

Disciplinas esenciales para una estrategia efectiva DevOps

Enrique Zárraga

Enrique.z@es.ibm.com

IBM Rational Sales Specialist

Agenda

- Software Innovation and Market Changes
- Software Delivery Challenges
- DevOps
 - Plan and Measure
 - Develop and Test
 - Release and Deploy
 - Monitor and Optimize
- The Business Impact of DevOps

Business innovation is increasingly being delivered via software

Rapid pace of change and the digitization of business drives the need for agility

Software drives
almost **80%**
of the automotive industry's
functional innovation

An F-35 contains
5.6 million
lines of code

Technology is the
#1 force impacting
business today

Robotic surgical systems have the
computational capacity
of **7 laptops**

By the year 2020 in the U.S.,
90% of financial
transactions will be
cashless

Customer experience
increasingly drives
business priorities

Market shifts are fundamentally changing the way businesses approach software innovation

Macro Business Environment

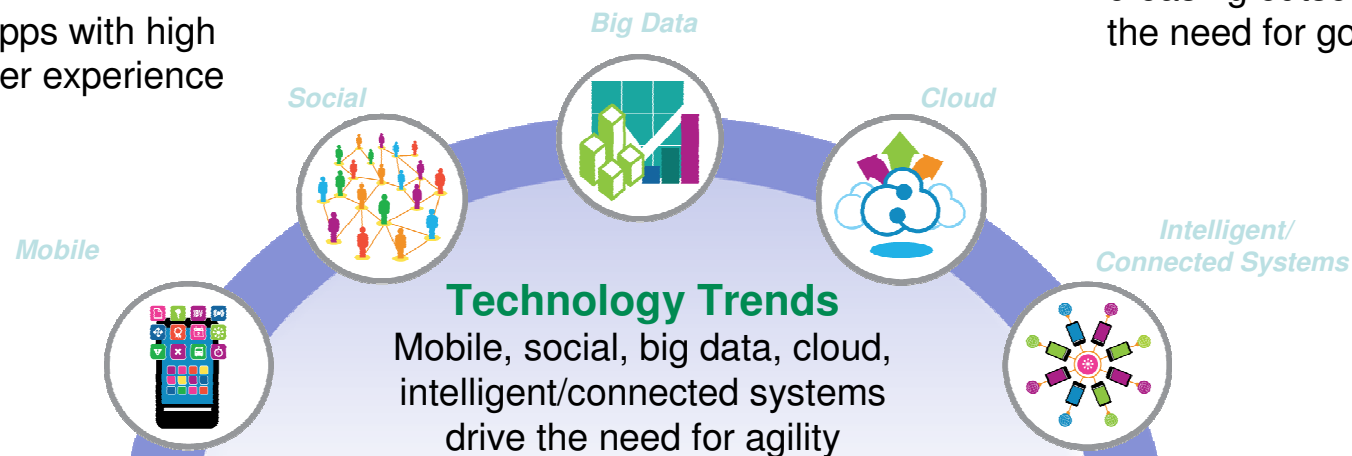

Increasing regulatory environments drive the need to reduce risk

Empowered Users

Consumerization of IT drives the need for apps with high quality customer experience

