Przetwarzanie w chmurach - możliwości produktu *LotusLive*

Wojciech Wilk
IT Specialist

Cloud computing to nowy elastyczny i skalowalny model IT, w którym funkcjonalność dostarczana jest dynamicznie jako usługa

- **Bezpieczny dostęp z dowolnego miejsca**
- **Samoobsługa**
- **Automatyczna skalowalność**
- **Stać dostępność**
- **Elastyczny model płatności**

Software as a Service

Własne środowisko ZARZĄDZANE PRZEZ DZIAŁ IT KLIENTA

Oprogramowanie

- Umożliwia pełne dostosowanie do potrzeb klienta
- Zarządzane przez dział IT
- Dane przechowywane lokalnie w sieci wewnętrznej

Appliance

- Łatwość instalacji i utrzymania
- Zarządzane przez klienta
- Możliwość dostosowania
- Wszystkie dane wewnątrz sieci wewnętrznej

Hosting ŚRODOWISKO ZARZĄDZANE PRZEZ IBM

Dedykowany hosting

- Negocjowane umowy SLA
- Miesięczne opłaty za hosting
- Możliwość dostosowania za pomocą narzędzi
- Bezproblemowe aktualizacje środowiska

SaaS

- Niski koszt początkowy
- Zerowa infrastruktura
- Elastyczne umowy
- Skalowalność
- Natychmiastowy dostęp do nowych technologii

Oferta usług LotusLive

Konferencje

LotusLive Meetings

Łatwe w użyciu narzędzie do prowadzenia konferencji WWW

LotusLive Events

Narzędzia do tworzenia, zarządzania i prowadzenia konferencji internetowych i webinarów dla max. 999 uczestników

