System z

Your guide to key sessions and activities

All your latest CICS info here!

IBM.

This year marks the 50th anniversary of the IBM Mainframe. This is the time to reflect on our past accomplishment, think about the future and above all to feel great pride in being a part of the journey to transform business and the world. That's what we have done with the IBM Mainframe for the last 50 years and what we continue to do today as we reach out toward the future and the promise it holds.

Fifty years ago, it all started with a $5 billion bet to create a new revolutionary system. That's $36 billion in today's money. IBM gathered thousands of clients and journalists in cities all over the world to announce the System/360 line of mainframe computers. At the unveiling, IBM CEO, Thomas J. Watson Jr., proclaimed that the 360 marked "the beginning of a new generation, not only of computers, but of their applications in business, science, and government."

And so it has. Just think: the air traffic control system, the ATM, the barcode, airline reservation systems, stock trading systems, weather modeling, the national smart utility grid, and the "smart car" – all made possible on the IBM Mainframe!

The innovation continues every day. There are so many exciting things going on today which we will look back on with pride. Cashless payment systems for foreigners visiting Japan. Mobile banking for the unbanked in Africa and in the Philippines. Improving crop yields by capturing data directly in the fields in tractors. And things we haven't thought of yet that will improve people's lives and make the world a better place.
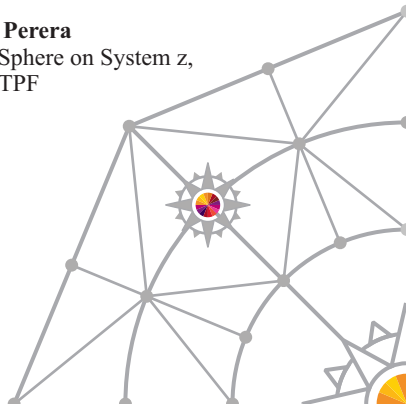

At Impact we are continuing to share our solutions, case studies, demos, and announcements. This booklet contains useful information regarding everything focused on System z and the 50th anniversary.

Key Sessions you don't want to miss

#1928 **CICS Track Opening and Portfolio Update**
Monday (1:00 p.m. – 2:00 p.m.)

#1351 **Analyst Insight: Developing an end-to-end mobile strategy from Data Center to Mobile Devices**
Tuesday (3:45 p.m. – 4:45 p.m.)

#1541 **Panel Discussion: 50 years and beyond: System z Customer Roundtable**
Tuesday (10:30 a.m. – 11:30 a.m.)

#1735 **Mobilize Your Mainframe**
Wednesday (3:45 p.m. – 4:45 p.m.)

#1349 **Meet the Experts: System z Ask the Technical Experts**
Thursday (9:00 a.m. – 10:00 a.m.)

Take time to visit our latest mobile demos in the System z booth

IBM

Retail Office Supplies Catalog Mobile Demo

This demo shows the potential to enhance and extend a legacy CICS/COBOL/VSAM application with IBM Worklight. With no changes to the CICS application, we are able to extend the reach of the Office Catalog application to Mobile users on numerous devices and to enhance the application by adding new capabilities.

Insurance Mobile Demo

This demo shows how to extend and enhance an existing CICS application to demonstrate new features and capabilities of CICS while maintaining the traditional application. An IBM Worklight mobile application interacts with the CICS General Insurance system instead of using a 3270 terminal. The mobile application can retrieve a customer's motor policy information, and initiate a claim with another customer. The claims processing uses Worklight push notifications triggered by CICS event processing, all without changing the original CICS application.

CICS at Impact
There's a Lot Going On

Here in the IBM® CICS® team, we work hard to make the most awesome transaction processing middleware in the world. Every year we bring CICS to Impact, and we get to talk to the people that we build it for. This makes us happy, and to say thanks for coming to see us we strive to put on a great set of sessions, labs and more. This year we have a lot to look forward to...

17
mobile & cloud talks from leading CICS speakers

3
chances to win a free workshop from our fab CICS Services team

240
minutes of **hands-on labs** with CICS experts

50
hours of CICS **demos** to see in the System z Software Solutions Suite

160,000
miles travelled by the CICS team to be at Impact with you

26
CICS maestros on the ground, ready for a conversation

35
hours of **CICS sessions** delivered by CICS specialists and CICS customers

3
carefully designed **session menus** with hand-picked combinations to fit every interest

We're striving to make Impact 2014 our greatest show yet, especially as we're also celebrating a friend's birthday - our old buddy System z® is 50 years young. With something for everyone, from fresh faces to old hands, and hard core techies to business brainiacs, you're invited to come along and join the party.

Oh, and one more thing... in the time it took to read this page, CICS will have processed around 57,870,350 transactions across 23 industries and in 75 countries, keeping everything from banks to universities running smoothly. Not that we're showing off or anything...

The Magnificent Mobile Menu

Dazzle and delight your technical tastebuds and uncork your bottled-up business questions with our marvellous array of mobile sessions - a dash of CICS makes mobile on the mainframe a tasty delight!

@RichGx

Yan Rong Shen ("Trinity"), CICS Software Engineer
2267 Smarter Banking Process: More Flexible & Stable Batch Process with QGate on IBM WebSphere MQ

Meet the CICS Clients

At Impact 2014, as well as the opportunity to learn all the latest about CICS from the people who built it, the IBM CICS team, you can also hear from our clients, giving you the chance to share the experiences of the people who actually use CICS every day.

