

IBM InfoSphere Data Replication QuickStart Offering

*Accelerate the implementation of your
replication solution*

Highlights:

- Lay the foundation with a Phase One implementation of a replication solution focused on reducing project risk
- Accelerate the time to value and return on investment with a production ready solution leveraging proven, repeatable processes
- Learn standard practices and methodology from our experts

By providing real-time, incremental data replication feeds from any topology into the data warehouse, InfoSphere Data Replication helps ensure that organizations are analyzing the most accurate, up-to-date data available. Whether the goal is creating a new marketing campaign or conducting cutting-edge scientific research, feeding trustworthy, real-time data into the data warehouse is essential for producing actionable insights and giving organizations the agility they need to capitalize on time-sensitive opportunities.

In addition, when you leverage the power of IBM InfoSphere Data Replication in conjunction with IBM PureData System for Analytics, IBM PureData System for Operational Analytics and IBM InfoSphere Warehouse you enable your organization to maximize the value of their data warehouse.

Our IBM Information Management Software Services experts leverage a proven methodology and extensive consulting experience to ensure that your Data Replication implementation is up and running quickly.

Overview

The IBM InfoSphere Data Replication QuickStart offering covers the implementation of an InfoSphere Data Replication Solution in your development or testing environment. This solution will enable replication between a single source database and a single target system.

Key activities:

- Review of the pre-engagement checklist requirements and selection of data sources
- Install and configure the InfoSphere Data Replication Solution in the development or test environment
- Perform replication for a limited set of tables

- Validate replication
- Perform system administration hand-off
- Deliver an engagement summary report

Our experts will work side-by-side with your team to share standard practices that will enable your team to self sufficiency for ongoing support and deployment.

Your independence is our greatest success

Nothing is more important than transferring IBM expert knowledge to your organization. This provides long-term self-sufficiency through a mentored approach.

Engage today

With a world-wide team of highly trained professionals, the IBM Information Management Software Services team can help build your solution with confidence while assuring that the business needs and expectations of your organization are met. Our experts are ready to assist your organization with:

- Establishing project goals and expectations
- Maximizing the return on your investment
- Reducing project delivery times, complexity and risk through the delivery of proven offerings
- Reducing total cost of ownership
- Information sharing through our mentoring approach

Available for any delivery approach, the IBM Information Management Software Services team will produce results quickly, and will help to put your project on the road to success.
