

IBM Lotus Society Special Gathering

What's New in Lotus Notes/Domino 8.5.1

Ray Chan

IBM HK/China Ltd

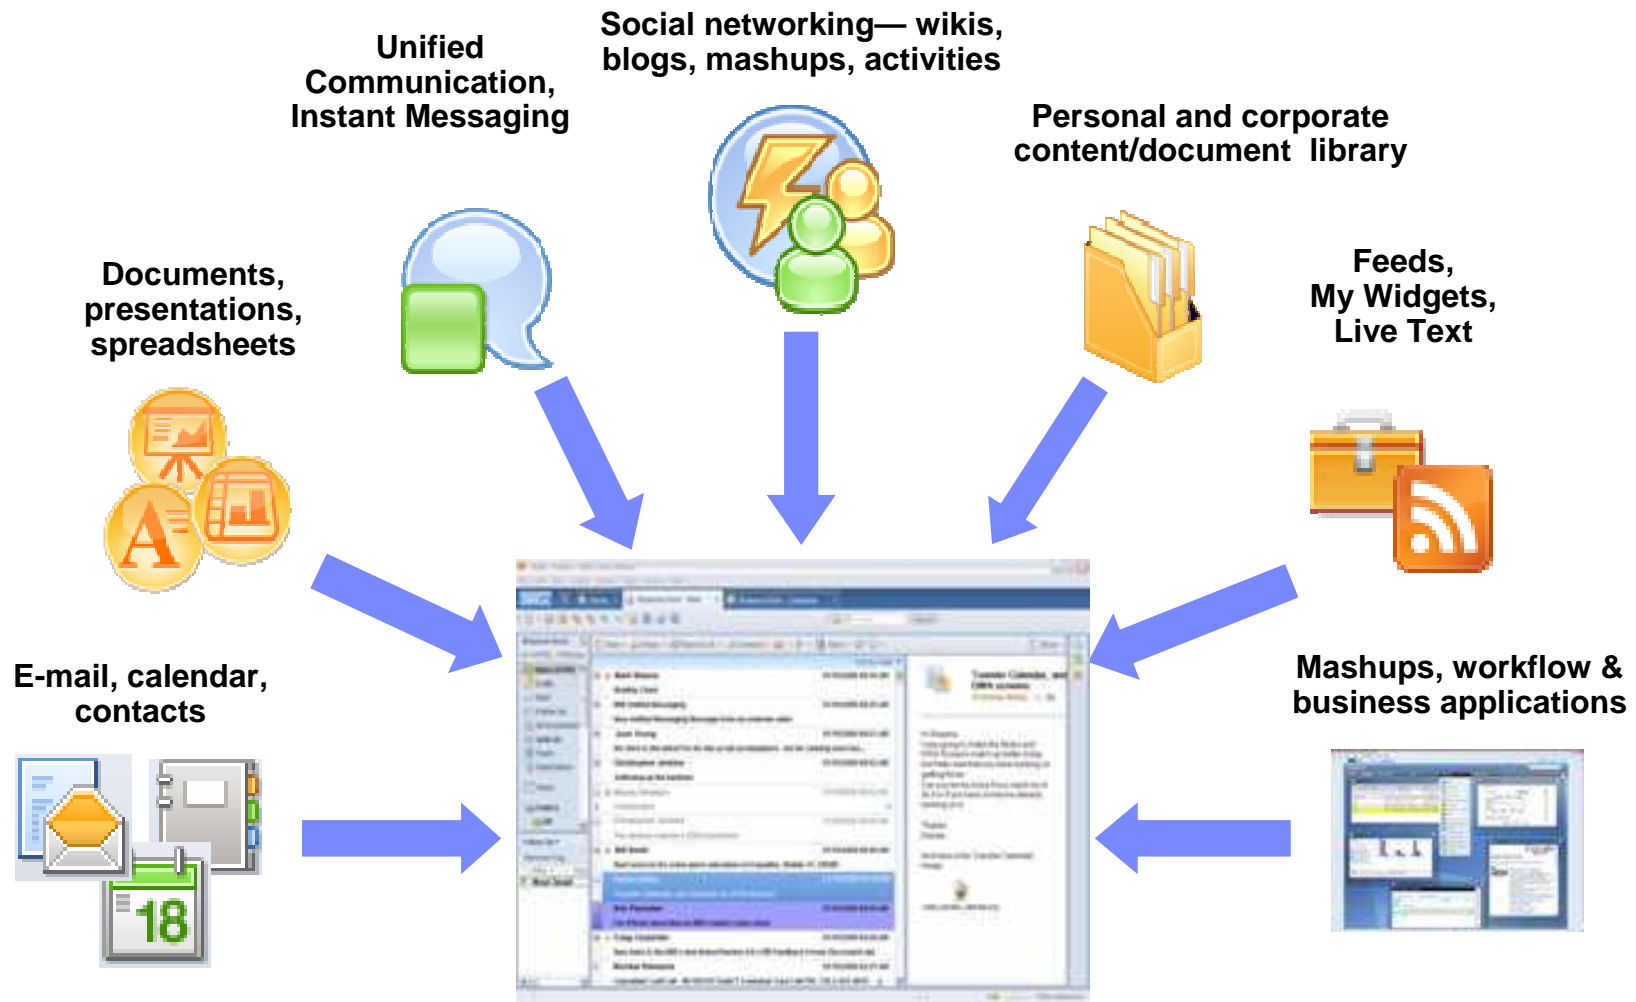

What We'll Cover ...

- What's new in Domino Designer
- What's New in iNotes
- What's New in the Notes Client
- Questions

Extending Collaboration Throughout and Beyond the Enterprise

You also need to Collaborate with Suppliers, Partners, Customers!
iWidgets & Open, Eclipse-based plug-ins allow easy integration with web-based services

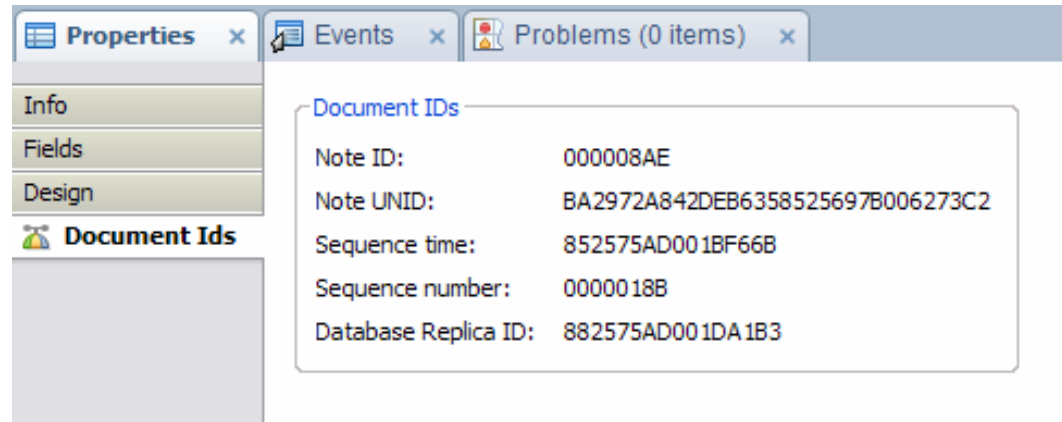

Domino Designer 8.5.1

- Builds on the foundation we created in Designer 8.5
- Usability
- Performance
- Extensibility API
- Script Editors

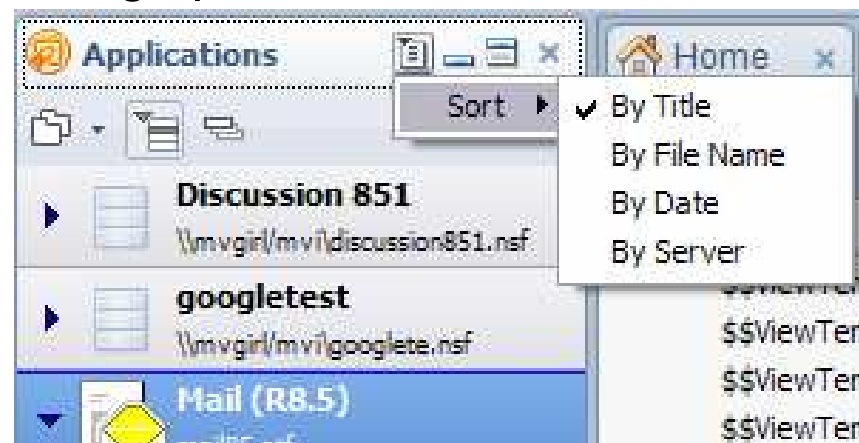

Some Small Usability Improvements

Label the Ids given in the properties box

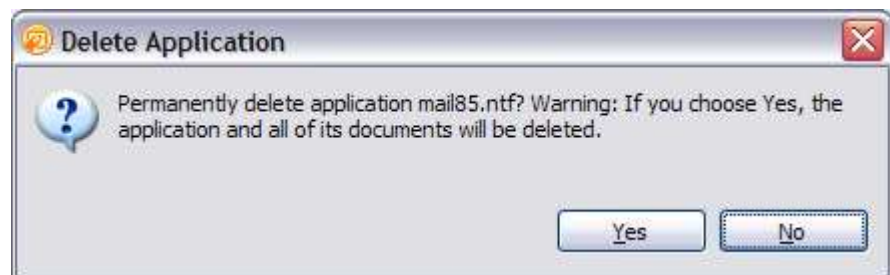

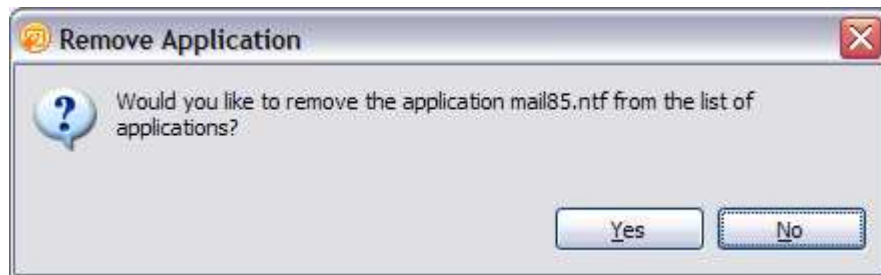

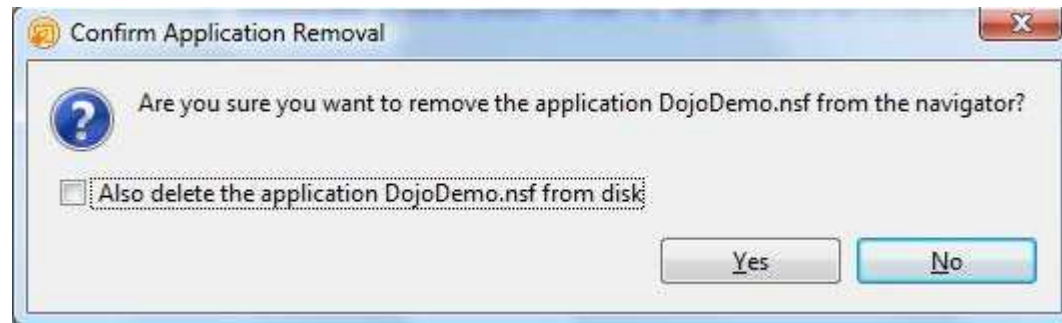

More Navigator sorting options

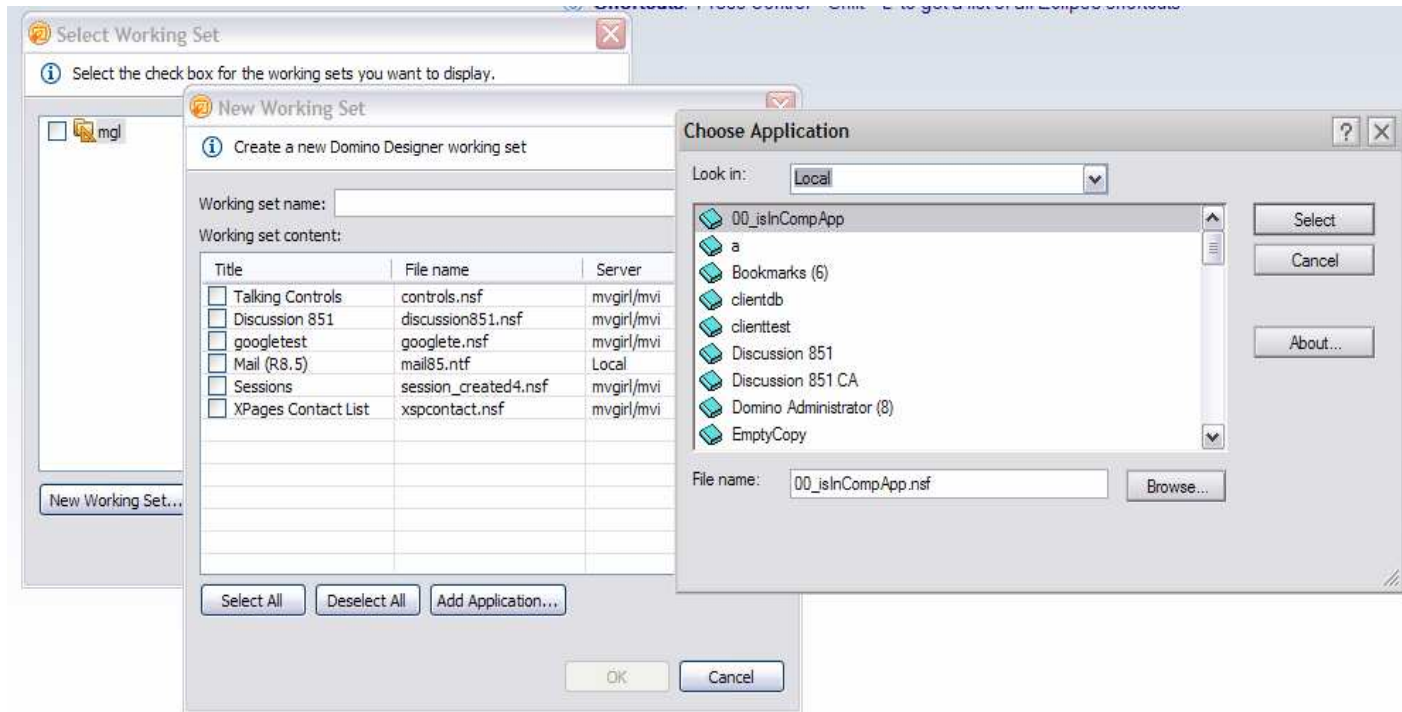

Distinguishing Remove from Delete

Working Set Usability Improvements

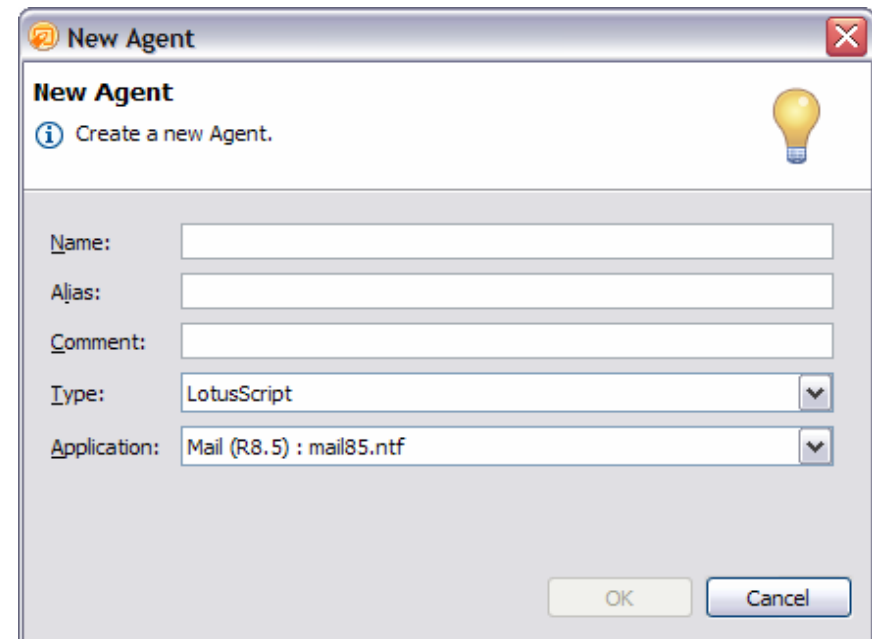

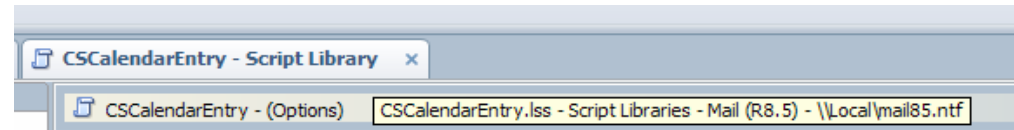

- group several applications together as a "working set"
- Add applications to a working set without opening them
- More information available for each application in the working set

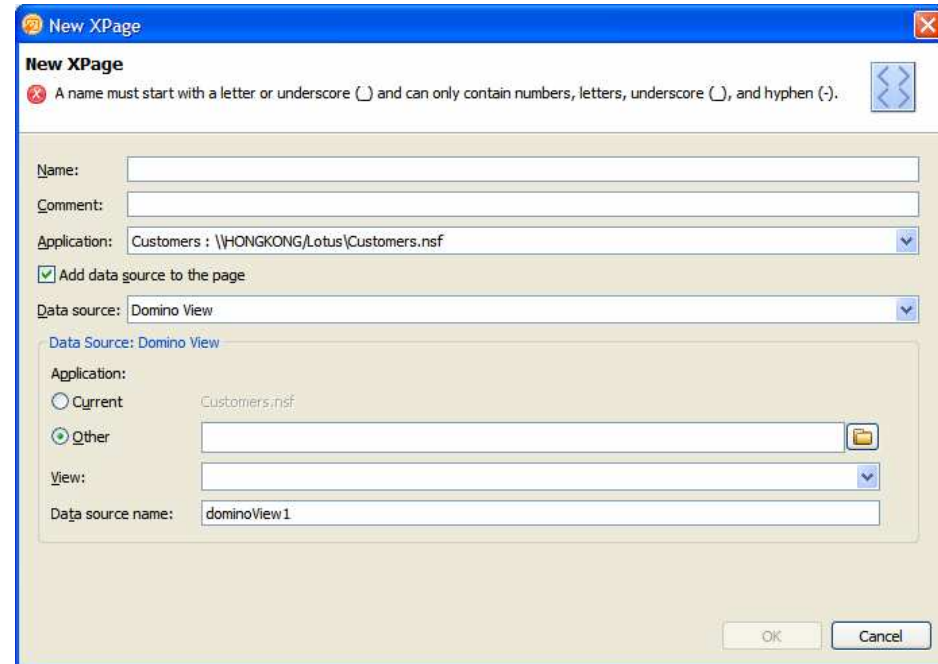

Framework Usability Improvements

- Hover on tab for more information
- Design list filtering
 - Find by name and/or alias
 - More Eclipse-like approach
- Creating design elements
 - 8.5 brought a change to Designer UI for creating design elements
 - Set alias and comment (and language type) when you create the design element

