IBM India/SA

Smarter Cities.....

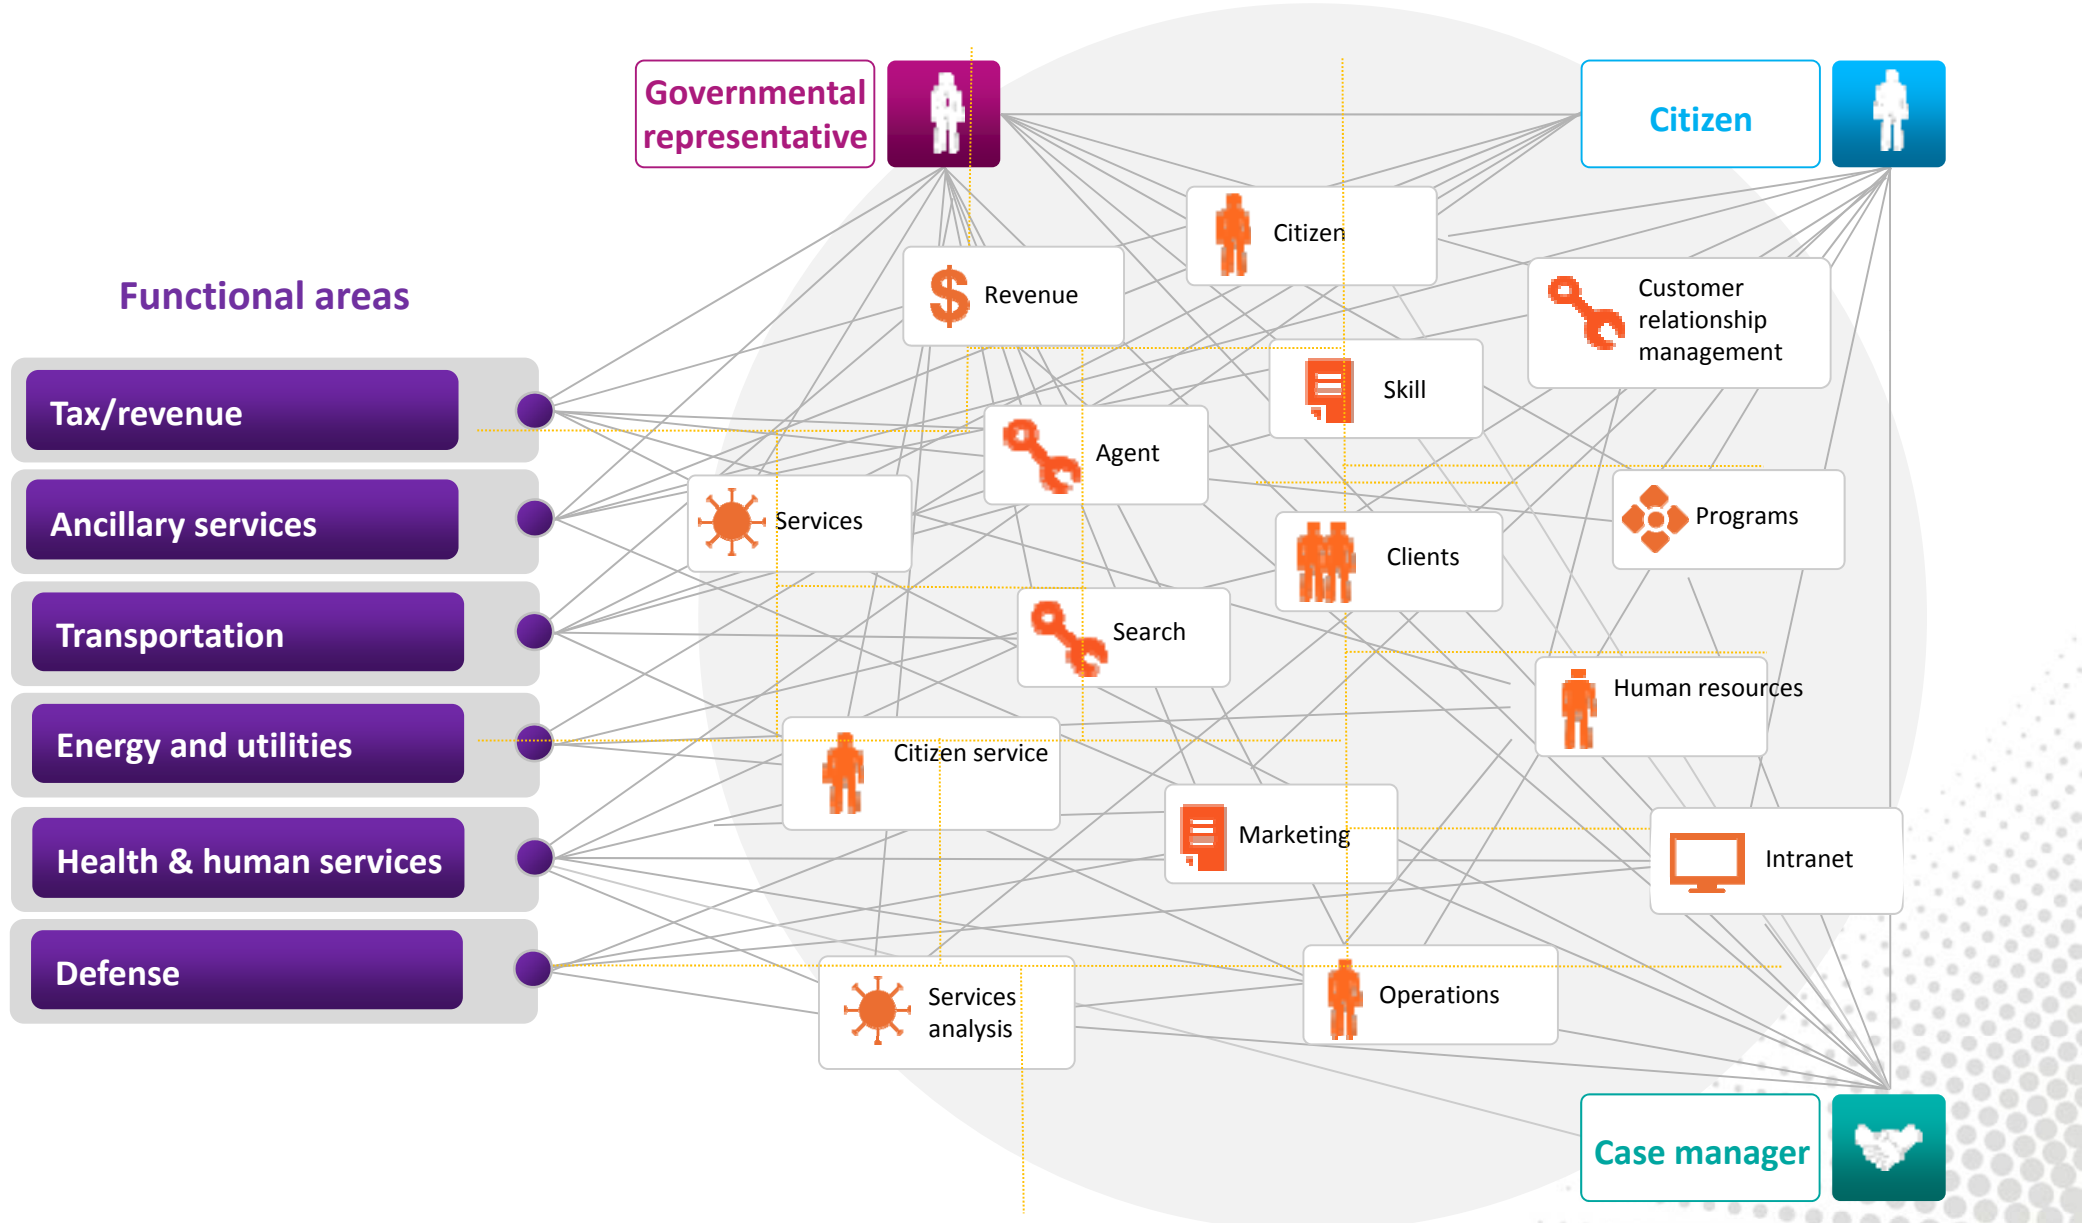

- Delivering BI for Business Value
- Advance Case Management
- IBM Industry Solutions: Helping Governments help citizens & businesses

• **Connect & Collaborate**

- Data Reduction and Storage Management Transformation
- Acquiring a Single View of Citizen
