

IBM Software Group | Lotus Expeditor 6.1.1 Education

IBM® Lotus® Expeditor

Getting started

Lotus software

@ business on demand software

© 2007 IBM Corporation

This presentation explains how to get started with IBM Lotus Expeditor

Goals and agenda

- Web Sites
- Documentation
- Information roadmap
- Workshops

The goal of this presentation is to understand how to get started with IBM Lotus Expeditor. It covers the resources available to help you get started, such as Web sites, documentation, information roadmap and workshops for IBM Lotus Expeditor.

IBM Lotus Expeditor Web sites

- Lotus Expeditor family
 - ▶ http://www.ibm.com/software/sw-lotus/lotus_expeditor
 - ▶ Lotus Expeditor
 - ▶ Lotus Expeditor Client for Desktop
 - ▶ Lotus Expeditor Client for Devices
 - ▶ Lotus Expeditor Toolkit
 - ▶ Lotus Expeditor Server
- Lotus Expeditor support
 - ▶ <http://www.ibm.com/software/lotus/expeditor/support>
 - ▶ Problem submission
 - ▶ Product documentation
- Lotus Expeditor information center
 - ▶ <http://publib.boulder.ibm.com/infocenter/ledoc/v6r11/index.jsp>
- IBM Education Assistant for Lotus Expeditor
 - ▶ <http://www.ibm.com/software/info/education/assistant>

Here are the public Web sites for IBM Lotus Expeditor. Go to these sites for information and other useful Web links.

IBM Lotus Expeditor documentation

- Documentation is installed as an Eclipse help system during product install
 - ▶ A PDF version is also available on the CD and in the help
- Developing Lotus Expeditor applications
 - ▶ Application_Developers_Guide.pdf
 - ▶ Installed with the IBM Lotus Expeditor Toolkit
 - ▶ Provides information to help developers create applications for deployment to the Lotus Expeditor Client
- Using Lotus Expeditor
 - ▶ Users_Guide.pdf
 - ▶ Installed with the IBM Lotus Expeditor Client
 - ▶ Provides end user information, such as navigating the Workbench interface, installing applications, and submitting service requests
- Assembling and deploying Lotus Expeditor applications
 - ▶ System_Admin_Guide.pdf
 - ▶ Installed with the IBM Lotus Expeditor Toolkit
 - ▶ Provides system administration information, such as assembling plug-ins into Eclipse features, and deploying application solutions.
- Lotus Expeditor information center
 - ▶ <http://publib.boulder.ibm.com/infocenter/ledoc/v6r11/index.jsp>
 - ▶ Provides all of the Lotus Expeditor documentation in one information center on the Web

Documentation is installed as an Eclipse help system when you install the product. In addition, a PDF version is available on the CD and in the help. The Developing Lotus Expeditor Applications documentation is installed with the toolkit and provides information to help developers create applications for deployment to the Lotus Expeditor Client.

The Using Lotus Expeditor documentation is installed with the Client and provides end user information, such as navigating the workbench interface, installing applications, and submitting service requests.

The Assembling and Deploying Lotus Expeditor Applications documentation provides system administration information, such as assembling plug-ins into Eclipse features, and deploying application solutions.

You can view this documentation, and documentation about the Lotus Expeditor Server, in the on-line information center at the URL provided on this slide.

Information roadmap – IBM Lotus Expeditor Client

User Role	Documentation
Web developer	Developers guide: "Developing Web applications"
Portlet developer	Developers guide: "Developing portlet applications"
Composite application developer	Developers guide: Developing composite applications"
Enterprise bean developer	Developers guide: "Developing embedded transaction applications"
User interface developer	Developers guide: "Developing the application user interface"
Synchronization developer	Developers guide "Developing synchronization applications"
Platform provider	Developers guide: "Creating client runtime images"
Application integrator	System administrators guide
Solution deployer	System administrators guide
End user	Users guide

The information roadmap shown on this slide provides a list of appropriate documentation for a variety of different user roles and tasks supported by the client.

Information roadmap – IBM Lotus Expeditor 6.1 Client

Common Services	Documentation
Messaging	Developers guide: "Developing messaging applications"
Database access	Developers guide: "Developing data access applications"
Synchronization	Developers guide: "Developing synchronization applications"
Network awareness	Developers guide: "Developing network awareness applications"
Serviceability	Developers guide: "Developing for serviceability"
Wired applications	Developers guide: "Developing wired applications"
Rich client applications including eRCP applications	Developers guide: "Developing rich client applications"
Management services	Developers guide: "Developing management applications"
Securing applications	Developers guide: "Securing applications and data"
Developing for Desktop and Device	Developers guide: "Cross platform API's"
Web services	Developers guide: "Developing Web services"

The information roadmap shown on this slide continues from the previous slide to provide a list of appropriate documentation for a variety of different user roles and tasks supported by the client.

Information roadmap – IBM Lotus Expeditor 6.1 Server

User Role	Documentation
System administrator	Information center for Lotus Expeditor

The information roadmap shown on this slide provides a list of appropriate documentation for the server.

Workshops and downloads

- Lotus Expeditor workshops
 - ▶ For information go to
http://www.ibm.com/software/sw-lotus/lotus_expeditor
- Lotus Expeditor samples and utilities download
 - ▶ For information go to
<https://www.ibm.com/developerworks/lotus/products/expeditor>

There are workshops available for Lotus Expeditor throughout the world. Follow the Web link to see the current schedule including any updates to these schedules.

There are also Lotus Expeditor samples and utilities available for download. Follow the Web link to see the available downloads.

Feedback

Your feedback is valuable

You can help improve the quality of IBM Education Assistant content to better meet your needs by providing feedback.

- Did you find this module useful?
- Did it help you solve a problem or answer a question?
- Do you have suggestions for improvements?

Click to send e-mail feedback:

U.S.A.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.
