

IBM PureApplication System

A new Expert Integrated System

Manny Arino, Especialista Worldwide en
Sistemas Integrados Expertos, IBM

On a Smarter Planet, technology innovation redefines industries

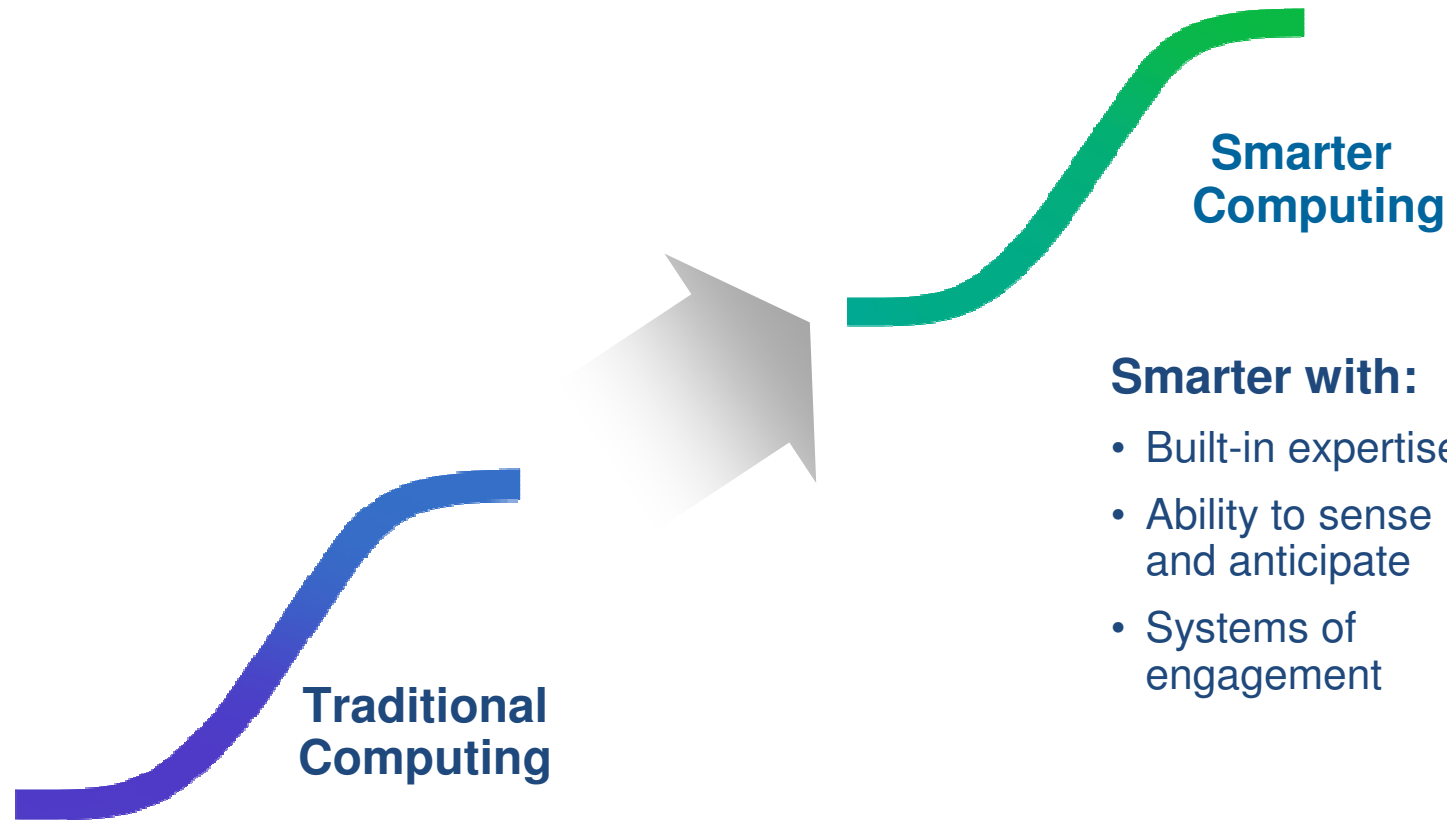

As Technology moves to the strategic center of business

The IT model must shift to Smarter Computing

Business innovation

Technology Innovation

IT must break through budget and resource barriers

Aligning IT and business goals

Business Goals

Grow top and bottom line by:

