

IBM Performance 2011

In-Memory & Real-Time –
Hype vs. Reality:
Tailored IBM Business Analytics
for SAP Customers

Frank Sattler
ERP Market Strategist
IBM Germany

Unprecedented Data Growth...

> 4.6 Billion
Mobile Phones, Smart Phones,
& Tablet Computers

1.3 Billion RFID Tags 2005;
> 30 Billion RFID Tags 2011

Twitter processes
> 7 Terabytes
daily

Capital market data:
>2.000% increase
since 2003

Facebook grows to
> 580 Millionen
users in 2011

...And Asks for New Views:

Big Data*

...concerns

- Companies of all legal forms, sizes, industries
- NPOs
- Public Sector

...is

- not a question about the „if“, only about „when“ and „how“
- Enables new business models
- Basis for competitive edge

...will be

- play an important role for most companies
- and broadens the scope for...
Business Analytics

* Management of huge data quantities & purpose driven use in companies

Use Mass Data Efficiently...

Performance

- High performance
→ *In-Memory?*
- Replication 24x7

Relevance

- Store & combine external & internal data
- Specify, process and provide relevant data

Access & Use

- Line of Business specific data
- When it is required
→ *Real-Time?*

**It's not just about time...
It's also about relevance.**

Focus: Performance & Real-Time

Examples for performance optimization:

In-Memory Appliance

- Columnar database technology
- Data storage in RAM
- Cheaper RAM
- 64bit architecture with up to 2 TB of addressable RAM
- Caching of complete databases
- Requires disaster recovery & back-up