Praca grupowa

LotusLive Engage

Kompletny zestaw narzędzi społecznościowych, praca grupowa i konferencje

LotusLive Connections

Łączy serwis networkingowy z narzędziami pracy grupowej

Poczta i kalendarz

LotusLive Notes

Wersja SaaS oprogramowania Lotus Notes & Domino

LotusLive iNotes

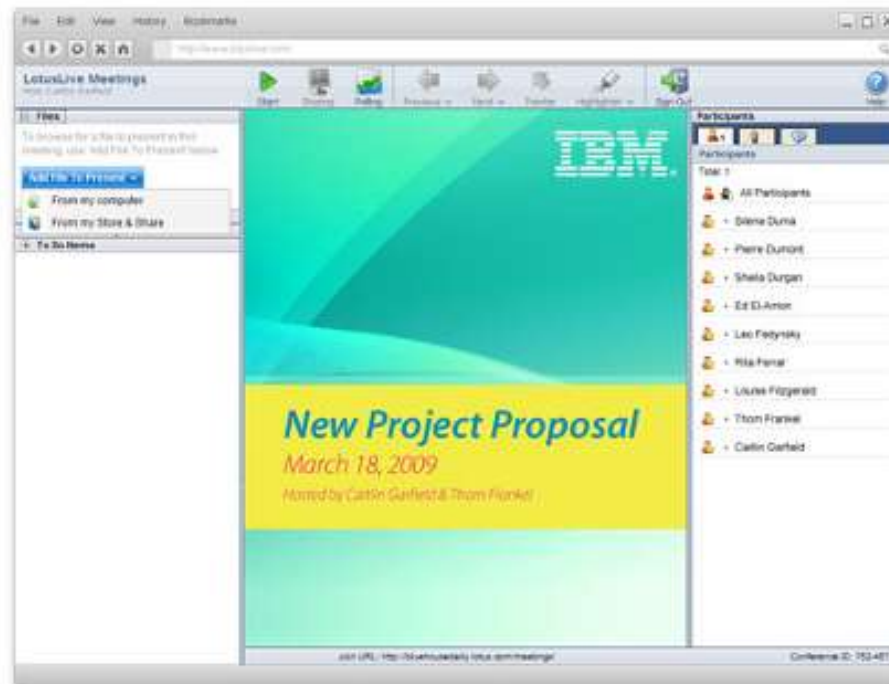

Usługi e-mail i kalendarza z interfejsem WWW

www.LotusLive.com

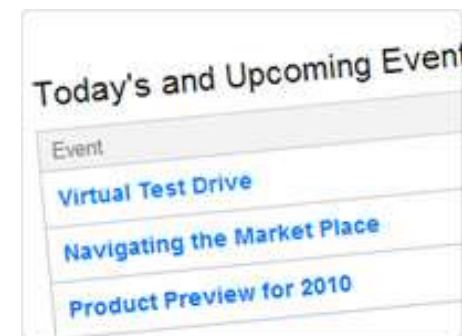

Spotkania

- ✓ Szybkie organizowanie spotkania
- ✓ Prezentacje z udziałem setek osób
- ✓ Współdzielenie pulpitu i aplikacji
- ✓ Ankiety, chat, pytania i odpowiedzi
- ✓ Wideo i rozgłoszenie konferencji audio
- ✓ Szyfrowanie SSL
- ✓ Rejestracja i odtwarzanie spotkań
- ✓ Prezentacja dokumentów bez pobierania

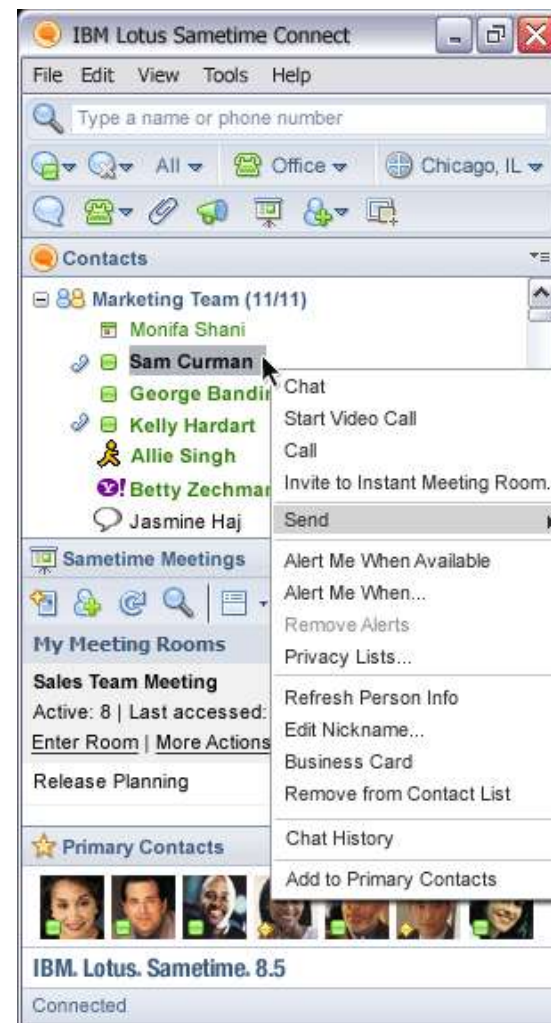

LotusLive Events

- ✓ Obsługa seminariów online
- ✓ Pełna usługa konferencji WEB
- ✓ Analiza i aktywności po zakończeniu
- ✓ Szablony zaproszeń
- ✓ Automatyczne powiadomienia email
- ✓ Zarządzanie rejestracją osób
- ✓ Historia i podsumowanie konferencji

Komunikator

- ✓ Chat i dostępność
- ✓ Błyskawiczna komunikacja
- ✓ Zapis transkrypcji rozmowy
- ✓ Przesyłanie plików i obrazów
- ✓ Szyfrowanie