Multi-sourcing

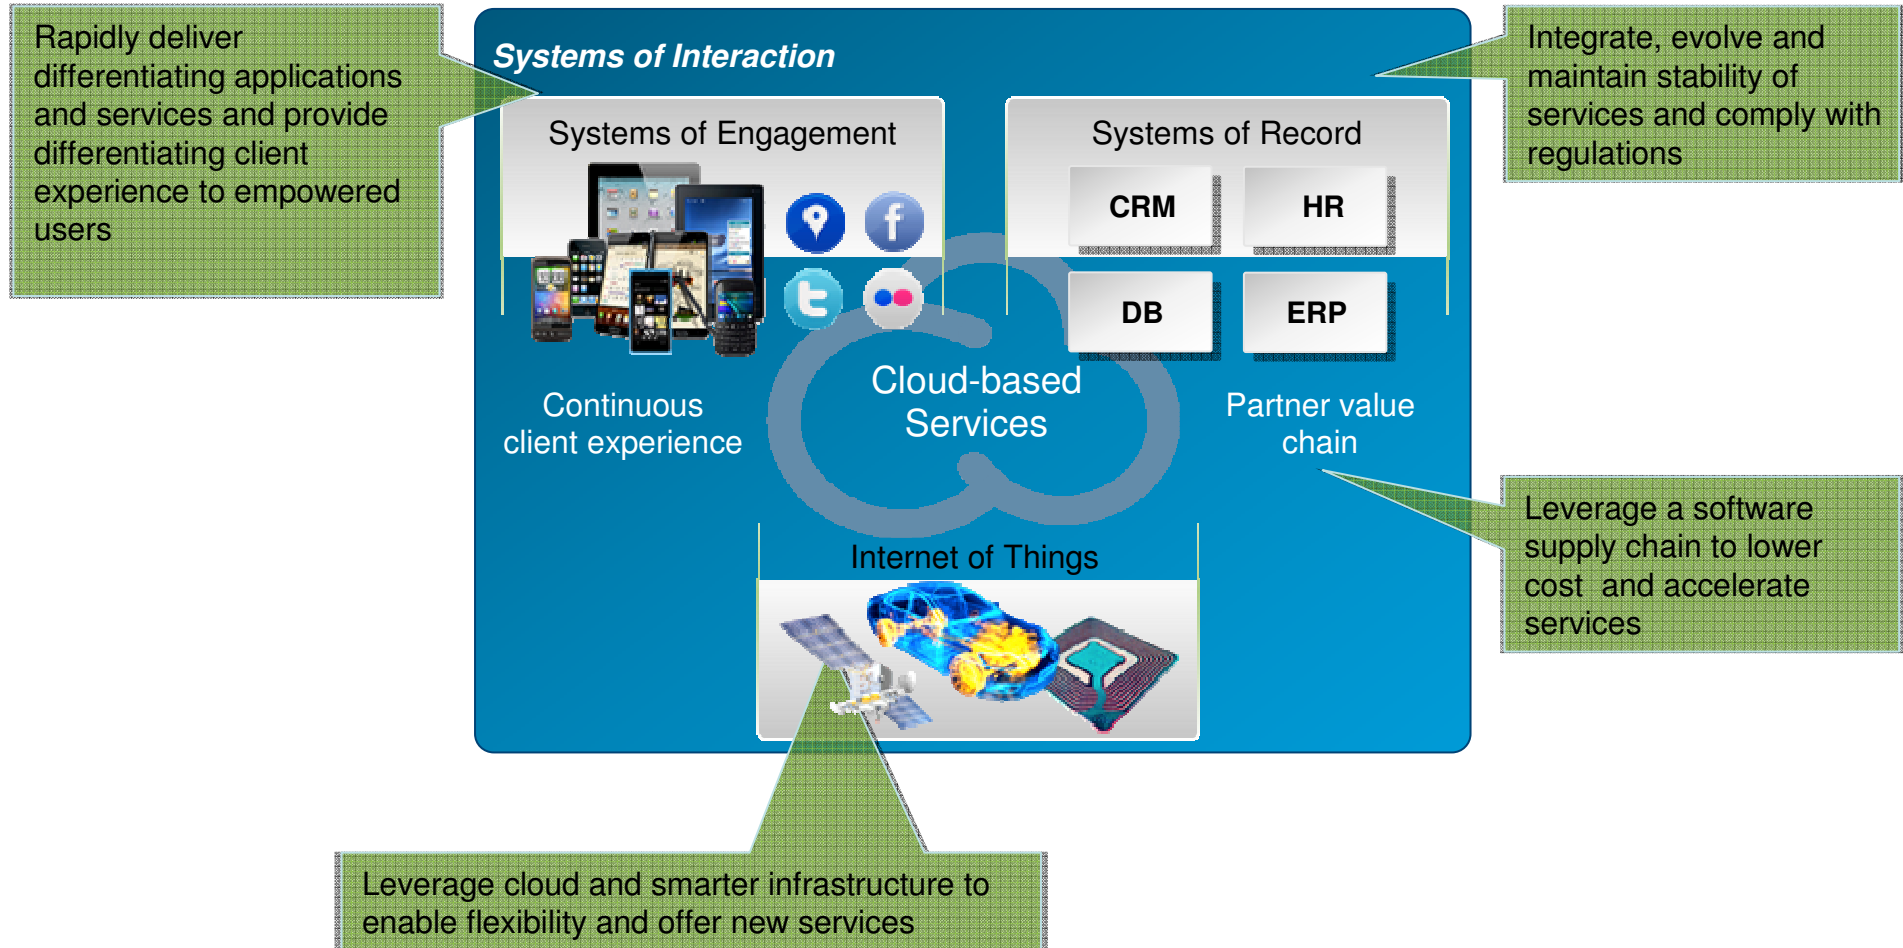

Increasing outsourcing drive the need for governance

Clients are trying to rapidly innovate and become agile with systems of engagement

At the same time need to evolve their systems of records and manage regulatory compliance, reduce costs by outsourcing and provide world class customer experience

Market Shifts create new demands for software driven innovation

Significant challenges in meeting new demands

Line-of-business

Takes too long to introduce or make changes to apps and services

Operations

Rapid app releases impacts system stability and compliance

>70%

of resources devoted to maintaining existing systems and products

>45%

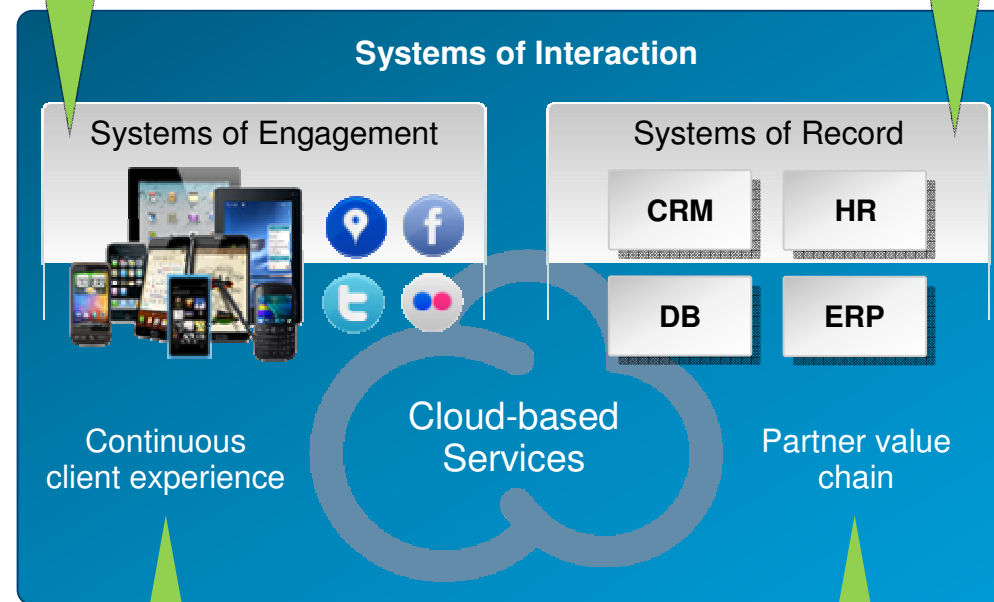

of customers experience production delays

4-6 weeks

to deliver application changes to customers

>50%

of outsourced projects fail to meet objectives

Development/Test

Speed mismatch between faster moving front office and slower moving back office systems, delaying time to get feedback

Suppliers

Delivery in the context of agile

Only a few enterprises, who are addressing these challenges are finding success

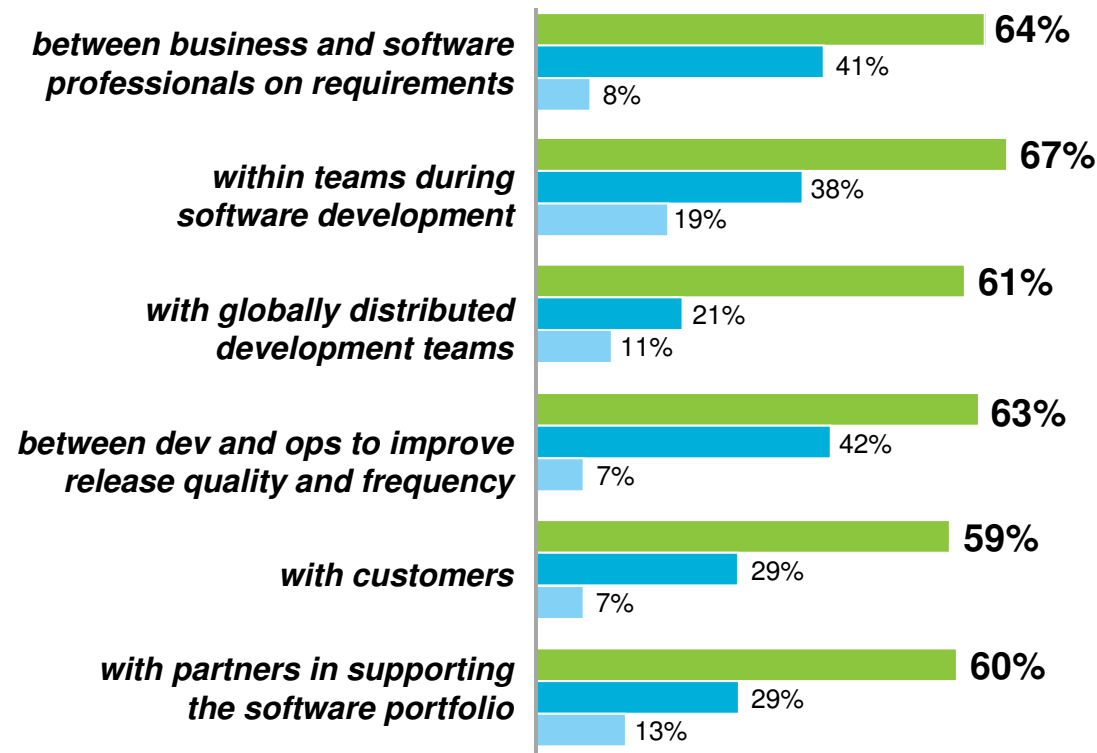

But only...

