

5.0 June, 2000 PTF Pak - 000650

30 June 2000

To All ICMS Technical Support Personnel:

This document contains a summary of the PTFs that are being shipped for ICMS Release 5.0 in the fifth 5.0 PTF Pak, Jun-00 (000650). The Pak has been tested in a customer test environment to ensure that you are receiving a quality product.

This PTF Pak has been compiled from a number of separate PTFs. These were developed as fixes to problems that have been identified from customers, and projects

Please note PTFs should be installed into the library ICMSPTF. If you have installed an individual PTF, received after the previous 5.0 PTF Pak has been installed, then you must determine whether or not it, and/or any of its pre-requisites, need to be reapplied after you have installed this Pak.

Fix Distribution Process

The Fix distribution process for PTFs and PTF Paks is as follows.

- ?? Problem reported by a Geography L2 on behalf of a customer.
- ?? Problem resolved, tested and inspected.
- ?? PTF sent to the reporting Geography L2 together with information on any pre-requisite PTFs
- ?? The Geography L2 sends the PTF to the customer. Any changes for customer specific objects must be made prior to the PTF installation.
- ?? The Monthly PTF Pak is built from all PTFs sent to Geography L2s in the previous month, tested and sent to all Geography L2s.
- ?? The Geography L2 sends the Monthly PTF Pak to customers. Any changes for customer specific objects must be made prior to the PTF installation.

5.0 Jun-00 PTF Pak Contents

The Pak is made up of the following individual PTFs developed from 3 May to 26 June 2000.

This 5.0 PTF Pak includes, in addition to a number of individual PTFs, some 'Sysroute' PTFs (a 'resync' of an error from a lower release of ICMS), as a result of an initiative undertaken to speed up the fixing of errors, found at lower releases, in 5.0P. To assist in this individual items were grouped together by object, so that in some cases a number of items were 'Sysrouted' into 5.0P under one of them. These are included with the individual PTFs in the table below. PTFs in this Pak that are a result of 'Sysroute' activity can be identified by the term 'Sysroute' in the Description

Distn #	Objects	Description
309913	HS5090	SC31510 - Sysroute - Home State must be entered or invalid error message appeared
309895	BL4084	SC31512 - Downgrade selection edit/post falls over when there are no services for the selected account.
309892	CP2705 CP2805 CP2809	SC31482 - MSPPP - Most Used discounts always uses Charge Amount.
309873	MS1010	SC31485 - No records displayed when inquiring on Interactive Upgrades/Downgrades, but active services exist.
309868	BL4070	SC31458 - Billing of Temporary S&Es for Disconnected Service
309866	MS0554	SC31453 - Directory Listing Code not shown on WWC screen
309865	TX7500	SC31476 - Online Tax Calculator is experiencing random errors
309851	AA9010	SC31471 - Unable to reschedule service order via option 14 if order is in AA stage.
309847	CP2705 CP2805 CP2811	SC31438 - Usage Qualification Validation for Package Plan dumps when called from Call Rating
309843	DL0200 SV0001	SC31432 - When creating a temporary connection service order, the disconnect side service order stages to the second stage instead of the first.
309841	BL4070	SC31431 - Account level item, prorate no, being credited back 1 month instead of billed normally for 1 month
309835	BL4070B	SC31423 - S&E Items that are 100% Discounted are only getting the Tax Exclusive Amount written to the SC/SS Record, which results in Statement Validation errors.
309824	BL4070	SC31411 - ProRate No Items should not receive Credits, when Outed.
309818	CP2705 CP2711 CP2719 CP2805	309818 SC31409 - Sysroute - MSPPP - Major-Minor Discount Per Event Wrong Calculation for negative amounts 309849 SC31439 - Graduated per event discount is not being calculated correctly.
309801	HS5021 HS5023	SC31402 - Incorrect processing of disconnect option, disconnect and pick-up detail not written
309799	CL0520 HS5003	SC31470 - Salesman Tracking
309795	BL2044	SC31500 - Sysroute - Service Number Retrieval Errors (BN/DE)

