

Quick Start Guide

Get started installing and configuring IBM Business Process Manager Server

Other languages: The Quick Start Guide is available in other languages from the IBM BPM library (<http://www.ibm.com/software/integration/business-process-manager/library/documentation>).

Product overview

IBM® Business Process Manager Server is a comprehensive business process management platform that helps you see and manage business processes. It includes tools and runtime environments that help you design, run, monitor, and optimize your business processes.

1 Step 1: Access the software and documentation

If you download the product from IBM Passport Advantage®, go to Downloading IBM Business Process Manager (<http://www.ibm.com/support/docview.wss?uid=swg27046470>), select the version and download link for your product, and follow the directions in the download document.

For the list of components in the product offering, go to the IBM BPM detailed system requirements (<http://www.ibm.com/support/docview.wss?uid=swg27023005>), select the version and operating system for your product, and click **Packaging List**.

For the product documentation, see the IBM BPM library (<http://www.ibm.com/software/integration/business-process-manager/library/documentation>).

2 Step 2: Evaluate the requirements and configuration

For the hardware and system requirements, see the detailed system requirements for the IBM BPM Server product (<http://www.ibm.com/software/reports/compatibility/clarity/softwareReqsForProduct.html>).

You can use IBM BPM in different configurations. For more information, see the planning section in the IBM BPM documentation for your product (<http://www.ibm.com/support/knowledgecenter/SSFPJS/welcome>).

Review the product license to ensure you have the necessary authorizations to support your topology and you understand the usage restrictions for all software components that are included with the product.

3 Step 3: Install IBM BPM Server

For installation instructions, see the IBM BPM Server installation and configuration information in the IBM BPM documentation for your product (<http://www.ibm.com/support/knowledgecenter/SSFPJS/welcome>).