Organizations considered advanced in software delivery strongly leverage **collaboration** across an *expanded lifecycle*

Software delivery collaboration...

Advanced Organizations

Capabilities Consistently effective

Practices Advanced maturity

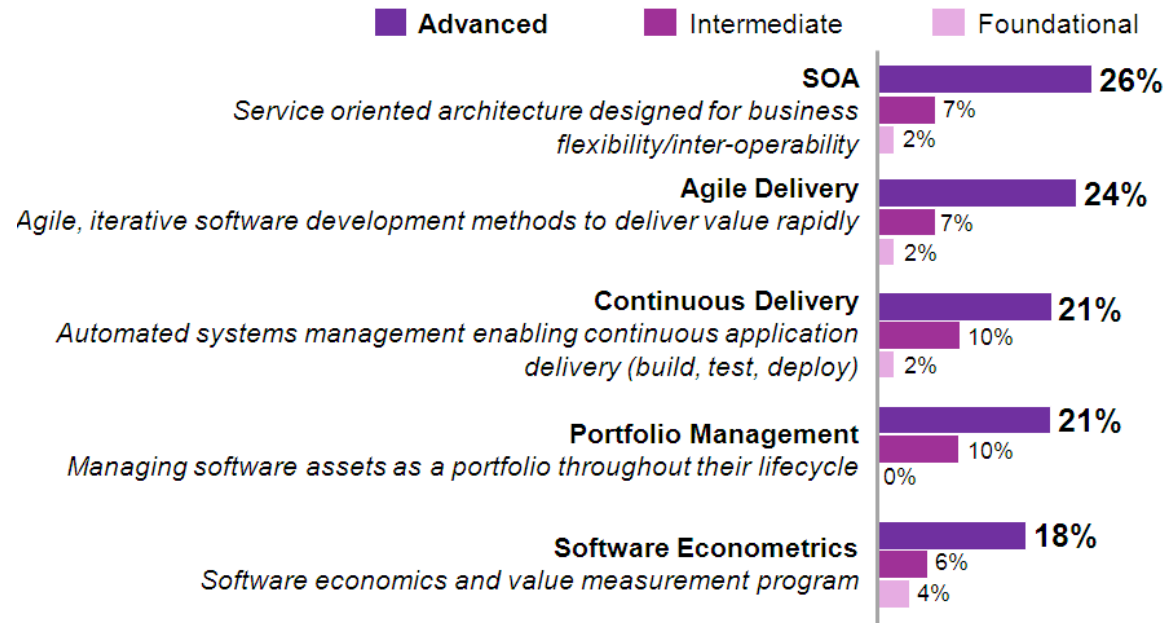

Results Consistently effective, all goals are met

■ Intermediate Organizations

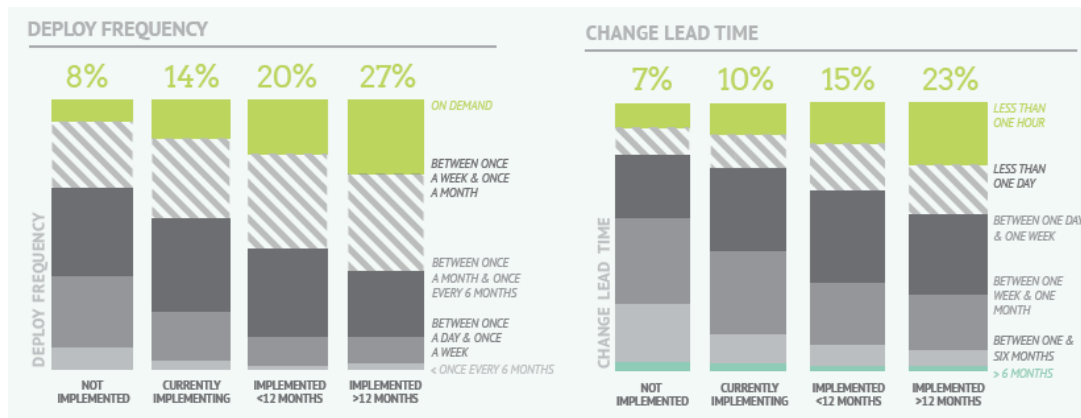

■ Foundational Organizations

A new approach has emerged: DevOps

Enterprise capability for **continuous software delivery** that enables enterprises to seize market opportunities and reduce time to customer feedback

1. Get ideas into production fast
2. Get people to use it
3. Get feedback

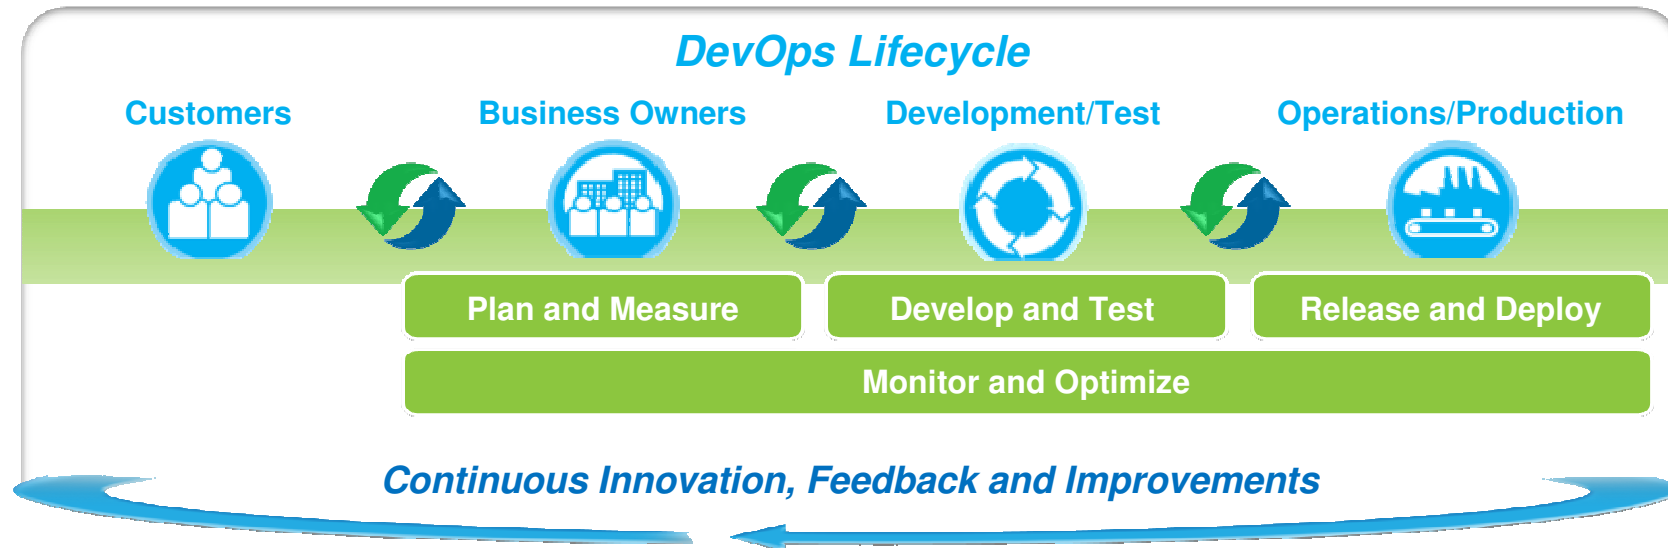

Applying Lean Principles to Software Innovation and Delivery to seize market opportunity:

- Eliminate any activity that is not necessary for learning what customers want.
- Eliminate wait times and delays caused by manual processes and reliance on tribal knowledge
- Enable business users, developers, testers, and operations to focus on creative activities

DevOps Defined

DevOps - Enterprise capability for continuous service delivery that enables clients to seize market opportunities and reduce time to customer feedback.

