DB2 Information Management Software

@business on demand software

Topics

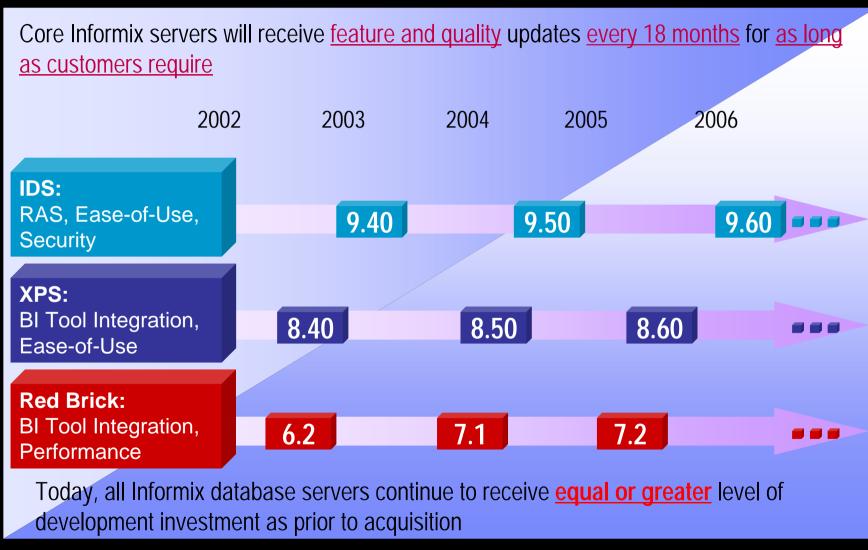

- Update on Informix @ IBM
- IBM Data Management Product Portfolio
- Key Plays for 2003

Quick update on Informix @ IBM

- Loyalty to Informix products
 - Continued strong endorsement by customers
 - Continued strong investment by IBM
- Product roadmap
 - Shipped at least one enhancement release of all major products since acquisition
 - Future is very clearly defined
- Informix team
 - Integrated into a single Data Management team
 - Retention still very high
- Informix partnerships
 - Key part of the acquisition
 - Strong retention of Informix partners

ong term support and enhancements

BM Red Brick Warehouse Roadmap

2006

DB2 Interoperability
Market, Technology &
Customer Requests

Red Brick v7.2

2005 <u>Completed</u> GA'ed in Oct. '02

- ANSI SQL/OLAP functions
- Integrated Backup/Restore
- Query/Load Performance
- Load/Export data in XML
- Performance monitor
- Locally segmented indexes
- Others

2003

2002

2004

Red Brick v6.2

Integrated Analytics

DB2 Interoperability

Red Brick v7.1

<u>Under consideration:</u>

- DB2 BI tools integration
- Performance Improvements to STARJoin and TARGETJoin
- Dynamic Smart Scan
- Self Tuning TMU Block Cache Surrogate Key Generation &
- Expression support in TMU
- Improve performance of aggregations, deletes, table scans, etc.
- Others

Under consideration:

