Componentes de la solución

- ▶ AVAYA ACE (Agile Communications Environment) es un sistema que consta de los siguientes elementos:
 1. Un entorno basado en IBM WebSphere Application Server (WAS)
 2. Adaptadores de comunicaciones (para hablar con los servidores de telefonía, video, UC, etc...), típicamente en protocolo SIP (Session Initiation Protocol)
 3. Implementación de API Web Services de Parlay-X (ETSI y 3GPP) para ofrecer a las aplicaciones.
 4. Conjunto de aplicaciones desarrolladas por AVAYA
 5. Toolkit de desarrollo para programadores que permite capacitar a nivel de comunicaciones cualquier aplicación

ABOUT AVAYA AGILE COMMUNICATION ENVIRONMENT™

Avaya Agile Communication Environment™ (ACE) is an open software platform for building multi-vendor Communications Enabled Business Systems (CEBS) and Unified Communications (UC) applications. Avaya ACE not only provides interfaces for developing custom applications, but also a set of packaged ACE Applications that offer out of the box integration with common business applications, such as Microsoft Outlook, Internet Explorer, IBM® Lotus® Notes, Sametime® and Microsoft Office Communications Server 2007. Avaya ACE enables business application developers to invoke multi-vendor communication functions from their own business applications without having to deal with the complexities of the underlying network infrastructure. Developers no longer need an in-depth knowledge of communications protocols to add communications capabilities to their applications.

Avaya ACE provides a set of high level Web service interfaces for extending multi-vendor communication system control to a customer's business applications, and lower level Foundation Toolkit interfaces for creating sequenced and endpoint applications that interact with Avaya Aura® Session Manager.

AVAYA

IBM® Business Process Manager

- ▶ **Plataforma líder en el mercado BPM** diseñada para procesos que cambian con frecuencia y con alta interacción con usuarios.
- ▶ GUI que permite modelar y optimizar de manera gráfica y sencilla los flujos de procesos de negocio.

Avaya ACE™ Valor añadido

- ▶ Drag&drop de las comunicaciones en tiempo real en los flujos
- ▶ Llamadas salientes activadas en etapas de procesos clave.
- ▶ Contacto con los usuarios en el dispositivo preferido
- ▶ Tránsito a llamada en caso de no respuesta

Cumulative Benefits

- ▶ **Elimina latencia** de los “workflows” mediante comunicaciones inmediatas.
- ▶ **Confirmación** vía enrutamiento de llamadas que garantiza respuestas antes de avanzar a la siguiente fase del proceso

¡Integración de procesos en tiempo real en menos de 1 día!