Accelerate Software Delivery

Expanding collaboration to include customers, LOB and others to eliminate organization silos

Balance speed, cost, quality and risk

Automating manual processes across delivery lifecycle to eliminate waste/delays and compliance tracking

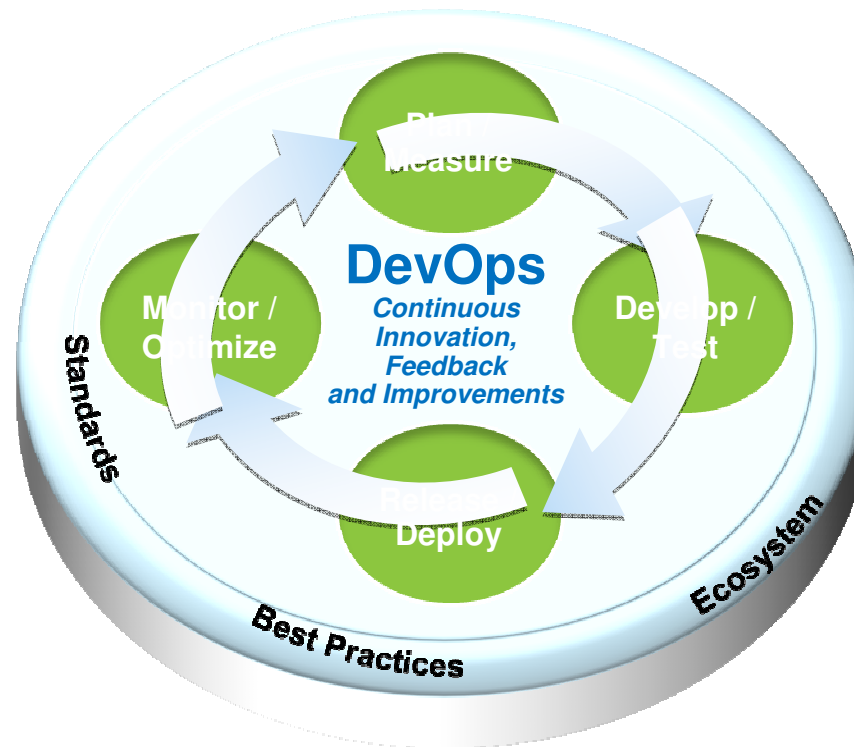

Reduce time to customer feedback

Enabling a customer feedback loop for continuous improvement

DevOps: Starting points and adoption paths

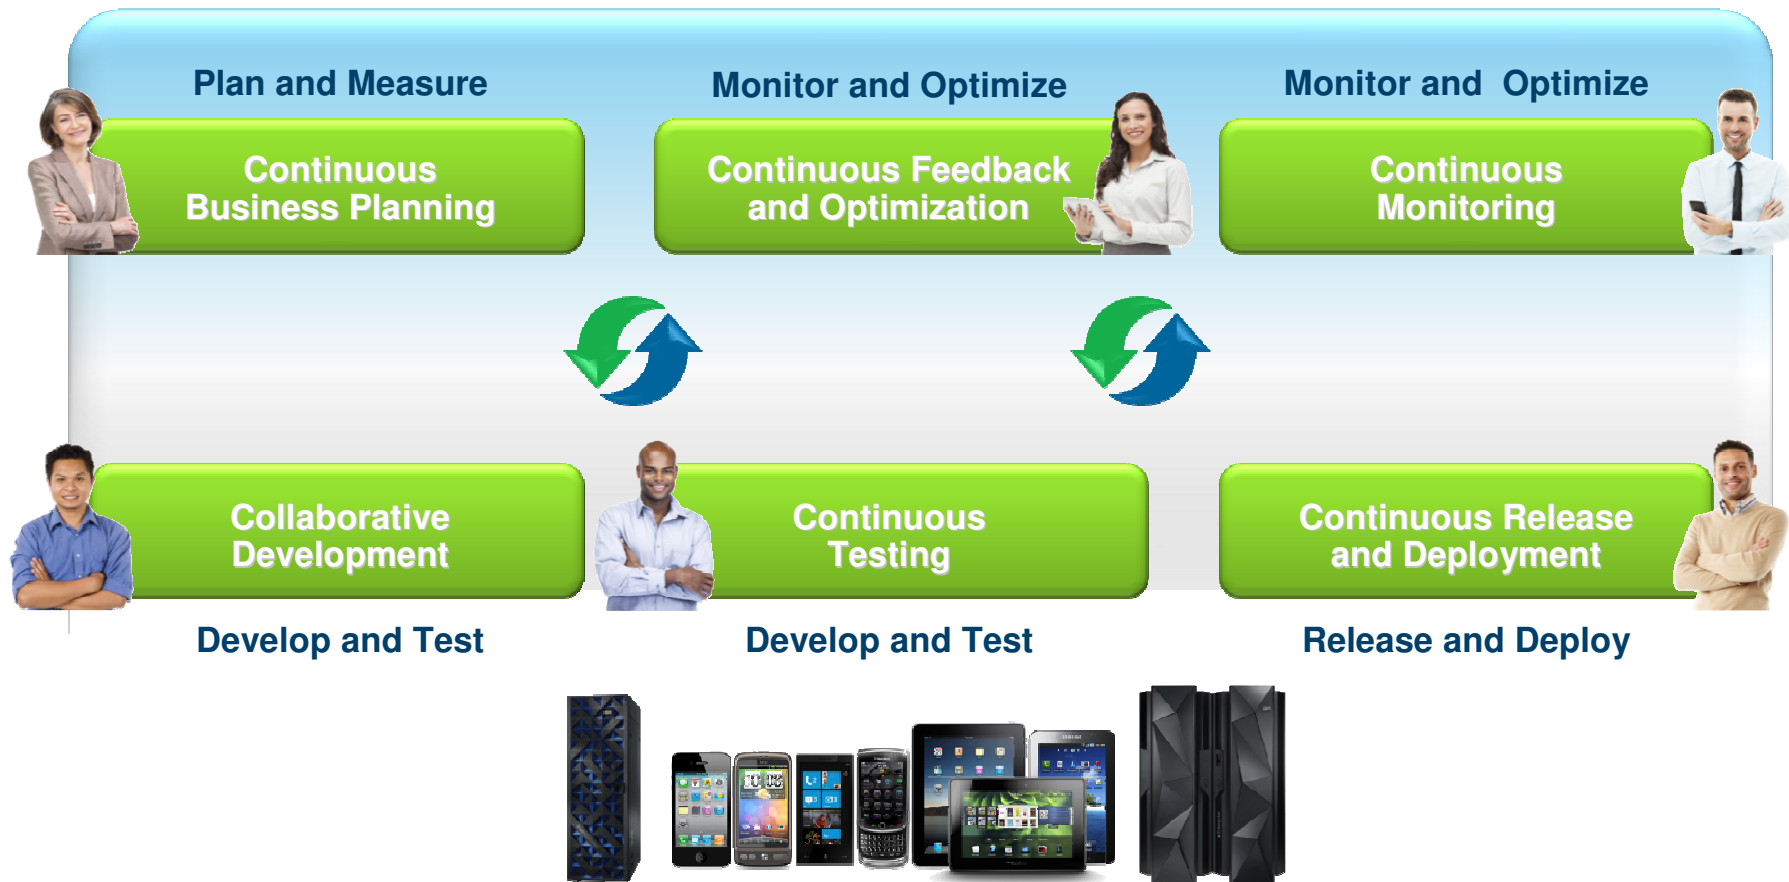

-  **Angela**
Business User
-  **Rick**
PMO/Manager
-  **Dave**
Business Developer / Data Analyst
-  **Jane**
Domain Specialized Developer, Tester
-  **Bob**
Backend Service Developer
-  **Fred**
Platform Operations
-  **Andrew**
Infrastructure Operations

"Continuous delivery results in a closer business-IT relationship and generates more value by increasing the velocity of the feedback loop between customers and companies that serve them" - Forrester

Improve client experience - By speeding the customer feedback loop
Accelerate software delivery - By enabling collaboration across software supply chain
Balance speed, cost, quality & risk- By eliminating waste & automating manual processes

Capabilities to enable a DevOps approach

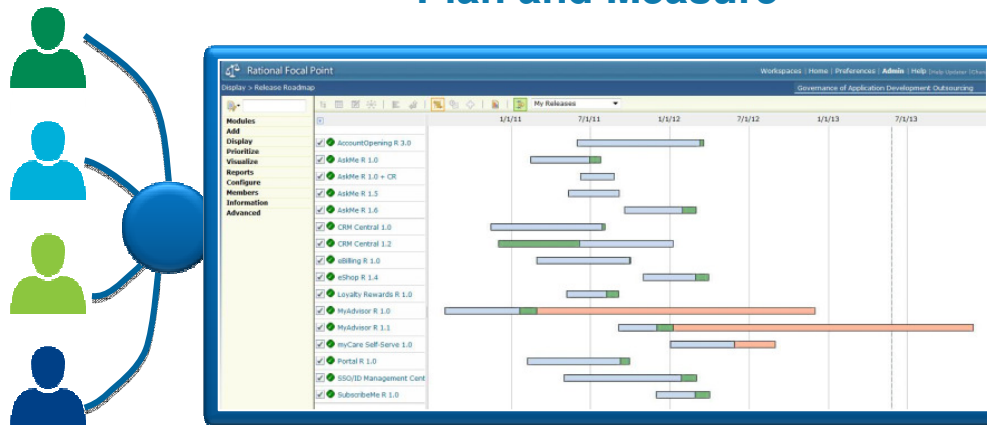

Continuous Business Planning

Plan and Measure

Plan and Measure

Requirements,
priorities & status

Develop
and Test

Release
and Deploy

Define scope
& view status

Continuous Business Planning

Plan and Measure

Bring business strategy, customer feedback into development lifecycle

What's new

- End-to-end business release planning
- Improved business and IT collaboration
- Early validation of business requirements

- IBM Rational Governance of Application Development Outsourcing Solution
- IBM Rational Focal Point
- IBM Rational Requirements Composer

Starting Point: Plan and Measure

Do the right things right

- Attack the high value and high risk items first