- Driving business innovation
- Make new markets
- Respond to competitive threats
- Enhance the customer experience

Typical Results:

- 34% of new IT projects (US) deploy late
- 55% experience application downtime for major infrastructure upgrades once deployed

IT Reality

Getting Up and Running

- 2-3 months to specify and procure
- 2-3 months to integrate, configure and deploy

Development Operations

- 3-6 months to go from development to production

Ongoing Effort

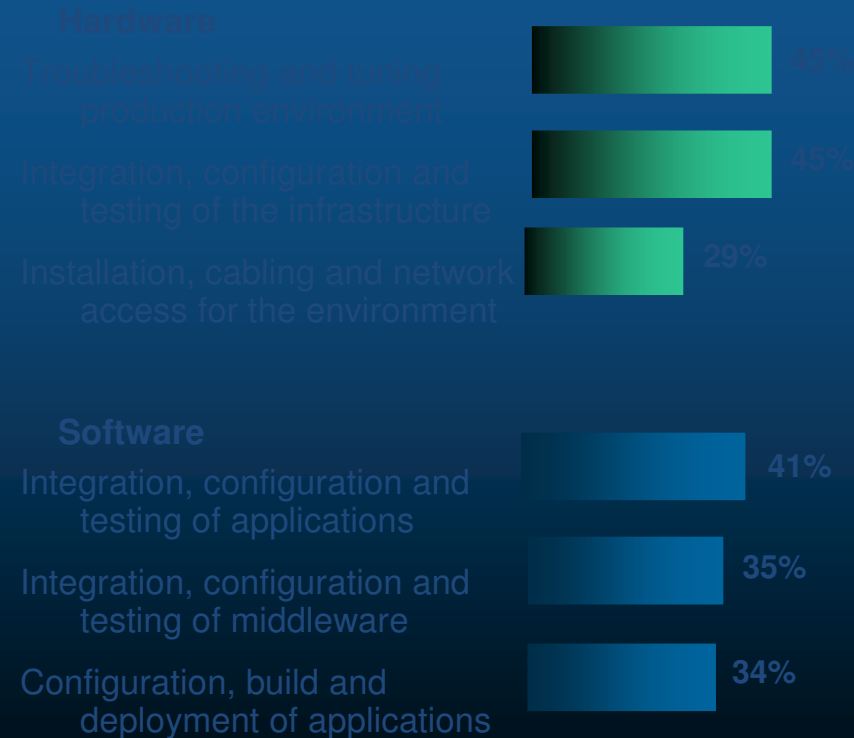

- 1-3 months to troubleshoot and tune
- Ongoing effort and downtime to maintain, scale and upgrade

Clients struggle to overcome barriers of time, cost and risk

Typical IT Project Time and Budget

Phase	Time (days)	Budget
Specify/design	73 - 96	14% - 16%
Procure	57 - 112	19% - 21%
Implement	74 - 93	12%
Configure/test	74 - 80	10% - 11%
Cluster & HA	66 - 104	11% - 12%
Backup	44 - 108	10%
Tune	89 - 98	9% - 10%
Management	67 - 110	9 - 10%

