Business Challenge

You know that your business can benefit from implementing WebSphere Business Modeler, but you face challenges ahead. Our experts will help you to:

- Improve your business process performance and identify problem areas and bottlenecks
- Provide solutions that support innovation and optimization of your business operations
- Optimize business processes as a viable and realistic means of saving money and increasing efficiency quickly

Services Solution

Our experts help you quickly get your WebSphere Business Modeler project on the right track. IBM has long been an important provider of services and technology needed to deliver Business Process Management (BPM) capabilities. IBM Software Services for WebSphere is a team of highly skilled consultants with Business Process Management knowledge and deep technical skills. We utilize our proven BPM methodology framework to guide execution across all phases of your BPM lifecycle. We provide worldwide support for WebSphere products to make it easy for clients and partners to design, build, test, and deploy solutions.

Our expert consultants establish competency in BPM and business process modeling concepts and methods. Business Process Modeling is a key entry point for customers doing process improvement. We offer hands-on experience modeling business processes with WebSphere Business Modeler as well as provide a tailored roadmap for moving forward with WebSphere Business Modeler.

Typical Activities

In addition to the benefits of having subject matter experts at your team's side, the following activities are provided as part of this QuickStart service:
