

CDS09 Customized Workshops

Highlights

We offer Customized Workshops to meet your education needs regarding the CICS Family of products. These workshops are staffed by senior CICS developers and can be run either at your location, or at an IBM location that meets with your preference.

Whether you need education on the traditional features and design of CICS, or on the newer additions to the CICS Family, we can offer customized workshops to match your needs in all CICS-related areas.

Example Workshops

- CICS Transaction Server existing and new features
- CICS Web 2.0, PHP scripting and Atom Feed exploitation in modern situational applications
- Using The CICS Explorer (includes hands on lab exercises)
- Using CICS tools such as CICS Performance Analyzer, CICS Interdependency Analyzer and CICS Configuration Manager
- Web services enablement and exploitation (including Rational Developer for z)
- Event Processing, introduction, deploying Event Bundles, writing custom adapters, capture point analysis (includes hands-on exercises)
- Connectivity options, enhancements and implementing IP connections
- CICS Transaction Gateway features and exploitation
- Using CICS with WebSphere Application Server and WebSphere MQ in a High Availability environment

Delivery

Workshops can be run at your location or an IBM location of your choice.

CICS Development Technical Services

Benefits

- Learn from teachers from the CICS development organization in IBM
- Improve your knowledge in CICS related areas to better support your business
- Learn how to exploit existing and new CICS TS and CICS Family features

Prerequisites

For IBM to perform this service you must have your CICS technical staff available to work with our IBM CICS services specialists and developers to define the content of the customized workshop.

The prerequisites listed may not contain all of the requirements for this service. For a complete list of prerequisites, consult your sales representative.
