Disclaimer/Trademarks

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements, or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

The information on the new products is intended to outline our general product direction and it should not be relied on in making a purchasing decision. The information on the new products is for informational purposes only and may not be incorporated into any contract. The information on the new products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. The development, release, and timing of any features or functionality described for our products remains at our sole discretion.

This information may contain examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious, and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.

Trademarks The following terms are trademarks or registered trademarks of other companies and have been used in at least one of the pages of the presentation:

The following terms are trademarks of International Business Machines Corporation in the United States, other countries, or both: DB2 Universal Database, eServer, FlashCopy, IBM, IMS, iSeries, Tivoli, z/OS, zSeries, Guardium, IBM Smart Analytics Optimizer, Data Encryption Tool for IMS and DB2 Databases, DB2 Administration Tool / DB2 Object Compare for z/OS, DB2 Audit Management Expert for z/OS, DB2 Automation Tool for z/OS, DB2 Bind Manager for z/OS, DB2 Change Accumulation Tool for z/OS, DB2 Cloning Tool for z/OS, DB2 High Performance Unload for z/OS, DB2 Log Analysis Tool for z/OS, DB2 Object Restore for z/OS, DB2 Path Checker for z/OS, DB2 Query Management Facility for z/OS, DB2 Query Monitor for z/OS, DB2 Recovery Expert for z/OS, DB2 SQL Performance Analyzer for z/OS, DB2 Table Editor for z/OS, DB2 Utilities Enhancement Tool for z/OS, DB2 Utilities Suite for z/OS, InfoSphere Change Data Capture, InfoSphere Data Event Publisher, InfoSphere Replication Server, Optim Data Growth Solution for z/OS, Optim Development Studio, Optim pureQuery Runtime, Optim Query Workload Tuner, Optim Test Data Management Solution for z/OS, Tivoli OMEGAMON XE for DB2 Performance Expert on z/OS

EMC and TimeFinder are trademarks of EMC Corporation

Hitachi is a trademark of Hitachi Ltd

Microsoft, Windows, Windows NT, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both.

Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.

Other company, product, or service names may be trademarks or service marks of others.

IBM DB2 Tools: Are you ready for DB2 10?

All New with DB2 10!

DB2 Utilities Suite 10 drives down costs with autonomics, page sampling and further offloads processing to zIIPs and FlashCopy. Developed in conjunction with DB2 10 to provide maximum data integrity and exploit all new functions out of the box. *Reorg and Runstats enhanced.*

Tivoli OMEGAMON XE for DB2 Performance Expert 5.1 extends its insight into distributed workloads and offers a robust infrastructure to support DB2 10 subsystem consolidation, with lower monitoring overhead. *The recommended performance monitor of DB2 10!*

DB2 Administration Tool/Object Compare 10.1 extends the value of DB2 10 with new capabilities that allow DBAs to quickly exploit DB2 10 features like schema evolution. *Reduces the overhead of many routine tasks.*

QMF 10 delivers built-in visualizations and reports that dramatically extend the value to end users. *A new metadata layer simplifies the process to understand and create reports.*

DB2 Sort 1.1 lowers the cost of DB2 Utility sort processing by exploiting advanced features of System z and z/OS while optimizing overall system efficiency. *Significantly reduces batch windows.*

DB2 High Performance Unload 4.1 support for TCP/IP Pipes and the new internal format as well as a new native XML data unload capability.

Roadmap to Exploit DB2 10 for z/OS

Accelerate your ability to leverage compelling DB2 10 features

➔ Administer DB2 Performance Savings

Optimize Dynamic Infrastructure Performance

Drive DB2 Efficiency and Productivity

Recover DB2 Advanced Technology

Accelerate Time to Value

DB2 Administration Tool V10.1

- **Drives immediate DB2 10 out-of-the-box Performance Savings**
- **Exploits DBA-managed Performance Improvements**
 - INCLUDE additional Columns in Indexes to Exploit Index Only Access
 - Converts LOBs to INLINE to boost performance
- **Extends Administration Capabilities**
 - Manages new Security models
 - Reduces Schema change overhead
 - Recovers from Access Path regressions
 - Manages Autonomic Statistics collection
- **Supports Time Travel with Temporal Data – “as of”**
 - Records changes in history – System Time
 - Defines, updates and queries events in past or future – Business Time
 - Browses Temporal Data “as of” a point in time with DB2 Table Editor 4.3

DB2 Admin Tool V10.1 **INCLUDE** Index non-key Column

- **Benefits**
 - Decrease index maintenance
 - Decrease physical storage
 - Index only access

