Implementation

Attend a Fit for Purpose Workshop to set a strategy for your IT systems architecture

- **Identify opportunities for growth**, factoring in environment, process model and other technical and non technical realities
- **Help identify the most optimal platform** on which to deploy new workloads and applications based on technical, operational and cost data
- **Lower costs** by exploiting the strengths of each platform currently implemented in the infrastructure

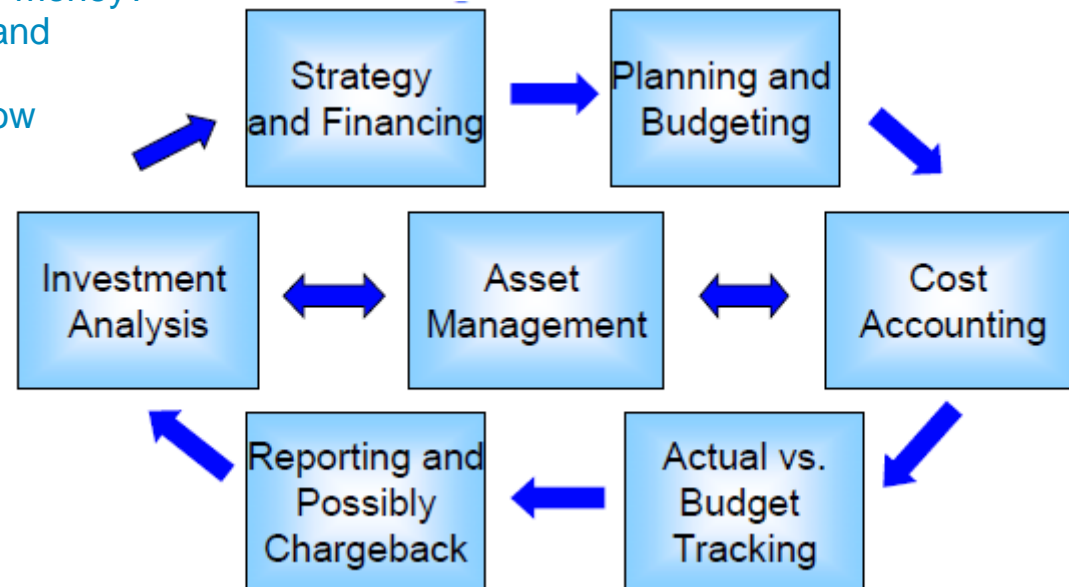

Fit for Purpose Parameters

A Financial Management Assessment (FMA) Workshop can help align IT TCO to true costs, usage and value

Answer some key questions about your finances:

- "Why can't our cost be more predictable?"
- "How can we incent the business to save money?"
- "How can I manage the supply and demand of IT resources?"
- "How come my IT spend continues to grow when the capacity is so cheap?"

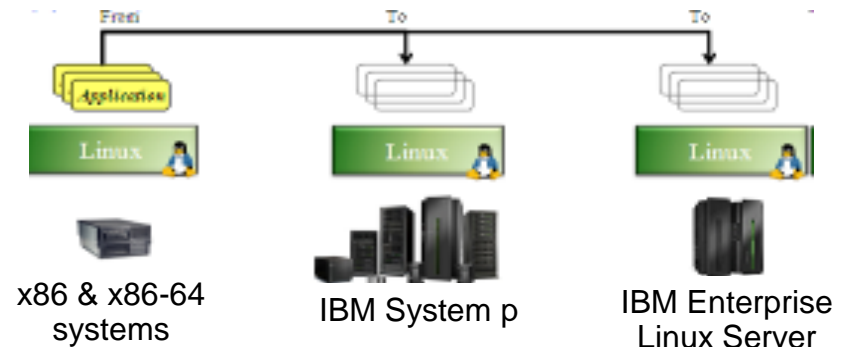

- A no charge, client focused engagement
- An IBM FMA Representative will meet with clients to discuss their current Financial Management process and tools
 - Purpose is to determine areas of improvement or enhancement
 - Determined through process refinement, additional IBM solutions, and/or IBM implementation resources

IBM provides free services support to ISVs when moving Linux applications from x86 to Enterprise Linux Server

Chiphopper services offering:

- Designed for IBM Business Partners (PartnerWorld members)
- Helps them port their existing Linux applications from competitive platforms onto IBM's Enterprise Linux Server (and IBM System p)
 - Enablement and guidance services, plus Linux support
 - Access to IBM hardware and middleware, proof of concept environments and platforms for testing
 - Technical assistance during the port
 - Post-porting issue support
- Free of charge service

"OpenPro and IBM Chiphopper team are working together to provide a flexible, scalable and fully featured business management ERP solution. This system uses the power of open source technologies with many advanced features that have saved clients millions of dollars in operating efficiencies."

- Jim Clark, CEO of OpenPro