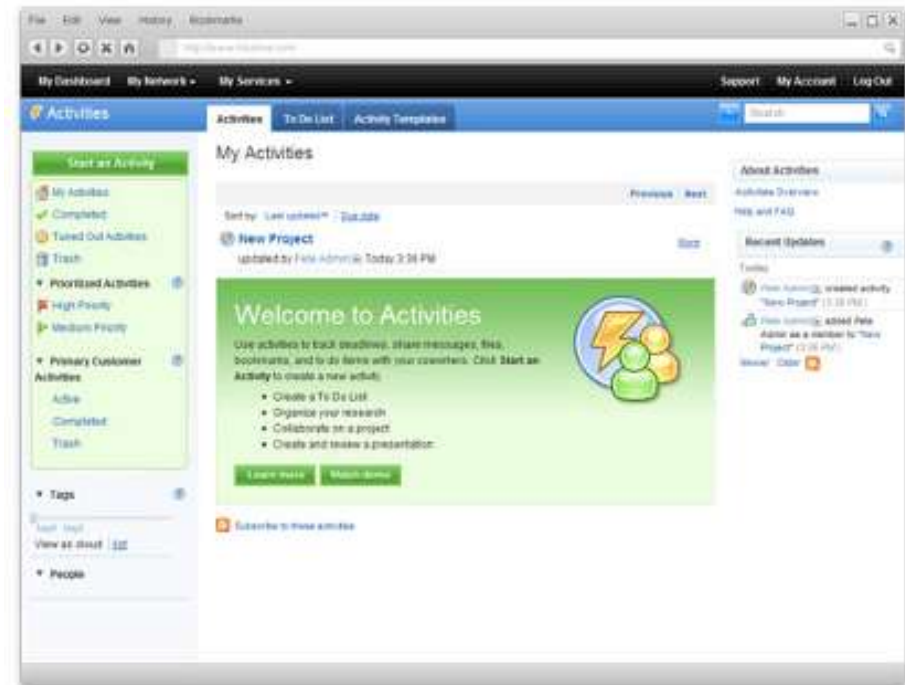

My Network i kontakty

- ✓ Wyszukiwanie profili
- ✓ Dodawanie, import i synchronizacja kontaktów
- ✓ Lista znajomych
- ✓ Grupy, tagi i wyszukiwanie
- ✓ Szybkie połączenie w ramach sieci powiązań

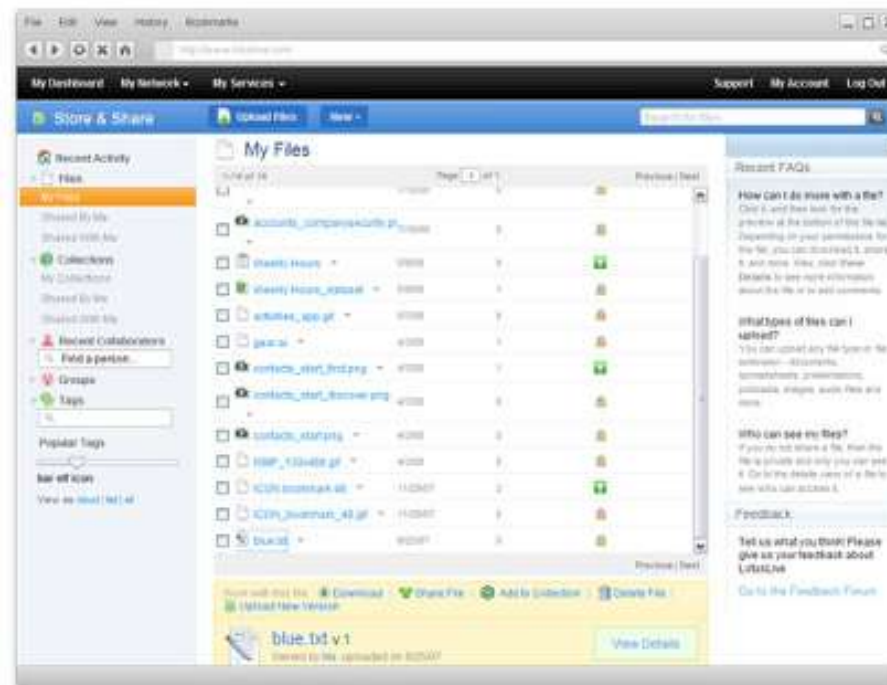

Działania

- ✓ Koordynacja pracy zespołu
- ✓ Szablony przyspieszające pracę
- ✓ Przydzielanie zadań, kamienie milowe
- ✓ Określanie priorytetu
- ✓ Komentarze i etykiety (tagi)
- ✓ Zarządzanie uprawnieniami
- ✓ Automatyczne powiadomienia