Market,

Technology trends

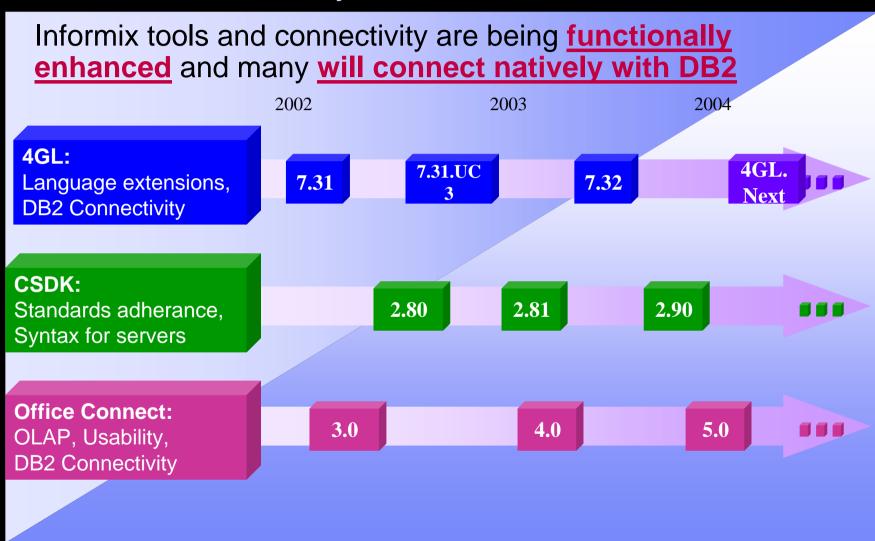

Customer

Requirements

Quality

Fools and Connectivity

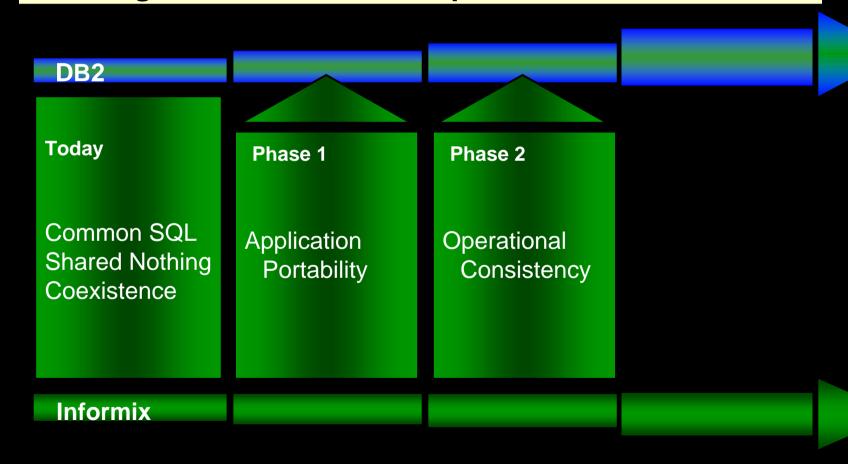

ong term support and enhancements

nformix Compatibility into DB2

<u>Informix compatibility features complement DB2</u> resulting in smooth transition path if customers desire.

nformix Compatibility into DB2

Infree Phase 1
Application
Portability

More SQL compatibility
Data Type parity
SQL functions

Native 4GL connectivity

Transition Tool Kit

Move schema

Move data

Translate important DDL,

DML and SPL

<u>ire:</u> on Phase 2
Operational
Consistency

IDS style HDR
RB style Star Join
Optimizations &
Loader Tool
IDS & XPS style
Fragmentation
Onstat style DBA tool

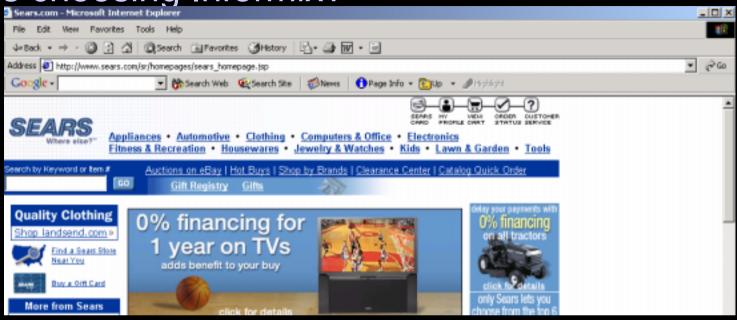

e.

Informix

T

Who is choosing Informix?

Application

Retail website providing comprehensive online shopping experience for large Sears.com customer base

Business Benefits

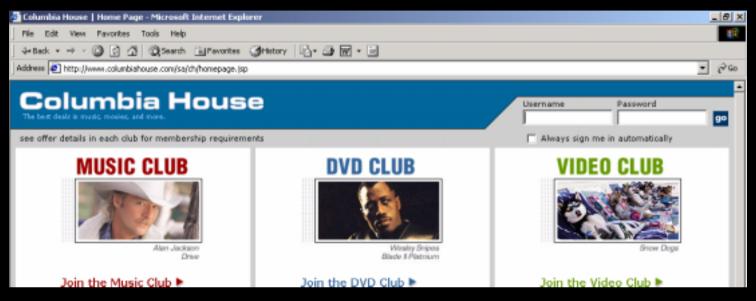

Robust, scalable database engine (IDS) requiring minimal administrative oversight and serving the distributed data needs of a large retail environment.

"The IBM/Informix agreement ...
means that the <u>superior technology</u>
and <u>support that we have enjoyed</u>
from Informix will now have the
backing and resources of IBM to
continue to grow."

Marlene Gaidzik
Director of Development
Sears Roebuck

Who is choosing Informix?

Application

Music and video <u>retail Web site</u> for buying club members

Business Benefits

Estimated <u>hundreds of thousands of dollars</u> saved annually in database administration costs; enhanced customer satisfaction; 20% growth in online membership as well as expansion of business model without additional investment

"We host <u>several terabytes of data</u>, and our business depends on it 365 days a year. That's why we have chosen <u>IDS from IBM</u> as the data management platform for our Webbased business."

