Economía

Sociedad

Web 2.0

Tecnología

Características Web 2.0

- Mayor participación = mayor valor
- La innovación y el valor se aceleran en base a la inter-operabilidad de servicios
- Experiencia de usuario avanzada sin coste formativo
- Versión BETA permanente
- Optimización del coste de servicios y productos
- Búsquedas integradas
- Escalable, persistente, interoperable, transparente
- Presentado en modo Pull: dirigido a audiencias desconocidas, lo que permite “descubrir” la audiencia de interés real (frente al modelos “push”)
- Evaluación y acceso mediante “tagging” and “folksonomy”

¿Por qué triunfan las iniciativas basadas en Web 2.0?

#1. Extender mi negocio más allá de mi 20% de clientes

#2. Los clientes valoran el contenido digital

#3. Experiencia virtual, negocio real

#4. Confiar en la red

#5. Contar con los clientes

#6. Utilizar redes

#7. Flexibilizar el negocio

#8. Fomentar la colaboración e innovación

***Value 2.0**. IBM Institute for Business Value. IBM 2008*

Enterprise Web 2.0

Enterprise Web 2.0. Gartner sobre el modelo de contenidos

- Una nueva cara de la colaboración
- Alternativas para llegar al "information worker"
- Encajan en la versión más amplia de los nuevos procesos de negocio

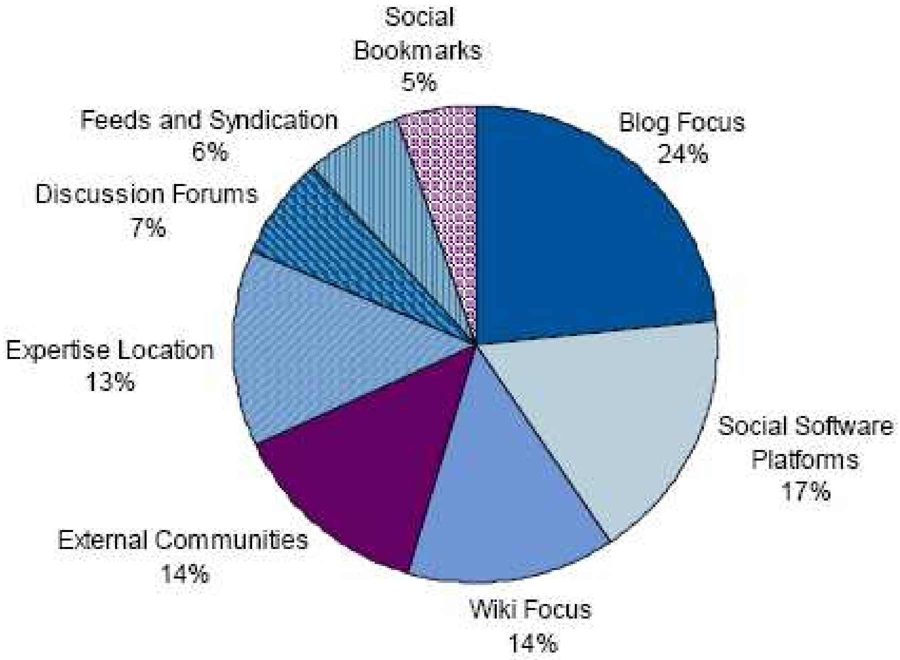
Gartner. Julio 2007. The Emerging Enterprise Social Software MarketPlace

Gartner sobre Software Social en la empresa

- Software Social como el catalizador de la productividad e innovación
  - Acceso al conocimiento, experiencia y capital intelectual
- Crecimiento superior al 40% para los próximos 5 años



Source: Gartner (July 2007)

Gartner. Julio 2007. The Emerging Enterprise Social Software MarketPlace

Forrester. Recomendaciones Enterprise Web 2.0

- Considerar la inversión Enterprise Web 2.0 como parte de la estrategia global
- Contar con los proveedores de Software tradicionales
- Arrancar desde las iniciativas de colaboración, portales o negocio ya existentes e ir evaluando progresivamente los planes
- Focalizarse en un único proveedor de software Web 2.0
- No necesariamente comenzar tras una decisión estratégica y una análisis profundo. Es un lujo que no nos podemos permitir

Forrester. Octubre 2007. The big vendors converge on Enterprise Web 2.0

Web 2.0 en IBM

Information Discovery Initiative

The Information Discovery Initiative is focused on improving employees' ability to find relevant information by:

- **Increasing the relevancy of enterprise search results**
- **Creating a user centered environment that aligns with how employees think and work**
- **Improving the quality and relevancy of content delivered to employees before they know or need to search for it**
- **Creating a participative environment in which employees help each other find what they need**

What sellers are saying

Everybody needs to know this stuff

What I learned through Global Sales School would have taken me forever to learn on my own. I know long-time IBM sellers who don't know about, or at least aren't using, some of the tools and resources we learned about in Global Sales School. Everybody needs to know this stuff, because it helps you think about the overall solution from a client's view.
Rick Sanford

daniel.olmo@e... Hi, have a second for a quick question?
branislav.vilagi... hi there
sure
daniel.olmo@e... it is about the GSS intranet site.
Is there any other site about GSS I should be aware of, or everything is linked from here? 11:37:44 AM

branislav.vilagi@sk.ibm.com - Branislav Vilagi/Slovakia/IBM is available

Our Understanding of Your Goals

Innovation is especially important right now because it's widely seen as the key to growth.

This striking statement is from a survey that IBM conducted last year with

employee population on the inside, as their primary sources of innovation.

Hi All:

We're continuing to develop the promotional materials for the worldwide "Meet ZetaBank" campaign. The latest addition is this basic banner, which can be used on the web, as letterhead, and on printed materials. The name of specific city or country in question would appear in the banner.

The documents have been sent by UPS. Here is the tracking number: 1ZR005W5NW00503168
Thanks --

Modelo de contenidos

- Todas las personas pueden ser creadores de contenidos
- El contenido es la suma del objeto original y todas las contribuciones (que en la Web 2.0 son persistentes)
- La interacción suma valor (y esto no se ha inventado ahora)
- Un contenido puede ser: Un documento, un correo, una conversación, una imagen, video/audio, un wiki, una entrada de blog, una noticia, una evento, una entrada de agenda, un enlace Web, un registro de incidencia… cualquier cosa.
- De nuevo habrá mecanismos para la autorregulación de los contenidos: el colectivo decide cual es el tema, la adecuación de cada aportación y la calidad

Lotus. Quickr

- **Gestión documental colaborativa**
- **Espacios de trabajo para equipos**
- **Front-end de soluciones ECM**

Interfaz y herramientas Web 2.0

Hello,

Check out this spreadsheet

What do you want to do with the attachments?

Gestión documental colaborativa

- Fácil gestión documental
  - Check-in/check-out
  - Versiones/Revisiones
  - Borrador
  - Workflow
- Experiencia de usuario
  - Vista previa de documentos
  - Menús de personas en los nombres
  - Refresco rápido (AJAX)
  - Iconos nativos de tipo de fichero
  - Drag & Drop desde el escritorio
  - Búsqueda sencilla
- Compartición de Contenidos
  - Bookmarking de documentos
  - Capacidades Atom / RSS