- Scalable Application Infrastructure for Citizen Centric Services
- Smarter Governance

Communication barriers abound; information overload is rampant

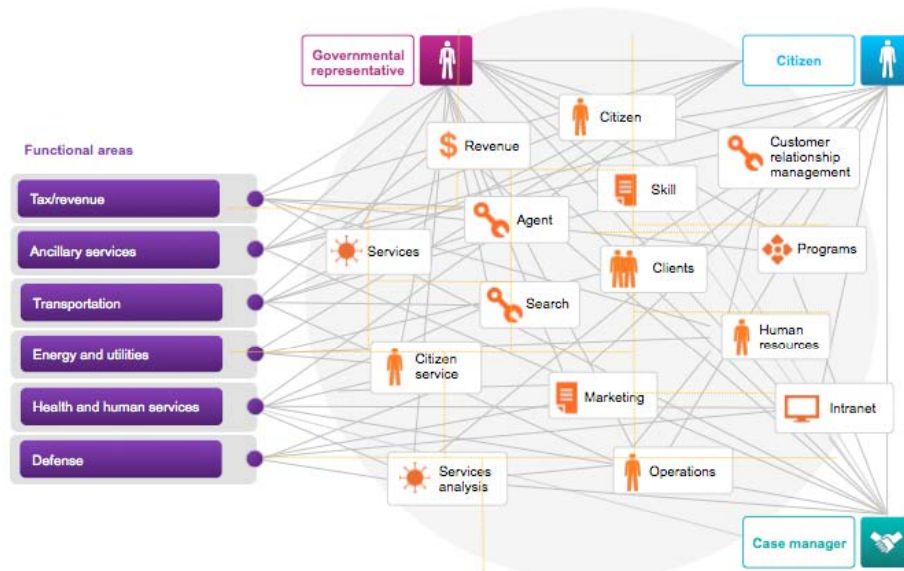

Whether working or serving, building the right relationships can be challenging

Smarter Businesses, Smarter Industries.

How can you help people find Experts, Collaborators & Information?