Walter Kerner, Vice President for Technical Services, Columbia House

Who is choosing Informix?

Application

Hosts 40,000 financial transactions daily for transportation industry

Business Benefits

Can now offer more secure and highly available processing environment with added encryption and combined ER & HDR functionality. Large chunks saves DBA cycles.

"We chose Informix over Oracle for its superior performance and stability, as well as its extremely competitive price. That decision has consistently reaffirmed itself in our ongoing evaluations of the data management marketplace.

We have no doubt that <u>IBM Informix 9.4</u> is as robust and reliable as any database available today, and the absolute leader in cost-performance."

Stephen Cobb Senior Database Administrator

So, what does this all mean to my customers, now?

Stay on Informix or will IBM make customers move to DB2?

- Our Philosophy
 - "Moves anywhere are difficult. Move only if the result is a recognizable value advantage for customers"
- Our Promise
 - "We'll continue to support the Informix product line for as long as customers require"
- Our Proof
 - "100's of IMS* customers still receive regular updates to a product originally released in 1968" (IMS is a mainframe, hierarchical database, the backbone of the world's financial systems)

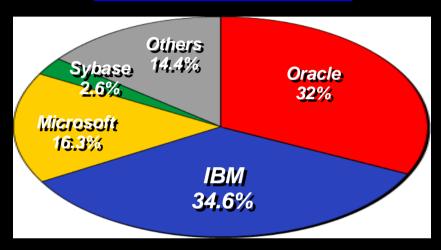

What else does IBM Data Management offer?

- DB2
 - **Universal Database**
 - Information Integration
 - Office Connect
- An Integrated Software Infrastructure

IBM Leads: #1 in overall database market share

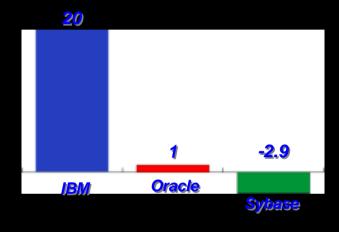

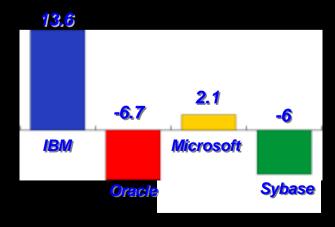

Customer acceptance fuels growth #1 DB on Linux ***
Continued growth on Unix & Windows Faster growth on all platforms

- Source: Based on Dataquest, May 2002 Release
- ** Source: Based on Dataquest, 1998, 2002 Releases
- *** Source: Based on IDC Doc #28096, October 2002 Release

Unix Market Share Growth '97-'01 **

Windows Market Share Growth '97-'01 **

BM DB2 Universal Database

DB2 Universal Database Edition	Where it Fits
DB2 Enterprise Server Edition (ESE)	Full Function Database.
DB2 ESE + Database Partitioning feature (DPF)	Additional fee for hardware clusters or partitioned SMP
DB2 Workgroup Server Edition (WSE)	Full Function, low cost, entry level server for smal business & departmental computing. Same as DB2 ESE w/o DB2 Connect, 64-bit & Datalinks
DB2 Workgroup Server Unlimited (WSUE)	Same as WSE with different licensing terms. CPU only. Useful for GMB/SMB
DB2 Personal Edition (PE)	Single user RDBMS for desktop. Same features as WSE but remote clients cannot connect.
DB2 Everyplace Edition (PE)	DB2 on hand held mobile devices, leveraging their ability to synchronize with other systems.

