

Build Team Capability

Rational Rose Deployment Service

The Rational Rose® Deployment Service is a configurable service offering that enables you to deploy visual modeling with Rational Rose in the most efficient and effective manner to meet your specific needs. Your Rational® account team works in partnership with you to transfer Rose technology and best practices in visual modeling to your team.

This deployment service provides the guidance and tools necessary to address your unique situation while mitigating the risks associated with introducing new technology into your organization. Rational's many years of experience in successfully introducing tools and best practices are combined into a deployment service package that will help you take full advantage of your investment in Rational Rose.

Clearly Defined Milestones and Deliverables

The Rational Rose Deployment Service follows a proven path to success and includes a comprehensive set of activities and deliverables addressing best practices, environment setup, training, deployment, and a follow-up assessment.

Setup and Configuration of Rational Rose

Your Rational technical representative visits your site to help set up your project(s) and configure your Rational Rose model to support team development. This enables you to start off your project with an efficient environment and avoid common pitfalls often associated with implementation of a new tool.

Rational Rose Training

On-site Rational Rose training is held to teach you how to effectively apply Rose to perform visual modeling in your team environment reducing ramp-up time and ensuring all end-users start the project with the same knowledge.

On-Site Consulting and Mentoring

A Rational technical representative provides on-site mentoring to project members on the desired topics, such as forward- and reverse-engineering and team development using Rational Rose. This provides you with a solid foundation to work more efficiently.

Follow-Up Assessment

Approximately 30 days after the initial deployment, your Rational technical representative will return to evaluate your project's initial success by reviewing the current state of the technology and process deployment. This evaluation identifies potential problems, and provides recommendations in order to avoid unnecessary project delays.

Rational Deployment Services help you:

Enhance efficiency and predictability of deploying a new technology

Improve communication and teamwork

Accelerate self-sufficiency

Leverage Rational's industry-leading software development experience

Recommended for:

Project teams or organizations of any size that are newly adopting Rational Rose. This service is also recommended for existing Rose users who are expanding the use of visual modeling with Rose within their organization.
