

**IBM SolutionsConnect 2013**

Turning Opportunity into Outcomes.

# IBM Content Navigator

Mark Rice, ECM Solutions Consultant

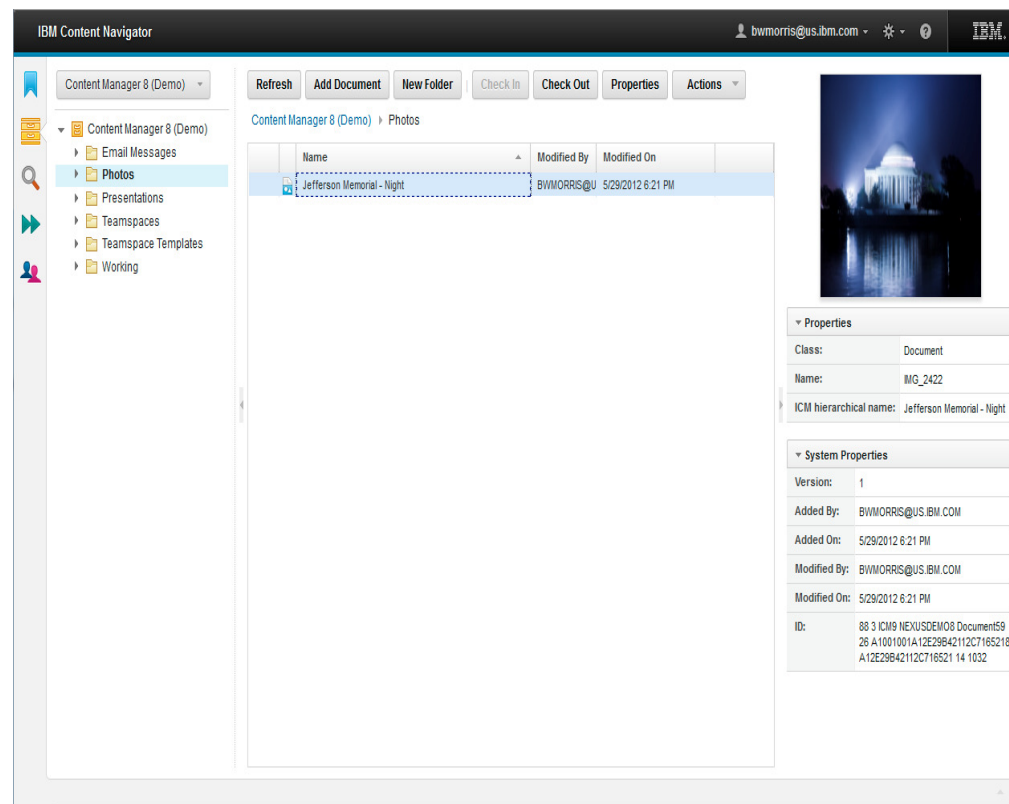

**Content in Motion**

Smarter Content. New Insights. Better Outcomes.

## What is IBM Content Navigator (ICN)?

- New ECM client and client framework/toolkit.
- Centrepiece to “one UI” strategy
- Consistent, easy-to-use, extensible ECM client.
- Goal: next version of current ECM clients
- Framework to be platform for other ECM products.