XPage Usability Improvements

- New XPage dialog
 - Create the data source when the XPage is created
- XPage Design Visualization Improvements
 - (Design Visualization = what it looks like at design time)
 - Text on a page
 - “Other” controls
 - Better rendering of style sheets in design mode

Extensibility API

- Designer (even in 8.5) publishes Eclipse resource selections
- Enables Eclipse plugins to contribute to Designer UI and function
- API maps between Eclipse resources and design elements, blends with and supports Eclipse APIs
- Current selection available through API to allow context sensitivity in plugin contributions
- Database and design element property manipulation available
- Allows plugin contributor to refresh core Designer UI

Extensibility Classes

- DesignerResource
 - Constants, static methods to analyze selections, open databases, find design elements, etc.
- DesignerDesignElementSelection
 - Information about the current selection (database or design element)
- DesignerProject
 - Information about the current database
- DesignerDesignElement
 - Information about a design element
- DesignerException
 - Thrown to report errors encountered by these classes

LotusScript Editor

- Brand new, built on Eclipse framework
- Script libraries and Agents
- Class browser (Yes, for custom classes, too)
- Content assist
- Preferences
- Syntax coloring
- Hyperlinking

Eclipse-Based Java Design Element Editor

- Manages the resources within design elements
- Agents, Libraries, Web Services, Web Service Consumers
- Eclipse Java editor for classes
- Eclipse New Class dialog
- Builtin access to Notes.jar, content assist, etc.
- Integration with other Eclipse editors

Lotus Domino Designer 8.5.1 -- Free to download

Download: Lotus Domino Designer

Learn | **Download** | **Resources**

 **Download Lotus Domino Designer**

Download Lotus® Domino® Designer 8.5.1, an Eclipse-based rapid application development tool for building collaborative Web 2.0 applications that run on Lotus Notes and Domino. Designer includes XPages which allows developers to use HTML, CSS and JavaScript skills along with a set of modern Web controls, Dojo and built in Ajax services to build applications.

Download

This is a no-charge product. All of the product's features are enabled. Developers may use Domino Designer to build applications that are run locally. To deploy applications developed with Lotus Domino Designer to Lotus Domino software, you must purchase the Lotus Domino Enterprise Client Access License offering for all supported users.

View pricing information for Lotus Domino Designer or [explore the available purchasing options.](#)

Scroll Hints – Dates of What You are Scrolling

The screenshot shows the IBM Lotus iNotes interface. The main window displays a list of emails with columns for 'Who', 'Subject', 'Date', and 'Size'. A scroll hint is visible over the 'Date' column, showing the date '07/22/09'. The interface includes a top navigation bar with 'Full', 'Preferences', 'Online', 'Logout', and 'Help' options. A left sidebar shows folders like 'Inbox (27)', 'Drafts', 'Sent', and 'Folders'. The bottom status bar shows 'Done', 'Internet', and '100%' zoom.

Preference for Scroll Hints

The screenshot shows the IBM Lotus iNotes application window with the 'Preferences' dialog box open. The dialog box has a 'Basics' tab selected. The 'Display Options' section is visible, showing 'Display this tab when starting:' set to 'Home'. Under 'For all list-type views:', the 'Show all documents as a scrollable list' radio button is selected, and the 'Enable Scroll hints' checkbox is unchecked. The 'Search' section has 'Enable full-text indexing for searching' checked. The 'Personal categories' section has a text box containing 'Lotusphere 2008'. The 'Default Mail Client' section shows 'IBM Lotus iNotes is NOT the default Mail Client' with a 'Make Default' button. The 'Spell Check Default Dictionary' section has 'Server Default' selected. The 'Right Double-Click Close' section has 'Enable right double-click to close window' unchecked.

For all list-type views:
 Show all documents as a scrollable list
 Enable Scroll hints
 Show documents one page at a time (faster load time)

Search
 Enable full-text indexing for searching

Personal categories
[Type here to add a new category] Lotusphere 2008

Default Mail Client
IBM Lotus iNotes is NOT the default Mail Client | Make Default

Spell Check Default Dictionary
Set this as the default dictionary:
Server Default

Right Double-Click Close
 Enable right double-click to close window

Sync ID with ID Vault (Hidden if no policy enabled)

The screenshot shows the IBM Lotus iNotes interface. At the top, there is a navigation bar with 'Full', 'Preferences', 'Online', 'Logout', and 'Help' options. Below this, there are tabs for 'Mail-Inbox' and 'Preferences'. The left sidebar shows the user 'Mary Beth Raven' and folders like 'Inbox (27)', 'Drafts', 'Sent', 'Follow Up', 'All Documents', 'Junk', 'Trash', 'Views', 'Folders', 'Archive', 'Tools', and 'Other Mail'. The main content area is titled 'Change Internet Password' and has a 'Change...' button. Below this, there is a section for 'Notes ID management for secure mail features'. It explains that the Notes ID is used for decrypting, signing, and encrypting documents. A status message states: 'Your mail file DOES NOT CONTAIN a Notes ID' with a 'Notes ID Info' button. The 'Security' tab is selected, showing options for 'Archive', 'Offline', and 'Logout'. Under 'Security', there are three sections: 'Synchronize Notes ID with Vault:' with a 'Sync with Vault' button, 'Import Notes ID:' with an 'Import Notes ID' button, and a 'Change Internet Password' section with a 'Change...' button.

New iNotes Policy Settings – iNotes Configuration Tab

- Refresh inbox automatically
- Enable unread count
- Auto-update unread count
- Enable scroll hits
- Disable warning on opening attachments
- Filter out images from emails
- Proxy server name/URL pairs for Quickr usability
- Show sidebar on startup
- Show preferences
- Server or local archiving

Other New iNotes Policy Settings

- Mail disclaimer
- Security policy for configuring proxies
 - ▶ Previously, you set proxies in `proxy.config.properties` in `Domino\data\properties`. This is no longer supported. You must use a security policy setting document
- ID Vault

What's New in the 8.5.1 Notes Client

- Mail
- Calendar
- Rich text editor
- Replication and Sync
- Widgets and Live Text
- General

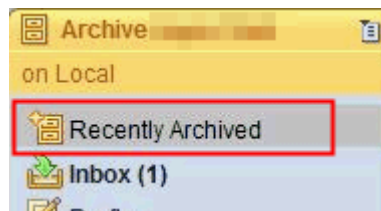

What's New in Mail

- Archiving improvements
- More colors for color coding
- New Spam protection with Lotus Protector integration
- You can empty Trash from a context menu
- Add a vCard
- Attachments collapsed at top on incoming MIME emails
- Red unread mail text
- Business card on typeahead – and a new card

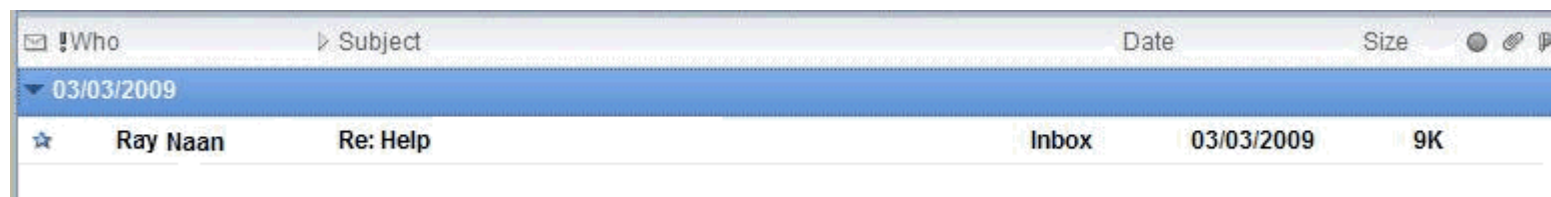

Improved Look for Archives

- **In an archive, the archive name is now highlighted in yellow, and the Archive, Other Mail, Follow-up, and Tools folders will not appear. Also, the preview pane will not display.**
- Recently Archived view

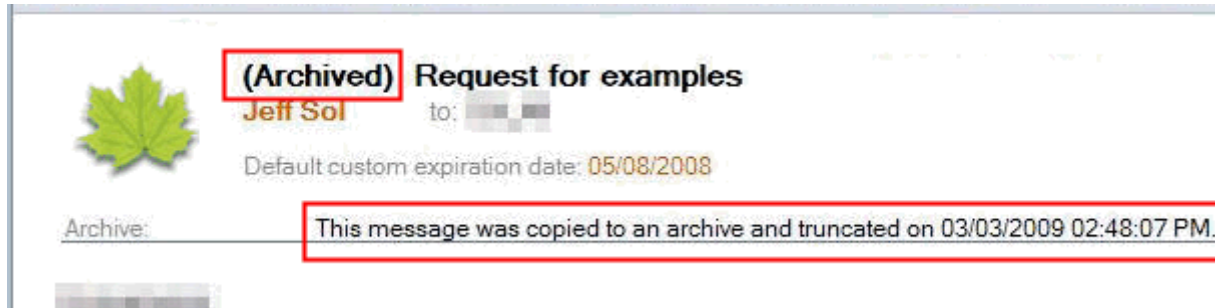

- **Recently Archived folder lists recently archived messages, categorized by archived date**

Mail: Archived Messages

- **The subject line of the open or previewed message says “(Archived)” and the header has archived date**

- **You can view an archived message in its archive. If you chose Remove attachments, leave summary or Remove attachments, leave summary and 40KB when you set the archive criteria, you can also view the message from a shortcut in its original folder.**

	Date	Size

Better Spam Control with Lotus Protector

The screenshot shows the IBM Lotus Notes Mail interface. The window title is "Mail - Inbox - IBM Lotus Notes". The menu bar includes File, Edit, View, Create, Actions, Tools, Window, and Help. The toolbar contains various icons for mail actions. The left sidebar shows the folder structure for "Samantha Daryn on Local", including Inbox (13), Drafts, Sent, Follow Up, All Documents, Junk, Trash, Chat History, Views, Folders, Archive, Spam Protection, Tools, and Other Mail. The main pane displays a list of emails with columns for Who, Subject, Date, and Size. A tooltip is visible over the "Spam: Block Sender's Mail" icon in the toolbar, indicating the action being performed on the selected email.