Distn #	Objects	Description
309794	CM1501	SC31390 - Line Test Result Display fails
309780	CP2705 CP2724 CP2725 CP2805 CP2811	SC31385 - MSPPP Pre-processor not enrolling some services.
309780	CP2705 CP2724 CP2725 CP2805 CP2811	SC31385 - MSPPP Pre-processor not enrolling some services.
309773	GF2001	SC31374 - Statement Mismatches resulting from the Generic Feed Process not calculating Tax correctly on Transaction, where there is more than one S&E Item specified on the Generic Feed Interface File.
309772	CM2809W3 CP2705 CP2805 CP2809 CP2810	SC31375 - Sysroute - MSPPP package based on Most Used Access Numbers inconsistent against the business perspective
309758	MS5501 MS5502 MS5503	SC31372 - Sysroute - Salesman tracking fixes did not cover upgrades/downgrade
309757	SV0120	SC31352 - ISR Date not recalculated even if parameter is set to 'Y' to recalculate it
309747	SV0001	SC31334 - Users are allowed to do S/O linecard maintenance even if they have no authority defined in the Access Authority Maintenance.
309725	MS5500 MS5500DF	SC31302 - Send hit button available when services do not require hits to be sent.
309724	AI2000 BL2101 LE0300 PL2868A	SC31347 - Sysroute - Month name of May is longer than 3 characters for certain reports
309707	HS5022	SC31298 - Provisioned location retrieved.
309706	HS2507	SC31373 - Sysroute - Service Order Post Exception Report says, "Package missing" but S&E are not part of a package.
309703	BL0399CLU	SC31296 - International Data Maintenance crashes with error message
309701	TX6300CL TX6500CLT TX7500 XXTAXT00 XXTAXT01 XXTRAN00 XXTRAN04	SC31292 - Tax Calculator is looping.
309696	TX6000	SC31291 - Tax is being double rounded; by Rounding Adjustment, then again by Currency Converter.
309689	AA3120	SC31498 - Connection to Mediation device dropping
309675	CL0500	Session or device error occurred when entering a cellular service order
309674	SV0001	SC31267 - A S/O with a type that has a default stage path setup skips the first stage and is staged to the second stage.
309673	BL2531 BL5038 BL5038FM	SC31282 - Online Aging Screen error
309672	BL3102 BL3102FM	SC31284 - Address Scroll returns back to WWC
309671	DB0719 DB0719FM	SC31268 - The S/O Entry Defaults do not refer to the Listing Codes File for valid Listing Codes.
309669	SR0022 CL0660 CL0661	SC31348 - Sysroute - Character date formats are always in DMY format
309662	XX0210	SC31260 - The T1, T9 records on the sorted Statement

