

Rational Unified Process Deployment Service

RATIONAL DEPLOYMENT SERVICES HELP YOU:

- Enhance efficiency and predictability of deploying a new tool
- Improve communication and teamwork
- Accelerate self-sufficiency
- Leverage Rational's industry-leading software development experience

RECOMMENDED FOR:

Project teams or organizations of any size that are newly adopting the Rational Unified Process. The service is also recommended for current users who are expanding the use of the Rational Unified Process within their organization.

The Rational Unified Process™ Deployment Service is a configurable offering designed to enable you to deploy the Rational Unified Process (RUP) in the most efficient and effective manner possible. Working in partnership with your Rational account team, you will receive the guidance and tools necessary to adopt RUP to address your unique situation while mitigating the risks associated with introducing new methodology into your organization. Rational® Software's many years of experience in successfully introducing software engineering best practices are combined into a deployment service package that will help you take full advantage of your investment in RUP.

Clearly Defined Milestones and Deliverables

The RUP Deployment Service follows a proven path to success and includes a comprehensive set of milestones and deliverables addressing best practices, training, deployment, and a follow-up assessment.

RUP Instantiation

Your Rational technical representative works with key project stakeholders to assess your project's current practices, resulting in recommendations for process improvement. The Rational Unified Process is instantiated to meet your specific needs to ensure the success of the project by starting with a well-defined process.

End-User Deployment

Accelerate the path to effective use of the Rational Unified Process through on-site training, mentoring, and a project-specific process website available to your user community. Maximize team efficiency by starting the project team with the same baseline of knowledge.

Follow-Up Assessment

Approximately 30 days after the initial deployment, your Rational technical representative will return to evaluate your project's initial success by reviewing the current state of the technology and process deployment. This evaluation identifies potential problems and recommendations are made in order to avoid unnecessary project delays.
