## Please note

IBM's statements regarding its plans, directions, and intent are subject to change or withdrawal without notice at IBM's sole discretion.

Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision.

The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion.

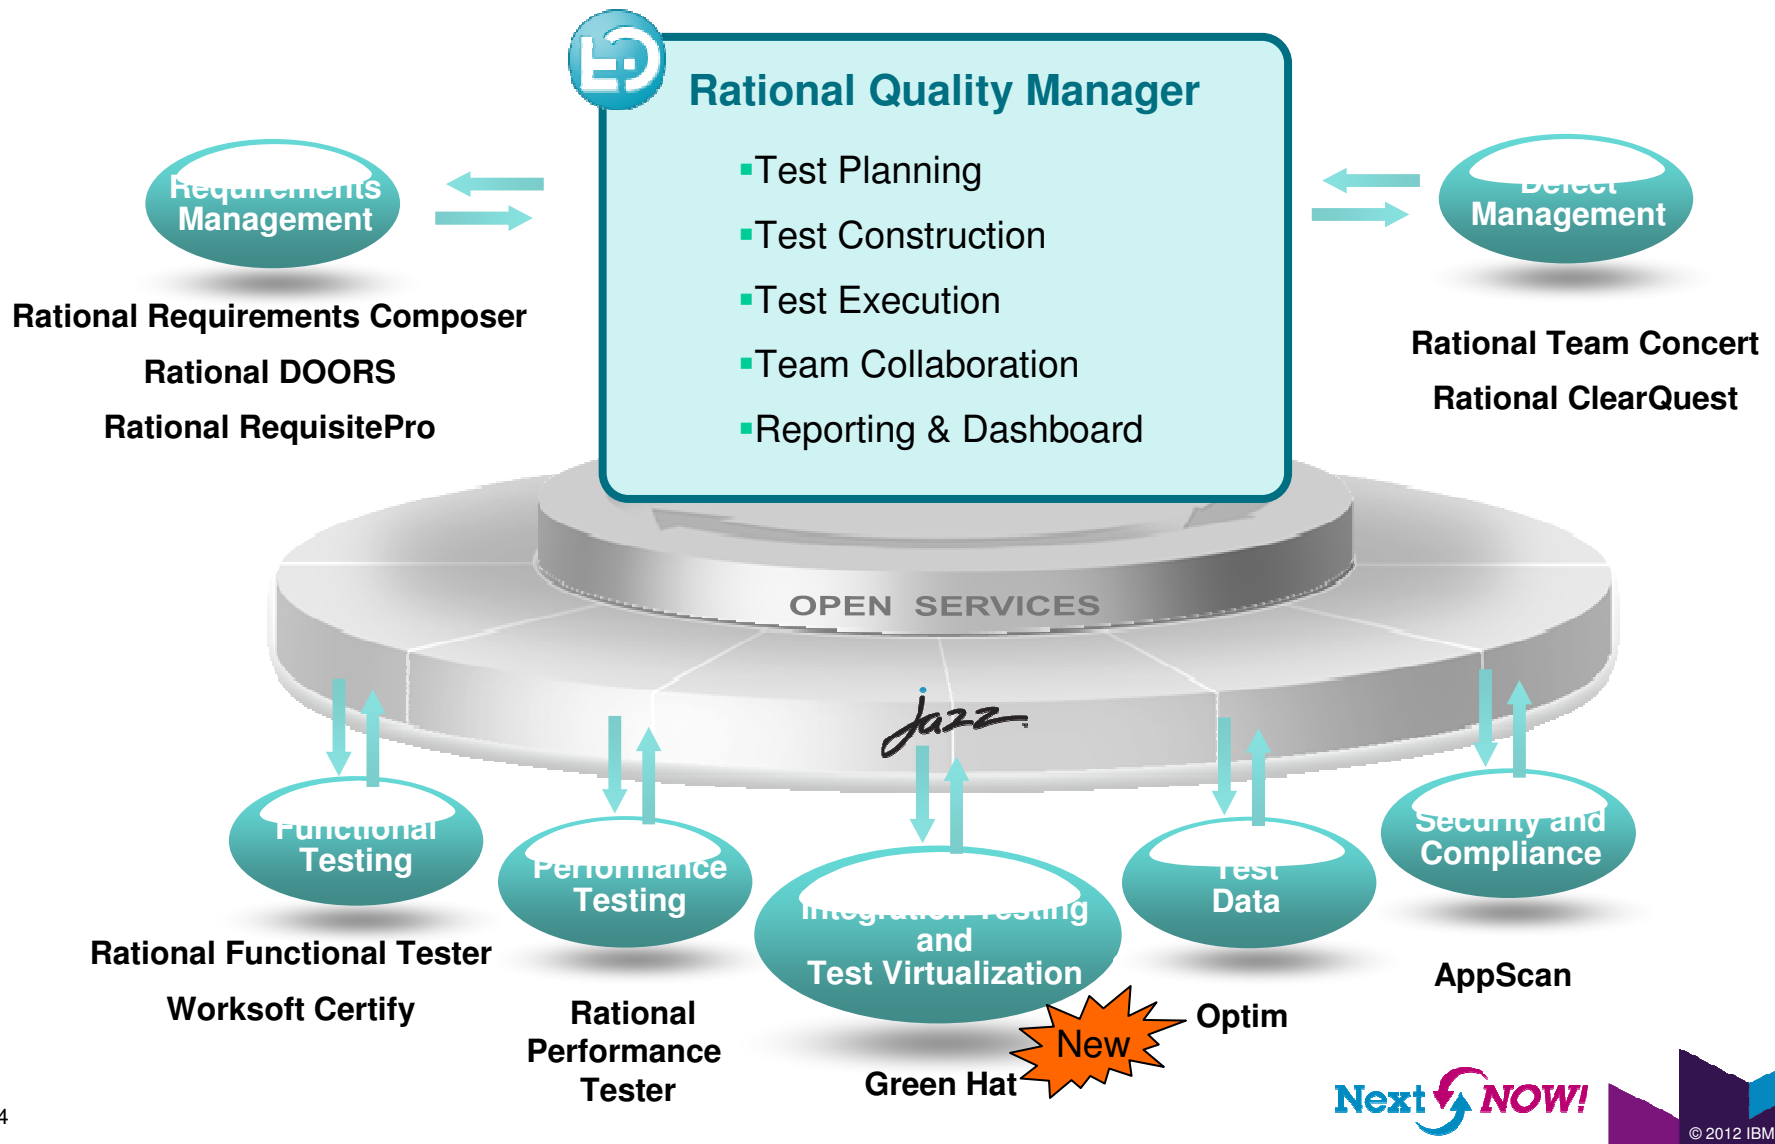

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.