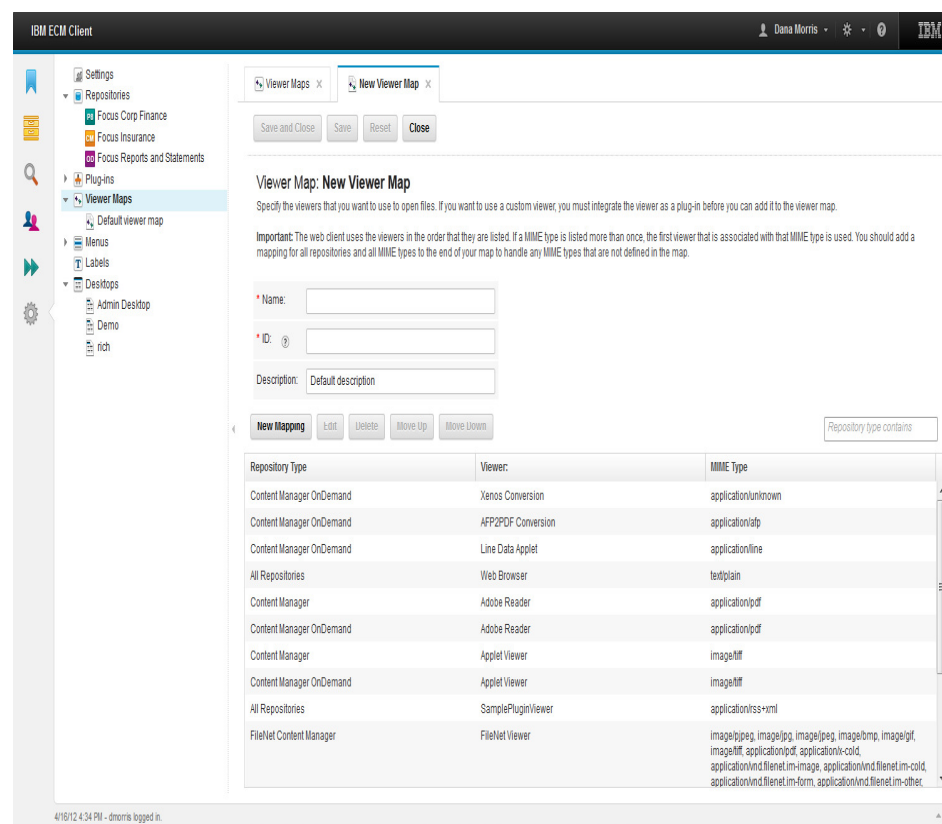

## What is IBM Content Navigator (ICN)?

- Provide an out of the box common client for CM8, P8, OnDemand, and CMIS compatible repositories
- Build on open standards
  - JavaScript, HTML, CSS, Java, etc.
- Componentize UI supporting multiple containers and use cases
- Extensible and pluggable framework
  - Adding new actions, panels, viewers, etc.
- Expose the wealth of repository capabilities and support production use cases (e.g. customer service, production imaging, etc.)
- Enable end-user provisioning of “teamspace” for without any IT involvement
- Support integration with social capabilities over time
- Support accessing content from mobile devices

