

Selected IBM Tivoli Products No Longer Orderable by Program Number – Products Remain Available through Consolidated Offerings

Overview

To further enhance IBM Tivoli® software as essential Business Impact Management tools, the IBM Tivoli product line is being consolidated to provide greater value and to simplify the complexity of management. These enhancements leverage the powerful solutions for which IBM Tivoli is well-known, combining their value to help meet our customers' needs. Current products are being offered as fewer, more logical, solution-oriented offerings. No products are being abandoned.

As a result of this consolidation effort, IBM Tivoli will withdraw from ordering the selected pre-consolidation program numbers licensed under the IBM International Program License Agreement. The capability in these products will remain available through consolidated offerings.

For information on the portfolio of consolidated offerings, a mapping from the pre-consolidation programs to the consolidated offerings, and information on conversion of licenses and support to the consolidated portfolio, refer to Software Announcement 202-087, dated April 9, 2002.

Refer to the **Additional Information** section for Unaffected Products, End-of-Service Information, Products Withdrawn from Ordering, and Replacement Product Information.

This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: <http://www.ibm.com>.

Additional Information

Summary

- Selected 5697 and 5698 pre-consolidation program numbers licensed under the IBM International Program License Agreement will be withdrawn from ordering effective May 9, 2002 (May 23, 2002, for Storage products).