Top Causes of Project Delays

34% of new IT projects (US) *deploy late*

From a commissioned study conducted by Forrester Consulting on behalf of IBM

IBM Confidential to April 11, 2012

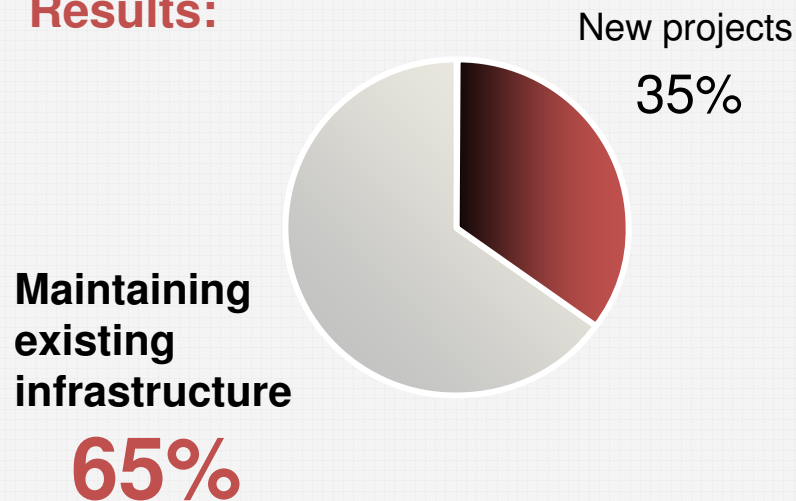

Only 1 in 5 can allocate more than half their IT budget to innovation

Least efficient data centers

Use of new technology:

- 43% first and fast technology adoption
- 1% move virtual machines to meet desired outcomes
- 21% use storage virtualization
- 3% use a storage service catalog (tiered storage)

Results:

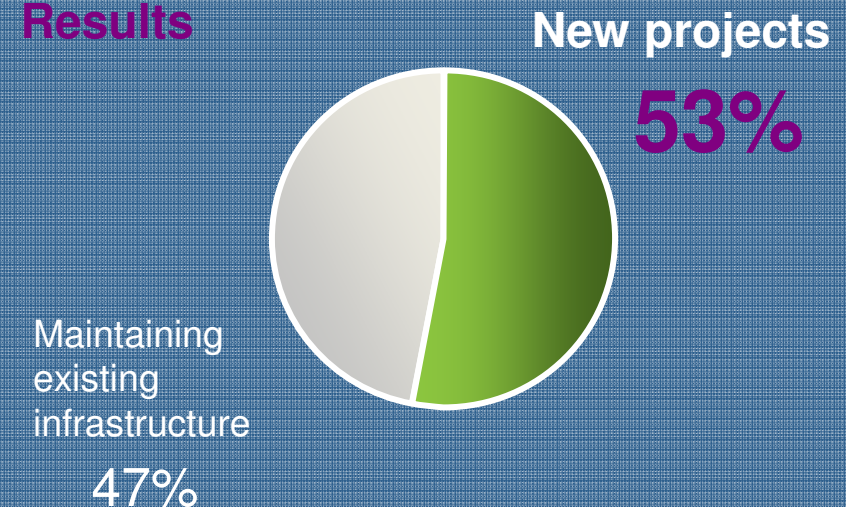

Most efficient data centers

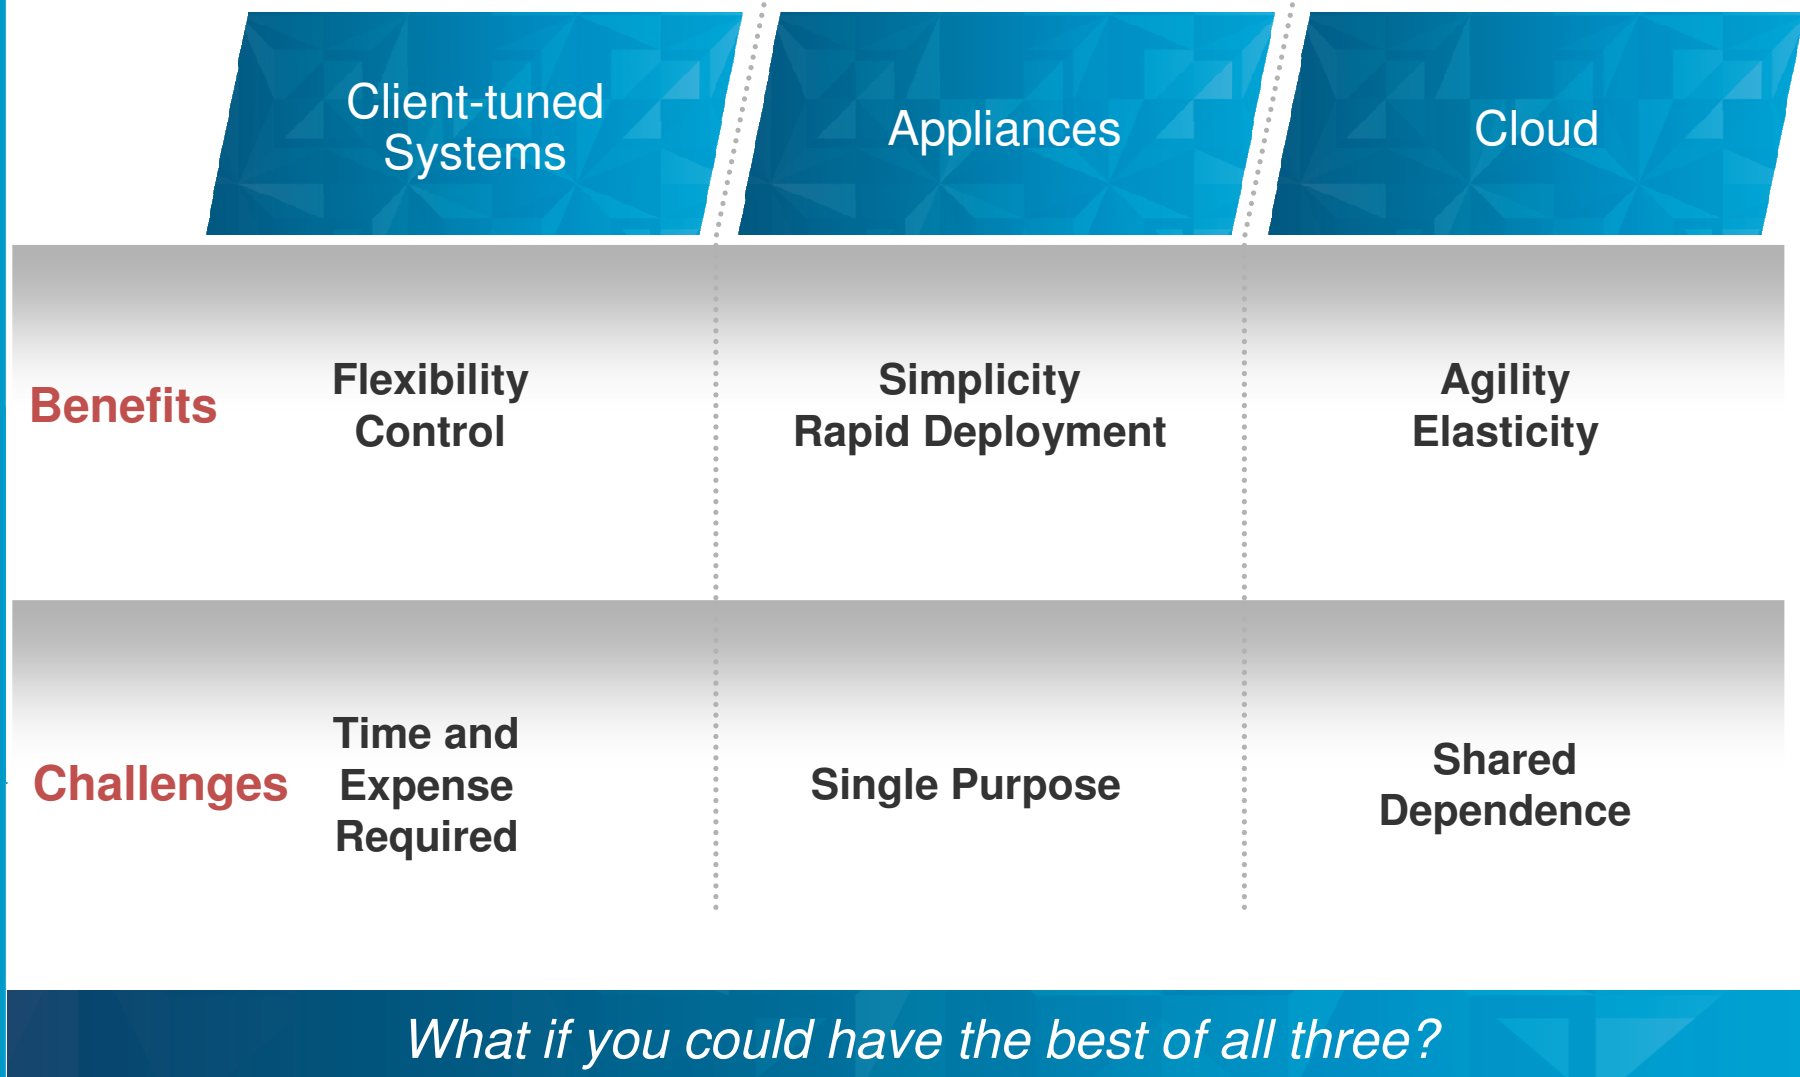

Use of new technology:

