En Önemli Gelecek Planları

Veri depolama yöneticilerinin gördüğü zorluklar

Müşterilerimizin Yaşadığı Zorluklar

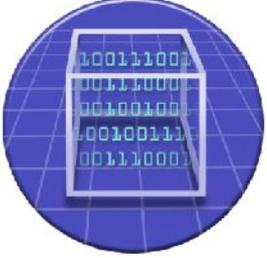

- Maliyetlerin artması
- Disk altyapısının yönetim ve kullanım zorlukları
- Yeni donanımların devreye alınma süresinin uzun olması ve zorlukları (*Eski donanımların devreden çıkarılma süresinin uzun olması ve zorlukları*)
- Kapasite planlamasının zorlukları

- Production
- Test ve Geliştirme
- Arşiv
- Yedekleme

Önerilen Yöntemler

Mevcut Ortam ile Daha Fazla Veri Depolama

- Disk Sanallaştırma
- Thin Provisioning

Verinin Doğru Katmanda Tutulması

SANALLAŞTIRMA

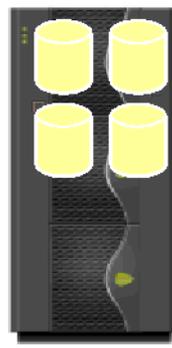

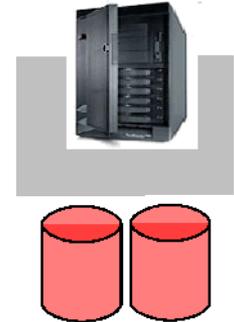

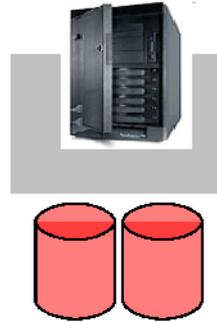

■ Otomatik Veri taşıma

Depolama alanlarının azaltılması

- Veri Sıkıştırma
- Veri Tekilleştirme

Linear Tape File System

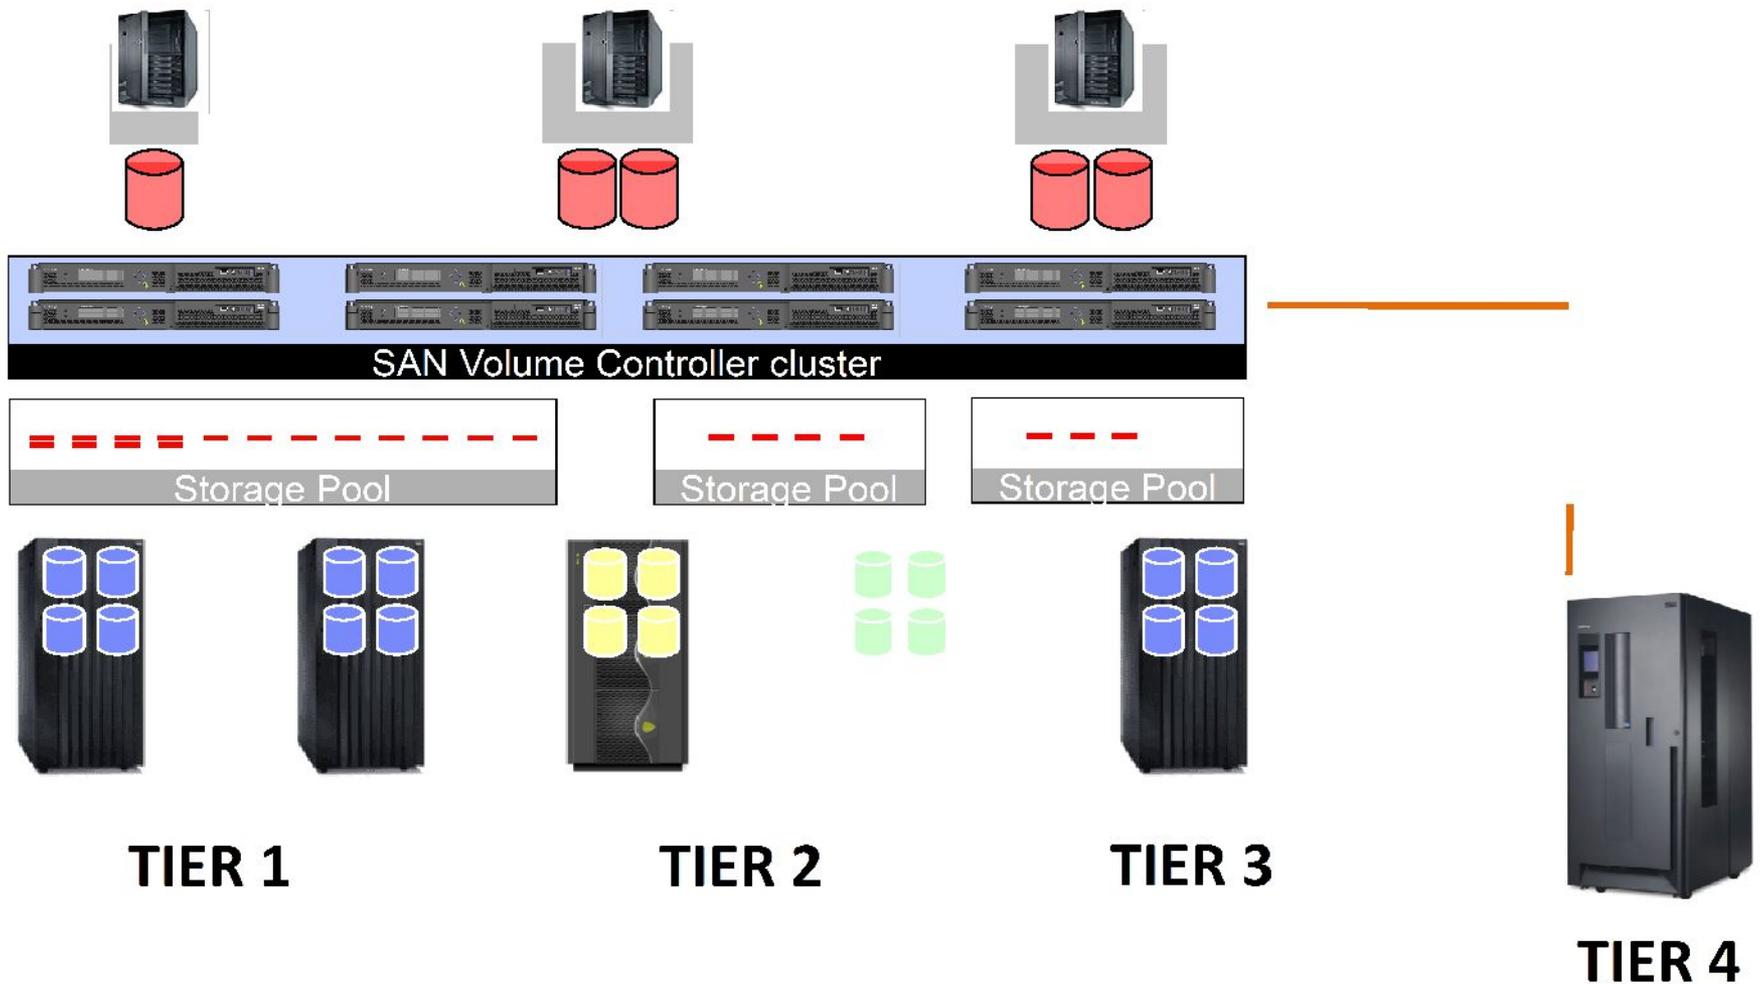

From Wikipedia, the free encyclopedia

Linear Tape File System (LTFS) refers to both the format of data recorded on [magnetic tape](#) media and the implementation of specific software that uses data stored on magnetic tape. The Linear Tape File System format is a self-describing tape format developed by [IBM](#) to address tape archive requirements. by the [LTO Technology Provider Companies](#), defines the organization of data and [metadata](#) on tape - files stored in hierarchical [directory structure](#). Data tape independently of any external database or storage system allowing direct access to file content data and file metadata. This format makes it possible to im system view of the data stored in the tape media. This file system view makes accessing files stored on the LTFS formatted media similar to accessing file *disk or removable flash drives*.

- ▶ Tüm yedekleme ortamının tek bir yerden izlenmesine olanak sağlar