Better Spam Control with Lotus Protector

The screenshot shows the IBM Lotus Notes Mail interface. The main window is titled "Mail - Blocked Messages - IBM Lotus Notes". The left sidebar shows the user's mailbox structure, including "Inbox (13)", "Drafts", "Sent", "Follow Up", "All Documents", "Junk", "Trash", "Chat History", "Views", "Folders", "Archive", "Spam Protection" (with sub-items "Blocked Messages", "Blocked Senders", and "Allowed Senders"), "Tools", and "Other Mail".

The main content area is titled "Blocked Messages" and contains the following text: "These messages are currently blocked as spam. To accept future mail from a sender add that sender to your allowed senders list." Below this text are three buttons: "Delete Selected", "Deliver to Inbox", and "Send Report to Inbox".

The message list shows 555 messages, with the first 50 displayed. The table has the following columns: "From", "Recipient", "Subject", "Folder", "Date", and "Size". A tooltip "Block this Sender" is visible over the "From" column of the third message.

The bottom of the window shows the Windows taskbar with the Start button, several application icons, and the system tray displaying the time as 3:27 PM.

Better Spam Control with Lotus Protector

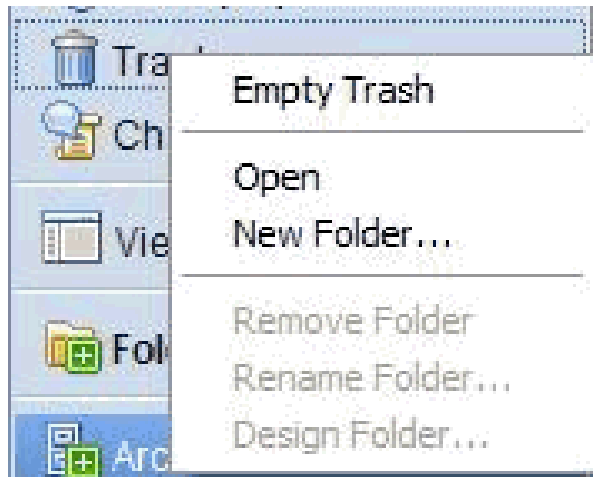

The screenshot displays the IBM Lotus Notes Mail interface. The window title is "Mail - Allowed Senders - IBM Lotus Notes". The menu bar includes File, Edit, View, Create, Actions, Tools, Window, and Help. The left sidebar shows the user's mailbox structure for "Samantha Daryn on Local", including folders like Inbox (13), Drafts, Sent, Follow Up, All Documents, Junk, Trash, Chat History, Views, Folders, Archive, Spam Protection (Blocked Messages, Blocked Senders, Allowed Senders), Tools, and Other Mail. The main content area is titled "Allowed Senders" and contains the text: "You have chosen to accept mail from these senders, even though your company blocks them." Below this text are buttons for "Delete Selected" and "Add to Allowed Senders". A table lists the allowed senders with their respective message counts. The table has two columns: "Sender" and "Messages allowed". The table content is as follows:

<input type="checkbox"/>	Sender	Messages allowed
<input type="checkbox"/>	great_newsletters@inter.net	0
<input type="checkbox"/>	testuser.147@example.com	0
<input type="checkbox"/>	testuser.2766@example.com	0
<input type="checkbox"/>	testuser.2811@example.com	0
<input type="checkbox"/>	testuser.3335@example.com	0

Navigation controls include "Viewing 1-5 of 5 messages", "Jump to page 1 of 1", and "Go" buttons. The status bar at the bottom shows "Done" and the system tray with the time 3:27 PM.

Empty Trash from a Context menu

Add a vCard to your Signature

- **Append a vCard (.vcf) file to your signature**
 - ▶ **Set Preferences - Mail - Signature** The basic fields are filled in based on information in your organization's directory,

Mail | Calendar & To Do | Access & Delegation

Basics | Letterhead | Signature | Follow Up | Sender Colors | Recipient Icons

Add a signature, such as your name and contact information, to the messages you send. You can add text, graphics and attachments (such as vCards) using the "T" control below. To use additional rich text features (such as fonts and HTML links), create your signature in a rich text field elsewhere (such as the body of a Notes message) and then copy and paste it here.

Note: The rich text signature is stored in your mail file so that the signature is available on any computer where you use Notes.

Automatically append a signature to the bottom of my outgoing mail messages

Signature

Append My vCard

["One UI" web guidelines](#) (internal only)
[User Experience Guidelines wiki](#)
[Notes Design Blog](#)

 Raven_Mary.vcf 

Add a vCard (Continued)

The screenshot shows a software interface for adding a vCard. The main window is titled "Append My vCard" and contains the following fields:

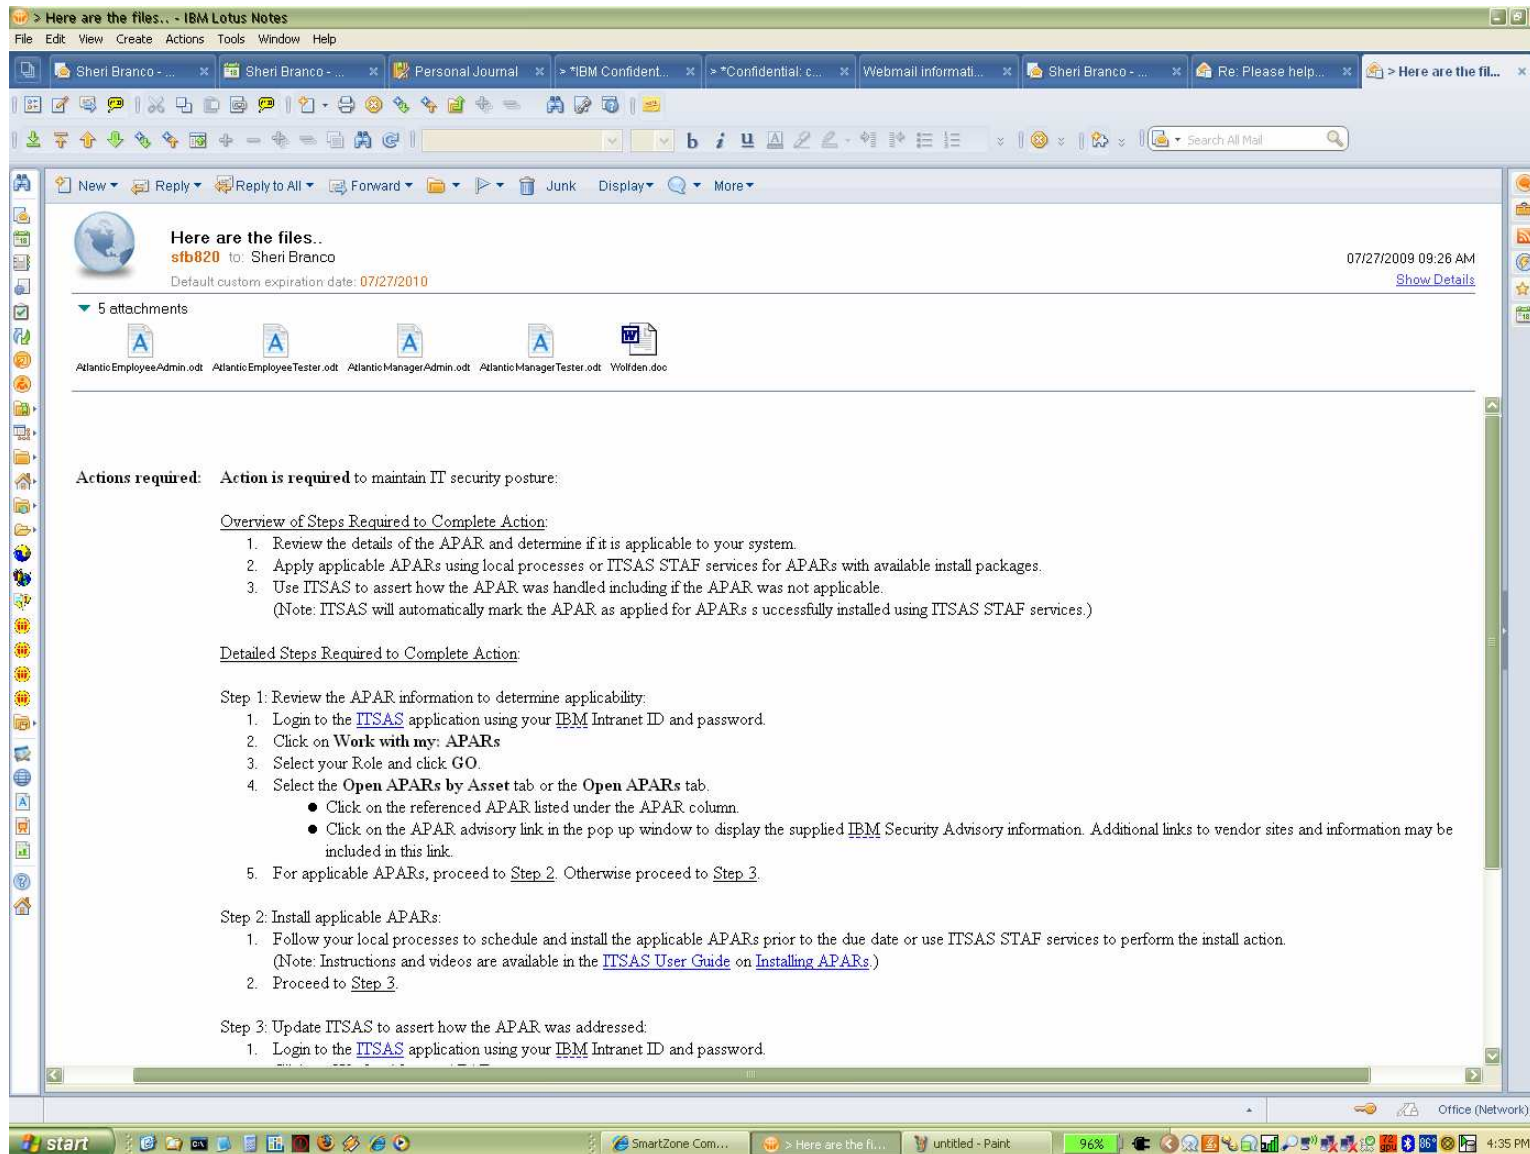

- Contact Name:** Mary Beth Raven
- Company Name:** Iris
- E-mail:** (with sub-sections for Business, Personal, and Assistant)