Ezriel Gross

CEO, CIRCLE Software, Education, Software & Consultancy company specializing in Mainframe; IBM Gold Consultant.
Ezriel specializes in CICS Web Services, CICS Web Support, CICS Performance, CICS Internals and CICSPlex SM.
Session 1966 Best practices for CICS SOA Connectivity

CiRCLE
SOFTWARE

Sylvie Constans

Software Engineer, CA-Silca, IT organization of Crédit Agricole S.A., one of Europe's largest banking groups.
Sylvie has been a System Engineer at CA-Silca since 2005.
Session 3070 CICS TG & CICS in a High-Availability Environment

CA SILCA
PRODUCTION INFORMATIQUE

Fransiscus Kaurrany

Core Banking Application Manager, BCA, one of the largest private banks in Indonesia.
Fransiscus specializes in z/OS, CICS and DB2.
Session 2267 Smarter Banking Process: More Flexible & Stable Batch Process with QGate on IBM WebSphere MQ

BCA

Russ Teubner

CEO, HostBridge, a company which focuses on the development and delivery of software products that integrate existing and emerging technologies within large organizations.
Russ is an inventor and enterpreneur in the software industry, he specializes in integration of IBM mainframes and applications.
Session 2880 CICS TS V5: Tales from the Trenches

HOSTBRIDGE
TECHNOLOGY

Carsten Trebbien

Performance Specialist, Danske Bank, the largest bank in Denmark and a leading player in the northern European financial markets.
Carsten specializes in z/OS, CICS and DB2.
Session 3073 z/OS and CICS Consolidation Project at Danske Bank

Danske Bank

Craig Whitaker
Technology Manager, Humana, an American health insurance company.
Craig's focus is on Transaction & Services Infrastructure.
Session 2436 Modernizing the Mainframe: Humana Takes CICS
to the Next Level

Humana.

Elena Nanos
Lead Systems Architect, HCSC, the largest customer-owned health insurance
company in the US.
Elena specializes in CICS Web Enablement, WebSphere Application Server
and MQ Series.
Session 1317 You've Got a Friend on IBM System z - Tales from CICS TG

Michael Zapytowski
Senior Staff, CICS Engineer in a leading Financial services firm.
Michael specializes in CICS Web Services, JVMProfiles and UNIX
System Services.
Session 3071 Workload Balancing with CICS Web Services Using CPSM
Session 3072 CPSM Sysplex Optimised Workload Routing

Robert Zenuk
Senior Staff, CICS Engineer in a leading Financial services firm.
Robert specializes in CICSPlex, CICS SM, high availability, performance,
application integration, capacity planning and tooling.
Session 3071 Workload Balancing with CICS Web Services Using CPSM
Session 3072 CPSM Sysplex Optimised Workload Routing

Brad Kemp
IT Analyst, State Farm, a group of insurance and financial services companies.
Brad has 20+ years of working with IBM Mainframe Systems and specializes in
CICS/DB2 and now works as a CICS System Programmer.
Session 3116 Making It Easy for Mainframe Apps to Be Clients in an
SOA Environment

Larry Turilli
IT Analyst, an IBMer contracted to Collabera at State Farm, a group of insurance
and financial services companies.
Larry has a 35+ years of experience with IBM Mainframe Systems; he specializes
in CICS/DB2 and now works as a CICS System Programmer.
Session 3116 Making It Easy for Mainframe Apps to Be Clients in an
SOA Environment

CICS Complete Session Schedule

CICS Keynote (Session 1928) - Monday at 13:00

Our joint speakers open the CICS track with all the latest from the CICS portfolio...

Dave Jeffries, Director of CICS Portfolio Development, will share the key themes from our latest releases, CICS Transaction Server V5.2 and CICS Tools V5.2, and will highlight the value that CICS support for mobile and cloud can bring to customers and business partners alike.

Gary Barnett, Principal Analyst at Ovum, has worked as an analyst and consultant for the last 15 years. Gary will use this industry insight to comment on important business issues surrounding service agility, operational efficiency and cost, discussing the key concerns that CICS TS V5.2 helps to address.

Day	Time	Session	Location
Mon 28 Apr	13:00 – 14:15	1928: CICS Track Opening	Marcello 4401 A
	16:00 – 17:00	1699: CICS TS V5 Technical Overview	Delfino 4102

WebSphere Application Server for z/OS

Learn about new capabilities to simplify mobile and cloud connectivity to z/OS applications and data . WebSphere Application Server for z/OS helps you:

- ✓ Quickly develop and deploy enterprise Java applications co-located with mainframe services
- ✓ Improve operational agility via concurrent batch and online processing
- ✓ Leverage z/OS qualities of service for resiliency, scalability, and transactional integrity

Key Sessions

AAD- 1969	*What's New with the IBM WebSphere Application Server Liberty Profile on z/OS* *Wednesday, 2:15 PM*

IBM MQ for z/OS

Delivering best in class messaging for z/OS environments, enabling cloud and mobile connectivity across the enterprise.

IBM MQ for z/OS provides:

- ✓ Flexible service-enabled businesses via integration of heterogeneous applications
- ✓ Rapid, reliable, simple, secure exchange of data across applications, systems and services
- ✓ Respond to peaks in transaction workloads through scaling capabilities such as clustering

Key Sessions

AMC-1863	*What's new in IBM Messaging* *Monday, 1:00 PM; Tuesday, 2:15 PM*
AMC-1800	*WebSphere MQ for z/OS and CICS: Workload Balancing in a 'Plexed world* *Tuesday, 2:15 PM*
AMC-1876	*WebSphere MQ for z/OS: Latest Features Deep Dive* *Wednesday, 2:15 PM*
AMC-1877	*WebSphere MQ for z/OS: Performance and Accounting* *Monday, 4:00 PM*
