to the decade of smart

is changing the game

and complexity bring new challenges

ter systems for a smarter planet

Data center is under pressure

7 out of 10 companies in the Global 1000 will need to modify their data centers to meet increased power and cooling requirements.

70 cents per dollar is spent maintaining current IT infrastructures rather than adding new capabilities.

78% of CIOs want to improve the way they use and manage their data.

complexity bring new challenges

*planet requires real-time data analytics and
unprecedented scale and complexity*

Terabytes
