Requirement	Major Benefit (+2)	Minor Benefit (+1)	No Impact (0)	Minor Neg. Impact (-1)	Major Neg. Impact (-2)	No Vote
1. Add security feature to DI Client.	12	10	8	0	0	0
2. Allow multiple literal lines in host mapping screens.	3	4	11	0	0	12
3. Allow manual transaction acknowledgement.	6	9	14	0	0	1
4. Add Expand All, Colapse All, Search features to standards, mapping, and DF screens.	12	16	2	0	0	0
5. Invalid envelope does not produce a 997	4	10	12	0	0	4
6. Provide additional functionality in the Export batch utility to allow the selection of individual usages for any given TP.	8	9	11	0	1	1
7. Provide schema support for XML.	14	9	5	0	0	2
8. HIPAA standard on the mainframe	0	2	14	0	1	13
9. Print adf and map or etc to a file.	7	8	7	0	0	8
10. Provide a conversion routine from Send / Receive mapping to Data Transformation mapping.	18	5	5	0	1	1
11. Flag code fields consisting of blanks as error.	5	8	10	1	0	6
12. Automated conversion from EDI to XML messages.	11	10	6	0	0	3
13. Have user level locking capability for maps in TEST and PROD.	18	7	4	0	0	1
14. Add capability to process and translate HL7 data.	1	0	19	0	0	10
15. Support WDI Client on Windows XP platform.	8	4	15	1	0	1
16. Add Transaction Store for DT maps(WDI 3.2), include all functionality available in MVS.	16	6	7	0	0	1
17. E-mail notification capability of translation failure.	15	9	6	0	0	0
18. Timers (by TP/transaction) for overdue FAs (All WDI).	8	10	11	0	0	1
19. Auto field fill-in in WDI Client of fields	8	16	3	0	0	3

relating to each other (profiles, etc. - All WDI).

20. Add wizard to assist with the creation of Perform statements in Service profiles	6	18	5	0	0	1
21. Add web based tool for reviewing and manipulating the Transaction Store.	11	11	6	1	0	1
22. Add a 'Cut and Paste' capability to DI Client.	21	4	1	0	0	4
23. Add a 'Search' function to DI Client.	10	12	7	0	0	1
24. Create an internal TP ID index.	10	9	8	1	0	2
25. Add the capability to set up the MQ queue on the where usage area.	7	5	13	1	0	4
26. Add the capability to able to set up the MQMD info on the where usage area.	6	4	15	1	0	4
27. On "Add TP Usage for Receiving" screen, aside from Responsible Agency Code, Version & Release, also add Industry Identifier Code:	0	3	20	0	0	7
28. Create DI Client map report that is similar in format to the DI mainframe report.	11	8	9	0	0	2
29. On DI Client/ADF/Dictionary, make it easier to change structure to record, record to loop, etc.	11	13	2	0	0	4
30. On MQ receive, can we have the Receive File unwrapped, either new line for each message or vertical format?	9	5	11	0	0	5
31. We need a way to mark transactions as received by application, both manually and programatically.	5	8	13	0	0	4
32. Add a new Network Status code that means "Accepted by Application". It would make more sense than using the present "Accepted by Network".	7	4	15	0	0	4
33. Add the BatchID field to the C record layout.	3	7	18	1	0	1
34. Add the BatchID field to display on Interchange, Group and Transaction Detail screens.	3	10	15	0	0	2
35. Allow users to change the Network Status via the Update Interchange/Group Status screen.	2	9	14	0	0	5
36. Allow BatchID and Application ID to be used as an alternate key for the Status Update API..	2	9	15	0	0	4
