# Presentation of Links

- This presentation provides a 'portal' to more information on the CICS ecosystem
- All the resources featured in this presentation have hyperlinks to the source
- This will be an evolving document, with refreshes distributed every few months
- To receive these refreshes, please email me at [batesan@cn.ibm.com](mailto:batesan@cn.ibm.com)
- The below key has been used to flag certain resources
  -  New resource created since the last issue
  -  Updated resource since the last issue
  -  Additional resource added since last issue
- Resources that have been removed since the last refresh are listed in a table at the back

## CICS Transaction Server for z/OS V4.1

**Overview**

CICS Transaction Server for z/OS v4.1 is a modern, dependable, and cost effective application platform.

This version brings new levels of ease-of-use and flexibility to meet the needs of the next generation of business users. It will assist its users in their activities directed at:

- Competing for new opportunities by gaining insight into business processes and responding by modifying key business applications quickly and with confidence. [Business flexibility](#): Making it easier to create, extend, and reuse applications quickly, to meet changing business needs
- Complying with corporate, industry and government policies to manage business risk of critical business applications. [Governance and compliance](#): Ensuring, and demonstrating, effective management control over business applications and IT facilities
- Controlling costs by simplifying IT infrastructure and improving development and operations productivity through easier-to-use interfaces and functions. [IT simplification](#): Helping IT staff to perform their tasks more effectively, while assuming a mix of skill levels
- New technologies can enable businesses to respond quickly and effectively, allowing them to capture emerging opportunities as markets recover. CICS TS v4.1 will deliver important new function to help businesses meet the demands of increased regulatory scrutiny, address changing demographics, and position themselves to take advantage of new growth opportunities

## CICS Explorer

**Overview**

IBM CICS Explorer - New Face of CICS. Integration point for CICS tooling with rich CICS views, data, methods.

Looking for new ways to accelerate the transfer of knowledge, skills, and best practice to the next generation of technical staff/experts? Need to maintain productivity and protect service-levels? CICS Explorer and System z lead the way to platform simplification.

**Learn more**

**Highlights**

- Common, intuitive, Eclipse-based environment for architects, developers, administrators, system programmers, and operators
- Task-oriented views provide integrated access to broad range of data and control capabilities
- Powerful, context-sensitive resource editors
- Now packaged with [Rational Developer for System z V7.5](#)
- Integration point for CICS TS, CICS Tools, CICS TS, PD Tools, and Rational Tools
- Extendable by ISVs, SIs, and customers using our Software Development Kit now available in [SupportPac C315](#)
- CICS Transaction Server for z/OS V3.1, V3.2. CICSplex SM WUI server required for CICS resource views
- Available Now! [Download CICS Explorer and try it today!](#)