- 86% first and fast technology adoption
- 58% move virtual machines to meet desired outcomes
- 93% use storage virtualization
- 87% use a storage service catalog (tiered storage)

Results

Clients have tried various approaches to close the gap

The time has come for a new breed of systems

A system with integrated expertise . . .

Built-in Expertise

Capturing and automating what experts do – from the infrastructure patterns to the application patterns

Integration by Design

Deeply integrating and tuning hardware and software – in a ready-to-go workload optimized system

Simplified Experience

Making every part of the IT lifecycle easier - with integrated management of the entire system and a broad open ecosystem of optimized solutions

IBM PureApplication System: the expert integrated platform system

PureApplication

Built-in Expertise

Patterns of expertise built from decades of experience extend business value

Integration by Design

Resource and workload optimized with complete platform-as-a-service cloud capabilities built-in

Simplified Experience

An open, integrated system enabling business model and ecosystem flexibility with a single pane of glass to manage both the infrastructure and application platform

What does it mean for you?

Agility

- **Get up and running in hours**, cutting months off deployment time of new application projects.
- **Accelerate industry capabilities** with solutions from a broad open ecosystem
- **Elastically adapt** to workload spikes without overbuying

Efficiency

- **Deploy twice as many applications per square foot** of data center space
- **Reduce lifecycle maintenance and minimize downtime.**
- **Manage all physical and virtual resources from a single user interface**

Simplicity

- **Free up time** from procuring, supporting, testing & deploying assets
- **Avoid delays** due to limited IT skills or complex integration with factory integration and built-in expertise
- **Maintain more quickly and easily** with integrated system patches

Control

- **Lower risk and costs** with automated provisioning and seamless scalability with security and resiliency
- **Maximize flexibility** with choice of architectures, and open standards
- **Intelligently manage cloud environments**

IBM PureApplication System

A Simple, Efficient, Flexible, Virtualized Application Platform

Complete, Ready-to-Go Systems

- Pre-integrated, up and running in <4 hours
- Pre-optimized for enterprise application workloads

Simplify Ongoing Tasks

- Single point of platform and application management
- Repeatable self service application provisioning

Built for Cloud

- “Platform as a Service”
- Elastic application runtimes

Manual, brittle

Best practice, pattern-based

Deploy

OS, runtime, resources

Policy based elasticity, single view

Manage

Manual optimizations on-site

Pre-optimized by experts

Optimize

IBM PureApplication System built in expertise

Patterns of Expertise: Proven best practices and expertise for complex tasks learned from decades of client and partner engagements that are captured, lab tested and optimized and then built into the system

Application Patterns
Available patterns from
IBM and Partners

100+ ISV business applications
Business intelligence
Business process management
Web experience (Portal)

Available
through
PureSystems
Centre

Platform Patterns
Expertise across the
middleware and
infrastructure

Web application deployment
Database deployment
Cloud platform management

Built-in
with
flexibility

Infrastructure expertise
across the compute
resources

Scalability Provisioning
Upgradeability Storage optimization

Clients have experienced:

20-30 times faster new
application deployment

Reduced time to provision from
45 days to minutes

Source: externally published customer case study data for existing capabilities that are include in PureApplication System

IBM PureApplication System integration by design

Optimizes the complete solution stack:

- All hardware and software components factory integrated and optimized
- Virtualized across the stack for efficiency
- Unified management, monitoring & maintenance
- Integrated and elastic application and data runtimes
- Application patterns allocate system and application resources for optimal performance, security and reliability

Clients have experienced:

