

*“Meanwhile, IBM sits quietly above the
bickering din, delivering what many users and
analysts say is ^{Still} today the most advanced
‘universal’ database in the form of DB2 Version 2.”*

Datamation, ~~April~~ 1996

December

We appreciate *Datamation's* positive comments because IBM's DB2® is still the only proven Object-Relational-Database on the market. To find out how companies are benefiting today from DB2, and for *Datamation's* complete story, visit www.software.ibm.com/db2info.