# Effective Test Planning and Execution Tracking Using IBM® Rational® Quality Manager

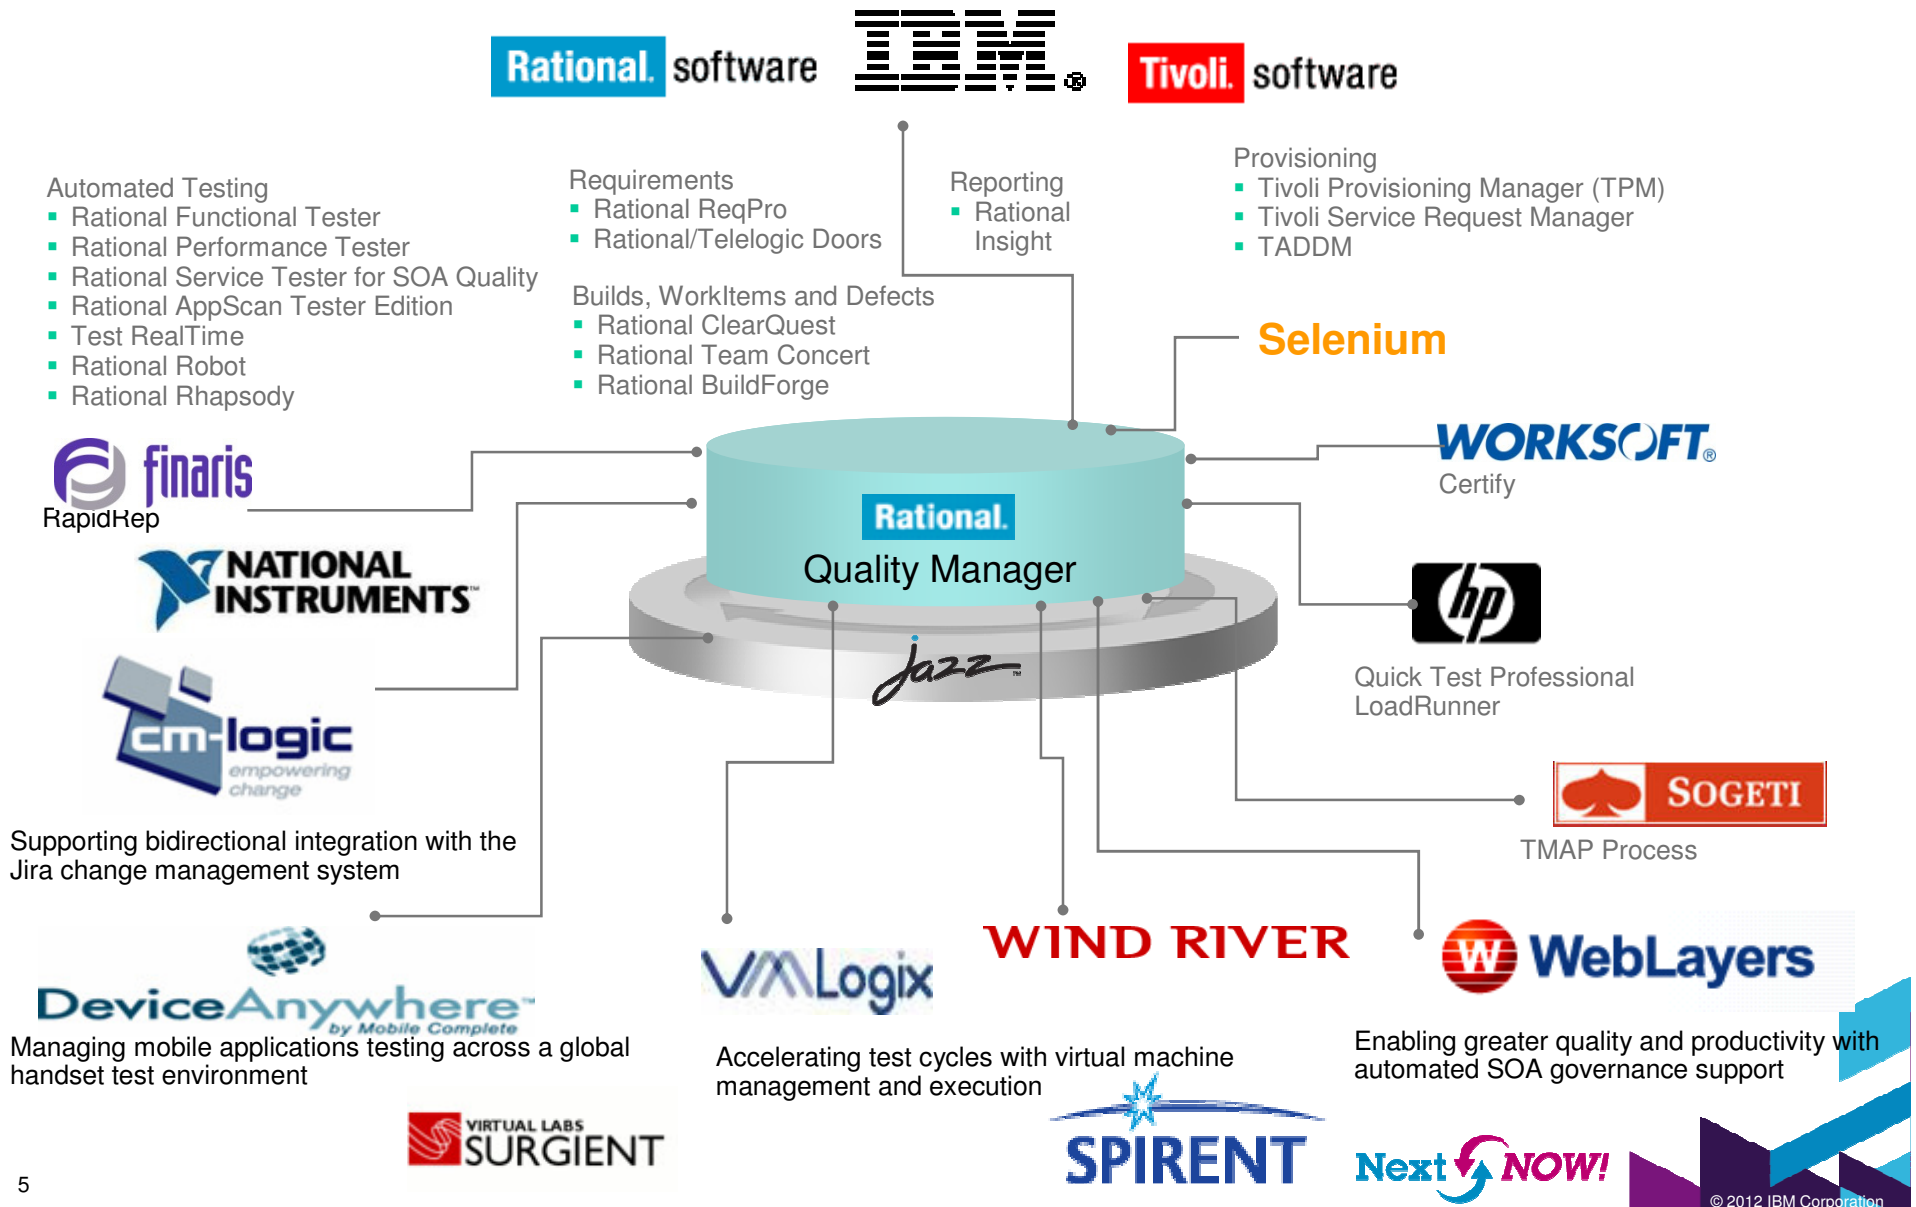

## Agenda

- Introduction
- Estimating the Test Effort
- Prioritizing the Test Effort
- Tracking Progress
- Questions

# Rational Quality Manager: Central Hub for Quality Management

# Rational Quality Manager Open Ecosystem

## Rational Quality Manager: A Closer Look

### Test Planning

- Comprehensive test plan
- Shared objectives
- Scope, Timeline, Resources
- Risk assessment

### Test Construction

- Requirements driven testing
- Test environments coverage
- Manual test authoring
- Test lab management

### Test Execution

- Manual test execution
- Use test automation tools
- Record test results
- Submit & track defects

### Team Collaboration

- Process enactment and enforcement
- Review and approval
- Task management
- Rapid team member on-boarding

### Reporting & Dashboard

- Status and progress tracking
- Customizable live dashboard
- Real-time metrics and reports
- Compliance and quality audit

# Introduction

- Estimate
- Time Spent

Test Case Execution Records >

### \* (QM Tutorial) Allocate Dividends to Multiple Causes

Originator: QM User      Owner: QM User

Team Area: Unassigned

Priority: **High**

Blocking Status: Blocked      Run On: May 27, 2011

Last Result:  Passed

Description: < [Click here to enter a description](#) >

#### Overview ?

Test Plan:	Unassigned
Test Case: *	(QM Tutorial) Allocate Dividends to Multiple Causes
Default Test Script:	Allocate Dividends to Multiple
Iteration:	
Available Test Environments:	Unassigned
Weight: *	125
Estimate:	4 hours
Time Spent:	2 hours

# Introduction

## New artifact fields in RQM: Priority

Field	Artifact Types	Usage