By adopting a smarter, more integrated collaboration approach

IBM's Collaboration Agenda can

The Collaboration Agenda feeds key collaborative solution components into the IBM Industry Frameworks

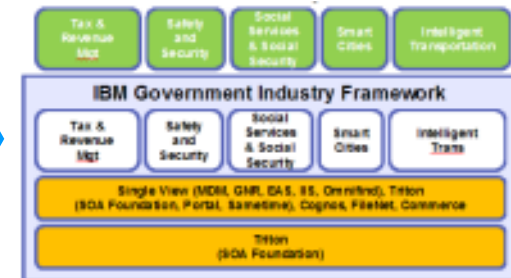

Business Optimization Map identifies repeatable patterns & best practices, leading to...

on-ramps for domains & projects included in the appropriate Industry Framework...

which provides a proven set of IBM software solutions to address key vertical business challenges.

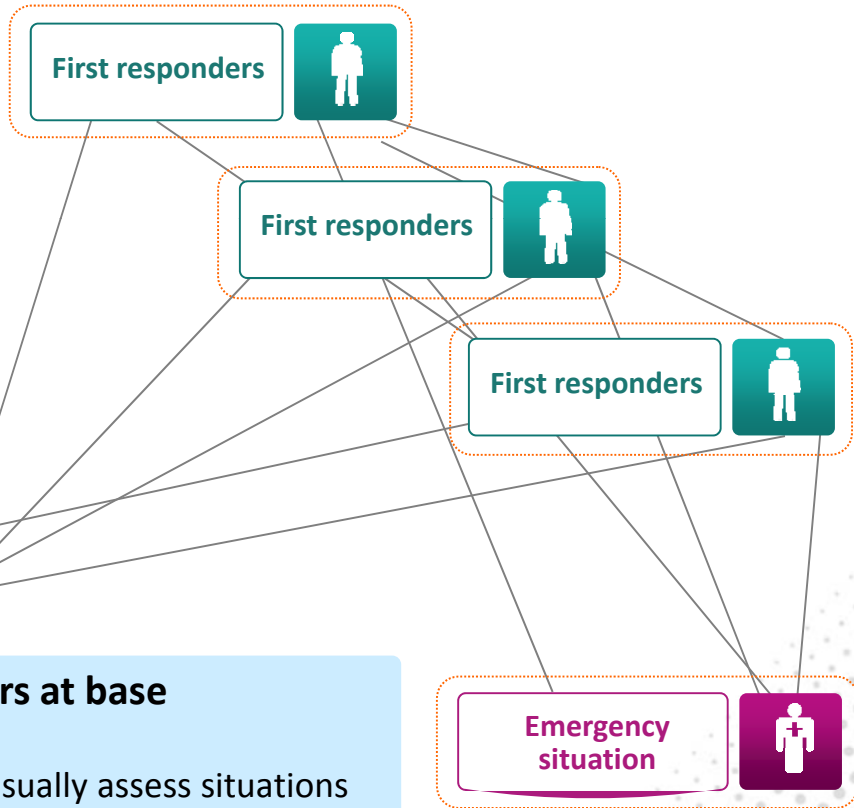

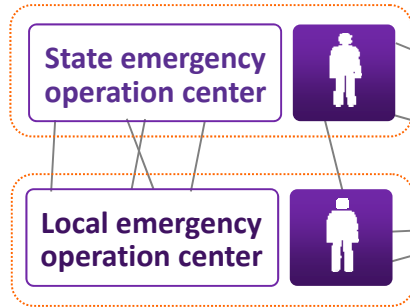

Missouri Office of Homeland Security

Challenge: Limited situational awareness, siloed departments

Limited access to radio communications

- Limited to communicating only oral reports of situations back to base operations
- Limited ability to directly communicate and collaborate with other departments or agencies

State & local operation centers required to dial in to conference calls for updates

- Delays in receiving information regarding emergencies
- Limited ability to proactively respond to emergency situations and disasters

Decision makers at base operations

- No ability to visually assess situations
- Limited ability to communicate with a large group of first responders from different departments and agencies
- Difficulty coordinating statewide responses in a timely manner