ICMS Product Service and Support

Distn #	Objects	Description
		file (BLSTNF00) have got the first 13 characters of sort key in them
309656	CE0708 ICMSMSGF WF0511 WF0521	SC31276 - Franchise/Division relationship in WFM Files not in synch with Franchise Master File
309646	MS0551 MS0552 MS0554	SC31243 - When an active GS service is attached to a directory listing code the WWC screen is not showing the listing code for that GS service.
309642	PL1871A	SC31353 - Sysroute - Block Type Code Listing always prints date in DMY format
309633	BL4070 CL2501 CL2507	SC31204 - Billing run dumps on Rate Retrieval of an S&E Item, which is an "Active" Item, but the Service has been Disconnected.
309627	SR0022	SC31299 - Sysroute - ICMS Reports not using abbreviation for month of May
309618	ICMSMSGF	SC31351 - Sysroute - Incorrect warning message on Master Linecard Maintenance - Exchange screen
309614	WF2610	SC31356 - Sysroute - Initial date value always in *DMY format
309595	CL0520	SC31134 - Wireless S/O Entry - F3 on screen MS0551 functionality regression
309589	BL2007	SC31324 - Call Type Group not populated on the T1 Record
309582	CE0093	SC31103 - Users cannot add any Customer Contact details.
309577	CE0285	SC31091 - Account merge locks user out of system
309574	PL0141	SC31357 - Sysroute -The EN status is not correct after online changes for DDI service order.
309567	AI2000	SC31315 - Sysroute - Incorrect Adjustments and Transfers amount in Customer Summary report.
309565	PL0892 PL0232 ICMSMSGF	SC31139 - Sysroute - When entering a terminal pair profile only the first switch is checked within an exchange
309555	PL4410	SC31072 - Sysroute - The disconnect date on a linecard is not printed correctly when the connect and disconnect date are the same
309525	CP2705 CP2711 CP2805	SC31370 - the Most used qualification program is called prior to the calculation of charge amount
309524	XX5012	SC31052 - Sysroute - SC30911-Plant linecard memo not copied into service order linecard memo.
309514	PL0878	SC31349 - Sysroute - Service order linecard template memo not loaded on subsequent service orders in a service request that contains the multiple service orders.
309503	PL1869A FX309503 FX309503CL FX309503DF FX3503P1	SC31350 - Sysroute - Bulk SAM change does not update SUBXTL records correctly after Change Number S/O
309478	CL0010 CL0011 CL0520	SC31396 - Sysroute - Equipment Prepackaging does not work for Analogue Cellphones
309476	BL0100	SC31362 - Sysroute - Cable Pairs can be dedicated to one or more SAM address.
309471	BL6911	SC30872 - Sysroute - The Billing General Ledger Interface report does not balance
309465	CP0571	SC31029 - Sysroute - MSPPP problem with package

Y2K Related Items

There are no items in this Pak designated as Y2K related fixes.

New Function

As per our policy of not putting Functional Enhancements into PTFs, there are none in this PTF Pak.

Installation Instructions

For full details on how to install a PTF Pak please refer to the '*ICMS Product Support User Guide & Utilities Manual*', a copy of which can be obtained from your Geography L2.

Pre-Requisites

The following PTFs and Paks must be installed, in the following order, prior to the installation of the Jun-00 PTF Pak:

?? 000450 Apr-00 PTF Pak.

Database File Changes

The DDS for the following database file or datastructure changes were shipped in this PTF Pak. An up to date copy of ICMSFREF can be found in savefile RI50000650.

PTF	File(s)	Comments
309701	XXTAXT00 XXTAXT01 XXTRAN00 XXTRAN04	A/R and A/R Tax Transaction Files for Online Tax Calculator
309361	PLALCM	The Message Sequence Line No Field (ALMMLN) in the file PLALCM is increased from 3 digits to 6 digits in length.
308805	CM2809W0 CM2809W1 CM2809W2 CM2809W3	These temporary MSPPP workfiles have been changed to include the International ISD Group Code 1 field.
308783	CPREPL00 CPREPL01	New logical file created for Call Processing report printing.
307305	BL0040W1 CT810000 DATAQWF QSPL132 XSPOOL	Record/Field Lengths for these files increased to 200. Note the file DATAQWF is only used for compiling the program XX9007. It should only exist in a compile library. Create instructions: CRTPF FILE(*CLIB/DATAQWF) RCDLEN(200) + IGCDTA(*YES) SIZE(*NOMAX) AUT(*ALL) Where *CLIB = your site's compile library name.
307221	CDTRDT00 CDTRDT01 CDTRDT02 CDTRDT03	A new field (CCEXPD) is added to store the Credit Card Expiry Date.
306333	PLRELL15	New logical file (sequence by exchange, then number) to assist in finding numbers on the National Number Scroll.

File Content Changes

The method by which the content of the Process Control files is changed has itself been changed. Previously these were done using the Copy File Add or Copy File Replace approach which had inherent disadvantages in that, without the appropriate checks being done, data could be lost from a file that was specific to the user's site, and in some cases, a duplicate record could be added.

The approach now is to use a datafix that can be run in either Report or Update mode.

- ?? In Report mode, the datafix will provide a report showing whether records, in the Control File, need to be updated or added, but will not perform the update.
- ?? In Update mode the datafix will perform the update, or addition, of records in the Control file and provide a report detailing the changes

The recommended approach is for the datafix to be run in Report mode first. After that the user can make the decision, based on the report provided, whether to run the datafix in Update mode or not. Please also refer to the Post Install Implementation Instructions contained in the PTF Pak Documentation savefile I150000650 for more details.

