IBM WebSphere CICS Transaction Server software seminar
Tuesday 29 November at IBM at Bedfont Lakes

RESERVE YOUR PLACE TODAY

At the heart of a flexible IT environment is a service-oriented architecture (SOA). IBM's latest technology offerings leverage a SOA to help you get more out of your existing IT resources. Join us on Tuesday 29 November at IBM at Bedfont Lakes to find out more. This detailed technical briefing seminar will explore IBM WebSphere Customer Information Control System (CICS) Transaction Server for z/OS V3.1. Plus learn how new Web Services technology for CICS can extend transaction resources to:

- Leverage existing enterprise skills and improve developer productivity
- Transform business critical legacy processes into reusable, sharable business components
- Improve performance and system management through simplified administration.

Agenda