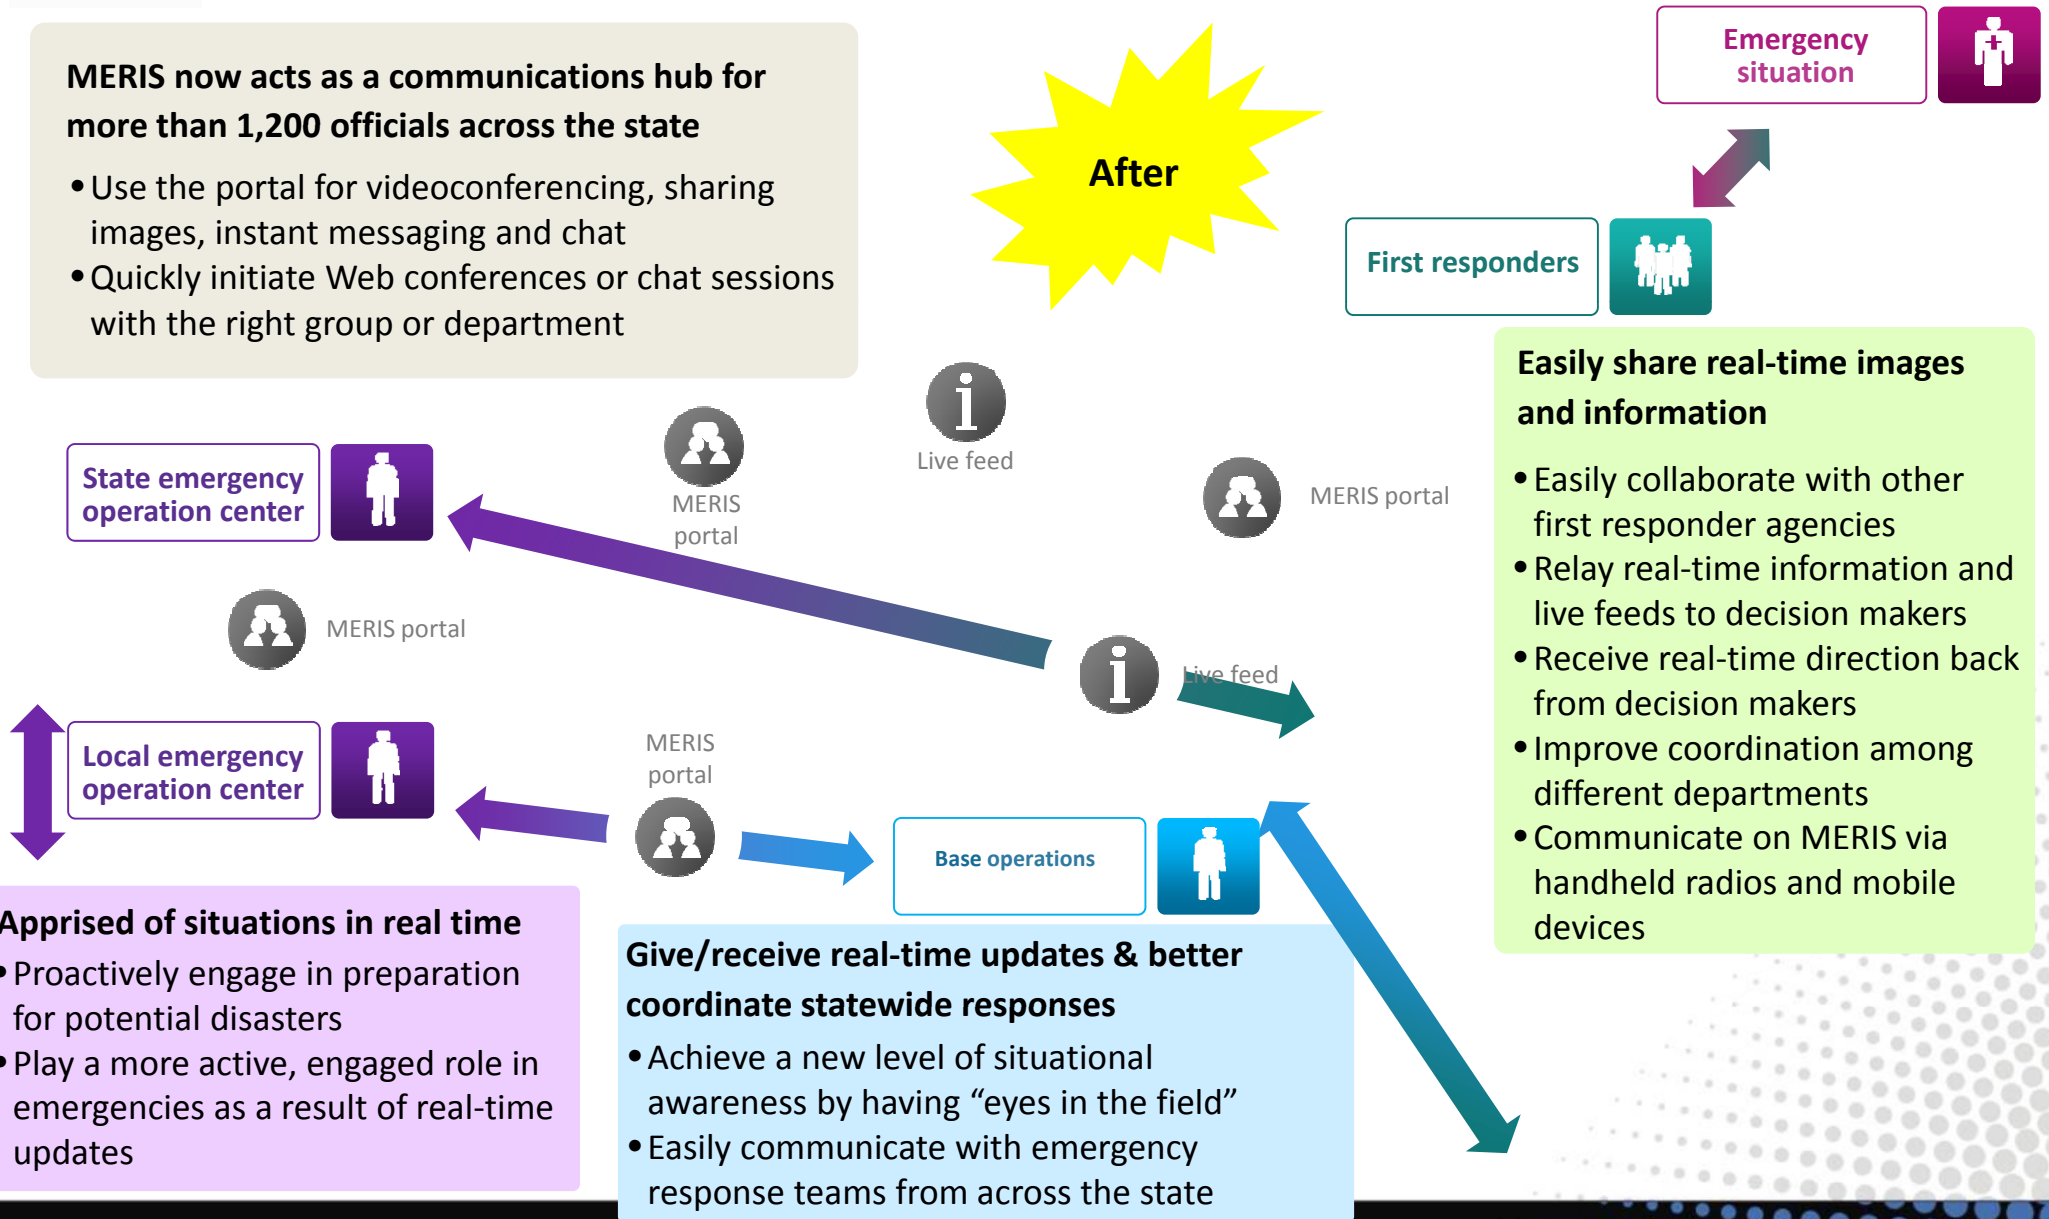

Missouri Office of Homeland Security

The Solution: Real-time situational awareness improves decisions

MERIS now acts as a communications hub for more than 1,200 officials across the state

- Use the portal for videoconferencing, sharing images, instant messaging and chat
- Quickly initiate Web conferences or chat sessions with the right group or department

Easily share real-time images and information

- Easily collaborate with other first responder agencies
- Relay real-time information and live feeds to decision makers
- Receive real-time direction back from decision makers
- Improve coordination among different departments
- Communicate on MERIS via handheld radios and mobile devices

Give/receive real-time updates & better coordinate statewide responses

- Achieve a new level of situational awareness by having "eyes in the field"
- Easily communicate with emergency response teams from across the state

Apprised of situations in real time

- Proactively engage in preparation for potential disasters
- Play a more active, engaged role in emergencies as a result of real-time updates

Missouri Office of Homeland Security

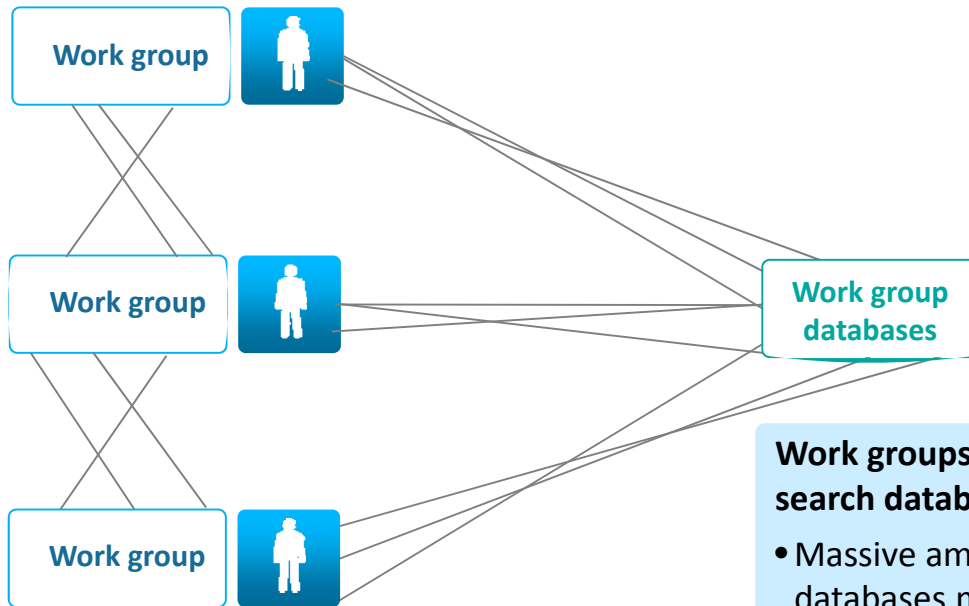