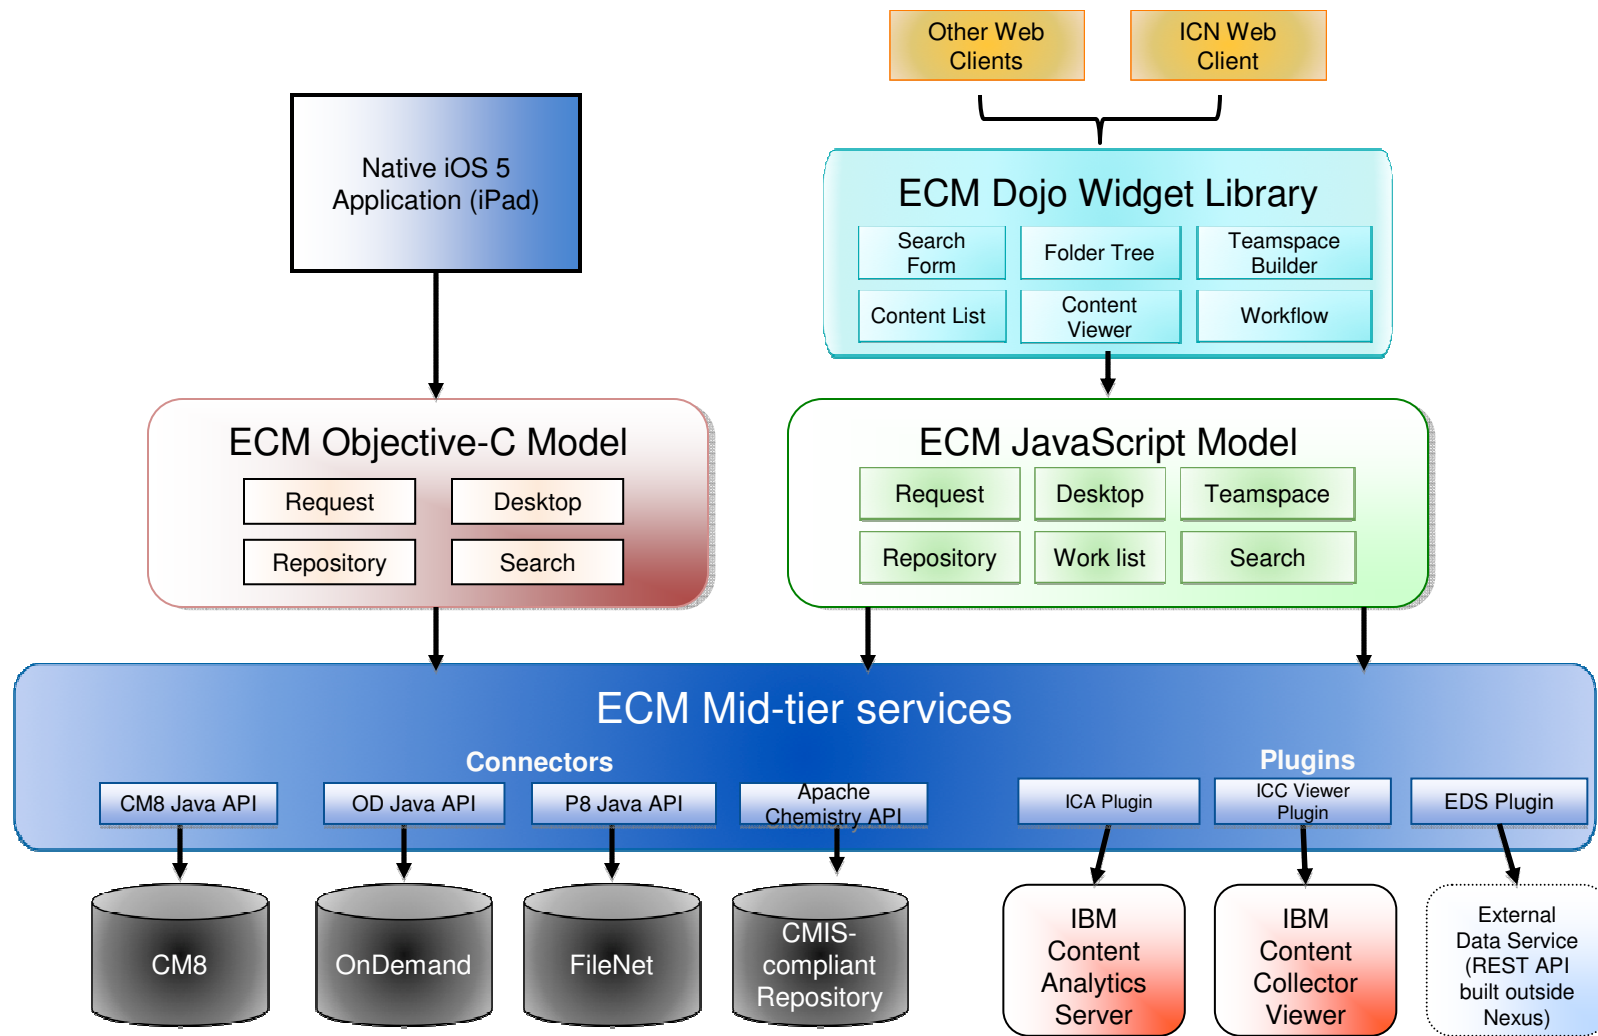

# Content Navigator UI: Easy Configuration

- Interface customization
  - Labels, icons, plugins
- Desktops
  - Allows for customizable UI views/roles
  - Can specify repositories, layout, menus, etc. per desktop
- Viewer mappings and menus
  - Custom viewers can be supported and administrators can customize any menu and/or toolbar
- Plug-ins
  - Allows for new actions and services to be added to the UI