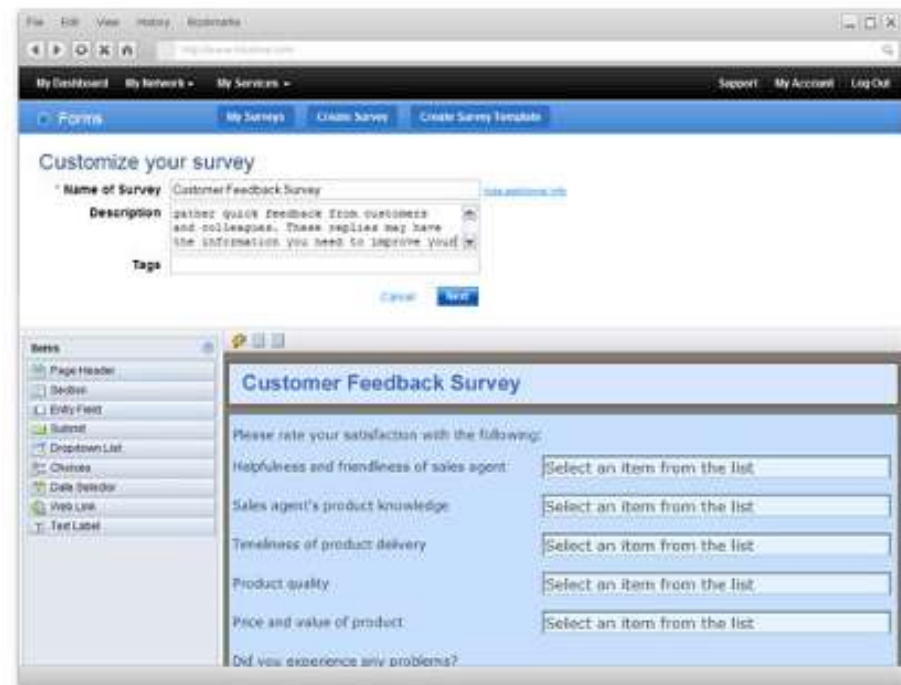

Pliki

- ✓ Repozytorium plików
- ✓ Współdzielenie dokumentów
- ✓ Kontrola wersji
- ✓ Komentarze
- ✓ Tagowanie
- ✓ Szybkie wyszukiwanie
- ✓ Filtrowanie i widoki
- ✓ Powiadomienia
- ✓ Zarządzanie dostępem