A "Name Helper" dialog box is overlaid on top, containing the following fields:

- Basics:**
 - Title:** Dr. (dropdown menu)
 - First name:** Mary
 - Middle name:** Beth
 - Last name:** Raven
 - Suffix:** (dropdown menu)
- Advanced:**
 - Mail system:** Lotus Notes (dropdown menu)
 - Routing domain(s):** (text input)
 - E-mail address:** (text input)
 - Include X.509 certificates when encountered** (checkbox)

Buttons for "OK" and "Cancel" are visible in the "Name Helper" dialog. The main dialog also has "OK" and "Cancel" buttons at the bottom right.

Attachments Collapsed at Top on Incoming MIME Mail

The screenshot shows the IBM Lotus Notes interface. The window title is "> Here are the files.. - IBM Lotus Notes". The menu bar includes File, Edit, View, Create, Actions, Tools, Window, and Help. The toolbar contains various icons for editing and navigation. The email header shows the subject "Here are the files..", sender "stb820", and recipient "Sheri Branco". The date is "07/27/2009 09:26 AM" and there is a "Show Details" link. Below the header, there are 5 collapsed attachments: AtlanticEmployeeAdmin.odt, AtlanticEmployeeTester.odt, AtlanticManagerAdmin.odt, AtlanticManagerTester.odt, and Wolfden.doc. The main body of the email contains the following text:

Actions required: Action is required to maintain IT security posture:

Overview of Steps Required to Complete Action:

1. Review the details of the APAR and determine if it is applicable to your system.
2. Apply applicable APARs using local processes or ITSAS STAF services for APARs with available install packages.
3. Use ITSAS to assert how the APAR was handled including if the APAR was not applicable.
(Note: ITSAS will automatically mark the APAR as applied for APARs successfully installed using ITSAS STAF services.)

Detailed Steps Required to Complete Action:

Step 1: Review the APAR information to determine applicability:

1. Login to the [ITSAS](#) application using your [IBM Intranet ID](#) and password.
2. Click on **Work with my: APARs**
3. Select your Role and click GO.
4. Select the **Open APARs by Asset** tab or the **Open APARs** tab.
 - Click on the referenced APAR listed under the APAR column.
 - Click on the APAR advisory link in the pop up window to display the supplied [IBM Security Advisory](#) information. Additional links to vendor sites and information may be included in this link.
5. For applicable APARs, proceed to [Step 2](#). Otherwise proceed to [Step 3](#).

Step 2: Install applicable APARs:

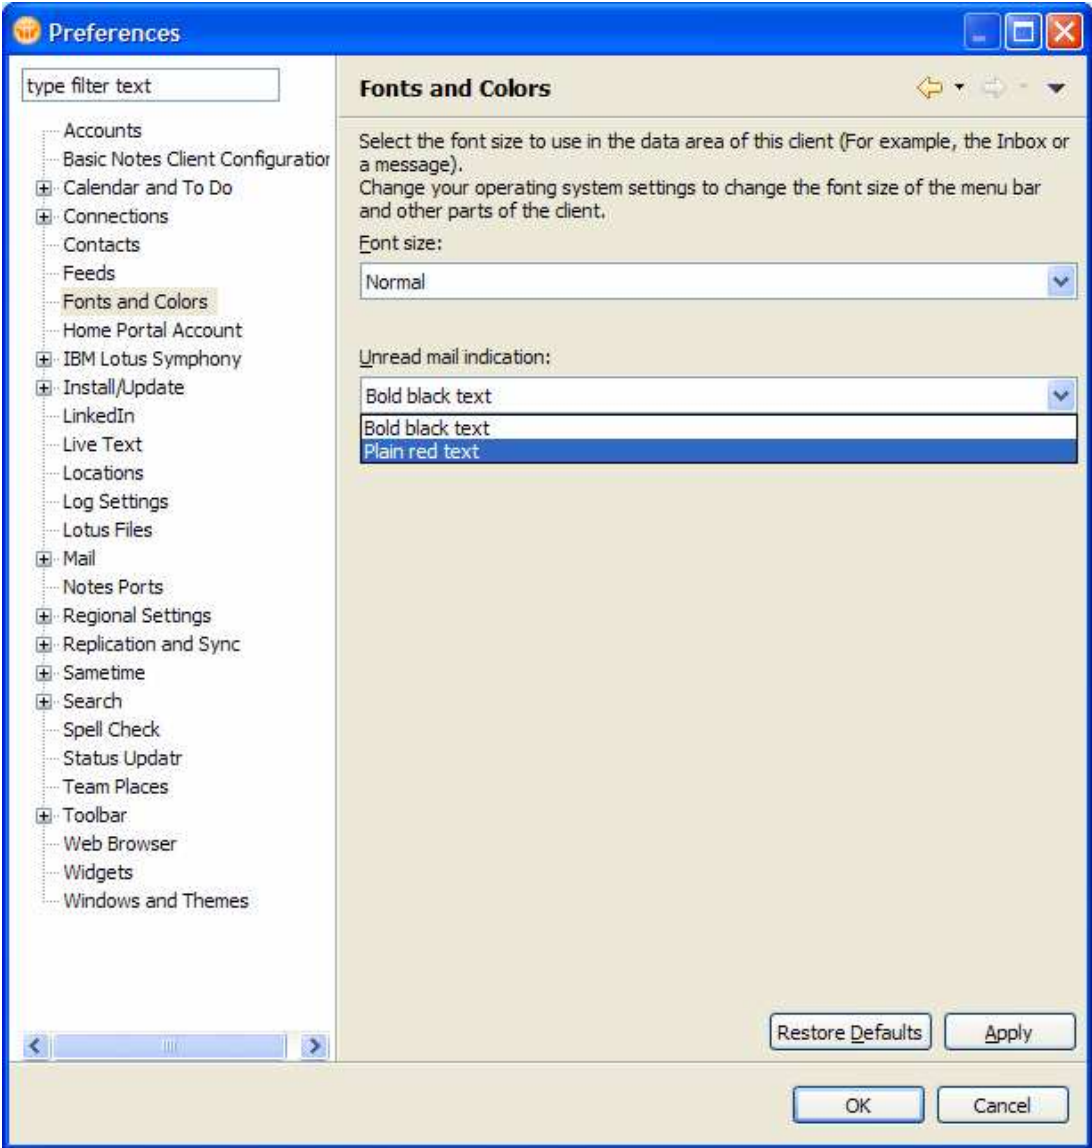

1. Follow your local processes to schedule and install the applicable APARs prior to the due date or use ITSAS STAF services to perform the install action.
(Note: Instructions and videos are available in the [ITSAS User Guide](#) on [Installing APARs](#).)
2. Proceed to [Step 3](#).

Step 3: Update ITSAS to assert how the APAR was addressed:

1. Login to the [ITSAS](#) application using your [IBM Intranet ID](#) and password.

What's New in Calendar

- Accept/Decline meetings from the preview pane
- New “Show Timeslots” choice
- Drag a Mail Message to Calendar tab or Day-at-a Glance to Schedule meeting
- Drag and Drop to Reschedule
- Integrated Google: choose How many Days for Offline

Accept/Decline Meetings from the Preview Pane

The screenshot shows the IBM Lotus Notes Mail interface. The window title is "Mail - iamlugGSX - IBM Lotus Notes". The menu bar includes File, Edit, View, Create, Actions, Tools, Window, and Help. The toolbar contains various icons for actions like Open, Reply, Forward, etc. The left sidebar shows the folder structure: on Local, Inbox (38), Drafts, Sent, Follow Up, All Documents, Junk, Trash, Chat History, Views, Folders, Archive, Tools, and Other Mail. The main pane displays a list of emails sorted by date. The selected email is from John Lance, dated 07/27/2009 09:07 AM, with the subject "Invitation: A Test Calendar Invitation". The preview pane on the right shows the details of this invitation:

Invitation: A Test Calendar Invitation
Mon 07/27/2009 6:15 PM - 7:15 PM
Attendance is required for Mary Beth Raven
Chair: John Lance/Westford/IBM
Location: Mary Beth's Sanctum

John Lance has invited you to a meeting. You have not yet responded.

Required: Mary Beth Raven/Westford/IBM@Iris

Description

The status bar at the bottom indicates "You have new mail on Bono/Iris" and "Online".