- Predict and quantify the outcomes and resources
- Measure honestly with distributions of outcomes
- Learn what customers really want and steer with agility

“We’ve achieved a 1600% increase in delivery velocity, in 7 months, using a DevOps approach.”

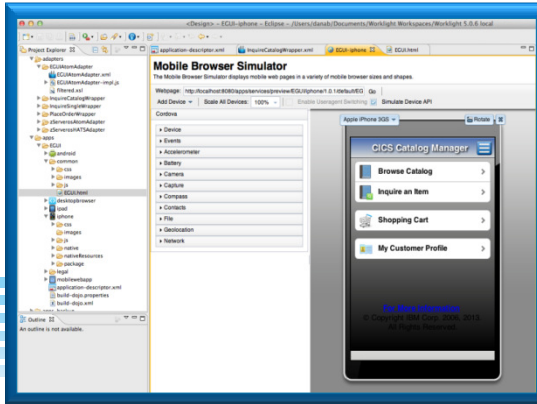

John Kosco
Director of IT Operations

Collaborative Development

Develop and Test

Continuous Delivery
Open Lifecycle and Service Management Integration Platform
Jazz

Bridge Mainframe and Mobile Skills

Link Systems of Record to Systems of Engagement

Collaborative Development

Develop
and Test

Single, integrated platform for comprehensive development needs

What's new

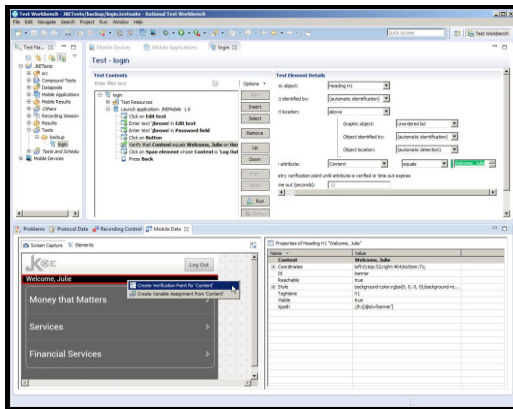

- CLM delivered continuously
- Lifecycle integration adapters
- Best-in-class IDE's
- Enhanced COBOL compiler

- IBM Rational solution for Collaborative Lifecycle Management
- IBM Rational Lifecycle Integration Adapters
 - CA Clarity and direct Rational Requirements Composer to HPQC synchronizer
- IBM Rational Developer Family including Worklight Studio
- IBM Enterprise COBOL for z/OS

Continuous Testing

Develop and Test

Comprehensive test automation solution

Multiplatform Application Testing

Mobile

Application Server

Mainframe Test Environment

Multichannel, multi-tiered test execution

Mainframe Applications

Databases

SOA / REST

Third-party Services

Virtualized services remove test bottlenecks

Continuous Testing

Develop
and Test

Deliver software quality at the speed your business demands

What's new

- Accelerate multi-channel testing
- Integrate mobile app testing earlier
- Enhanced integration for web app testing
- Expanded develop and test environment for System z

- 
- IBM Rational Test Workbench
 - IBM Rational Test Virtualization Server
 - IBM Rational Performance Test Server
 - IBM Rational Quality Manager
 - IBM Rational Development and Test Environment for System z