Real-Time Analytics

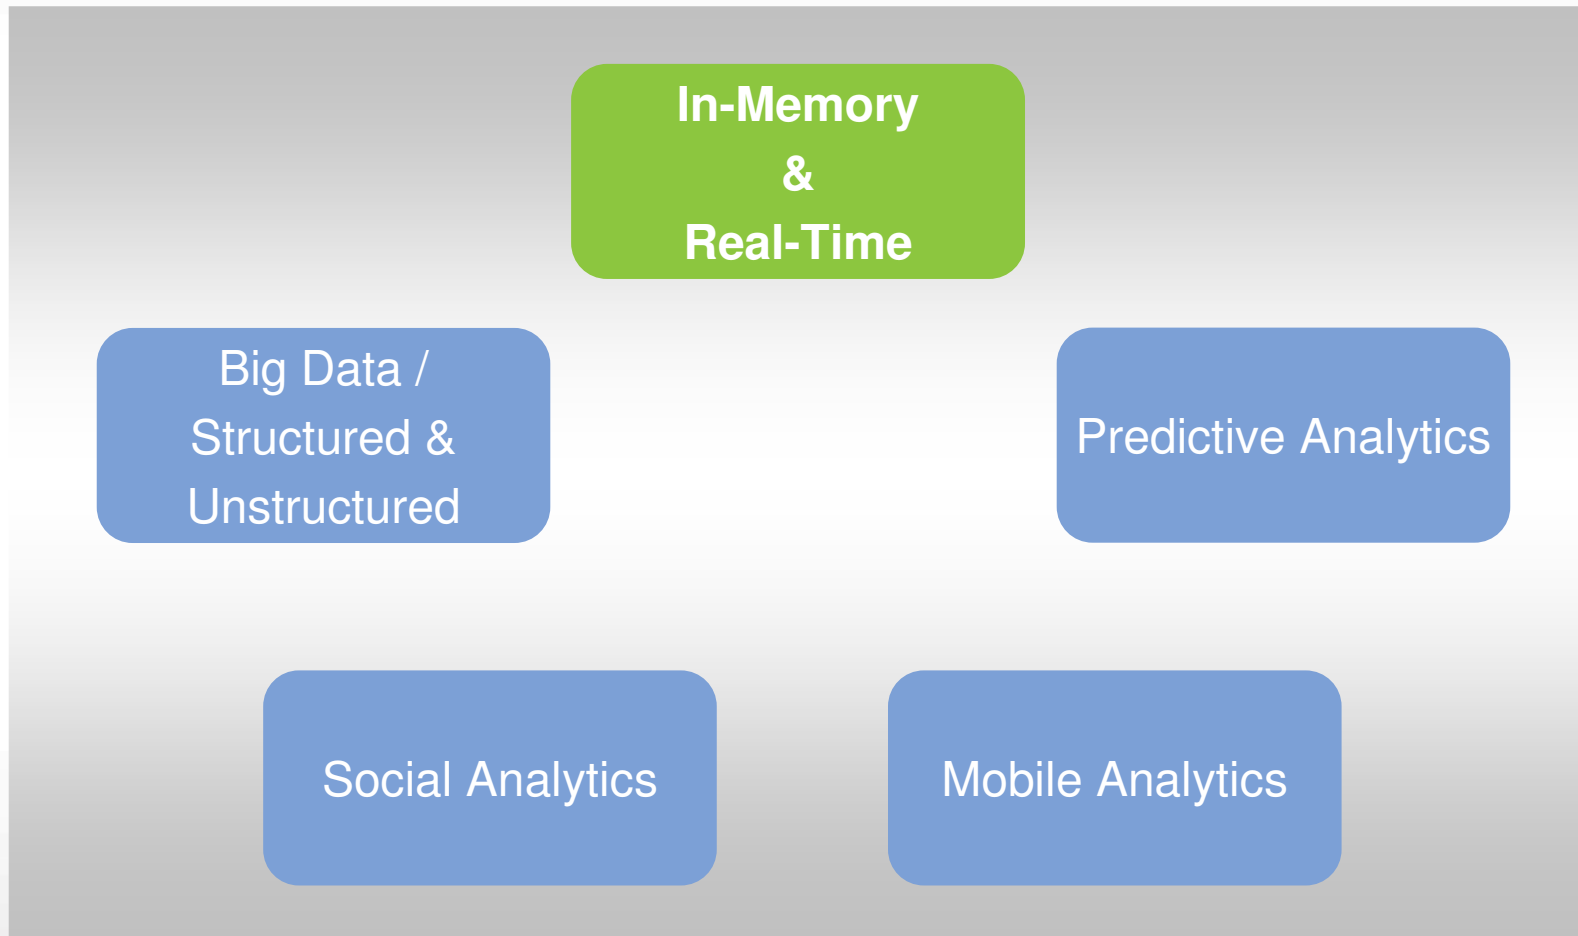

- Analysis in real-time instead of hours or days
- Use of all necessary internal & external data sources
- Flexible, dynamic analysis
- Based upon continuous data replication (24x7)

or

Customer Specific

- Tailored to the need of the various Lines of Business
- Analysis of your existing hardware & software
- Customer specific optimization

And...Business Analytics?

Lines Of Business: In Memory & Real-Time as Answer to All Business Needs?

- How fresh is the data?
 - Real-, Near-, Right-Time
 - Daily, weekly, monthly
- Other requirements?
 - Simulation, predictive analytics
 - Planning
- Access?
 - Mobile
 - Online, Offline

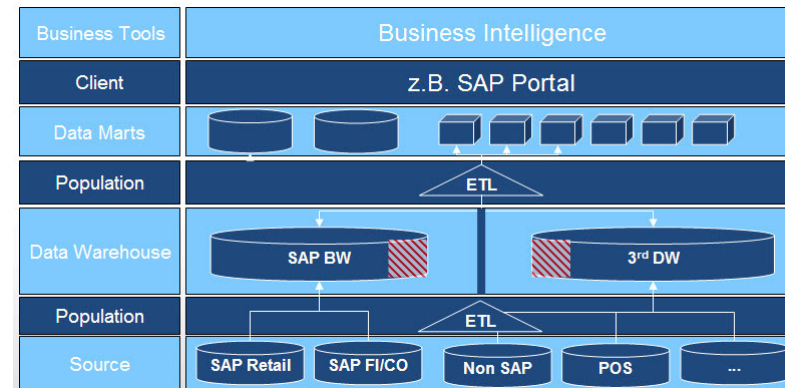

Relevance for SAP Customers

Conventional Systems

- Traditional instruments (ETL, BI, Business Warehouses) reaching their limits
- Lengthy batch-runs at night
- High load for transactional system
- Real-Time applications not always deployed as required by the business

...Optimize SAP Systems

...SAP Systems: Complement & Substitute

- Business Analytics Strategy
- Integration
- Cost / Benefit

Define the right mix - Simplicity and Flexibility

IBM Big Data Platform

Custom Solution

Optimization of Existing SAP Systems

Customer Specific

IT

- Optimization or replacement of SAP BW
- Alternative ETL scenarios, data quality (e.g. IBM InfoSphere)
- Replication of data-marts (instead of entire databases) for real-time scenarios

Lines of Business

- Holistic corporate business analytics strategy
- “Right-Time”: provision of data when it is really needed
- Drive application adaption by the business user

Thank You