Calendar View : Show – Summary or Show - Timeslots

The screenshot shows the IBM Lotus Notes calendar application. The window title is "Calendar - One Day - IBM Lotus Notes". The interface includes a menu bar (File, Edit, View, Create, Actions, Tools, Window, Help), a toolbar with icons for opening files and other actions, and a window title bar with standard OS controls. The main area displays a calendar for Friday, August 28, 2009. A context menu is open over the calendar, showing options: "Preview on Bottom", "Preview on Side", "Hide Preview", "Filter by", "Summary" (highlighted), "Timeslots", and "Calendar Footer". The calendar shows several entries: "Mentoring session" at 10:00, "Notes RET Meeting" at 11:00, "Optional Brown Bag - Weekly series of Talks on How To Innovate for Notes, Domino, Expeditor, Symphony, etc Product Lines" at 12:00, and "Mary Beth and Amy have a quick Monthly chat re: One UI and Notes Design leadership" at 4:00. On the left, there is a sidebar with "Views" (One Day, Two Days, One Work Week, One Week, One Month) and "To Do" items. The bottom status bar shows "Day 240 - 125 days left in the year" and "Online".

Drag a Mail message to Calendar tab or Day-at-a-Glance

Drag and hover on Calendar tab; wait for tab to switch, then drop on timeslot

Drag email; drop on empty timeslot to schedule meeting

Franziska Tanner	URGENT: IamLUG Speaker Profile Update	07/22/2009 01:09 PM	3K

The screenshot shows the IBM Lotus Notes interface. The main window displays a list of email messages. On the right side, there is a 'Day-At-A-Glance' calendar view for Monday, July 27, 2009. The calendar shows a 5:00 pm slot with an event titled 'Invitation: A Test Calendar'. The interface includes a menu bar, a toolbar, and a left-hand navigation pane with folders like 'Inbox (38)', 'Drafts', and 'Sent'.

Drag and Drop to Reschedule a Calendar Entry

- **Drag a Calendar entry to a new date on the date picker in either your main calendar or the Day-At-A-Glance sidebar panel. This will open the reschedule dialog box.**

- **Use this feature to counter a meeting invitation.**
- **To drag to a different month on the date picker, hover over the previous or next arrow while dragging.**

Rich Text Editor Improvements

- New toolbar icons:

Underline

Text color

Highlighter

Insert Link

- The selection behavior in a Notes section is now smoother. You can scroll smoothly through the text as in normal text. The entire section is still selected as before but scrolling occurs only when you drag out of the window.
- Lists: if no text on a line then no list element is displayed. (Exception: in edit mode, a list element displays on an empty line if the cursor) is in the paragraph)
- Improved Table formatting
 - ▶ Drag to Reorder rows or columns 
 - ▶ Multiple undo: Step through multiple  its and undo them. Note that this feature is supported when editing lists also.
 - ▶ Table resize: Drag the outside margin of a table to resize it.
 - ▶ Insert columns or rows: Press and hold down the Shift key. When the cursor changes appearance, double-click the border of a row or a column to insert a new row or column. The new row or column is inserted in between the two rows or columns sharing the common border. The cursor changes as follows:
 - ▶ Move text from one cell to another: Drag and drop  contents of a cell to move it to another cell.
 - ▶ Fixed width table: When you create a fixed width table, you can now specify the width in the Create Table dialog box. In previous versions, the width for fixed width tables was automatically determined based on the available area.
 - ▶ Columns: Drag and drop a column border to resize it.

Replication and Sync: Activities on Replicator Page

The screenshot shows the IBM Lotus Notes 'Replication and Sync' window. The main window has a menu bar (File, Edit, View, Create, Actions, Tools, Window, Help) and a toolbar. Below the toolbar is a list of open documents. The main area displays a table of replication tasks with columns for 'Enabled', 'High Priority', 'Application', 'Last Run', 'Scope', and 'Summary'. A 'Preferences' dialog box is open over the table, showing settings for 'Replication and Sync'. The dialog has a tree view on the left with 'Replication and Sync' selected. The main area of the dialog contains three sections: 'Normal-priority schedule', 'High-priority schedule', and 'Other triggers'. Each section has checkboxes and input fields for scheduling options.

Enabled	High Priority	Application	Last Run	Scope	Summary
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Synchronize Contacts			
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Synchronize Activities			
<input type="checkbox"/>	<input type="checkbox"/>	Widget Catalog			
<input type="checkbox"/>	<input type="checkbox"/>	Application templates (NTFs)			
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Mary Beth Raven			
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Design and User Experience			
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	LUX Office Notes			
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	NotesDesignBlog			
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Roaming User Applications			
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Send outgoing mail			
<input type="checkbox"/>	<input type="checkbox"/>	Local free time info			

Preferences - Replication and Sync

You can set a different replication/sync schedule for each location. The schedule you set now applies to the location name you see in the status bar.