Priority	<ul style="list-style-type: none"> <li>• Test Plan</li> <li>• Test Case</li> <li>• Test Suite</li> <li>• TER</li> </ul>	<ul style="list-style-type: none"> <li>• An enumeration of values describing relative priority of one test vs. another</li> <li>• Out of the box values: High, Medium, and Low</li> <li>• Viewable/Filterable/Sortable within Table Views</li> <li>• Used to make intelligent decisions of what test to focus on first and what to defer if needed</li> <li>• Yes, we know some of you use “weight” for this already</li> </ul>

# Introduction

## New artifact fields in RQM: Estimate

Field	Artifact Types	Usage
Estimate	<ul style="list-style-type: none"> <li>• Test Case</li> <li>• Test Suite</li> <li>• TER</li> </ul>	<ul style="list-style-type: none"> <li>• A time measure of how long it will take to execute a test</li> <li>• For TERs: used with “Time Spent” to provide live execution progress data: Test Plan progress and progress by Owner</li> <li>• Viewable/Filterable/Sortable within Table Views</li> <li>• Yes, we know some of you used “weight” for this already</li> </ul>

# Introduction

## New artifact fields in RQM: Time Spent

Field	Artifact Types	Usage
Time Spent	• TER	<ul style="list-style-type: none"><li>• The actual time it took to run a test</li><li>• Used with “Estimate” to provide live execution progress data: Test Plan progress and progress by Owner</li><li>• Viewable/Filterable/Sortable within Table Views</li><li>• Used to correct Estimates based on historical data to help with more accurate future planning</li></ul>

## Estimating the Test Effort

How can I plan my testing in a way that allows me to evenly distribute work across the team and make intelligent decisions about load balancing?

