## Case: European Automotive OEM

**Leading European OEM**

**Manufactures a range of SUVs, Station wagons (estates), Sedans (saloons), Compact sedans, Coupes**

**2,300 local dealers from around 100 national sales companies worldwide**

**Largest markets are the United States, Sweden, China, Germany, the United Kingdom, and Belgium.**

**2011: global sales of 449,255 cars (+20.3% vs. 2010).**

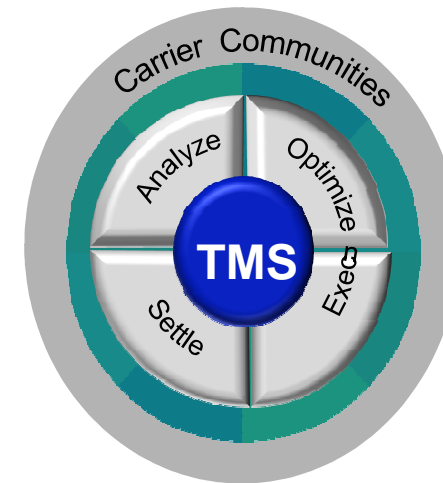

**Overall Business Objective**

**“In-source the Logistics Operations of Finished Vehicles from an outsourced 3rd party logistics provider in order to internally control, execute, and manage their global finished vehicle distribution”**

### Scope

Implement a solution which executes and manages the global finished vehicle distribution of luxury cars. This includes:

- Route Determination,
- Transit Time Calculation,
- Mode Selection,
- Carrier Contract Management & Selection,
- Shipment Visibility,
- Freight Payment and
- Electronic communication with the Shipper's 20+ systems and their 30+ multiple carriers

### Timelines

- **Live within 5 months** or the Shipper would not have been able to distribute their finished vehicles.
  - The ideal project timeline for a project with this scope would be over a year in length!
- Started March 2012 - Full scope of functionality working in Production by the end of July in 2012
  - Including the connectivity to all systems (Shipper and Carrier systems).

Logistics knowledge / Domain expertise

- + Outsourced 3rd party LSP to manage the shipper's global vehicle distribution
- + No internal vehicle distribution system or domain expertise
- + Logistics Process and Implementation experience provided by CLX logistics vital

SaaS Solution

- + Cloud Service
- + IBM and CLX joint effort
- + Live in the TMS within 5 months of the start of the project
- + Much lower overall cost than a traditional solution

Carrier On-boarding

- + CLX experienced in on-boarding of Carriers (for multiple modes).
  - Including the development and the implementation of new EDI by the Carriers
- + All of the Shipper's Carriers connected to the TMS at the time of the go-live