Autonomic Computing

Self-Configuring

Monitor and tune resources automatically

Self-Healing

Discovery, diagnose, and react to disruptions

Self-Optimizing

Adapt automatically to the dynamically changing environment

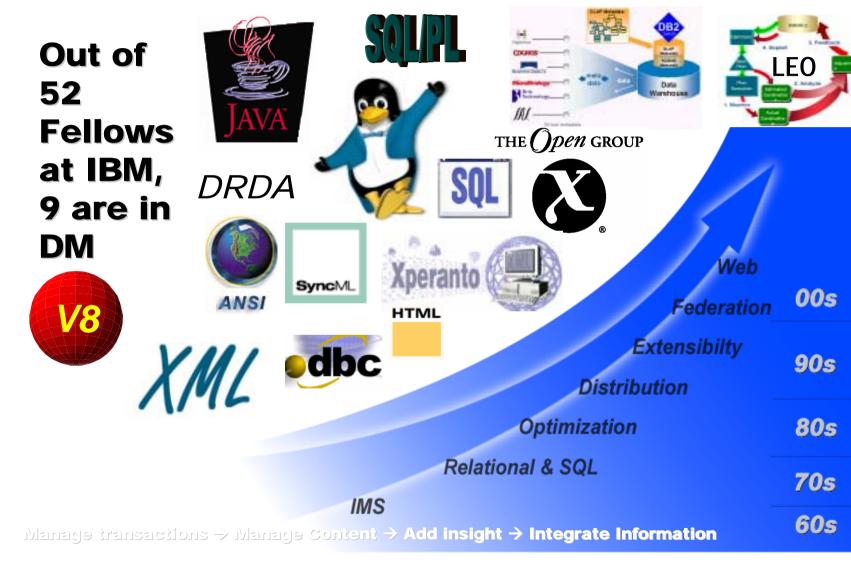

Self-Protecting

Anticipate, detect, identify, and protect against attacks from anywhere

Less Skill, Less Resource, Better System Utilization

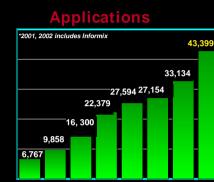

Standards and Innovation

Support for Applications that run e-business

- Partner certifications >150% YTY
- SAP penetration doubled
- 30% of new Siebel seats...
- Channel revenue >270% YTY
- Strategic Partnerships: development platform and internal deployment

DB2 Easily Handles Traditional and Non-Traditional Data

DB2 Image Extender

DB2 Audio Extender

DB2 Video Extender

DB2 Text Extender

DB2 Spatial Extender

DB2 Video Charger Extender

EcoWin Time Series Solution

XML Extender

Fillmore SQL Expander

IBM Net Search Extender

ESRI Spatial Database Engine

Prime DES Encryption and Key Management

OANDA Currency Extender

Protegrity Secure, Data

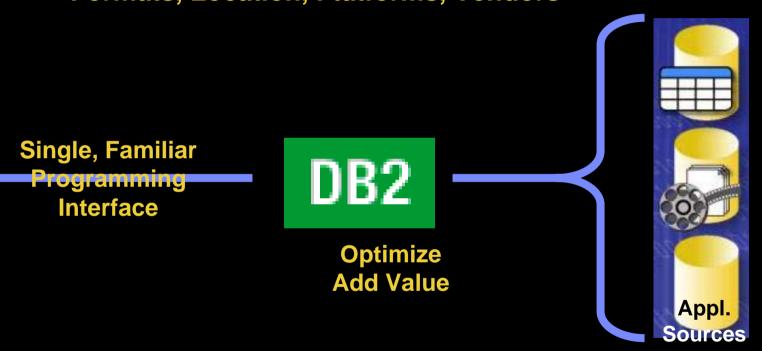

Discovery Link Extender

Data Isn't Just Data...Anymore

Federated over Heterogeneous Sources is Key.

Less Programming, Less Maintenance, Faster Time to Value

DB2 Information Integrator

- Introducing new integration software : DB2 Information Integrator
 - DB2 Information Integrator 8.1
 - DB2 Information Integrator for Content 8.2
- Announcing beta availability
 - Access beta through IBM client representative
- Key business value:
 - Optimize IT investments given more choice in data access
 - Integrate data with better productivity and application efficiency
 - Gain more return from existing assets

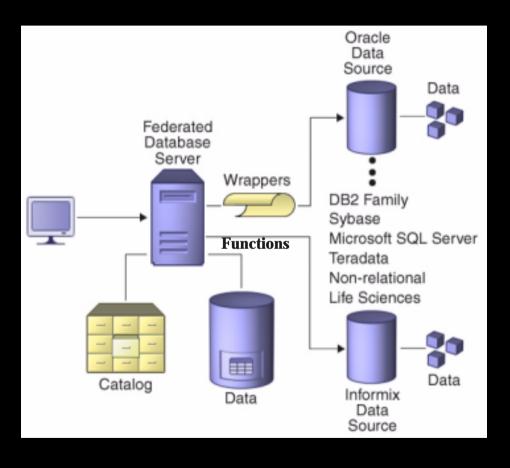

DB2 Information Integrator: Value for Informix

Data Federation (leave your data where it is)

- Create new applications that integrate data stored in Informix with data from Oracle, Sybase, SQL Server, Teradata, XML files, Flat files, Message Queues, Web Services, ODBC databases...
 - Supports 2PC enabling a single unit of work to update Informix, Oracle and read an MQ, all from a single API with a common language (DB2 SQL)
- Enable new applications to use DB2/UDB APIs and SQL but keep the data in Informix 7.3, 8.3 or 9.3
 - A single API for access to both Informix or DB2 or Oracle or...