Distn #	Objects	File	Comments
309150	FX309150 FX309150CL FX309150DF FX3150P1	MSXREF00	Records are added to the Program Access Cross-Reference file, MSXREF00 to ensure the MSPPP transfer program is called for CT Service Orders.
309064	FX3064P1 FX309064 FX309064CL FX309064DF	MSXREF00	Records are added to the Program Access Cross Reference file, MSXREF00 to ensure the Directory Post and MSPPP Post are called for TX Service Orders during Service Order Post
308619	FX308619 FX308619CL FX308619DF FX38619P	SRDETT00	HH0360DF/L\$F011 record added to the Soft Coded Literals file. It will be used to display the literal for the Estate field on the Premises Generic Address selection screen
308278	FX308278 FX308278CL FX308278DF FX38278P	SYPRCX00	This new record will be used to determine if S&E items that have not been changed will be sent as part of an auto activation group
3080188	FX308088 FX308088CL FX308088DF FX38088P	SYPRCX00	This new record will be used to determine what date the Equal Access Effective Date uses; Either The Service Order Effective Completion Date or Actual Completion Date (run flag = Y). Or The Service Order Issue Date or Due Date (run flag = N).
307218	FX307218 FX307218CL FX307218DF FX307218P1	MSXREF00	Record added to the Program Access Cross-Reference file, MSXREF00 to assist in the retrieval CATV Customers' addresses.
306182	FX306182 FX306182CL FX306182DF FX306182P1	MSXREF00	Records added to the Program Access Cross-Reference File, MSXREF00 to activate the function that updates the S&E files.

Conversions or Datafixes

The standard practice for conversions or datafixes is that they can be run in either Report or Update mode.

?? In Report mode, the conversion/datafix will provide a report showing what records, if any, in the affected file(s), need to be updated, but will not perform the update.

?? In Update mode the conversion/datafix will perform the update of the records in the affected files(s) and provide a report detailing the changes

The recommended approach is for the datafix to be run in Report mode first. After that the user can make the decision, based on the report provided, whether to run the datafix in Update mode or not. Please also refer to the Post Install Implementation Instructions contained in the PTF Pak Documentation savefile II50000650 for more details.

Distn #	Objects	Comments
309503	FX309503 FX309503CL FX309503DF FX3503P1	As a result of a Bulk SAM change, there may be records in the SAM Extension file (SUBXTL00) that may have an incorrect SAM Address. This datafix will ensure that all records in file SUBXTL00 will have the correct SAM address by using the address from the Service Master file BLSUBI00 to update SUBXTL00, when necessary
308976	FX308976 FX308976CL FX308976DF FX308976P1	This datafix will change the status of the Closed Service Requests, with Open Service Orders, will be changed to 'Open' in the Service Request Details file PRDETL00.
308345	FX308345 FX308345CL FX308345DF FX3345P1	As a result of Linecard maintenance the century part of the dates have been populated incorrectly on three files, <ol style="list-style-type: none"> 1. Linecard Transaction Miscellaneous Switch/EN file (PLHMSW00), 2. Plant Linecard Miscellaneous Parameter History File (PLMISH00), and 3. Plant Linecard Special Numbers History File (PLSNEH00). This datafix will correct the dates.
307442	FX307442 FX307442P F307442CL F307442DF	Conversion to change the Entity Code to allow room for the classification in the Service code Network Independent file (DBG SRL00) and the Network Independent Entity File (DBG SEN00).

Other Details

The Pak should be installed in its entirety. You cannot choose individual objects from within it and install these only. The only exception is the updating of any Content File changes as detailed above.

Feedback

If you have any issues with this PTF Pak, or suggestions for improving the process please send it via Notes E-mail to “**ICMSU Support/New Zealand/IBM@IBMNZ**”, or Internet Id “**ICMSUSUP@nz1.ibm.com**”. Please use the problem reporting process for any ICMS product problems.

Regards,

Debbie Compton
Product Support Manager