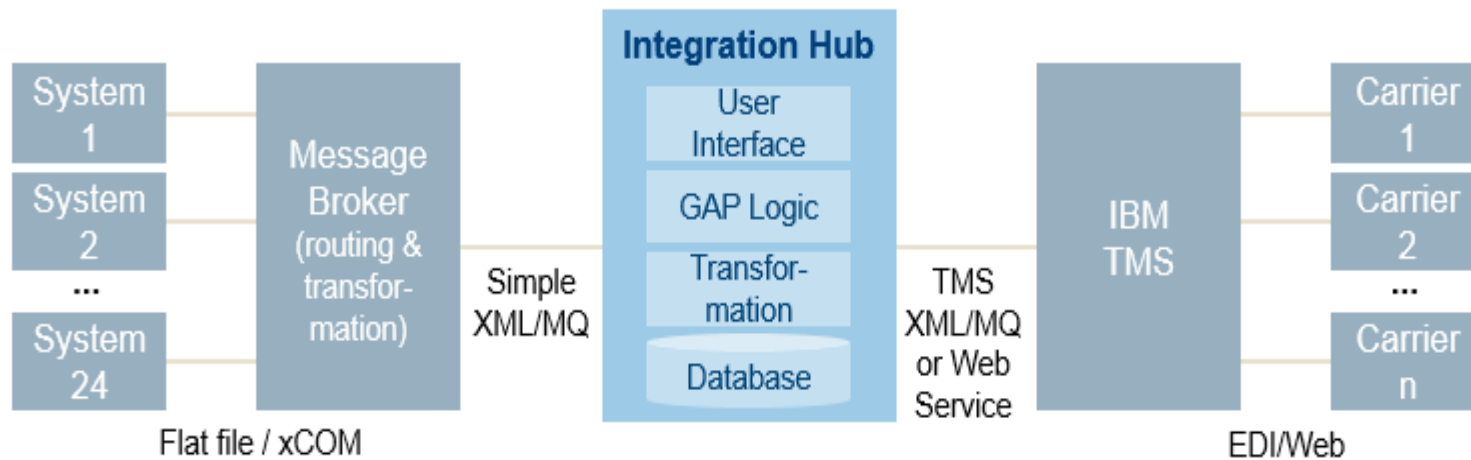

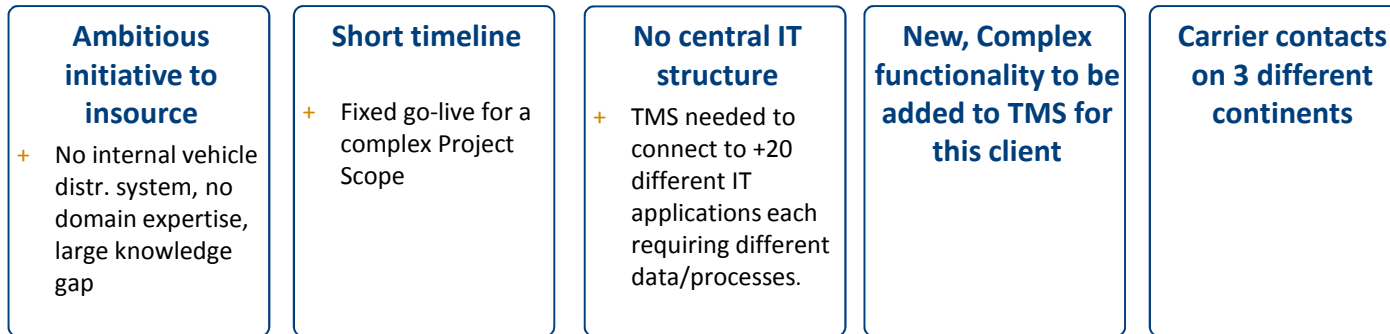

Overall IBM value

- + Full system for testing within 3 months from the start of the project.
  - Including customizations to the SaaS solution and custom cloud connectivity platform to overcome to the Shipper internal IT weaknesses

<p><b>Full deployment within 6 months</b></p> <ul style="list-style-type: none"> <li>• Deployed global solution for car distribution in less than 6 months</li> <li>• 8,000+ routes via multiple carriers and modes into 120 countries</li> </ul>	<p><b>30+ carriers connected</b></p> <ul style="list-style-type: none"> <li>+ 30+ global carriers connected and certified on IBM TMS network</li> </ul>	<p><b>Control &amp; visibility</b></p> <ul style="list-style-type: none"> <li>• Complete control and visibility of global distribution process</li> </ul>	<p><b>Car movement booking</b></p> <ul style="list-style-type: none"> <li>• Booking car movements from plant, through processing centers, ports, distribution yards and dealers (incl. Routing changes and Dealer allocation updates)</li> </ul>
<p><b>Shipment visibility</b></p> <ul style="list-style-type: none"> <li>• Tracking each shipment leg for visibility of on-time pickup and delivery</li> </ul>	<p><b>Alerts on late arrivals</b></p> <ul style="list-style-type: none"> <li>• Alerting on late events, as well as automatic update of subsequent shipment legs based on actual delivery events on prior legs</li> </ul>	<p><b>SaaS Platform</b></p> <ul style="list-style-type: none"> <li>• SaaS platform providing flexibility to scale with OEM's growth expectations and business changes</li> </ul>	<p><b>Self-billing through TMS</b></p> <ul style="list-style-type: none"> <li>• Automated Self-Billing Freight Payment processing through the TMS</li> </ul>

**Large money savings: better management of cost through removal of the 3PL and dependency on legacy system support**

**How significant are the following barriers to visibility & collaboration?**

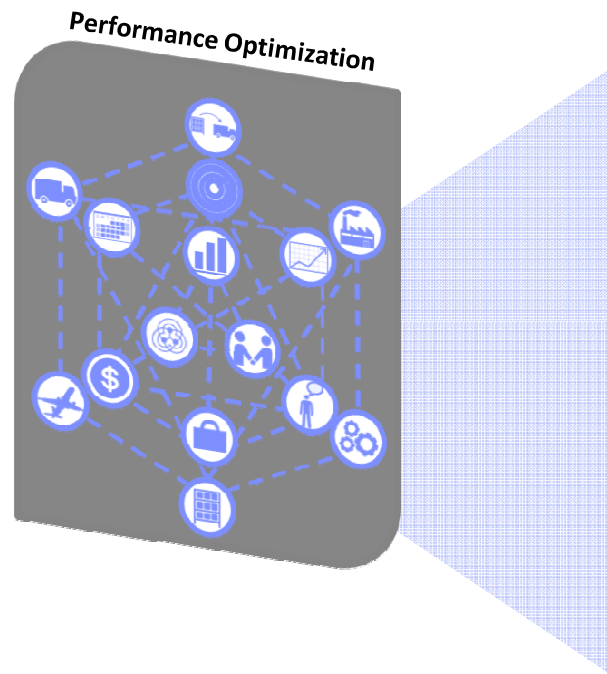

**Of your supply chain partners, where is your greatest supply chain visibility issue?**

Source: IBM Institute for Business Value

- Bundle **visibility** and **control** of the value chain into a **synchronized portal view**
- **Consolidate events** across the end-to-end value chain – customer, distribution, manufacturing, multi-tiered supply
- **Manage by exception.** Issue alerts, recommend action, when key performance indicators are trending toward tolerance boundaries
- Initiate recovery responses either automatically or through **decision feedback loops**
- Uses **advanced analytics for optimized cost, inventory and network alignment**

