

Overview

A comprehensive, secure software

NSE.IT needed a comprehensive, secure software solution efficiently and quickly handle processes such as maintaining ledgers, client records, internal communications and document sharing

Maintaining data integrity

By installing a suite of IBM Lotus software products, NSE.IT was able to maintain data integrity and website availability

Secure paperless communication

The solution helped NSE.IT communicate efficiently and securely with internal teams and external clients, as well as to adopt some paperless procedures

Solution Components

Software

- IBM® Lotus® Notes
 - IBM Lotus Domino® V8.5.1
 - IBM Lotus Sametime® V7.0
-

NSE.IT Ltd.

By implementing an efficient and secure communication system, NSE.IT is able to maintain data integrity and availability.

Founded in 1993 as the IT department of the National Stock Exchange of India Ltd., NSE.IT Ltd. was incorporated as a separate company in 1999 to offer end-to-end IT products, solutions and services. The Mumbai-based company also has expertise in a wide range of business applications, specializing in providing IT solutions to stock exchanges, clearing corporations, brokerage firms and insurance firms. The company also works with other organizations in the capital market, banking and insurance industries.

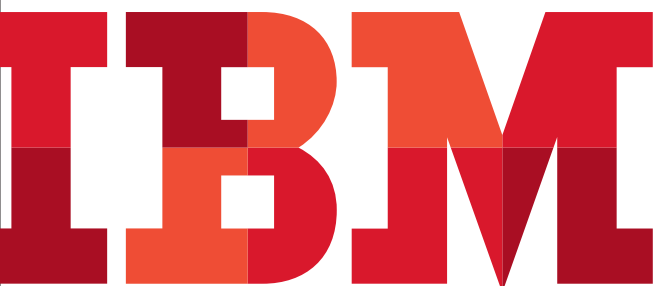

The Challenge

NSE.IT Ltd. faced challenges with maintaining its ledgers and client records and with internal communications and document sharing. All these processes were previously handled manually with paper-based document transactions. NSE.IT needed a comprehensive, secure software solution to efficiently and quickly handle these processes.

The Solution

NSE.IT chose to install a suite of IBM® Lotus® software products featuring IBM Lotus Domino® V8.5, IBM Lotus Notes® V8 and IBM Lotus Sametime® V7 software. The Lotus Domino software was used in the company's intranet and Internet websites to help ensure data integrity and website availability.

NSE.IT Ltd. used Lotus Notes software for mailing, calendaring, scheduling and day-to-day office management purposes. The client used Lotus Sametime for internal communications.

“At NSE.IT, we were really pleased with IBM Lotus suite and the efficiency with which it was implemented. Our communication system is perfectly secure now, and we can communicate with internal teams as well as external clients with ease. Also, it has drastically cut down on paper-based procedures and has led us towards paperless procedures.”

- NSE.IT Ltd.

Benefits

- Enables efficient and secure communication with internal teams and external clients
- Helps secure its web-server environment with respect to web authentication, server security and data security
- Enables seamless transition to paperless procedures