Normal-priority schedule

Replicate/Sync at this interval for normal priority

Daily from: 08:00 AM to 10:00 PM

Repeat every (minutes): 60

Days of the week: Sunday Monday Tuesday Wednesday Thursday Friday Saturday

High-priority schedule

Replicate/Sync at this additional interval for high priority

Daily from: 08:00 AM to 10:00 PM

Repeat every (minutes): 5

Days of the week: Sunday Monday Tuesday Wednesday Thursday Friday Saturday

Other triggers

Replicate/Sync when I start the client

Prompt me

Replicate/Sync when I shut down the client

Prompt me

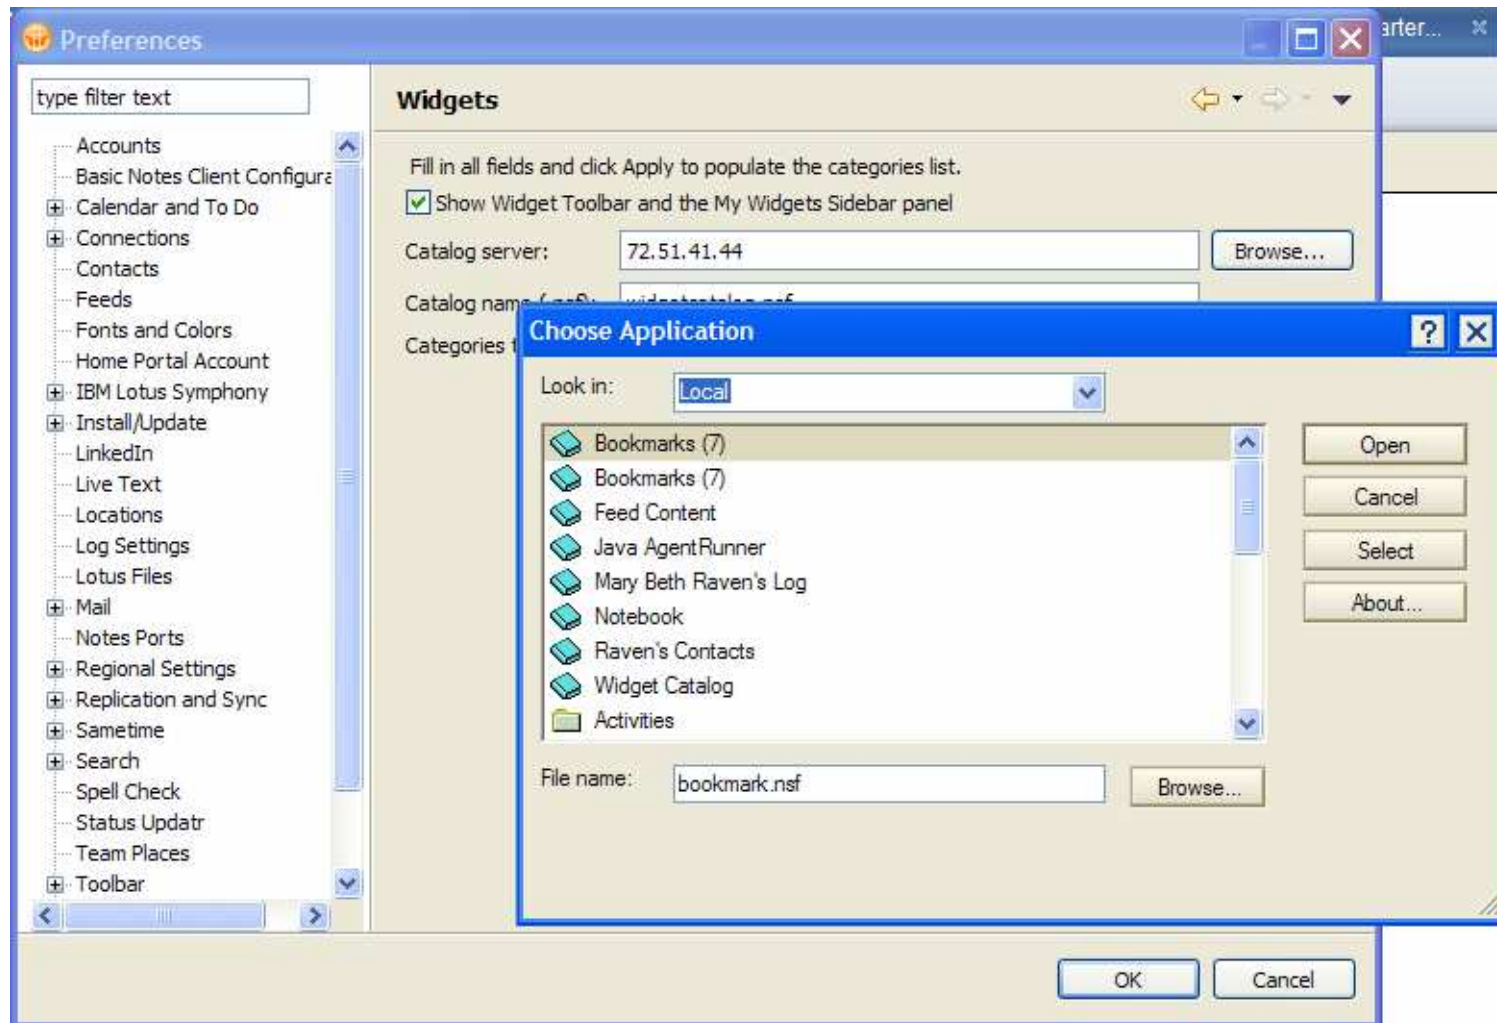

OK Cancel

No replication/sync in progress

Last replication/sync ran at 09:30 PM Today, next replication/sync

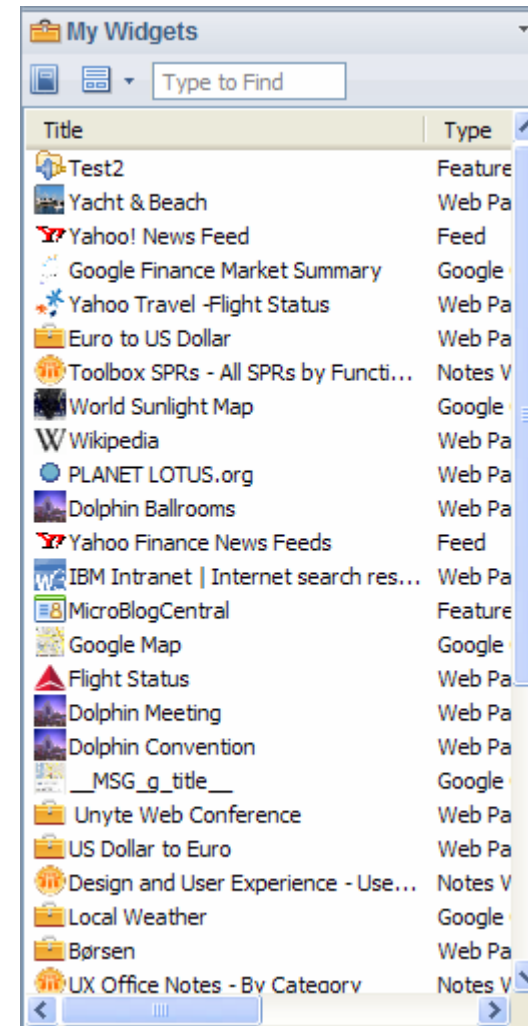

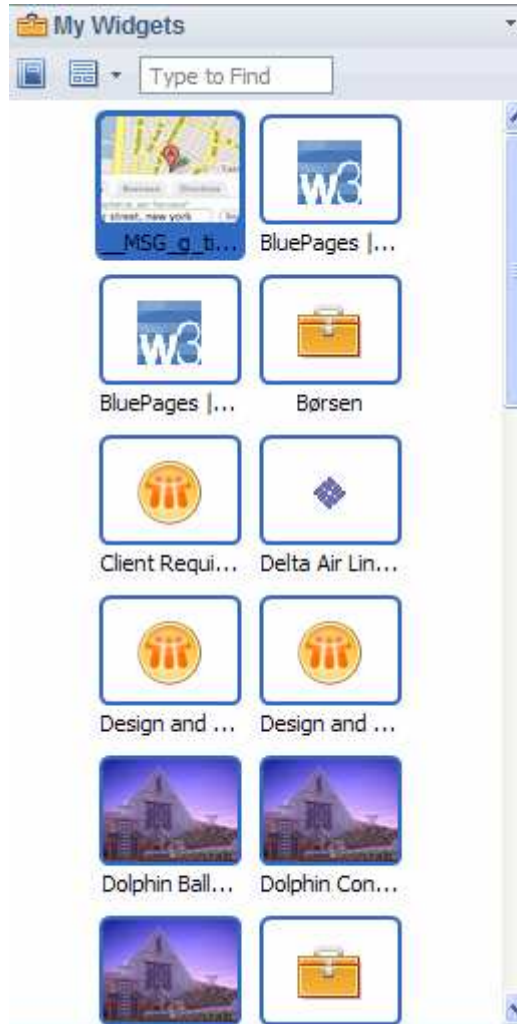

Widgets: Browse Feature in Preferences

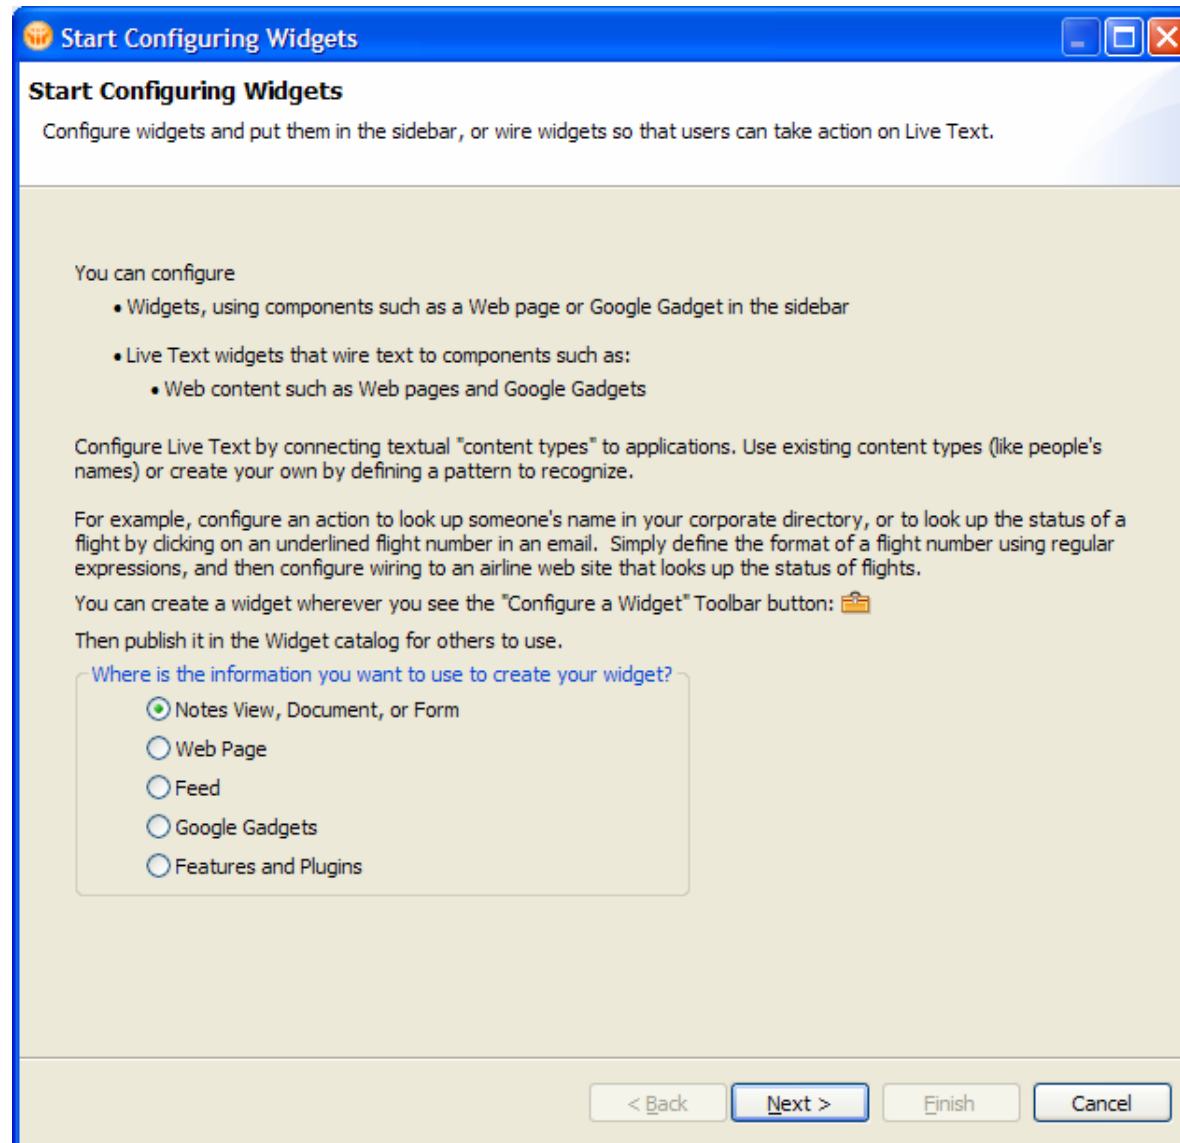

Widgets: New Toolbar in the My Widgets Sidebar Panel

Widgets: New Option on this Wizard

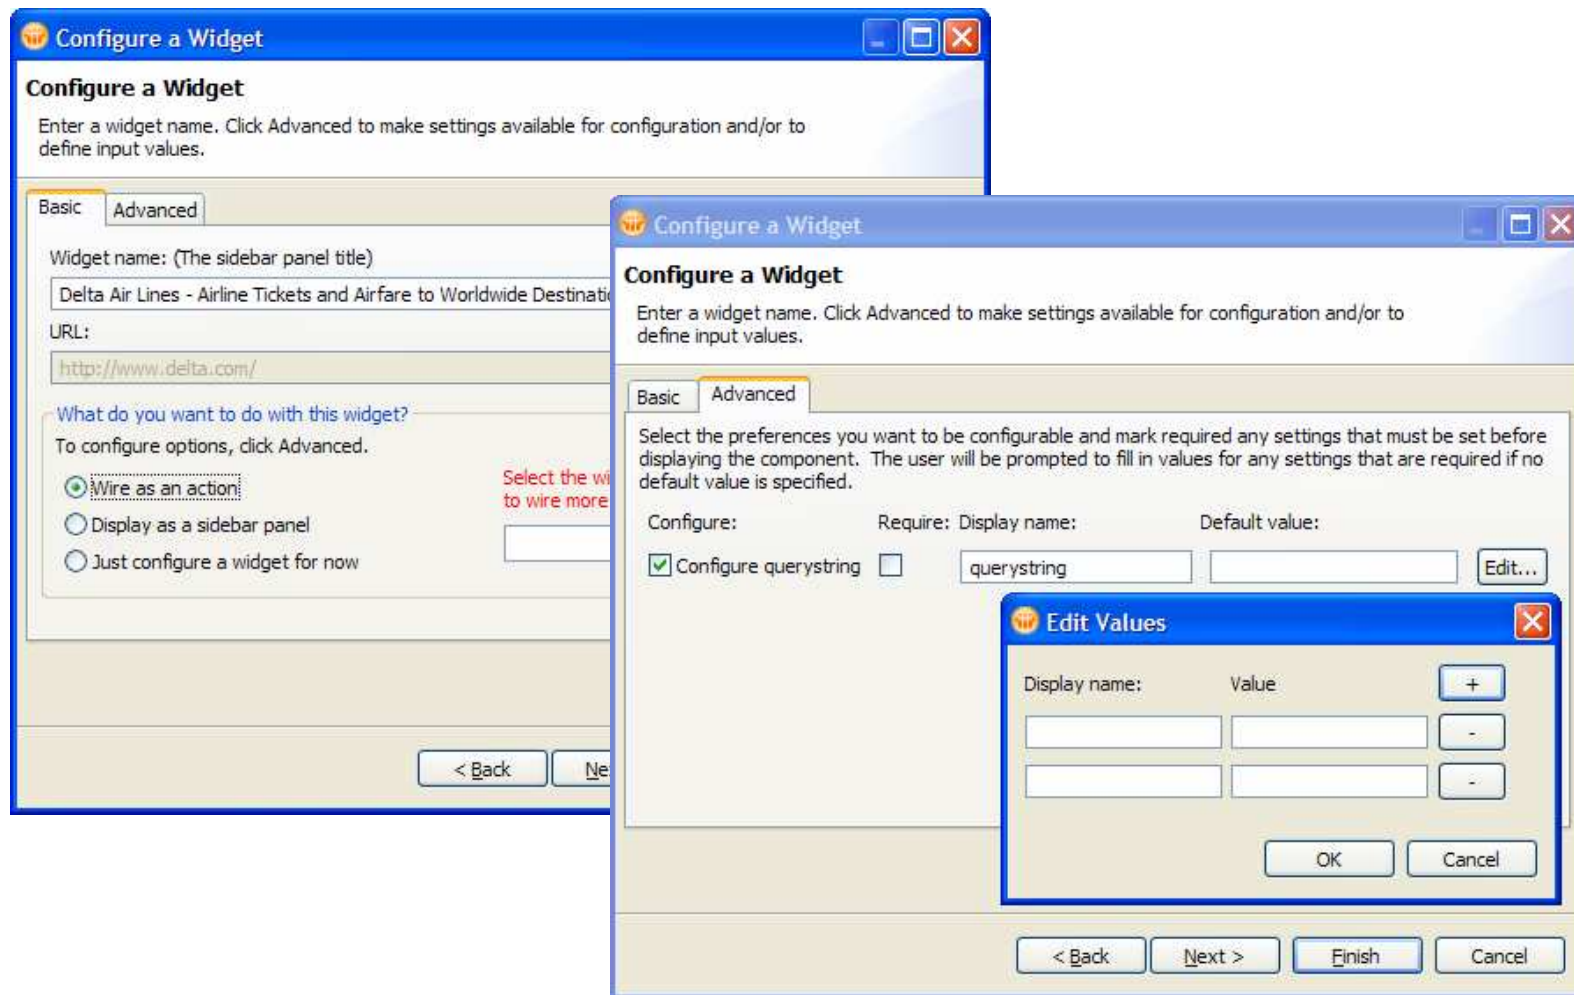

Widgets: More Options for Notes Applications

The screenshot shows a dialog box titled "Configure a widget from Notes" with the instruction "Select an option to configure a Notes Widget". The dialog has several radio button options: "Perform a full text search on this Notes view:" (selected), "Open this view", "Open this frameset", "Open document by key in