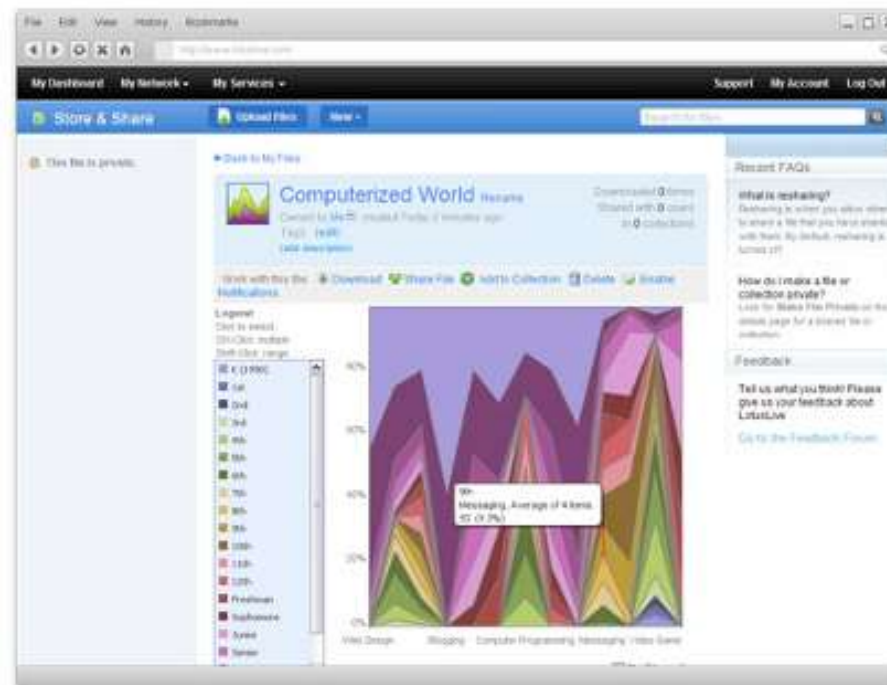

Formularze

- ✓ Publikowanie ankiet i formularzy
- ✓ Tworzenie przez kreatory
- ✓ Dystrybucja przez e-mail
- ✓ Powiadomienia
- ✓ Prezentacja wyników w dynamicznych wykresach