- **Supports only UNIQUE indexes**

- **Places the object in RBDP (Rebuild Pending)**

- **Supports INCLUDE COLUMN syntax**
 - CREATE INDEX
 - ALTER INDEX

DB2 Admin Tool V10.1 INCLUDE Index non-key Column

```

DB2 Admin ----- DSNT Redefine Index ----- Row 1 to 5 of 5
Command ==> Scroll ==> PAGE

Commands: CONTINUE ORIGINAL
Line commands: nnn A|D - Sequence & order R - Remove the column I - Include
A - Ascending D - Descending RA - Random U - Update expression/XML pattern
B - Business Time without overlaps

DB2 Admin Tool V10.1 INLINE LOB

- **Stores INLINE LOB data in base table space**

- **Benefits**
 - Minimizes I/O
 - Minimizes the management of table space and index space

- **Defines default max length - LOB_INLINE_LENGTH**
 - Default = 0

- **CREATE TABLE, CREATE TYPE, and ALTER TABLE**

DB2 Admin Tool V10.1 INLINE LOB

```

DB2 Admin Tool V10.1 Temporal Table

- **Supports Temporal Table**
 - Records a period of time when a row is valid
 - System Time or Business Time

- **Benefits**
 - Helps in managing data based upon time
 - Simplifies search criteria process
 - Satisfies new compliance laws

DB2 Admin Tool V10.1 Temporal Table

- **Application period**
 - Timestamp or Date data
 - Beginning and End times

- **System period**
 - Implemented by creating a temporal table, a history table, and enabling versioning

- **Bi-temporal table – is both a System Period Temporal Table and an Application Temporal Table**

DB2 Admin Tool V10.1 Temporal Table

```

DB2 Admin ----- DSNT Alter Table ----- 13:53
Command ==>

Table schema . . . : TEAM76   >

Recover DB2 Advanced Technology

Accelerate Time to Value

IBM DB2 Performance Management Tools Solution

Optimize Dynamic Infrastructure Performance

OMEGAMON XE for DB2 Performance Expert 5.1 Exploitation

▪ Features Extended Insight

- Surface DB2 for z/OS end-to-end response time metrics
 - Provides visibility to all the components that make up end-user response time
 - Facilitates platform-agnostic identification of response time bottlenecks
 - Enables near-instantaneous response to and prevention of application slowdowns
- Leverages Tivoli Enterprise Portal GUI

▪ Provides Summary for SQL Reporting

▪ Manages thousands of Threads

▪ Supports new DB2 10 Monitoring Data

▪ Lowers Monitoring Overhead

Roadmap to Exploit DB2 10 for z/OS

Accelerate your ability to leverage compelling DB2 10 features

Administer DB2 Performance Savings

Optimize Dynamic Infrastructure Performance

 **Drive DB2 Efficiency and Productivity**

Recover DB2 Advanced Technology

Accelerate Time to Value

DB2 Automation Tool V3.1

- **Supports Autonomic Statistics**
 - Exploits real-time, sampling driven Statistics collection
 - Invokes RUNSTATS with new Profile option
 - Interfaces with existing Job Schedulers

- **Introduces FlashCopy Image Copy**
 - Reduces Batch-windows
 - Reduces CPU consumption with Storage-based Backups
 - Drives improved Recovery Time Objectives

- **Avoids Unnecessary Reorgs**
 - Sets REORG thresholds based on DB2 10 Best Practices
 - Detects when Indexes are insensitive to Clustering
 - Avoids REORGs for poorly structured Indexes

DB2 Automation Tool V3.1

RUNSTAT Profile

```

AUTOTOOL V3R1 ----- Runstats Options ----- 2011/01/21 11:41:58

DB2 Utility Enhancement Tool V2.1

- **Offers a proactive way to cancel threads holding locks**
 - Views and cancels threads through ISPF panels
 - Cancels and blocks threads through:
 - Batch processing
 - DSNUTILB Intercept processing
- **Watches utilities on the DB2 SSIDs you specify**
 - Cancels threads on DB2 objects that match criterion you define
 - Extends utility functionality if using UET parameters
- **Enforces the use or disuse of utility parameters**

DB2 Utility Enhancement Tool V2.1

- **Extends utility syntax for LOAD**
 - **CONSTANT** replace a given value for a particular field in the input records with another specified value being loaded at run-time
 - **VALUEIF** – if a condition is met a new value is used in its place
 - **PRESORT** by table object identifier (OBID) and by clustering index key
 - If no clustering index key is available sorts by the oldest defined index
 - Reduces elapsed time & CPU times
 - **DISCARDTO** – name of a flat file to write discarded data (rather than a DB2 table)

DB2 Utility Enhancement Tool V2.1

- **Enhances the native DB2 CHECK DATA syntax**
 - Supports discarding rows to a flat file
 - Creates and sizes the discard table automatically
 - Unloads from the discard table to a LOAD-format SYSREC file
 - Creates LOAD-format SYSPUNCH file
 - LOAD-format SYSREC / SYSPUNCH file can be used by other utilities
 - Automatically drops discard table

- **Supports the standard DB2 restart of a DB2 utility for which interception is occurring or has occurred.**

DB2 Sort

- **High speed utility sort**
 - Processes data stored in DB2 for z/OS
 - Improves sort performance
 - Optimizes overall system efficiency

