

IBM PureSystems

Isabel Zárate, STG Growth Initiatives Manager, SPGI

AGENDA

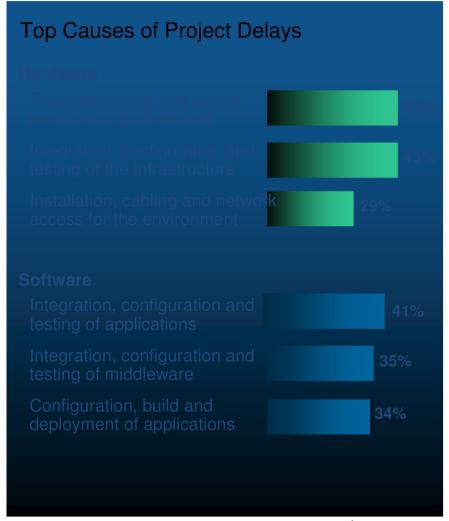

Smarter Comp	uting
12:00	Sistemas Integrados Expertos John Vitkus, Vicepresidente Worldwide de PureSystem, IBM STG
12:30	PureApplication System Highlights Manuel Ariño, Especialista Worldwide en Sistemas Integrados Expertos, IBM
13:00	PureApplication System Business Value Manuel Ariño, Especialista Worldwide en Sistemas Integrados Expertos, IBM
13:30	IBM Smarter Storage para Smarter Computing. Un nuevo enfoque al almacenamiento Javier Sánchez, Especialista en Soluciones de Almacenamiento, IBM
15:30	Soluciones de almacenamiento hyper-eficiente. Compresión y auto-optimización Javier Sánchez, Especialista en Soluciones de Almacenamiento, IBM
16:00	¿Qué hay de cierto en las promesas del mercado? Mitos y realidades del almacenamiento Julián Jiménez, Arquitecto de Soluciones de Almacenamiento, IBM
16:30	Tendencias futuras en tecnología de almacenamiento Julián Jiménez, Arquitecto de Soluciones de Almacenamiento, IBM

Clients struggle to overcome barriers of time, cost and risk

Typical IT Project Time and Budget			
Time (days)	Budget		
73 - 96	14% - 16%		
57 - 112	19% - 21%		
74 – 93	12%		
74 – 80	10% - 11%		
66 – 104	11% - 12%		
44 – 108	10%		
89 – 98	9% - 10%		
67 – 110	9 – 10%		
	Time (days) 73 - 96 57 - 112 74 - 93 74 - 80 66 - 104 44 - 108 89 - 98		

Announcing the first two members of the IBM PureSystems family

PureFlex

Infrastructure System:
Expert at sensing and anticipating resource needs to optimize your infrastructure

PureApplication

Platform System: Expert at optimally deploying and running applications for rapid time-to-value

Built-in expertise • Integration by design • Simplified experience

IBM PureSystems "patterns of expertise"

Patterns of Expertise: Proven best practices and expertise for complex tasks learned from decades of client and partner engagements that are captured, lab tested and optimized and then built into the system

Patterns deliver superior results:

- Agility: Faster time-to-value
- Efficiency: Reduced costs and resources
- Simplicity: Simpler skills requirements
- Control: Lower risk and errors

Through *unmatched expertise* in:

- System design
- Infrastructure management
- Application deployment
- Data management
- Datacenter management
- Application management

- High availability and scalability
- Security
- Storage optimization
- Networking
- Cloud

IBM PureSystems "patterns of expertise" Example: Web Application Deployment Pattern

Captures:

 IBM's decades of experience in helping clients design, build and deploy new business applications

What is it?

 Codified best practices for presetting configuration options by type of selected Web application (e.g., high availability, high security, etc.)

What do you do?

 Bring your data and application code, select the type of application you want and everything else is handled for you in the background

What do you NOT have to do?

- Understand the interdependencies and connections between your database, application server, management, security, and the rest of the middleware
- Manually engage in the real-time management of your infrastructure

Result: Speed deployment of Web applications by 20-30x!

IBM PureSystems extensible with "patterns of expertise"

Including built-in cloud capabilities

Expert integrated systems

Built-in with flexibility

Built for cloud

IBM PureFlex: an evolution in design, a revolution in experience Smarter computing that fundamentally changes the economics of IT

PureFlex

Built-in Expertise

Infrastructure patterns and self-optimizing technology for lower cost, based on the experience of managing tens of thousands of data centers

Integration by Design

A complete system that is cloud-ready, more secure and designed from the start to work together

Simplified Experience

Management integration and choice at every step, to make IT easier

Built-in Expertise

Infrastructure patterns and self-optimizing technology for lower cost, based on the experience of managing tens of thousands of data centers

Up to:

