IBM and Box - Digital transformation for business documents in a cloud world, Madrid (Spain), February 16 (1 day)

Description
Come and join us for this 1-day event to learn how document collaboration and enterprise content management (ECM) are transforming in today's cloud and mobile world. Last year's partnership signed between IBM and Box allows many new solution options in this area, due to the various product integrations made available since then.

In the morning, you will hear from our WW ECM program director, Ian Story, the latest updates on cloud and hybrid collaboration for Enterprise Content Management (ECM) and how you can benefit from them. In the afternoon, you will have the opportunity to do a test drive in various hands-on labs so you can gain first-hand experience with Box and the integration points into the IBM ECM products.

The goal of this workshop is that you gain an understanding on next generation cloud and hybrid ECM solutions available today and how your business can benefit from them. As we are doing labs in the afternoon, the number of participants is limited - so please register fast to secure your seat!

Start and end time
- 10:00 local time
- 16:00 local time (same day)

Location
IBM Client Center Technology Solutions
Calle Santa Hortensia 26-28
E-28002 Madrid