**Graphical view on origins, destination, steps, milestones and content of the shipments (owner, orders, etc.)**

The image displays several screenshots from the IBM Sterling TMS interface, illustrating various data visualization and reporting capabilities:

- Default Case (Weight or Cost) Reason by SubReason:** This dashboard features a pie chart showing the percentage of cases by reason, a line graph for 'Default Case by Origin City', and a detailed table with columns for 'Case ID', 'Load/Weight', 'Unload/Weight', 'Load/Volume', 'Unload/Volume', 'Origin/Weight', and 'SubReason'.
- Online Performance:** This dashboard includes a table for 'Top Type Values' and a 'Top Type Value' table with columns for 'Case Type', 'Cases', 'Weight', 'Volume', 'Cases/Weight', 'Cases/Volume', 'Weight/Volume', and 'Cases/Weight/Volume'.
- Loading Performance Dashboard:** This dashboard contains a table with columns for 'Case ID', 'Total Cases', '% Busy/Status', and 'Rank'. It also includes a pie chart for 'Case Status' with categories like 'In Progress', 'On Hold', 'Completed', and 'Cancelled'.
- Online Performance Dashboard:** This dashboard features a bar chart for 'Case Type Values' and a map of the United States showing regional performance data.

**IBM Brings World Class Technology**

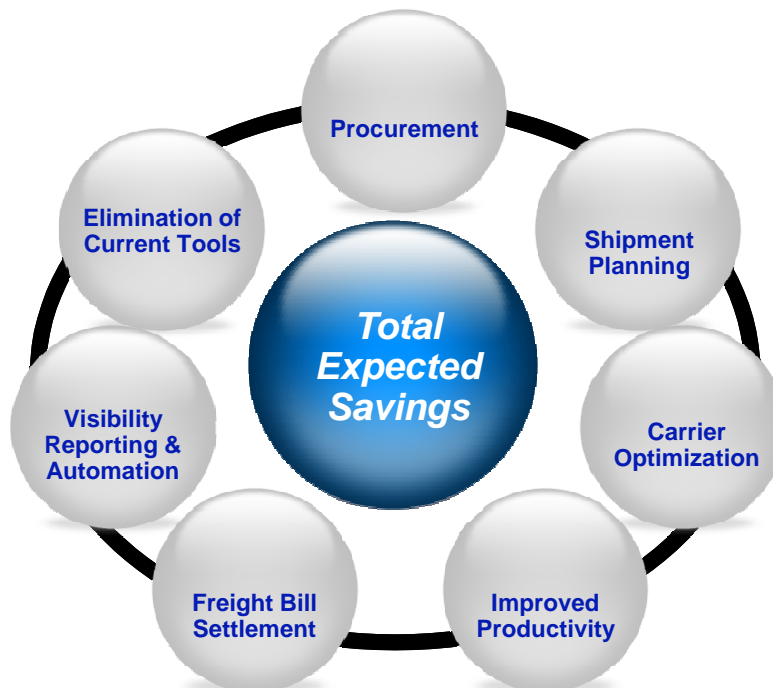

- Supply Chain Applications: Optimization & Execution in a SaaS model
- Carrier Network: 15,000+ carriers for 150+ shippers
- World Scale & World Class Development , Execution, and Support for the Network and Applications

**CLX Logistics Brings Deep & Broad Logistics Expertise**

- Process Analysis/Improvement/Design
- Proven Implementation Methodology and Resources
- Strong project managers to ensure a successful, efficient implementation
- First Line Support by Logistics & Logistics Systems Experts
- Value Added Services When and If Needed

#### Total Expected Savings

- 5-20% Logistics Cost Reductions
- Based on CLX Logistics proprietary business value assessment process, applying comparable solutions with similar shippers

Sample TMS customers

## Using a Transportation Management System to achieve Global Control Tower Visibility

- Manage customer service levels
- Pro-active alerts on disruptions
- Cost control management
- Optimize and extend to a global Network

- SAAS based,
- Good ROI
- Easy and quick to implement
- Global capability
- ERP independent
- Developed by logistic experts