this view", and "Open Notes object". Under the selected option, there are three checkboxes: "Show Search Bar", "Show Navigator", and "Add as an engine to the Search Center". A yellow callout bubble points to the "Add as an engine to the Search Center" checkbox with the text "Easily add any Notes Application to the Search Center!".

Overlaid on the right side of the dialog is a search center dropdown menu. The menu lists various search engines and sources, including "All Documents", "All Mail", "All Calendar", "All Contacts", "Design and User Experience - Guidelines/...", "Profiles", "Bookmarks", "Blogs", "Communities", "Activities", "Google Web Search", "w3", "Recent Searches", "More Searches", and "Preferences...". A yellow callout bubble points to the "Design and User Experience - Guidelines/..." option with the text "Choice is always there!".

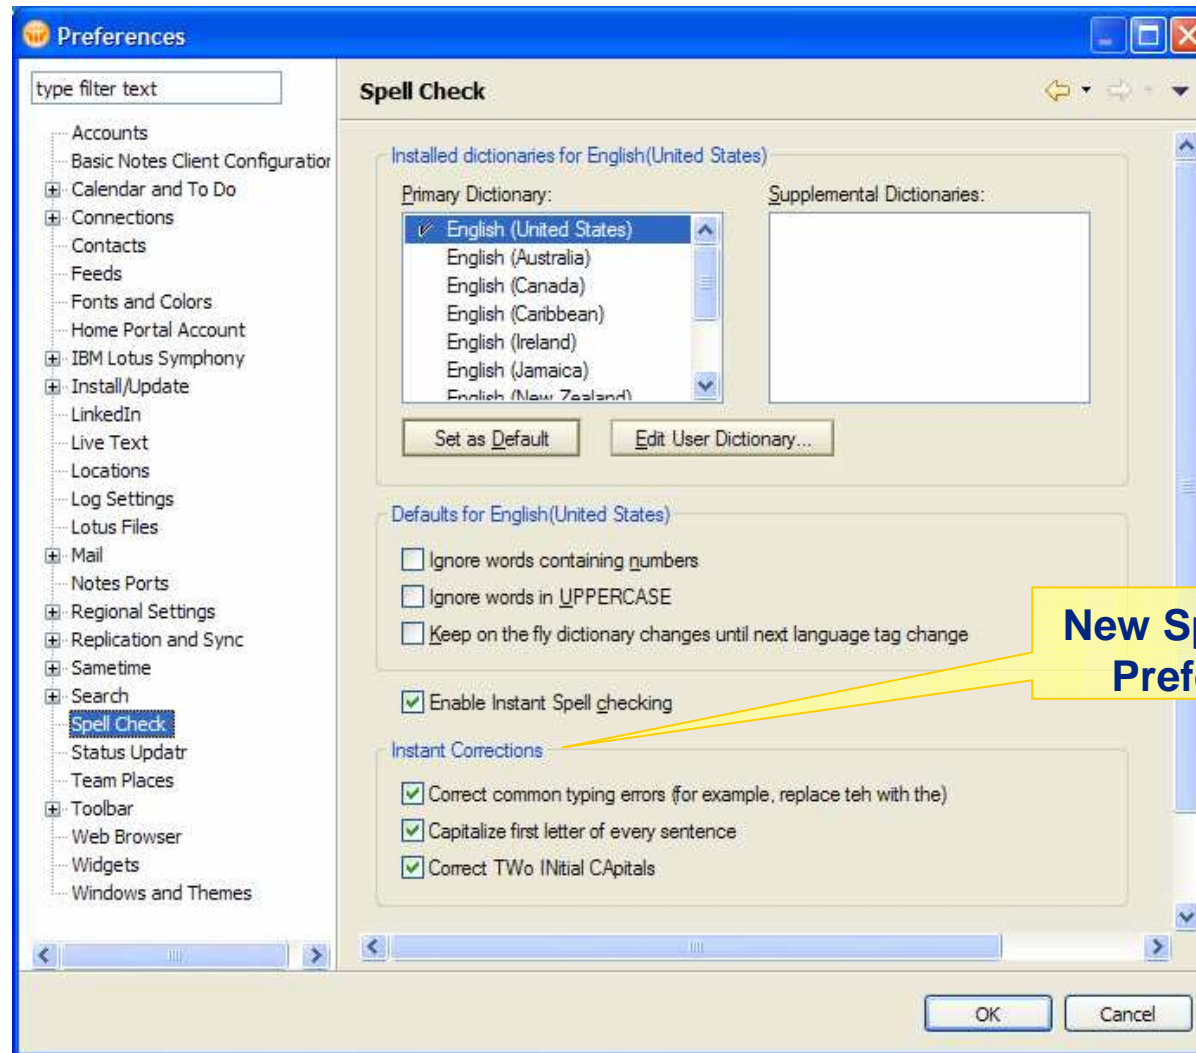

Widgets: Wizard Improvements

Spell Check

General

- More multi-tasking:
 - ▶ Start a task in Notes and still use:
 - Sametime chat
 - Embedded browser
 - ▶ Sametime chat from the sidebar or use the embedded browser while
 - Opening a Notes application
 - Clicking a Notes document link that another user has sent you
 - Starting to search a view
- KeyView has been upgraded to version 10.8
 - ▶ Improves viewing and importing
 - ▶ Addresses security and filtering issues