Benefits: Similar to process re-engineering, evaluating roles and their interaction patterns leads to a wide range of benefits

Role interaction	Enabling components	Increased situational awareness	Cross-department collaboration	Faster, better decision making	More coordinated response to emergencies
First responders ↔ Decision makers	<ul style="list-style-type: none"> MERIS (IBM WebSphere® Portal, IBM WebSphere Portal Server and IBM WebSphere Application Server software) IBM Lotus® Sametime® 	HIGH		HIGH	HIGH
Decision makers ↔ Emergency situation	<ul style="list-style-type: none"> MERIS (WebSphere Portal, WebSphere Portal Server and WebSphere Application Server software) Lotus Sametime 	HIGH	MEDIUM	HIGH	HIGH
First responders ↔ First responders	<ul style="list-style-type: none"> MERIS (WebSphere Portal, WebSphere Portal Server and WebSphere Application Server software) Lotus Sametime 		HIGH	MEDIUM	HIGH
Emergency operation centers ↔ Home office	<ul style="list-style-type: none"> MERIS (WebSphere Portal, WebSphere Portal Server and WebSphere Application Server software) Lotus Sametime 		MEDIUM	HIGH	HIGH

"We're getting fantastic response times—about four times faster than we were getting on Microsoft® SQL implementations."