Wykresy

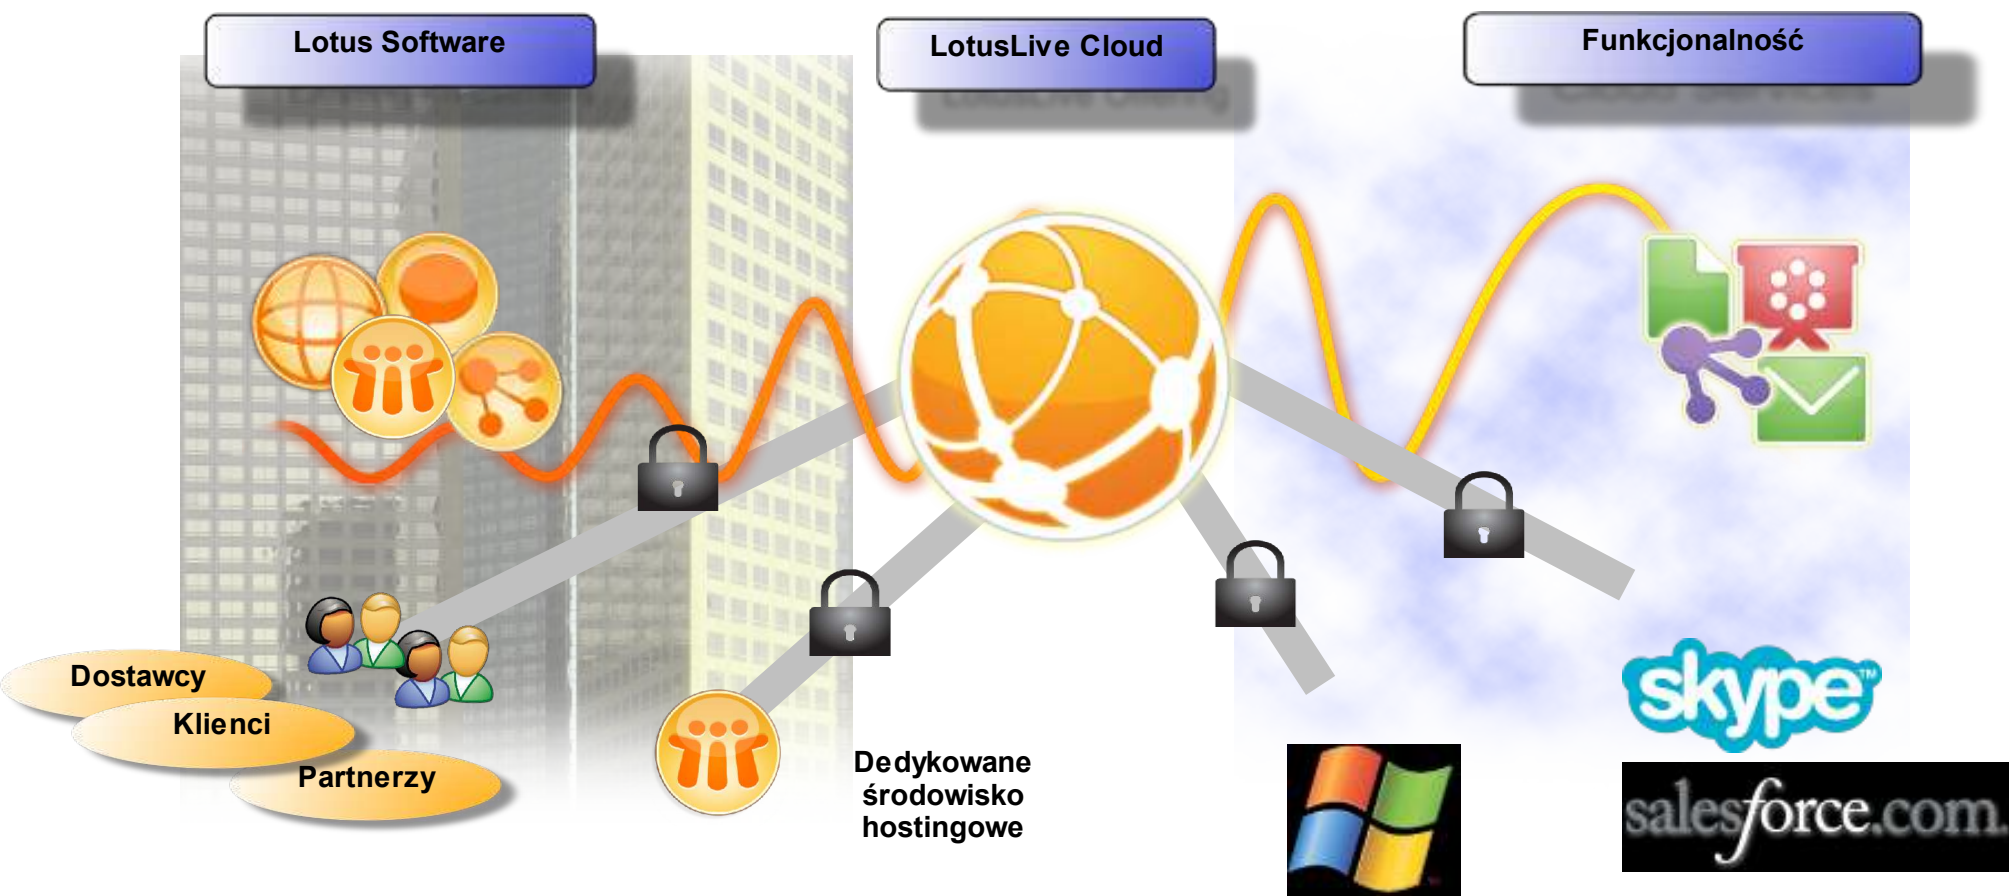

- ✓ Dynamiczna wizualizacja danych
- ✓ Wiele typów wykresów
- ✓ Automatyczna aktualizacja
- ✓ Możliwość pobierania
- ✓ Zmiana widoków i perspektyw
- ✓ Wersjonowanie
- ✓ Komentowanie

Click to Cloud: nowe możliwości integracji

Platforma otwarta i skalowalna

Jedno kliknięcie aby rozpocząć spotkanie

The screenshot displays the Lotus Symphony interface with several windows open. A central window titled 'Sametime Primary Contacts' shows a list of contacts. A context menu is open over this list, with the 'Invite to a Meeting' option highlighted. A blue box highlights the 'Invite to a Meeting' option in the context menu. Another blue box highlights the 'Invite to a Meeting' button in the bottom right corner of the interface. A third blue box highlights the 'Invite to a Meeting' button in the 'IBM Lotus Sametime Unyte' window. A grey callout box with a blue arrow points to the 'Invite to a Meeting' option in the context menu, containing the text 'Zaproś osoby z listy kontaktów na spotkanie'. Another grey callout box with a blue arrow points to the 'Invite to a Meeting' button in the bottom right corner, containing the text 'Rozpocznij spotkanie'. The background shows a mail window with a list of messages, including one from Heather Reeds dated 12/15/2008 07:50 PM with the subject 'Session Presentation'. Other windows include 'Frank Adams - Mail', 'Sametime Contacts', and 'IBM Lotus Sametime Unyte'.

