## All-In-One For Peace of Mind

### Simplifying and Securing Your Business Processes

With so many choices of solutions out there, it can be a dilemma trying to figure out which solution is effective for each business area you want to address and more importantly, providing your employees with the necessary information they need while keeping that information secure.

There is no need to puzzle further over this issue, as Core Systems Integration Sdn Bhd (CSI) has developed the One Core Business Suite comprising sales, operations and business management solutions to meet your everyday business needs and provide you with a bird's eye view of your operations.

## One Core Business Suite

The One Core Business Suite provides midsize companies with the following modules to optimize all aspects of their business, taking into account the need for visibility and connectivity while providing security for the company's data:

**Enterprise Business Broadcasting Tools**
for SMS/MMS/Email

**Business Recruitment Module** allows sales personnel to track their sales and orders, as well as generate alerts and reports

**Private Chatting Network Module**
provides an internal instant messaging system to avoid business information leakage

**Event Management Module** provides easy tracking of company events and marketing campaign status, making it easy to mobilize your marketing/ sales staff

**Knowledge Based Module** information such as policies, product information can be uploaded and shared internally with a comprehensive search function for easy usage

CSI's One Core Business Suite is powered by IBM WebSphere® Application Server, an affordable, ready-to-go solution for developing, running and managing dynamic Web sites and applications.

Designed to meet the unique needs of small and midsize companies, it provides software for service oriented architecture (SOA) environments that enables dynamic, interconnected business processes, and delivers highly effective application infrastructures for all business situations.