- ▶ Sorunlara hızlıca ulaşabilirsiniz
- ▶ Gerçek zamanlı analizler yapabilirsiniz
 - ▶ Kütüphaneler
 - ▶ Sürücüler
 - ▶ Kartuşlar
- ▶ Anlık ve geçmişe dair raporlar hazırlanabilir.

The screenshot displays the ReadVerify Appliance web interface. The top navigation bar includes the product name, user information, and various menu options like Overview, View, Archive/Verify, Reports, Alerts, and System. The main content area is titled 'Library: Overview' and is divided into several sections:

- Library Status:** Shows a warning icon and a message: 'Communicating with 1 out of 2 drives that are enabled for polling, with 2 reporting errors. The library reports 2 drives.'
- Alerts (last 24 hours):** A table listing recent alerts with columns for Date, Alert Name, and Message.

Date	Alert Name	Message
02/09/10 03:05:07 CST	Drive Status	Drive 1110136790 status changed to Not ready.
02/09/10 03:02:07 CST	Polling Drives	Drive 1110136790 is no longer responding.
02/09/10 02:57:08 CST	Drive Status	Drive 1110136790 status changed to Not ready.
02/09/10 02:56:41 CST	Polling Drives	Drive 1110136790 is no longer responding.
- Archive/Verify Status:** Shows 'Verifier State: Suspended' and 'Drive Status: No drives selected for use'. There are links to 'Edit verification settings' and 'View more Archive/Verify status'.
- Current Drive Stabases:** A table showing drive status with columns for Name, Product, Status Condition, and Last Status Time.

Name	Product	Status Condition	Last Status Time
336000021034	STK 9640 rev. 1.30.110	Critical (4 issues)	02/05/10 12:19:47 CST
1110136790	IBM ULTRUM-T02 rev. 73V1	Critical (2 issues)	02/06/10 01:03:08 CST
- Current Tape Stabases:** A table showing tape status with columns for Barcode, Media Type, Status Reason, and Last Verification.

Barcode	Media Type	Status Reason	Last Verification