Smart data placement

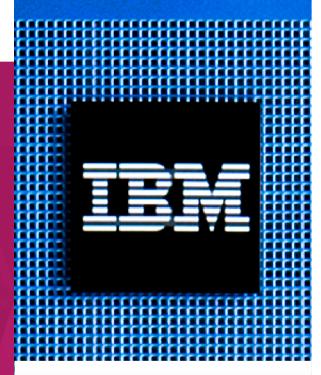

300% increased performance of critical applications

Thousands of virtual machines on single system

2X improvement in system utilization 70% fewer cores for reduced software licensing

Management integration

50% lower management costs2X improvement in fault diagnosis

Over \$2B in R&D and acquisitions over 3 years

Millions of development hours across 37 labs in 17 countries

Integration by Design

A complete system that is cloud-ready, more secure and designed from the start to work together

Up to:

Intelligent cloud technology 2X application density in same floor space 50% improvement in administrator productivity

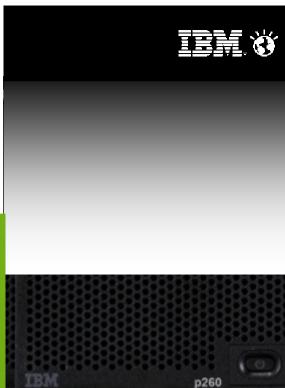

Security innovation

O setup time to achieve enterprise risk reduction with trusted protection built in from the hardware up

Scale-in systems networking

50% latency improvement for faster application performance

IBM-designed management across compute, storage, and networking – in a single system with upgradability to future technologies

© 2012 IBM Corporation

Simplified Experience

Management integration and choice at every step, to make IT easier

Up to:

Factory pre-configured and tested

70% faster setup time

Dynamic resource allocation

Days to minutes

for workload deployment time

Management across physical & virtual resources 75% lower systems costs over 3 years 98% time savings in storage provisioning

Management from a single pane of glass with open choice of environments and applications

What can this mean for clients? Reduced cost. Greater value.

Managed services provider can consolidate mixed environment

\$2.6M systems and OPEX savings (71%)

\$2.0M management savings (53%)

Bank can innovate in response to market conditions for competitive advantage

1 day or less to deploy new service and realize revenue faster (vs. weeks)

Manufacturer can optimize existing ERP environment

\$3.8M software licensing savings (78%)
9 months payback

Retailer can accelerate private cloud for regional store operations

~\$1 M management cost savings (56%)

\$2.8M lower total IT costs (54%)

Projected savings over 3 years

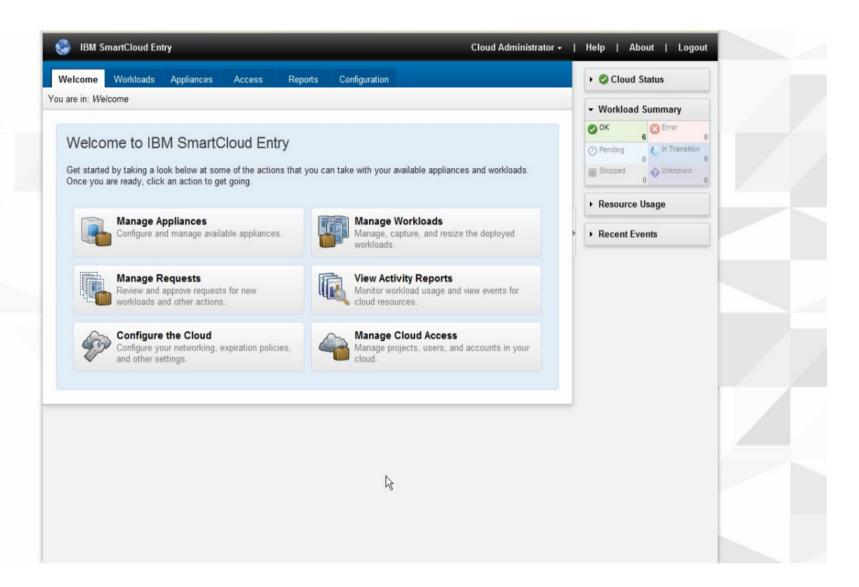

Expert integrated systems

Simplified Experience

Runs tens of thousands of applications, with over 100 optimized for PureSystems

IBM PureFlex System

Infrastructure Flex-ibility to meet a variety of client needs

A continuum of expert integrated systems that delivers value from the moment of acquisition

Express

Infrastructure for small and midsize businesses

Standard

Infrastructure for cloud deployments and server consolidation

Enterprise

Infrastructure for large-scale deployments; highly redundant for resilient operations

Why IBM?

- 100 years of experience delivering essential IT
- Market leading systems and software
- Services offer a strategic approach to leverage new PureSystems technology enabling faster ROI and minimal risk
- Global financing offered with flexible payment options
- Commitment to open standards
- Broad open ecosystem of 120k partners
