

IBM Quickstart Services for Architecture and Platform Deployment

IBM Endpoint Manager

Maximize the Value of your C&SI Solution

This offering helps new customers define the initial IEM architecture and carry out a quick install of the IEM platform.

This offering is a prerequisite to all other IEM Service Offerings.

- You need to achieve real-time visibility and control of thousands of endpoints from a single console.
- You need to establish a high-performance platform for management of distributed endpoints.
- You need to implement policies on distributed endpoints securely, safely and in real-time on thousands of endpoints.
- You need assistance in deploying a centralised solution that allows you to operate decisively endpoint security at a large scale.

Benefits

- Develop a single platform, single agent for implementation of endpoint management resources.
- Gain real-time capability to answer questions about your organizations' security and compliance posture.
- Implement endpoint management best practices in your environment..
- Train your staff on the usage of IEM in your environment.
- Learn IEM agent deployment techniques on up to 10 endpoints, so you can roll out the rest of the deployment in confidence.
- Leverage IBM's experience with systems management and proven best practices.

Deliverables

- Perform architecture and design services for the IEM platform..
- Deploy IEM server in the data center.
- Assist with the installation of up to 10 agents and 3 top level relays.
- Establish relay selection and relay affiliation routines consistent with best practice given your unique network topology.
- Provide Architecture Document summarizing the design, network topology, and next steps recommendations.
- **Duration - the average customer completes this offering in a week or less** – remote and onsite options are available.

If you require Distributed Server Architecture, extensive agent or relay installations, or additional web reports deployments please contact your Services Sales Representative for guidance.
