

WebSphere software

IBM WebSphere Portal Version 6.1 software

Highlights

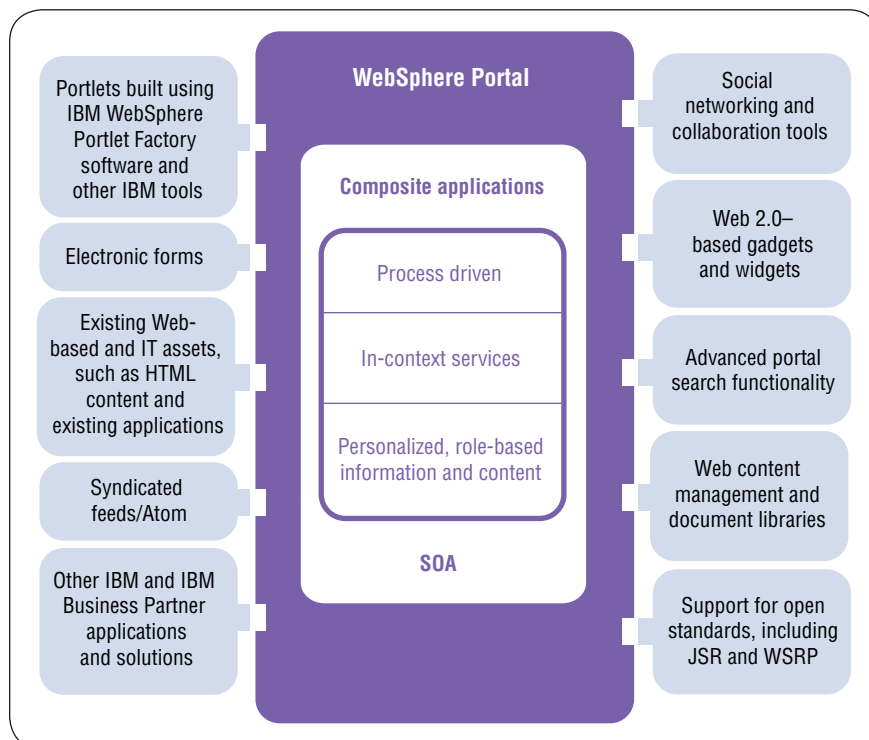

- **Exceeds users' expectations with a rich, responsive portal interface**
- **Enables you to respond quickly to changing business requirements and new business opportunities by leveraging existing assets**
- **Helps speed application and content deployment with powerful development capabilities, templates and accelerators**
- **Helps lower the overall costs of portal deployment and maintenance with site wizards and simplified administration**

Help empower users with the right resources, at the right time

IBM WebSphere® Portal software helps you quickly build scalable portals that simplify and accelerate user access to personalized information, applications, processes and people. These portals offer a rich, responsive user interface that gives you the power to exceed your users' expectations. WebSphere Portal software enables you to quickly and easily reuse your existing Web-based and IT assets, which can help your company respond more quickly to changing business requirements and new business opportunities. Plus, WebSphere Portal software includes a number of tools and innovations that make it easier than ever to deploy, maintain and extend the value of your Web portals.

WebSphere Portal software is available in three packaged offerings:

- *IBM WebSphere Portal Server Version 6.1 software*
- *IBM WebSphere Portal Enable Version 6.1 software*
- *IBM WebSphere Portal Extend Version 6.1 software*

IBM WebSphere Portal software provides a great degree of flexibility and choice, which can help you protect your IT investments.

Get your portal up quickly with IBM WebSphere Portal Server software

WebSphere Portal Server Version 6.1 software lets you quickly consolidate applications and content into role-based applications, complete with search, personalization and security capabilities. You can also apply powerful development capabilities, like those of IBM WebSphere Portlet Factory software, to speed application deployment. IBM® accelerators for IBM WebSphere Portal software provide another way for you to address specific business challenges and simplify portal implementations, helping you obtain faster time to value.

WebSphere Portal Server software enables you to create a portal that's right for your specific business needs. It provides portal page customization capabilities, along with click-to-action technology that allows you to create highly interactive portal applications. Plus, multisite support enables you to create multiple virtual portals on a single installation. In addition, WebSphere Portal Server software delivers a scalable architecture and innovative portal services such as:

- *Flexible access to existing enterprise data and applications, as well as to external news feeds or Web data.*
- *Live text tagging, which allows users to access relevant supporting information with a single click without leaving the page they are viewing.*

- *Portal Representational State Transfer (REST) services that allow you to incorporate composite mashup applications, including service feeds from other Web applications.*
- *A site wizard that allows users to create and deploy independent virtual portals.*
- *A one-click site management application featuring rollback and versioning capabilities to simplify moving portals from staging to production.*
- *Expanded site layout support that enables you to incorporate existing static HTML, built with familiar HTML and PHP development tools, opening up the platform to additional content sources.*
- *Support for the latest portlet open standards, including Java™ Specification Request (JSR) 286 and Web Services for Remote Portlets (WSRP) 2.0 protocols.*
- *A Web application integrator that enables you to easily embed existing Web applications into your portals.*
- *Enhanced usability features, such as drag-and-drop customizations and semantic tags that enable smart markups and dynamic menus.*
- *Templates, a Theme Customizer portlet and WebSphere Portlet Factory software that help you speed application deployment through new portlet development and deployment capabilities.*
- *Integration and tooling that allow you to quickly create composite, high-value applications that leverage existing investments in legacy applications and databases.*

WebSphere Portal Server software includes restricted licenses to the following products:*

- *IBM Tivoli® Directory Server software*
- *IBM WebSphere Application Server software*
- *IBM DB2® databases*
- *IBM WebSphere Portlet Factory software*

Deliver advanced portal functionality with WebSphere Portal Enable software

WebSphere Portal Enable Version 6.1 software includes all of the features of WebSphere Portal Server software plus enhancements that help users get the information they need in the context of the tasks they are doing via integrated Web content management and document libraries.

In addition to WebSphere Portal Server components, WebSphere Portal Enable software delivers:

- *Integrated Web content management capabilities that enable you to rapidly build next-generation Web sites with enhancements that can be used throughout the content life cycle.*
- *Document libraries that allow users to easily share, view and organize files within the portal community.*
- *Advanced portal search across a wide variety of search sources.*

WebSphere Portal Enable software also includes restricted licenses to the following products:*

- *IBM Lotus® Web Content Management software*
- *IBM WebSphere Process Server software*
- *IBM OmniFind™ software*

Expand collaboration capabilities with IBM WebSphere Portal Extend software

WebSphere Portal Extend Version 6.1 software includes all of the features in WebSphere Portal Server and WebSphere Portal Enable software and adds services for collaboration and electronic forms, including:

- *Individual and shared workspaces that allow you to collaborate and exchange ideas on projects, improving team productivity.*
- *Instant messaging so you can chat with other portal users and take action related to a task or application.*
- *Editable electronic forms that can help you streamline your business processes by allowing your employees, customers and partners to fill out, view and store forms electronically.*

In addition to the IBM software components in WebSphere Portal Server and WebSphere Portal Enable software, WebSphere Portal Extend software includes restricted licenses to the following products:*

- *IBM Lotus Forms software*
- *IBM Lotus Sametime® software*
- *IBM Lotus Quickr™ software*
- *IBM Lotus Domino® Enterprise Server software*
