

IBM Enterprise Modernization Sandbox for System z

What is it?

IBM® Enterprise Modernization Sandbox for System z is a free, Web-based, hands-on environment that allows you to work with and deploy IBM System z® applications in a guided “tinker, test, and try” approach. No downloading, configuration, or installation required.

Experience and evaluate IBM's latest modernization solutions by simply logging in and getting connected to a live System z test environment.

What can you do?

In this virtual environment, learn how to create modern SOA, Web, and Web 2.0 applications for System z and how to modernize 3270 green-screen user interfaces.

Experience how easy it is to improve the effectiveness of your traditional COBOL and PL/I development, maintenance, and support processes.

What types of scenarios are available?

- **Discover** and analyze existing mainframe applications
- **Transform** green screens into Web services, Web, portal, or mobile interfaces
- **Extend** CICS® or IMS™ applications for SOA and Web 2.0 mashups
- **Build** modern Web 2.0 user interfaces without being a technology expert
- **Analyze** and repair defects early in the application development lifecycle
- **Improve** performance and scalability with advanced compiler technology
- **Manage** multiplatform application development and deployment lifecycle

Five easy steps to start your online trial

1. **Download** and print the tutorial for the scenarios you want to try or create your own.
2. **Register** for the Enterprise Modernization Sandbox for System z trial.
3. **Log in** to start your online trial.
4. **Download** and install a free Citrix® client to connect to your remote session.
5. **Follow** the steps from the tutorial you printed in step 1 or create your own applications.
