■ **Future directions for MQSeries Workflow**

■ **MQSWF will be bundled into WS B2Bi**

- ▶ **Sold using the 5 Tier CU structure**
- ▶ **Capacity Units calculated in the same way as other family members**
- ▶ **Announces April 24th**

■ **MQSWF will move to Value Units in 3Q2001**

- ▶ **Applicable to both 390 and Non390**
- ▶ **VUs fully transferable across platforms**
- ▶ **390 just another platform**

- **Future directions for MQSeries Workflow**
 - **MQSWF will move to Value Units in 3Q2001**

- The products in this announcement have one charge unit - Value Units. Value Units for a specified MSU capacity are determined by the following table. The price of a Value Unit varies depending on the product selected.

- Translation from MSUs to Value Units

| | MSUs | Value Units/MSU |
|----------|---------|-----------------|
| ■ Base | 1-3 | 1.00 |
| ■ Tier A | 4-45 | .45 |
| ■ Tier B | 46-175 | .36 |
| ■ Tier C | 176-315 | .27 |
| ■ Tier D | 316+ | .20 |

- The total number of Value Units is calculated according to the following example:

- If the customer has installed 1000 MSUs the applicable Value Units would be:

- $3 * 1.00 + 42 * 0.45 + 130 * 0.36 + 140 * 0.27 + 685 * 0.20 = 244$

- Value Units. Rounded to the next integer.
