-

In today's competitive IT market, leading organizations continue to evolve their IT infrastructure, applications and hardware to reduce costs and remain competitive.

IBM PureData System for Analytics, powered by Netezza technology transforms the data warehouse and analytics landscape with a platform built to deliver extreme, industry-leading price-performance with appliance simplicity. It is a new frontier in advanced analytics, with the ability to carry out monumental processing challenges with blazing speed, without barriers or compromises.

With the help of IBM Information Management Software Services, clients worldwide have successfully migrated their data warehouse solution for business success.

The Teradata to PureData System for Analytics Migration offering has been put together specifically for clients wanting to migrate to PureData System for Analytics in the most optimized way.

Overview

IBM will help you achieve your migration to your PureData System for Analytics data warehouse while taking advantage of the leading high performance appliance platform and mitigating the risks historically associated with the migration of a data warehouse.

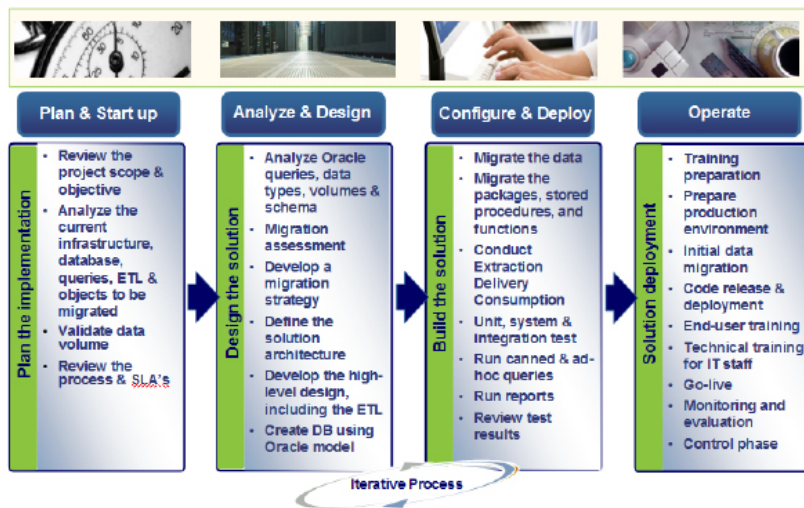

With the use of standard practices, data warehouse methodology and accelerators, IBM will speed up the conversion process, minimize downtime and deliver an optimized solution.

This comprehensive offering manages all of the critical components from the Teradata environment including but not limited to Teradata database, scripts and database objects.

Our migration approach

Our certified professionals use proven, automated toolsets to help you with your migration.

Through deep product and domain expertise, IBM will provide the technical leadership and expertise to ensure that your IBM PureData System for Analytics appliance is designed and implemented to seamlessly fit your environment.

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Analytics Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met.

Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Analytics Services team will produce results quickly, and will help to put your project on the road to success.
