Business Challenge

You know that your business can benefit from implementing WebSphere Business Monitor, but you face challenges ahead. Our experts will help you to:

- Gain a more in-depth understanding of your business processes and optimize them for increased efficiency
- Avoid common pitfalls while quickly and efficiently adopting a new technology
- Get the analysis you need to continually improve your business processes

Services Solution

Our experts help you quickly get your WebSphere Business Monitor project on the right track. Backed by years of proven software deployment experience, IBM Software Services for WebSphere is a team of highly skilled consultants with broad architectural knowledge, deep technical skills, and best practices expertise. We provide worldwide support for WebSphere products to make it easy for clients and partners to design, build, test, and deploy solutions—helping you to become an On Demand Business.

Our experts will help you achieve real business value from your recent investment in WebSphere Business Monitor and also avoid the pitfalls involved with implementing a new technology. You will be able to quickly and efficiently adopt the new technology, speed time to value, and boost your project return on investment (ROI).

Typical Activities

In addition to the benefits of having subject matter experts at your team's side, the following activities are provided as part of this QuickStart service:

Installation of WebSphere Business Monitor on a development server that demonstrates:

- Installation, configuration, and management of WebSphere Business Monitor in an initial, single WebSphere Business Monitor server environment
- Installation of the WebSphere Business Monitor Toolkit for use in a development environment

A process model for a simple business process on a development server that demonstrates how to:

- Plan and design the flow of business event information through the monitor model applications into the database that supports the business dashboard
- Capture and define business priorities as business performance measures and key performance indicators (KPIs)
- Design customizable business dashboards to satisfy monitoring needs

A guide to Process Model Management that demonstrates how to build, package, and deploy the components of a business monitor model solution to the server

Deliverables

As a result of this review, IBM Software Services for WebSphere will deliver lectures and interactive working sessions with your team.

Related Education

IBM offers courses which can complement this QuickStart service, enabling you to get the most out of your WebSphere software investment.

For additional WebSphere Business Monitor course information, please visit: ibm.com/websphere/education.

Duration

The duration of this QuickStart is approximately 80 hours and provides you with the support of one WebSphere services consultant.