Continuous Release and Deployment

Release and Deploy

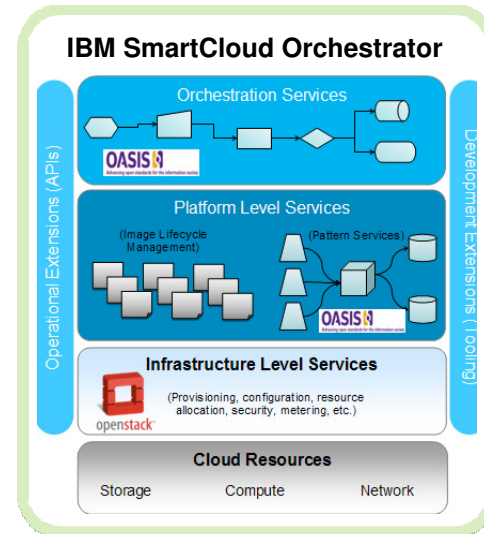

| Task | Role | Target | Status | Completed By | Actions |
|----------------------|-------------------|--------|----------|-------------------------------|---------|
| Environment Approval | Environment Owner | UAT | Complete | admin on 05/20/2013, 05:27 PM | |

| Step | Progress | Start Time |
|--------------------------|--------------|-------------------|
| Rollback DB | 0 / 0 | 5:27:52 PM |
| Deploy APP | 0 / 0 | 5:27:52 PM |
| Deploy WEB | 1 / 1 | 5:27:52 PM |
| Deploy DB | 1 / 1 | 5:27:52 PM |
| Rollback JKE-Banking.com | 1 / 1 | 5:27:52 PM |
| 1.1 | | 5:27:52 PM |
| Total Execution | 2 / 2 | 5:27:52 PM |

| Component | Version | Snapshot | Properties | Status | Compliance | Actions |
|-----------------|---------|----------------|-------------|--------|------------------|--------------|
| JKE-Banking-APP | 1.0 | April 2013.1.1 | Version 1.0 | Active | Compliance (0/0) | View Request |
| JKE-Banking-DB | 1.0 | April 2013.1.1 | Version 1.0 | Active | Compliance (0/0) | View Request |
| JKE-Banking-WEB | 1.0 | April 2013.1.1 | Version 1.0 | Active | Compliance (0/0) | View Request |

| Component | Version | Snapshot | Properties | Status | Compliance | Actions |

| JKE-Banking-WEB | 1.0 | Baseline | Version 1.0 | Active | Compliance (0/0) | View Request |

Continuous Release and Deployment

Release
and Deploy

Accelerate delivery of mobile, cloud, big data and traditional applications with automation

What's new

- End-to-end automation for your entire application from development to production
- Self-service, visibility, traceability, and complete audit trails for deployments
- Integration with MobileFirst platform

- 
- IBM UrbanCode Deploy
 - IBM UrbanCode Release
 - IBM SmartCloud Orchestrator

IBM UrbanCode delivers DevOps

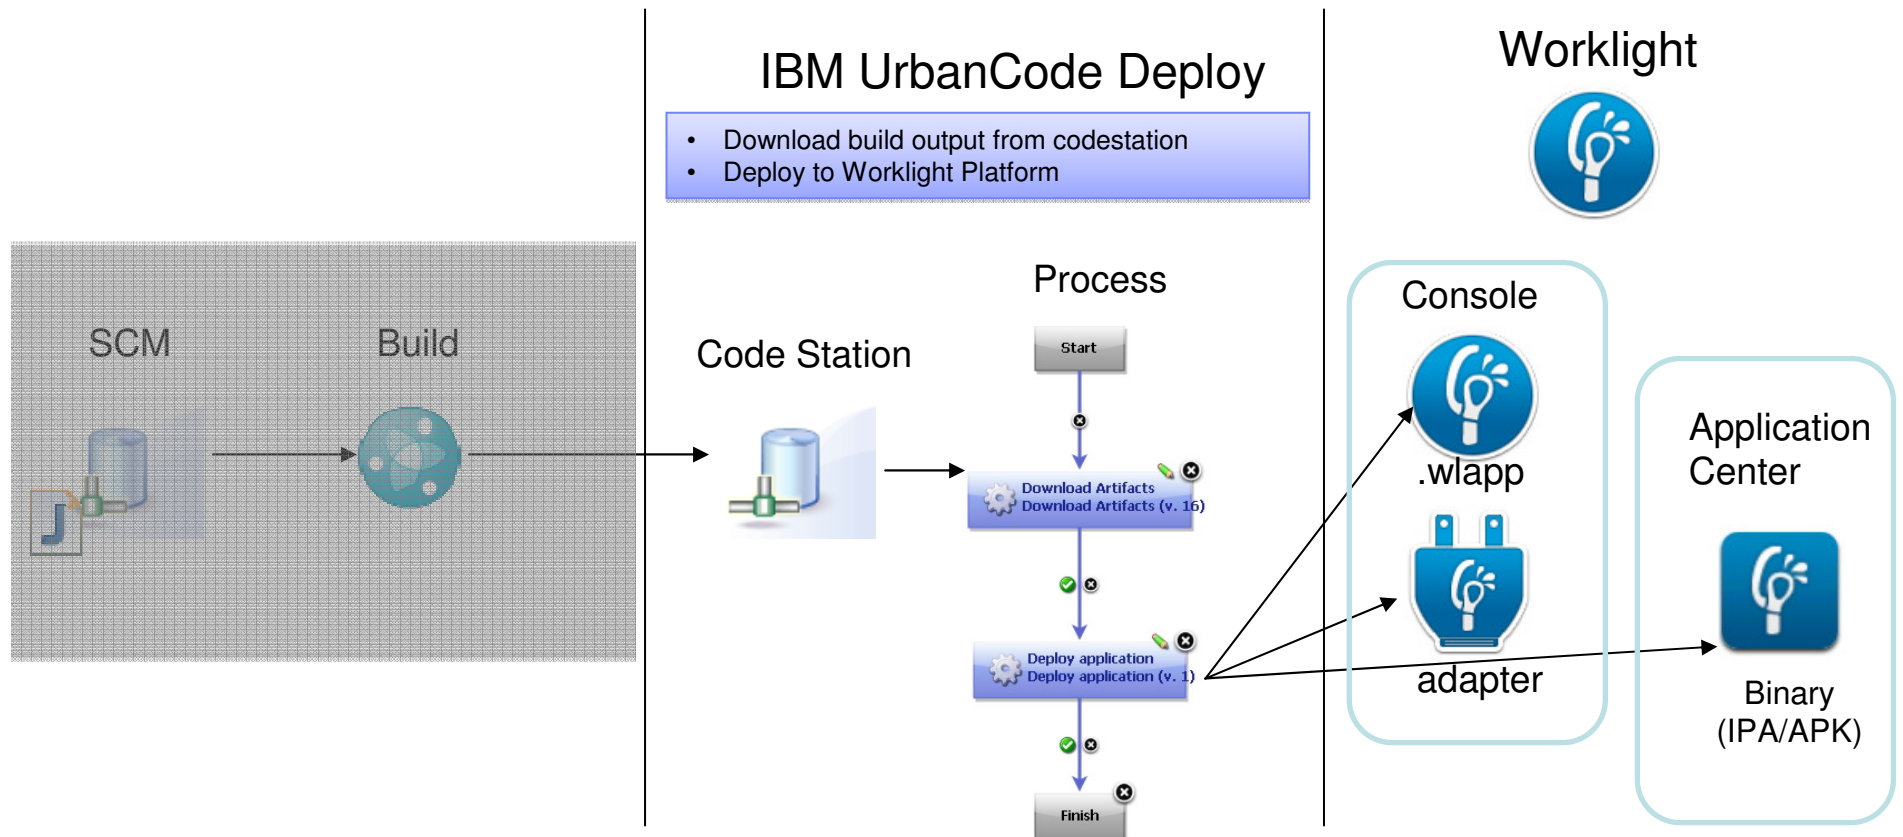

Enabling clients to more rapidly deliver mobile, cloud, big data analytics and traditional applications with complementary DevOps capabilities

New!

