IBM Quickstart Services for
IBM MobileFirst Protect - MaaS360 (On Premise)

Maximize the Value of your IBM Security Solution

This offering helps MaaS360 On-Premise customers maximize their return on investment by installing and configuring the necessary MaaS360 components.

- *You need guidance on:*

  - *Architecture & design of an IBM MaaS360 On-Premise solution*

  - *How IBM MaaS360 On-Premise integrates with the IT environment*

  - *Definition of hardware and software prerequisites*

  - *Definition and implementation of changes to the network environment*

- *You need to:*

  - *Implement IBM MaaS360 On-Premise according to corporate standards*

  - *Monitor, manage, secure and support a wide range of mobile devices*

  - *Separate user's personal and corporate data*

  - *Manage the connection of 'BYOD' devices with the environment*

  - *Maintain security and control of mobile device management data*

  - *Ensure that employees have the appropriate mobile apps available to them*

Benefits

- *Guidance on ensuring prerequisites are in place prior to deployment*

- *Rapid delivery of a functional IBM MaaS360 On-Premise installation*

- *A single portal to monitor and control smart phones and tablets*

- *Simplify MDM with rapid deployment, and comprehensive visibility and control that spans across mobile devices, applications, and documents*

- *Empower users by giving them access to business documents on mobile devices while providing total manageability and control in a secure, encrypted container*

- *Proactively secure mobile devices through continuous dynamic security and compliance features*

- *Simplify mobile application management by delivering an easy-to-use enterprise app catalog with full security and operational lifecycle management of apps across mobile device platforms*

- *Protect the organization by deploying and understanding how to leverage MaaS360 Secure Web Browser to block websites based on content categories, and allowing exceptions based on domain name*

- *Keep the workforce productive with a consistent user experience through MaaS360 Secure Mail*

Deliverables

- *High-level solution design document*

- *Deployment of IBM MaaS360 on-premises virtual images*

- *Deployment of up to 3 Cloud Extenders*

- *Deployment of up to 1 Enterprise Gateway*

- *Base configurations of policy, compliance and reporting definition for IBM MaaS360 managed devices*

- ✓ *Assistance with device enrolment during initial rollout*

- ✓ *Configuration of up to 3 polices for managing devices or compliance rules*

- *Demonstration of:*
- ✓ *Device registration*
- ✓ *Policy creation*
- ✓ *Automation of policy enforcement*

Collaboration of effort: the average customer completes this offering in 12 days effort

Up to 1 week on site assistance, additional options available on request.
