

**WebSphere** software

## IBM QuickStart for WebSphere Dynamic Process Edition

---

### Highlights

---

- ***Experience new capabilities for delivering business agility and for outmaneuvering competitors***
- ***Foster collaboration between business and IT with increased process visibility, analysis and monitoring***
- ***IBM Software Services for WebSphere® has the hands-on experience, as well as the depth and breadth of knowledge with WebSphere software, to enable your business to be innovative and high performing in a constantly changing environment***

### Business Challenge

The frequency and level of change in business is accelerating at a rapid pace, driving companies to redefine and improve their existing business processes for greater agility. You need a platform that supports innovative business models and optimizes your operational capabilities in order to be more flexible and productive in any economic climate. IBM Software Services for WebSphere can help you reduce the risk and time to implement dynamic Business Process Management (BPM) solutions through standards-based components on an industrial strength platform—leading to overall reduced costs and the ability to be more responsive to change.

Your business can benefit from implementing WebSphere Dynamic Process Edition, but you face challenges ahead. We will help you to

- Realize value from your recent investment in WebSphere Dynamic Process Edition
- Avoid common pitfalls while quickly and efficiently adopting a new technology
- Speed time-to-value to boost project return on investment (ROI)

### Service Solution

Our experts help you quickly get your service-enabled BPM project on the right track by leveraging WebSphere Dynamic Process Edition. Backed by years of proven Service Oriented Architecture (SOA) and BPM solution delivery experience, IBM Software Services for WebSphere is a team of highly skilled consultants with broad architectural knowledge, deep technical skills and recommended practices expertise. We provide worldwide support for WebSphere products to make it easy for clients and partners to design, build, test and deploy solutions—helping you to become an agile, service-enabled BPM environment.

Our expert consultants provide a working stand-alone installation of WebSphere Dynamic Process Edition in a development environment as a BPM and SOA solution platform. We then assist in the education and skills transfer related to value, fit and realization of composite applications on the WebSphere platform.

### Typical Activities

The QuickStart engagement includes a hands-on, interactive session with an IBM Software Services for WebSphere expert, but the specific activities may vary by customer. Typical activities will

- Elaborate on the fit and value of service-enabled BPM applications to identify and evaluate candidate projects
- Explore the decomposition of composite application and BPM requirements into common use cases and possible WebSphere Dynamic Process Edition solutions
- Provide assistance in standing up a complete BPM asset to illustrate end-to-end capabilities of the WebSphere Dynamic Process Edition platform
- Discuss an approach for integrating WebSphere Dynamic Process Edition with your existing middleware solutions
- Install your WebSphere Dynamic Process Edition runtime and workstation environments

### Deliverables

Upon completion of the QuickStart, an IBM Software Services for WebSphere expert will deliver the following:

- High Level Architecture document outlining the applicable BPM use cases
- Installation of a stand-alone WebSphere Dynamic Process Edition development sandbox and a developer workstation Dynamic Process Edition solutions
- Development of an end-to-end BPM composite application on WebSphere Dynamic Process Edition
- Engagement summary report

### Duration

The duration of this QuickStart is approximately 120 hours and it provides you with the support of up to two WebSphere services consultants over a two week period.