# Estimating the Test Effort

## Setting estimate on test cases

When you set an estimate and/or priority on a test case, all TERs generated from that test case will inherit the estimate and priority values

## Prioritizing the Test Effort

How can I plan my testing in a way that ensures that my team executes the most important tests first and defers the least important?

# Prioritizing the Test Effort

## Creating custom priorities for your organization

The Project Area Administration page has a “Priority” entry in the newest version of RQM that allows you to rename, remove, and create custom priority values.

You can set the default priority value used for new test artifacts.

You can insert new priority values within the existing hierarchy indicating relative priority.

This project area is part of a Lifecycle Project: Money that Matters Sample [Sample](#)

# Prioritizing the Test Effort

## Deriving test case priority – requirements and workitems

Use Requirement “Business Priority” and Workitem “Priority” and “Story Points” to determine Test Case priority.

The new “Traceability” view for Test Cases is great for this. You can add those columns to all Test Case views. BTW – the icon “decorations” are live and indicate related asset status. Cool!

Test Cases <sup>?</sup>

# Prioritizing the Test Effort

## Deriving test case priority – defects and prior runs

Use defects found and results of prior runs to determine “sensitive” areas that require more focus.

Use a filtered TER view and leverage the new “Defects” column to make intelligent decisions here.

# Prioritizing the Test Effort

## Deriving test plan priority

Do you classify test plans with categories to indicate type of testing? Using categories (like Test Phase) to separate plans by regression, translation, new feature, etc. is useful to define relative priority.

Additionally, Test Plans have traceability views to Requirement Collections and Development Plans that can also drive decisions on priority.

### Test Plans ?

View As: Traceability Group By: Ungrouped

# Tracking Progress TER view

Use the TER view grouped by owner to reassign test ownership. Transfer TERs from overbooked testers to under-booked testers.

The TER view in a plan is great, but the general TER view can also be grouped by Owner for a more holistic view.

# Tracking Progress Dashboard viewlet – Test Plans Execution Status

Test plan execution status can be tracked via a viewlet on personal, team, and project dashboards.

Hover over progress bars for breakdowns of details.

Click on progress bars to open the relevant table of test case or test suite execution records.