- **DB2 Sort leverages the strengths of the System z platform, DB2 for z/OS and the DB2 Utilities Suite to drive:**
 - Saves elapsed time and CPU significantly
 - Relieves from application constraints of large volumes of data
 - Commits continually to deliver DB2 solutions

Roadmap to Exploit DB2 10 for z/OS

Accelerate your ability to leverage compelling DB2 10 features

Administer DB2 Performance Savings

Optimize Dynamic Infrastructure Performance

Drive DB2 Efficiency and Productivity

Recover DB2 Advanced Technology

Accelerate Time to Value

DB2 Recovery Expert V2.2 – Application Recovery

- **Provides Expert assist for performing many types of DB2 recoveries**
 - Analyzes the requested recovery
 - Provides a selection of possible recovery plans
 - Selecting for you, the needed recovery assets and utilities
 - Assists in selecting recovery points
 - Builds RECOVERY jobs
- **Includes a subset of DB2 Log Analysis services**
 - UNDO/ REDO recoveries
 - Quiet point analysis
- **Supports Drop Recovery**
- **Supports Dependency analysis**

DB2 Recovery Expert V2.2 – System Recovery

- **Provides backup and recovery solutions that leverage sophisticated storage processor capabilities**
- **Includes ability to backup and restore an entire DB2 subsystem almost instantaneously using fast replication storage hardware**
- **Restores individual DB2 objects or groups of DB2 objects from the system level backups**
 - ISPF or GUI
- **Automates disaster recovery process**
 - Gathers resources needed at the local site and copying them to tape for use at the disaster site
 - Supports disaster recovery from both system backups and image copies

DB2 Recovery Expert V2.2 – DB2 10

- **Exploits FlashCopy Image Copy**
 - Takes Consistent Online Image Copies in seconds
 - Reduces CPU and Batch-windows
 - Improves Recovery Times
 - Automates Recovery Jobs
 - Supports natives EMC Storage-based copies

- **Exploits RECOVER BACKOUT for faster recoveries**

DB2 Log Analysis Tool V3.2

- Reads DB2 logs and DB2 pages directly
- Allows Phased components to have more granular specifications for more expensive jobs (I/O,CPU)
 - Initial run asks to show any changes to database X for Monday
 - Subsequent run asks to show only actual row changes to table Y in database
- Does NOT require DATA CAPTURE for any tables – does support
- Supports extensive filtering capabilities
- Creates Robust reports – General / Summary / Detail / Quiet Time / Impact

DB2 Log Analysis Tool V3.2

- **Outputs archive data so that the reports can be rerun without having to re-read the archive logs**
- **Loads data into DB2 tables for analysis**
- **Supports data sharing transparently**
 - Allows to bypass processing of logs from other members optionally
- **Extracts continuous information based on filter factors**
 - Does not miss any transactions
 - Stores details of uncommitted units of work
- **Views LOB / XML data**

DB2 Log Analysis Tool V3.2 – DB2 10

- **Undo and Redo / Reports on Temporal Data**
- **FlashCopy Image Copy**
- **New functions for updating XML columns**
- **XML columns with versioning**
- **INCLUDE column on an index**
- **INLINE LOB**
- **Greater precision for TIMESTAMP**
- **New Timestamp with TIME ZONE data type**
- **All new DB2 10 Log changes**

Jump into DB2 10! The water's fine.

DB2 V8

DB2 9

DB2 10

Key Questions are WHEN? and HOW?

Roadmap to Exploit DB2 10 for z/OS

Accelerate your ability to leverage compelling DB2 10 features

Administer DB2 Performance Savings

Optimize Dynamic Infrastructure Performance

Drive DB2 Efficiency and Productivity

Recover DB2 Advanced Technology

 *Accelerate Time to Value*

Accelerate DB2 10 Time to Value

DB2 Cloning Tool V2.2

- Exploits Storage-based copies to drastically reduce CPU and outages
- Creates Subsystem and Object Clones to test DB2 10 with minimal effort
 - Reduces the number of Data Sharing Members automatically
 - Converts Data Sharing to non-Data Sharing
 - Creates Subsystem Clone from System Level Backup
 - Masks sensitive production data
- Supports native IBM, EMC and Hitachi Storage-based copies

DB2 Query Monitor V2.3

- Tracks SQL Performance before and after Migration

DB2 Path Checker V4.1

- Identifies potential Access Path regressions
- Exports SQL to Optim Query Workload Tuner or Data Studio for tuning
- Saves packages with DB2 9 Plan Management before DB2 10 Migration

DB2 Bind Manager V2.4

- Identifies and Free unused Packages
- Reduces Bind impacts

Exploit DB2 10 for z/OS with IBM DB2 Tools

Accelerate your ability to leverage compelling DB2 10 features with comprehensive Tools support

Data Encryption Tool for IMS and DB2 Databases