- **Drive down costs**
 - Reduce the amount of manual labor, resource wait-time, and rework
- **Speed time to market**
 - Increase frequency of software delivery
- **Reduce risk**
 - Deliver higher quality application releases with increased compliance

Automate deployment to IBM MobileFirst Platform (Worklight)

Automatically deploy Worklight applications as part of your deployment process

The plugin supports:

- ✓ deploying Worklight **adapter and application components** to the Worklight Server
- ✓ deploying Worklight **mobile application binaries** to the Worklight Application Center for distribution and management

Continuous Monitoring

Monitor and Optimize

Settings Application Overview

0 Apps in Critical Status

1 Apps in Warning Status

0 Apps in Unknown Status

0 Apps in Normal Status

SimpleTrade Resources Clients Transactions Events

Back SimpleTrade - Transaction Dashboard

Transaction Status Summary: 100% Critical: 0 Warning: 0 Normal: 2

Overall Volume: Bar chart showing volume over time (06:25 to 07:15).

Overall Response Time (seconds): Line chart showing response time over time (06:25 to 07:15).

Top 10 Transactions:

| Transaction | Status | Transaction Volume | Failed (%) | Slow (%) | Response Time (s) | Timestamp |
|--------------|---------|--------------------|------------|----------|-------------------|-----------|
| SimpleTrade | Warning | 1 | 0.00 | 100.00 | 120.006 | 07:15 |
| SimpleTrade2 | Good | 1 | 0.00 | 0.00 | 1.183 | 07:15 |

Back SimpleTrade - Resource Dashboard

Transaction Performance: Response time 60.594s, Requests 2, Percent failed, Percent slow, Transaction status 2, Client status 1.

HTTP: Web server status Running, Web server name TradeHS, Request rate/sec 0.033, Failed requests rate/min 0.000, Server failures rate/min 0.000, Failed login rate/min 0.000.

WAS: Server status Connected, Worst Avg response time(ms) No data available, JVM memory used(KB) 110,753, JVM CPU used(%), DB Conn pool used(%), Heap used(%), Worst request completion(%) No data available.

DB2: Instance status Active, DB lowest BP hit ratio(%) 99.67%, DB highest failed SQL stmts(%) 0.75%, DB highest table space(%), DB highest sort overflows(%), Sort heap used(%).

MQ: Queue manager status Running, Channel initiator status Running, Command server status Running, High depth queue count 0, DLO depth 0, XIMTD depth 0, Count of channels not running 0, Count of indoubt channels 0, Count of server connections 1, Count of WMQ events not reset 0, Critical MQ errors 0.

Continuous Monitoring

Monitor
and Optimize

Accelerate problem and product defect isolation and resolution

What's new

- Lightweight cloud application monitoring
- Easily embed monitoring during development
- Holistic application health dashboards

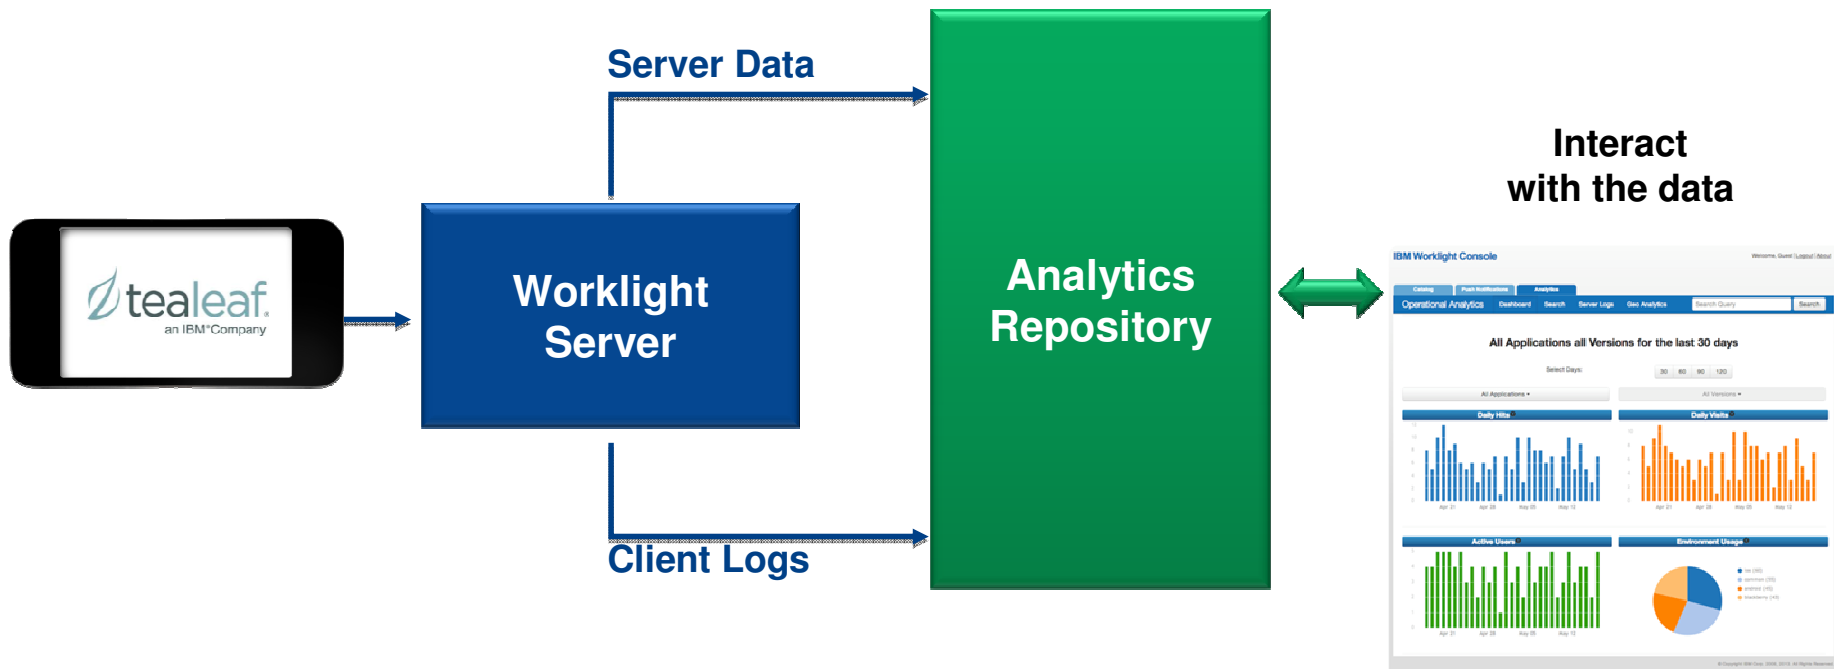

- IBM SmartCloud Application Performance Management
- IBM SmartCloud Control Desk
- IBM SmartCloud Monitoring – Application Insight

