

# 10 reasons to buy eNetwork Communications Suite

*One easy answer for universal information access*

- 1 Marketplace-leading emulation, collaboration, TCP/IP, and Web access software all in one package.** IBM eNetwork Communications Suite delivers complete, easy access to all of your corporate intranets and host data, Lotus Notes, and the Internet. Communications Suite combines the power of IBM Personal Communications line of client communication products, Lotus Notes Mail, FTP Software 32-bit TCP/IP protocol stacks and applications, and Netscape's Navigator browser.
- 2 Universal connectivity.** Communications Suite addresses your business needs by providing an extensive range of connectivity options to let you communicate from anywhere. Communicate through any LAN or WAN network using Communications Suite multiprotocol support. When away from the office, use Communications Suite dial-up support for secure remote access to your corporate intranet or the Internet.
- 3 Premier, full-function terminal emulation.** Personal Communications (PCOMM) allows you to access S/390 and AS/400 applications with a powerful graphical user interface that is easy to use, is effortless to learn, and has a common look and feel. Communications Suite also includes terminal emulation from FTP Software for VT52 through 420, Wyse 50/60, SCO ANSI, and IBM PC.
- 4 World-acclaimed client/server messaging system.** With Lotus Notes Mail, you can communicate and share information with your colleagues, customers and suppliers. Notes Mail incorporates the three-pane cc: Mail interface, which makes it simple to organize, navigate, locate and preview e-mail messages and other documents.
- 5 Next-generation 32-bit TCP/IP technology.** Communications Suite includes all the next-generation TCP/IP protocol stacks and applications from FTP Software that you need for complete access to your intranets and the global Internet. With industry-leading, 32-bit TCP/IP technology from FTP Software, Communications Suite boosts the power of your desktops while providing a solid foundation for future growth.
- 6 Investment protection and savings.** With Communications Suite unique combination of rock-solid, mission-critical applications, such as PCOMM, Lotus Notes, and next-generation technology, such as Internet Protocol Version 6 from FTP Software, your investment in core desktop communication software is protected. You can easily upgrade as your needs grow.
- 7 World-leading Web browser and plug-ins for your Internet and intranet needs.** Communications Suite lets you navigate your corporate intranet and the Internet with the Netscape Navigator. Your productivity and effectiveness on the Web can be increased by using Communications Suite additional Netscape plug-ins, such as FirstFloor Smart Bookmarks and Adobe Acrobat Reader.
- 8 Common communication desktop configuration across your enterprise.** Communications Suite support for Windows 3.1, Windows 95, or Windows NT 4.0 allows you to focus on your application needs and not on your operating system restrictions as you migrate from Windows 3.1 to Windows 95 or Windows NT. There is no need to purchase a different version of Communications Suite when you change Windows operating systems.
- 9 Single package, single installation interface, and single source of support.** Communications Suite eliminates the need to obtain multiple desktop software packages to solve your enterprise communication needs. With Communications Suite single installation interface, you can install everything or just the functions you need.
- 10 Extensive set of APIs.** Software developers can use the Communications Suite rich set of application programming interfaces (APIs) to develop powerful applications. Supported APIs include but are not limited to WinSock 2.0, Added Common-ISDN-API (CAPI), OPEN Object, OPEN Script, and APPC.