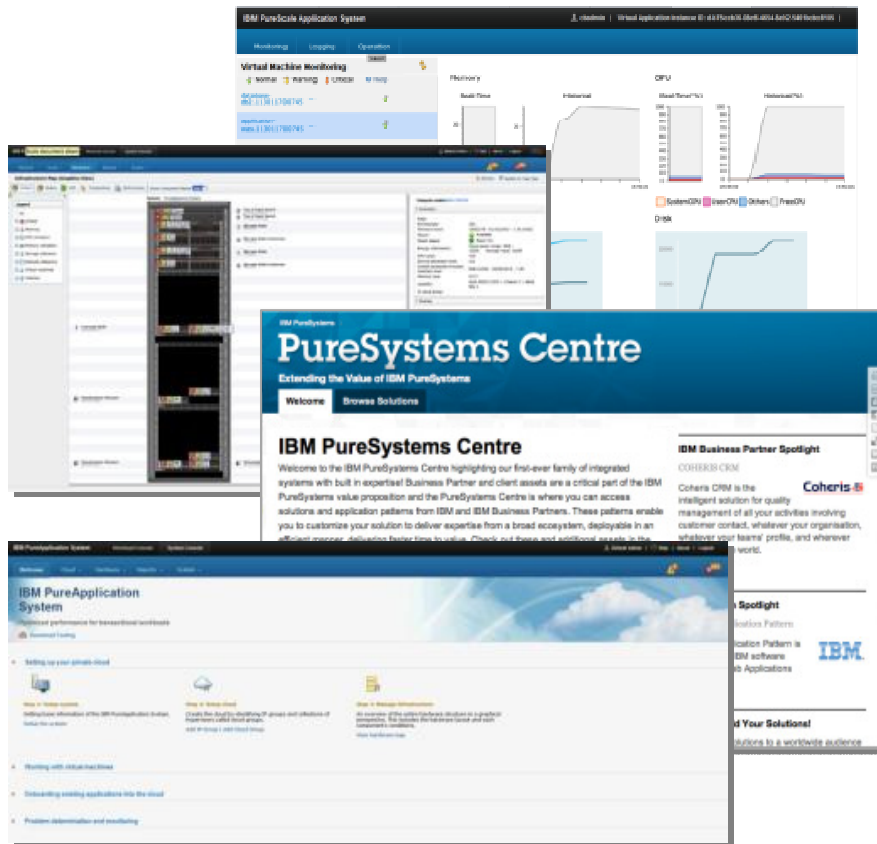

98% fewer
unplanned outages

55% reduction required
management time

Source: externally published customer case study data for existing capabilities that are include in PureApplication System

IBM PureApplication System simplified experience

New client experience:

- Single product streamlines ordering, tracking, receiving, installing and running
- Factory installed, fully packaged solutions drive simple setup (pull it out of the box, plug it in and boot it up)
- Management integration across system
- Single point of contact for support
- Upgrade with zero downtime based on integrated patches and system design
- PureSystems Centre – an online catalog of applications and patterns.
- A broad open ecosystem of optimized solutions

Up to:

53% Reduction
change management

incident/capacity management
reduced by **57%**

Source: IBM internal study of IBM PureApplication System solution designed to replicate actual IBM customer usage in the marketplace

Patterns of Expertise: Proven best practices and expertise for complex tasks learned from decades of client and partner engagements that are captured, lab tested and optimized *into a deployable form*

What is a Pattern?

- The pre-defined architecture of an application
- For each component of the application (i.e. database, web server, etc)
 - Pre-installation on an operating system
 - Pre-integration across components
 - Pre-configured & tuned
 - Pre-configured Monitoring
 - Pre-configured Security
 - Lifecycle Management
- In a **deployable form**, resulting in **repeatable deployment** with **full lifecycle management**
- **Delivering** superior results:
 - **Agility:** Faster time-to-value
 - **Efficiency:** Reduced costs and resources
 - **Simplicity:** Simpler skills requirements
 - **Control:** Lower risk and errors

Built-in Web Application Pattern delivers proven expertise

Auto Scaling

Managed environments scale up and down based upon business SLAs you specify

Failover

Failed virtual machines are replaced with new VMs which are configured with the old VM's identity