DB2 Information Integrator for Data Federation

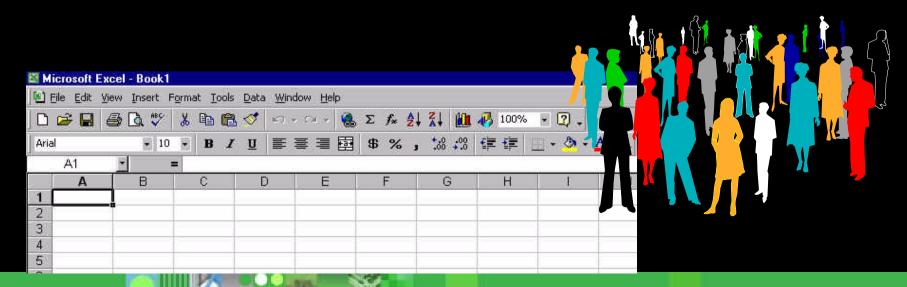

- Transparency
 - Appears to be one source
- Heterogeneity
 - •Integrates data from diverse sources
 - Relational, Structured, XML, messages Web, ...
- Extensibility
 - •Federate almost any data source.
 - Development tooling provided
- High Function
 - Full query support against all data
 - Capabilities of sources as well
- Autonomy
 - Non-disruptive to data sources, existing applications, systems.
- Performance
 - Optimization of distributed queries

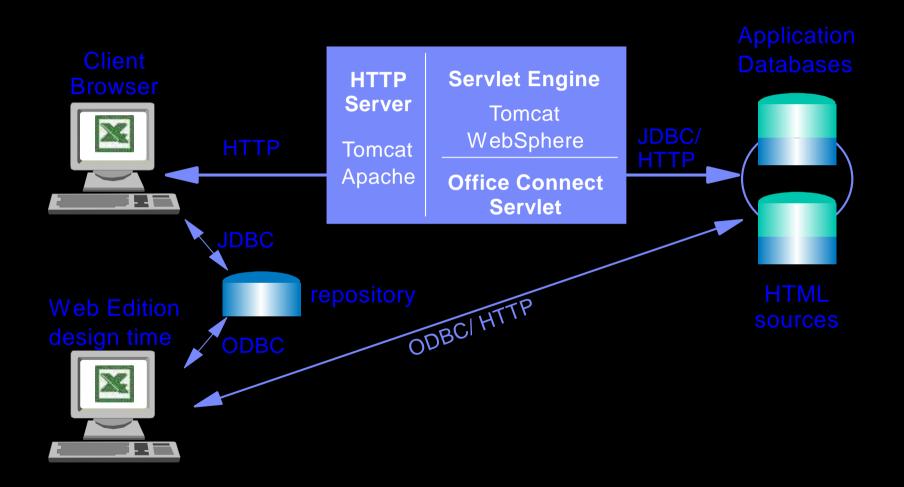

Office Connect: MS/XL as a query and reporting tool

Connects DB2 and Informix databases to Microsoft Excel
Seamless macros in XL for querying, updates, etc.
No front end tool license fees, no training costs
95% of corporate desktops have MS Office Suite installed
Allow all corporate desktops to do query & reporting against DB2 & Informix

Office Connect (web edition)

Key Plays for 2003

- **INFORMIX Products**
 - ■IDS V7 V9 Migrations
 - •IDS V9.4
 - Office Connect
 - Gold Licenses

- **DB2 Products**
 - Workgroup v SQLServer
 - Linux in the City
 - ■DB2 v Sybase 'Crush Sybase'
 - Focused Winbacks
 - SAP, Peoplesoft, JD Edwards, Siebel
 - •Information Integration

How do I better leverage the advantages of Data Servers at IBM?

- Get more information
 - Talk to your IBM representative
 - Join International Informix Users Group and your local user group
 - http://www.iiug.org
 - Sign up for InformixToday newsletter
 - http://www.ibm.com/informix/informixtoday
- Check out Passport Advantage, IBM's order processing and fulfillment tool
 - Earn volume discounts on all IBM Software
 - Most Informix products enrolled, more to come
- Explore the breadth of IBM Software e-business offerings in addition to your Database portfolio
 - Integration with WebSphere Application Server Servers
 - Tivoli System Management and Archive tools
 - Connectivity options for your heterogeneous environment Gateways
 - Content Management
 - Business Intelligence Tools