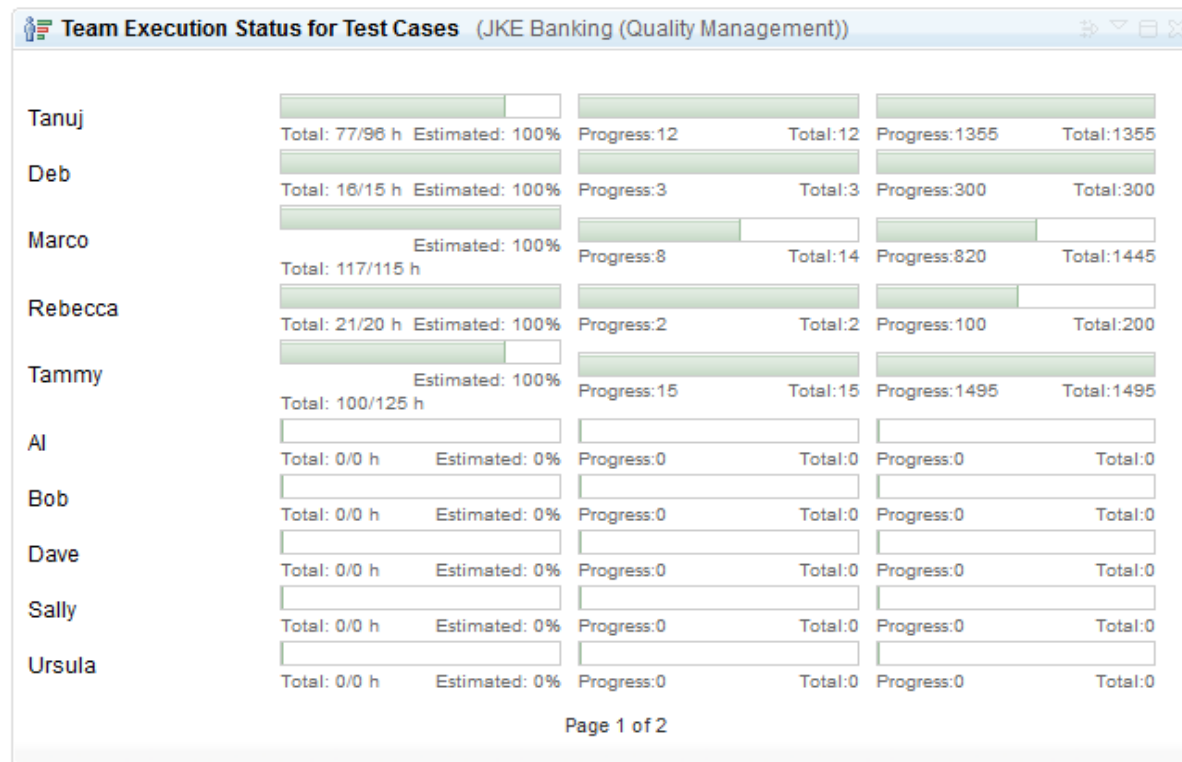

# Tracking Progress Dashboard viewlet – Team Execution Status for Test Cases

A great team dashboard viewlet (also available on personal and project dashboards) that is a breakdown of your team's progress.

Hover over progress bars for breakdowns of details.

# Tracking Progress

## Reviewing what has not been executed: TER view

The TER view in a test plan filtered with “Last Result = Not Run and Failed” (e.g.) is a quick and easy way to see your exposure.

Leverage the priority you've assigned to TERs to assess risk and exposure, drilling into the associated test case's related requirements and workitems for a complete picture. Use the progress view to reassign those critical TERs!

ID	Priority	Name	Test Case	Iteration	Owner	Last Result
	Any			Any	Any	Not Run
<div style="display: flex; justify-content: space-between; align-items: center;"> <span>▼ Marco (1 - 5 of 5)</span> <div style="text-align: right;"> <span>Total: 31/45 h</span>  <span>Estimated: 100%</span> </div> </div>						
13		Dividend_Allocation_by_Percentage_Fir...	Dividend Allocation by Perce...	S2	Marco	
8		Dividend_Allocation_by_Percentage_Int...	Dividend Allocation by Perce...	S1	Marco	
14		Dividend_Allocation_by_Percentage_Int...	Dividend Allocation by Perce...	S2	Marco	
11		Allocate_Dividends_to_a_Single_Caus...	Allocate Dividends to a Singl...	S2	Marco	
16		Dividend_Allocation_by_Percentage_Ch...	Dividend Allocation by Perce...	Unassigned	Marco	

# Tracking Progress

## Reviewing what has not been executed: Execution Records viewlet

You can save your TER query in the prior slide and use that to drive the Execution Records viewlet on your project, team, or personal dashboard.

Decorations in the viewlet include execution status and priority.

# Tracking Progress

## Reviewing requirement exposure in a report

Use the “Plan Requirement Defect Impact” report to view exposure for a test plan, iteration, requirement(s), owner, or TER state.

### Plan Requirements Defect Impact\*

Parameters

#### Requirements impacted by defects

Requirement name	Test case	Defect ID	Defect name	Defect state
Allocate dividends by Percentage	Allocate Dividends to a Single Cause	38	Organization selection list is empty	New
Allocate dividends by amount and frequency	Allocate Dividends to a Single Cause	38	Organization selection list is empty	New
Dividend allocation by percentage	Allocate Dividends to a Single Cause	38	Organization selection list is empty	New
Donor Chooses an Organization	Allocate Dividends to a Single Cause	38	Organization selection list is empty	New
Donors can choose to support an organization	Allocate Dividends to a Single Cause	38	Organization selection list is empty	New

#### Test cases impacted by blocked requirements

Test case	Requirement name
Allocate Dividends to a Single Cause	Allocate dividends by Percentage Allocate dividends by amount and frequency

# Tracking Progress

## Reviewing what has not been executed: exporting to CSV

You may need to report status to others in your organization who may not want to or be licensed to use CLM reporting, let alone QM itself. CSV Export is a new 2012 feature that allows you to export exactly what you're seeing in any table view to a spreadsheet. Start your pivot table engines!

## Summary

- Use priority to focus your test efforts and make intelligent decisions on what can be deferred.
- Estimate and time spent drive our live status views and allow you to better track your execution progress from a resource perspective.
- Traceability views provide easy access to linked data to make planning decisions.
- Live views in the test plan offer “at a glance” status without running a report.
- The TER section in a test plan is a powerful way to easily and conveniently track testing progress.
- New viewlets make tracking progress in a dashboard easier