—David Finch, special assistant, Missouri Office of Homeland Security

Smarter Businesses, Smarter Industries.

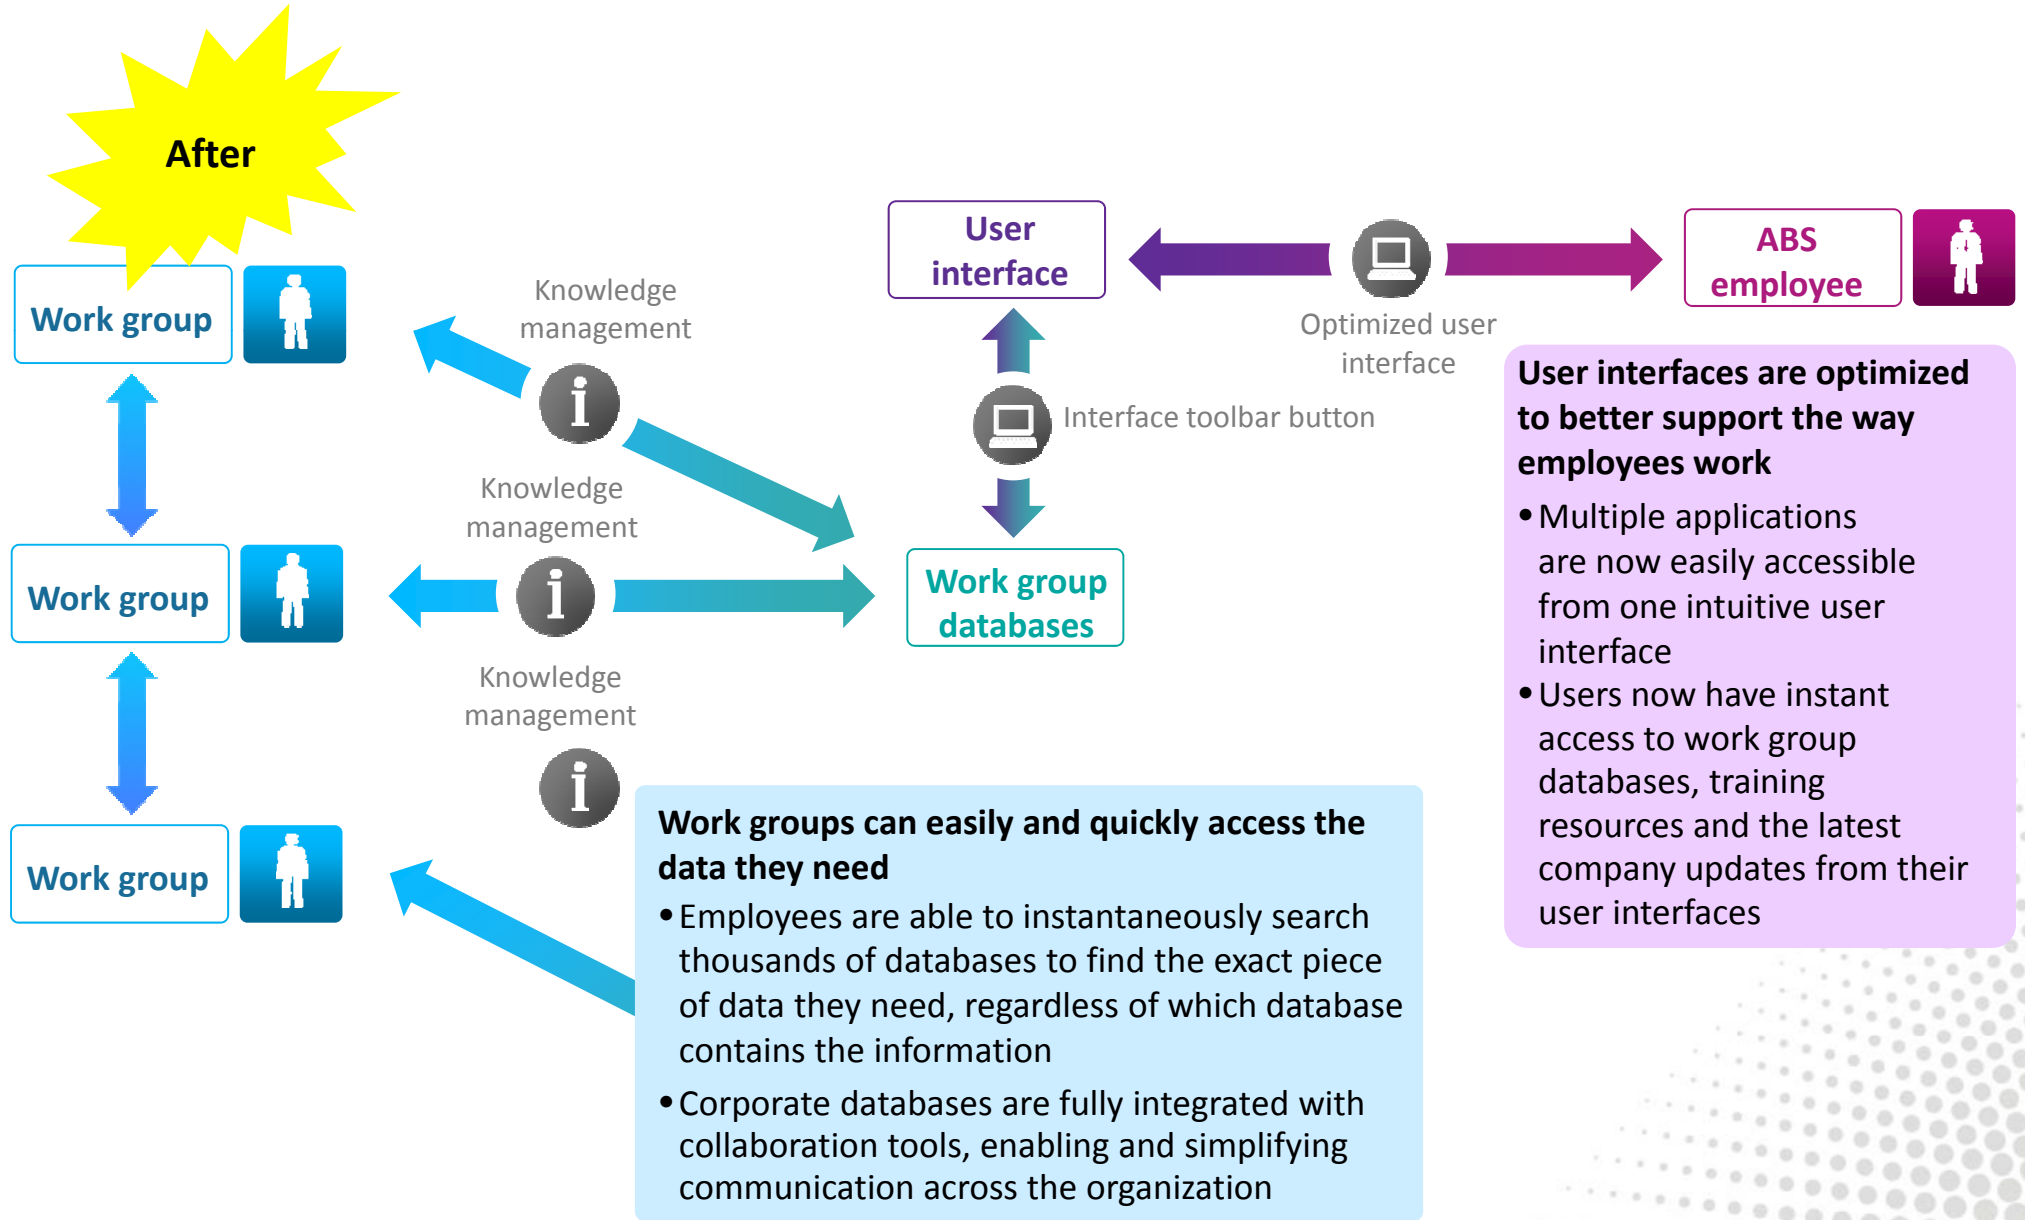

The user interface is not optimized for employees

- Employees waste valuable time and effort struggling to work with multiple independent applications that aren't truly integrated
- Employees require a long time to get up to speed with new technology because they lack an effective training resource

Work groups are limited in their ability to access & search databases

- Massive amounts of data stored over thousands of databases make it nearly impossible for employees to find data unless they know which specific database contains the information
- Collaboration is difficult and inefficient because corporate databases are not integrated with existing collaboration tools

