CHANGE MADE EASY

**ResQ!Net:** At 300K, a 100% pure Java solution
for graphically accessing your host applications.

**ResQ!Net for Host On-Demand ™:**
Thin Java applet works as an add-on with IBM's eNetwork
Host On-Demand (HOD) to graphically present host applications.

**ResQ! for Windows:** Windows-based version that quickly
and easily builds a customizable GUI without programming
or scripting.

# ResQ! technology

- Provides TN3270/5250 host conectivity.

- Works with existing connectivity solutions including IBM's Host On-Demand.

- 100% pure Java version lets you web enable your host applications.

- Windows version supports optional plug-ins for added functionality.

# ResQ! Net:

- Instantly transforms Mainframe and AS/400 "green screens" into a customizable GUI.

- Requires absolutely no programming, host or server component.

- Generates no scripting or coding; runs entirely within the browser.

- Provides access to multiple sessions simultaneously.

- Never see a green screen.

- Allows drag-and-drop customization of user selected host screens.

- Supports foreign languages.

- Bypass navigational screens for more targeted workflow.

- Multiple customizations of the same screen.
