

IBM eNetwork Personal Communications and Host On-Demand: Your Choice of Host Access in a Single Package

Overview

The eNetwork™ Personal Communications and eNetwork Host On-Demand programs deliver complete, easy access to your corporate intranets and host data.

The combined package incorporates IBM's powerful host-access solutions to give you access to your information, wherever it resides, in the most convenient way.

You can mix and match support to user and operations requirements.

Your host access needs are met with the single, flexible emulator package. This release contains the latest levels of Personal Communications and Host On-Demand for Windows™ 95, Windows NT®, and OS/2®:

- eNetwork Personal Communications V4.2
- eNetwork Host On-Demand, V2.0.1a

Intended Customers

Customers who:

- Want to obtain their enterprise client communication support for host access from a single, world-class vendor
- Want one-stop shopping with a single order, and a single vendor for support

- Want to manage and standardize on a common base of host-access support throughout their enterprise or organization
- Have some users who need a high-function emulator with many added productivity functions, and would be satisfied only by function supported by Personal Communications
- Have other users best served by an emulator that can be downloaded whenever the need for host access arises, with no need to copy and install the latest level of code

Key Prerequisites

A Java™ -enabled browser and Windows 95, Windows NT 4.0, or OS/2 Warp

Planned Availability Date

July 17, 1998

At a Glance

Offer the best service to every user:

- **eNetwork Personal Communications**
 - Full-function terminal emulation
 - Increased productivity for your most demanding users
- **eNetwork Host On-Demand**
 - Quick support for host access
 - Offered to any user with a Java-enabled browser such as Navigator or Internet Explorer
 - No other workstation support required

Technical Information

Specified Operating Environment

Hardware Requirements: For installation, a PC capable of reading a CD-ROM is required. Other requirements are summarized below. Refer to the **Reference Information** for details of specific configuration requirements.

Windows™ 95

- Intel 80486/66MHz, or faster, microprocessor
- 8 MB RAM (16 MB recommended)
- Available disk space for components selected:
 - 65 MB for Personal Communications 3270 or 5250 installation
 - 15 MB for Host On-Demand Server™ function or to support resident applet files
- For a LAN connection, a LAN adapter, with a device driver supporting NDIS or ODI
- For a dial-up connection, any Hayes-compatible modem, supporting 9600 bits per second, or higher, and a standard, switched telephone line

Windows NT®

- Intel 80486/66MHz, or faster, microprocessor (or Pentium™ or Pentium PRO microprocessor)
- 24 MB RAM
- Available disk space for components selected:
 - 53 MB for Personal Communications 3270 or 5250 installation
 - 15 MB for Host On-Demand server function or to support resident applet files
- For a LAN connection, a LAN adapter, with a device driver supporting NDIS or ODI
- For a dial-up connection, any Hayes-compatible modem, supporting 9600 bits per second, or higher, and a standard, switched telephone line

OS/2® Warp

- Intel 80486/66MHz, or faster, microprocessor (or Pentium or Pentium PRO microprocessor)
- 16 MB RAM
- Available disk space for components selected:
 - 42 MB for Personal Communications 3270 or 5250 installation
 - 15 MB for Host On-Demand server function or to support resident applet files
- For a LAN connection, a LAN adapter, with a device driver supporting NDIS or ODI
- For a dial-up connection, any Hayes-compatible modem, supporting 9600 bits per second, or higher, and a standard, switched telephone line

Software Requirements: eNetwork™ Personal Communications and Host On-Demand can be installed on any Windows 95, Windows NT 4.0, or OS/2 Warp platform. Refer to the letters in the **Reference Information** section for specific requirements.

Host On-Demand, when installed as a server, requires support for JVM 1.1. When downloaded from a server, Host On-Demand requires a browser that provides JVM 1.02, or later.

Performance Considerations: Response time in a terminal communications environment depends upon a variety of system unit and data communication speed and load factors. These include the types and speeds of the system unit processor, number and types of communications adapters installed, the line speed of the communication service, and the amount of processing done by the applications installed on the workstation.

Planning Information

Packaging: eNetwork Personal Communications and eNetwork Host On-Demand program packages are distributed with the following materials:

- IBM International Program License Agreement in multilanguage booklet and its License Information
- Proof of Entitlement (PoE)
- CD-ROM for Personal Communications
- CD-ROM for Host On-Demand

eNetwork Personal Communications and eNetwork Host On-Demand **upgrade** program packages are distributed with the following materials:

- Upgrade sticker
- IBM International Program License Agreement in multilanguage booklet and its License Information
- PoE
- CD-ROM for Personal Communications
- CD-ROM for Host On-Demand

This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: <http://www.ibm.com>.

Security, Auditability, and Control

eNetwork Personal Communications and eNetwork Host On-Demand runs under the control of the operating system for which they were designed and are subject to the controls that the operating system provides.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering Information

eNetwork Personal Communications and eNetwork Host On-Demand is available as a program package. The program package includes one Registered User PoE and can be copied to support your authorized use of the program as described below.

Additional Registered User PoE are available. For each Registered User PoE, you can:

1. Install and use Personal Communications on one computer
and
2. Allow the Registered User to access and use Host On-Demand

Host On-Demand includes the Host On-Demand Express feature. This feature is licensed for use in a wired network only. Use across a wireless network is expressly prohibited.

An upgrade program package and upgrade registered user authorizations are available to customers currently licensed for the following qualifying programs:

- eNetwork Communications Suite Version 1.x
- eNetwork Host On-Demand Version 2.x
- IBM 3270 or 5250 emulator programs
 - Personal Communications AS/400® and 3270
 - Personal Communications/3270
 - Communications Manager/2
 - OS/2 EE, ES, ES+DB
 - 3270 PC
 - 5250 PC
 - 5250 Workstation Feature
 - Personal Communication/5250
 - Client Access/400™
 - Any other IBM 3270 or 5250 full-function emulator program
- IBM APPC Networking Services for Windows
- Any specifically-licensed, non-IBM 3270 or 5250 full-function emulator programs including, but not restricted to, any of the following:
 - EXTRA!
 - Rumba
 - IRMA Workstation
 - Rally
 - Rumba for AS/400
 - IRMA/400
 - CGS
- IBM Internet Connection for Windows Corporate Kit Version 5.0

Customers can acquire upgrades up to the current level of use for which they are currently authorized for the qualifying programs.