Australian Bureau of Statistics

Benefits: An optimized interface resulting in greater productivity

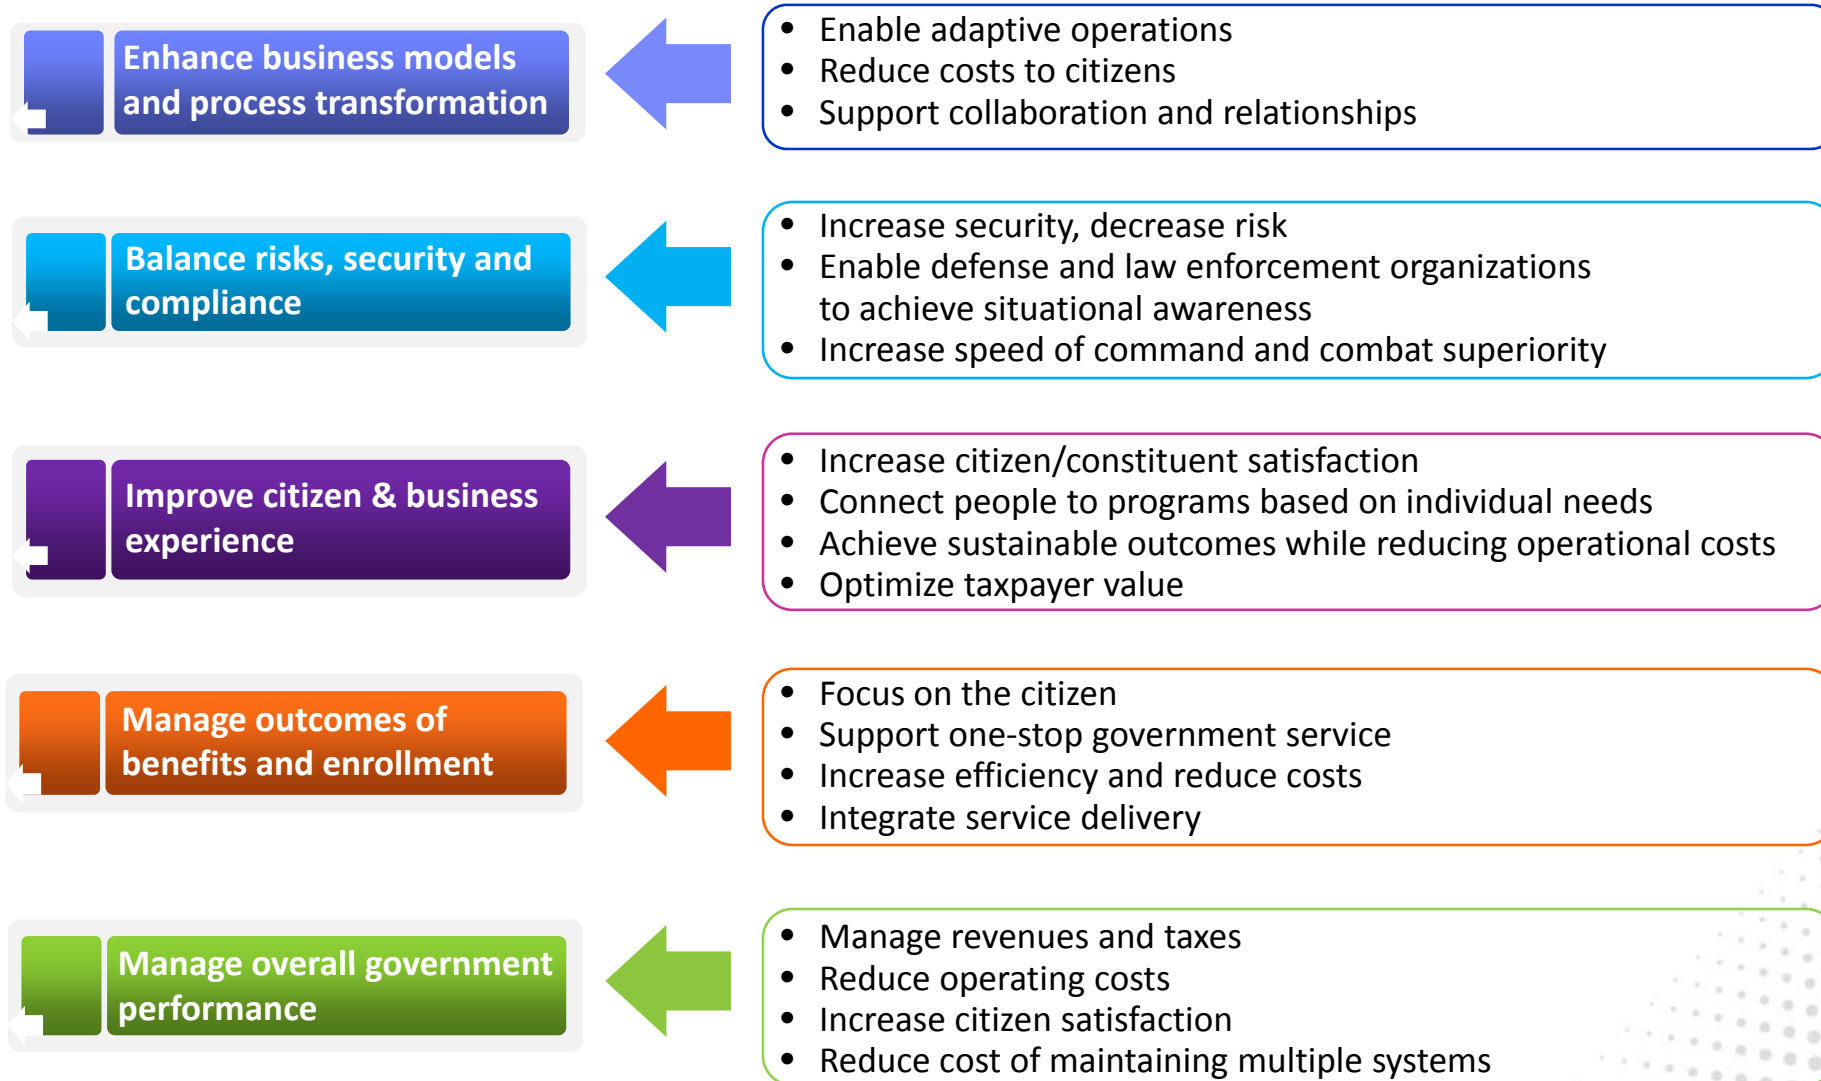

Role interaction	Enabling components	Improved knowledge management	Ability to easily search multiple databases	Increased collaboration across workgroups	Improved personal productivity
Employees ↔ Databases	• Lotus Notes	HIGH	HIGH	MEDIUM	HIGH
Mobile workers ↔ Home office	• Lotus Notes • Lotus Sametime	MEDIUM	MEDIUM	HIGH	HIGH
Employees ↔ Employees	• Lotus Notes • Lotus Sametime	HIGH		HIGH	MEDIUM
Employees ↔ Lotus Notes interface	• Lotus Notes • Lotus Sametime	HIGH	HIGH	MEDIUM	HIGH

"With Lotus solutions, we're able to tailor the functionality to perfectly complement the way we work as a team." — Mark Sawade, Australian Bureau of Statistics
