

# IBM WebSphere Deployment Readiness Assessment

The IBM WebSphere Deployment Readiness Assessment ensures that the installation of all necessary WebSphere and related hardware and software are configured correctly to support your new site, and prepares you for the deployment of your new e-business application.

## Your Business Challenge

- You are preparing to deploy your new WebSphere application
- You would like to minimize the risk involved in implementing your new e-business solution

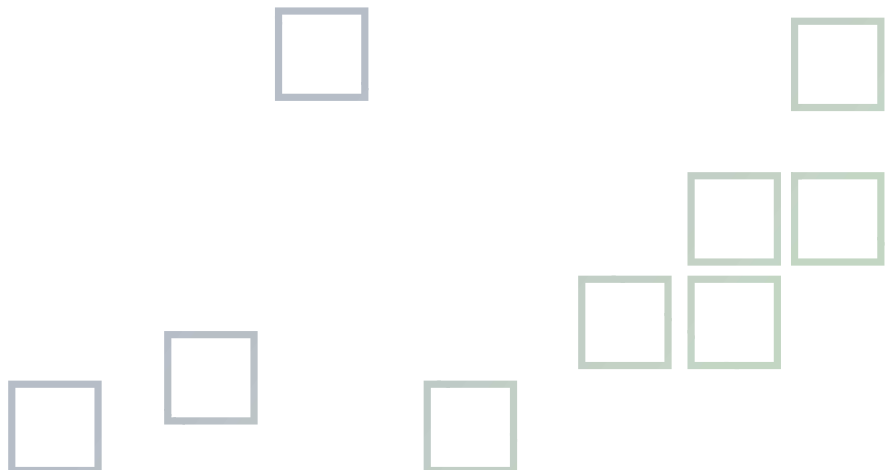

## Services Solution

The IBM WebSphere Deployment Readiness Assessment session prepares you for the deployment phase of your WebSphere project. Our consultants assess the quality of your systems and processes to certify that your new web site meets your pre-defined requirements for hits per second, response time, capacity and concurrent number of users supported. In addition, our consultants conduct an application review and a configuration review as well as validate your development environment. By the end of this session, you will be confident that the deployment of your WebSphere application will be a success.

## Benefits

### During this workshop, you will:

- Verify the quality of your systems and prepare for a successful deployment and implementation of your WebSphere application
- Gain greater assurance that your WebSphere solution is based on a set of sound business and technical assumptions that lead to a successful project outcome

# IBM Software Services for WebSphere

## Statement of Work

### Our Software Services Consultants will:

- Assess your hardware and software configurations, including databases, middleware, and host legacy systems
- Develop performance, scalability, durability and stability evaluation scripts and tests
- Develop a schedule of evaluations based on the amount of tests required
- Evaluate your deployment readiness by assessing the procedures for change control, source control, problem tracking and crisis resilience
- Present the assessment findings to your key management and staff
- Plan the date of deployment

## Your responsibilities

- Provide access to process documentation and development assets
- Ensure that the appropriate staff and support are available for review activities

## Duration

The duration of WebSphere Deployment Readiness Assessment varies based on your requirements.

All work will be completed using a Time and Materials contract.