Load Balancing

Web requests are automatically load balanced across multiple virtual application servers

Security

ACL's for application sharing and management access, LDAP integration for application security

Monitoring

All components of virtual application environments are monitored by PureApplication System

Lifecycle Management

Built-in components are pre-configured, tuned, and tested to enable efficient, minimal click deployment and single point of maintenance

Three ways to get the value of patterns of expertise

Add **third-party** application patterns of expertise

Use **IBM** patterns of expertise throughout the system

Capture **your own** expertise:

- Image Construction & Composition Tool allows you to create your own custom virtual images
- Pattern Development Kit allows you to create your own virtual application patterns.
- Capture existing expertise for operating system and middleware installation
- Dynamically combine pre-defined components to build new image packages
- Create a standard VM format in Open Virtual Format

Capture 80% of today's workloads

Extensibility from the broadest ecosystem is made easy

New IBM PureSystems Centre:

- Gain access to a broad community of IBM and certified partner expertise
- Download optimized, deployable application patterns from 100+ leading ISV partners
- Search by solution area, industry or system

*Also run your existing applications today**

* Unix/Linux and Windows applications

PureExperience: IBM's investment to *prove it*

IBM PureExperience

Offers the following at no charge:

1. On-site installation of PureApplication System and guided demonstration of business value
2. Execution of a 10 day on-site service engagement
3. Use of the PureApplication System for 30 days
4. Lab advocate for usage questions and advice
5. Single point of IBM support and maintenance

Product release dates and/or capabilities referenced in this presentation may change at any time at IBM's sole discretion based on market opportunities or other factors, and are not intended to be a commitment to future product or feature availability in any way. Nothing contained in these materials is intended to, nor shall have the effect of, stating or implying that any activities undertaken by you will result in any specific sales, revenue growth or other results.
- If the text contains performance statistics or references to benchmarks, insert the following language; otherwise delete:
Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.
- If the text includes any customer examples, please confirm we have prior written approval from such customer and insert the following language; otherwise delete:
All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.
- Please review text for proper trademark attribution of IBM products. At first use, each product name must be the full name and include appropriate trademark symbols (e.g., IBM Lotus® Sametime® Unyte™). Subsequent references can drop "IBM" but should include the proper branding (e.g., Lotus Sametime Gateway, or WebSphere Application Server). Please refer to <http://www.ibm.com/legal/copytrade.shtml> for guidance on which trademarks require the ® or ™ symbol. Do not use abbreviations for IBM product names in your presentation. All product names must be used as adjectives rather than nouns. Please list all of the trademarks that you use in your presentation as follows; delete any not included in your presentation. IBM, the IBM logo, Lotus, Lotus Notes, Notes, Domino, Quickr, Sametime, WebSphere, UC2, PartnerWorld and Lotusphere are trademarks of International Business Machines Corporation in the United States, other countries, or both. Unyte is a trademark of WebDialogs, Inc., in the United States, other countries, or both.
- If you reference Adobe® in the text, please mark the first use and include the following; otherwise delete:
Adobe, the Adobe logo, PostScript, and the PostScript logo are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States, and/or other countries.
- If you reference Java™ in the text, please mark the first use and include the following; otherwise delete:
Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.
- If you reference Microsoft® and/or Windows® in the text, please mark the first use and include the following, as applicable; otherwise delete:
Microsoft and Windows are trademarks of Microsoft Corporation in the United States, other countries, or both.
- If you reference Intel® and/or any of the following Intel products in the text, please mark the first use and include those that you use as follows; otherwise delete:
Intel, Intel Centrino, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.
- If you reference UNIX® in the text, please mark the first use and include the following; otherwise delete:
UNIX is a registered trademark of The Open Group in the United States and other countries.
- If you reference Linux® in your presentation, please mark the first use and include the following; otherwise delete:
Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both. Other company, product, or service names may be trademarks or service marks of others.
- If the text/graphics include screenshots, no actual IBM employee names may be used (even your own), if your screenshots include fictitious company names (e.g., Renovations, Zeta Bank, Acme) please update and insert the following; otherwise delete: All references to [insert fictitious company name] refer to a fictitious company and are used for illustration purposes only.
