## Installing Debug Tool Plug-in for Eclipse V10.1.0.0 into CICS Explorer

The following steps are required in order to install the Debug Tool Plug-in for Eclipse V10.1.0.0 into CICS explorer.

1. Extract all the contents of cn0d.zip to any writable directory of your choice, for example, C:/DebugTool.
2. Start CICS Explorer.
3. In the action bar click "Help" -> "Software Updates".
4. Click "Available Software".
5. Click "Add Site".
6. Click "Local".
7. Navigate to the directory storing the extracted files.
8. Click "OK".
9. Click "OK".
10. CICS Explorer displays a list of features you can install. Select the "Debug Tool Plugin" check box.
11. Click "Install".
12. Click "Next".
13. Accept the feature license agreement and click "Finish".
14. CICS Explorer installs the Debug Tool Plug-in for Eclipse V10.1.0.0. You will be asked if you want to restart CICS Explorer. Click "Yes".

After CICS Explorer restarts, read "Getting Started Using Debug Tool Plug-in for Eclipse V10.1.0.0" for instructions on how to display the "Getting Started" help topic, which has instructions on how to start debugging your applications.

## Technical Support

This SupportPac is available at no charge to all licensed users of IBM Debug Tool for z/OS V9, or later. It is supplied under the standard terms and conditions of the IBM International Program License Agreement (IPLA) and of the associated License Information and other documentation, and provides a defect correction entitlement for those licensed users entitled to service for IBM Debug Tool for z/OS V9, or later. Service is available for this SupportPac for as long as the IBM Debug Tool for z/OS product with which the SupportPac is to be used is generally supported by IBM. In addition, IBM reserves the right to discontinue service on this SupportPac when it is withdrawn from marketing by IBM. Please reference "IBM Debug Tool for z/OS" as the entitled product when contacting IBM and requesting support for this SupportPac.
