

Messaging and collaboration solutions  
To support your business objectives

Lotus® software

## Messaging and collaboration solutions for small to midsize businesses.

*IT that's easy to install, use and maintain*

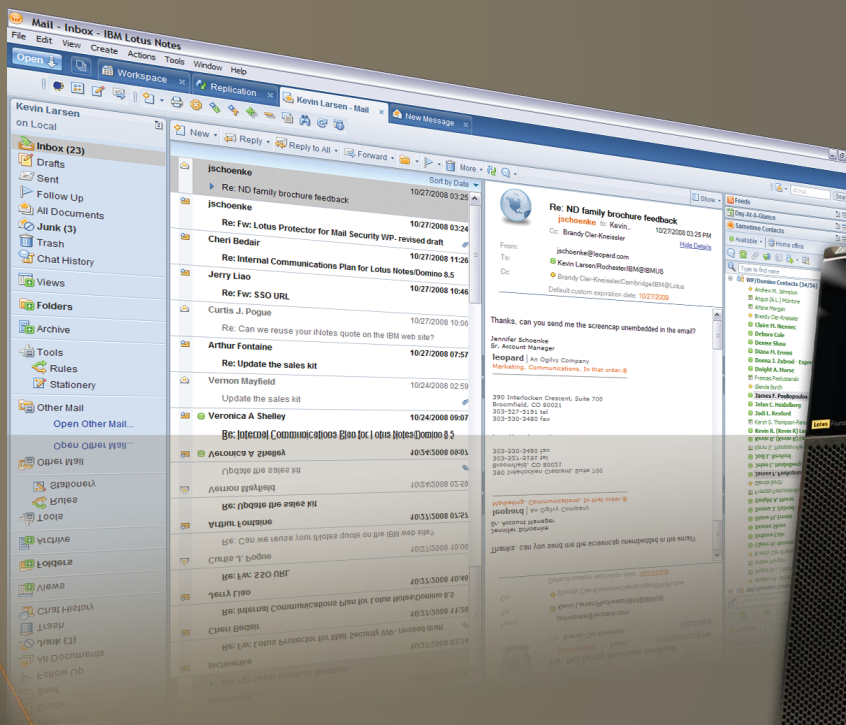

## As a small to midsize business (SMB),

you have unique communications needs. Essentially, you need both more and less from a messaging and collaboration solution. More options, more interoperability and more value. Less complexity, less administrative overhead and less expense.

### You need a messaging and collaboration solution that:

- Supports the way your employees and your business processes work.
- Provides the power you need to foster innovation in your organization.
- Enables users to access resources practically anytime and anywhere, on practically any type of device.
- Helps you protect your company's confidential data and meet compliance requirements.
- Can be extended as your company's needs change.

## A range of solutions to meet the needs of the SMB

IBM offers a comprehensive portfolio of messaging and collaboration solutions packaged with the SMB in mind. These solutions are attractively priced, quick to deploy and highly flexible.

Messaging and collaboration technologies for SMBs from IBM:

- Simplify installation, use and maintenance.
- Enable mobile and remote workers to stay connected.
- Feature security-rich, scalable and reliable e-mail and collaboration tools that allow your employees to share sensitive information and more easily access business data.
- Help reduce telephone and travel costs.
- Provide investment protection through backward compatibility.
- Can help you realize a rapid return on investment (ROI) by enabling you to reuse the skills, hardware and applications you already have.
- Support your choice of desktop clients, including the Microsoft® Windows®, Linux® and Mac OS platforms, as well as the Microsoft Internet Explorer, Mozilla Firefox and Safari Web browsers.
- Enable expanded support for mobile devices including Nokia S60 devices, the Apple iPhone, Microsoft Windows Mobile® devices, and others.
- Typically support many server platforms, including the Microsoft Windows, Linux, IBM i and IBM AIX® operating systems.\*