Continuous Feedback and Optimization

Monitor and Optimize

Collect, compress and stream important information

Continuous Feedback and Optimization

Monitor and Optimize

Analyzing the customer experience and their challenges

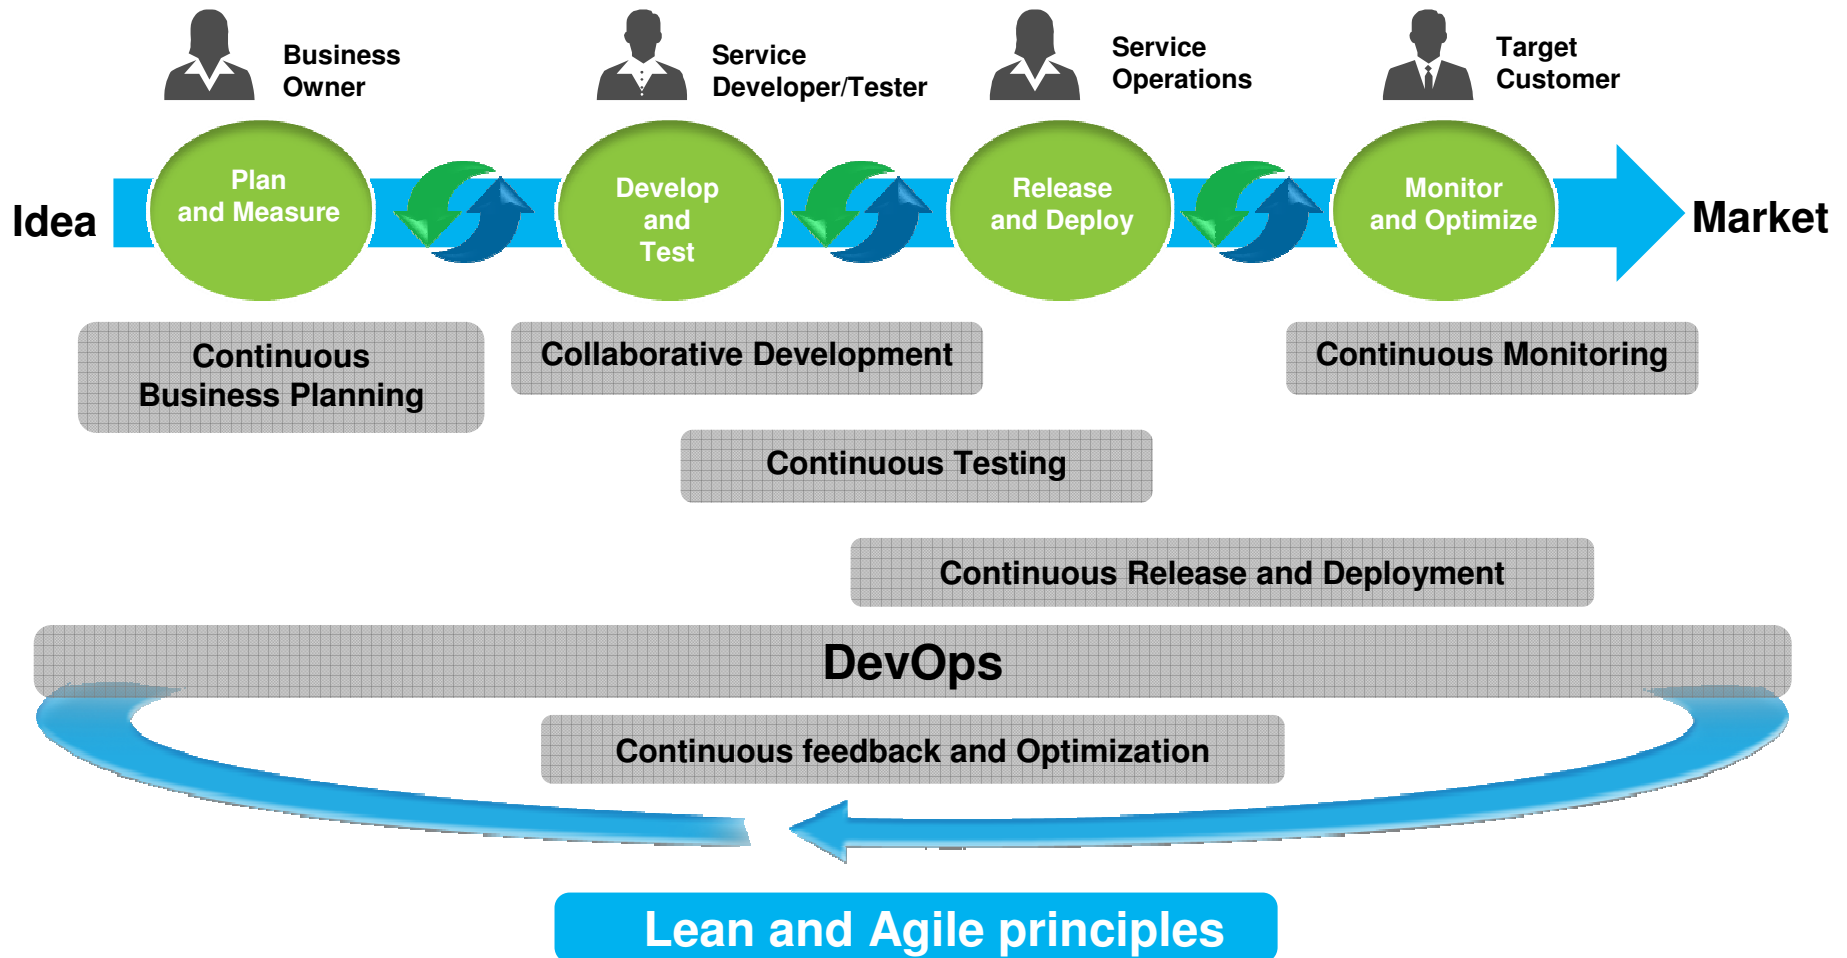

What's new

- Visibility into actual customer experience
- Quick diagnosis and resolution of issues
- Quantify business impact
- Real-time customer analytics

- 
- IBM Tealeaf – CX Mobile
 - IBM Digital Analytics – Marketing Center

DevOps takes a closed-loop approach to application delivery

Extending Lean and Agile practices across the entire software value chain

The IBM DevOps Approach

The Business Impact of DevOps – Closing Thoughts

- This is a **business approach**, driven by the market, enabled by technology (not a pure technology play)
- “**Continuous**” is IBM’s strategy (integration, test, deployment, optimization, etc.)
- **DevOps is a journey** – not a big bang
 - Recommended best practice is to build a roadmap and select entry points with short to mid-term ROI
- A successful DevOps program requires:
 - **Sponsorship** at an executive level measured by end to end delivery
 - **In combination with** from key stakeholders: LOB, Dev, Test and IT Operations
