

## WebSphere Host On-Demand (HOD) Migration Services

The Host Integration Services team is pleased to offer consulting services to assist customers with migrating your applications and macros from other emulators to Websphere Host On-Demand (HOD). Our team is made up of professionals who possess a depth and breadth of Host Integration product knowledge unmatched in the industry. The team maintains a close relationship with the Host Integration Development Lab, where the future of our products is being determined every day. Our consultants have experience with HOD migration projects and are experts at leveraging our migration tools to accelerate your migration effort. The tools are available for download on the Host On-Demand web site at <http://www.ibm.com/software/webservers/hostondemand/>.

### **HOD Migration Services**

Host Integration Services will customize a services engagement to meet your specific needs. These services may include but are not limited to:

- ◆ **Project planning and management**
  - ✓ Perform an assessment of the current environment and the work effort necessary to migrate to HOD
  - ✓ Assess the usefulness of available tools that may be used to ease and accelerate the migration effort
  - ✓ Work with the customer to develop specifications for the HOD environment
  - ✓ Work with the customer to develop a project plan and estimated timetable to migrate
  
- ◆ **HOD Migration Assistance**
  - ✓ Work with the customer to migrate a number of macros and/or applications and provide skills transfer to your staff to complete the job
  - ✓ Perform conversion services to your specifications (may be done on site at customer location or remote)

The duration of the services specified above is dependent on the planned size and scope of the engagement and will be estimated during the project planning phase.

For more information or to request assistance, please visit our web site or contact your software services sales representative.