Integracja z Salesforce.com

The image shows a screenshot of the Salesforce.com web interface. The main window displays an opportunity record for 'Burlington Textiles Weaving Plant Generator'. A modal window titled 'Start an Activity' is open, showing the process of creating a new activity. The activity title is 'Review Joint Marketing Plan'. The activity goal is 'To finalize details, now or. Use sale.'. The due date is set. The member options section shows the author field populated with 'jack.rogers@client.com, henry.wexler@client.com'. The template options section is also visible. A table at the bottom of the screenshot shows a list of activities with columns for Action, Subject, Name, Task, Due Date, Status, Priority, and Assigned To. The activities listed are 'Review Joint Marketing Plan', 'Site Visit Preparation', and 'Finalize Contract Details'. The status for all activities is 'Not Started'.

Created on Jan 2, 2009 10:15 AM by Anonymous

There is a plan that you might want to review. Pay close attention because I made some bold assertions that should be checked by everyone.

Especially look at these sections:

- Introductor
- Marketing Plan
- PR Plan
- Folcut Assumptions
- Dudget Assumptions
- Wildcards
- Conclusions and flexi steps

After that is done, then I will use it to share with our partners and not further comment.

Integracja ze Skype

Lotus Symphony interface showing document sharing and integration with Skype. The document is titled "Overview of Interest in Private Clouds.ppt v.1" and is owned by Jorge Palmiero. The interface includes options for "Store & Share", "Upload Files", and "New". A profile card for Jorge Palmiero is visible, showing his name, title (Chief Regional Design Director), location (Five Clothing Square, London, UK), and contact information (satwik@us.ibm.com, 617-797-7068). A "Skype Call" button is highlighted in a blue box, indicating direct communication from the contact list. A grey box with a blue arrow points to the "Skype Call" button, containing the text "Rozmowa bezpośrednio z listy kontaktów".

Integracja z Linked in

The screenshot displays the Lotus Notes 'Store & Share' interface. A file named 'Market Potential by State.xls' is being shared. A 'Share files' dialog box is open, showing options to share with 'People/Groups', 'My Company', or 'Public'. The 'Readers' field is highlighted with a blue box, and an arrow points to it from a text box. Another arrow points from a text box to the 'My LinkedIn Contacts' table in the background.

Kompozytor

Composer umożliwia budowanie nowych aplikacji poprzez integrację różnych usług. To połączenie usług webowych, pocztowych, formularzy, systemów zewnętrznych, a także usług LotusLive Engage.

The screenshot displays the LotusLive Labs Composer interface. At the top, the header includes the logo and text "LotusLive Labs Composer Your Business Space" on the left, and "Welcome Wojciech Wilk | IBM | LotusLive Labs Home | Forum" on the right. Below the header is a navigation bar with tabs for "Design", "Process", "Form", "My Work", "My Compositions", "My Dashboard", and "Export". The main area is titled "BPMN Editor" and contains a workflow diagram. The diagram starts with a green circle (Start Event) leading to an "Entry" node (clipboard icon). From "Entry", the flow splits into two paths: one leading to a "lotusActi..." node (calendar icon) and another leading to a "To Do" node (calendar icon with a person). Both paths merge into a "putIntoFi..." node (file folder icon). This node leads to a "NewMail" node (envelope icon), which is highlighted with a yellow border. The "NewMail" node is followed by an orange circle (End Event). On the left side, there is a "Palette" with sections for "Basic Flow Elements", "Forms", "LotusLive Activities", "LotusLive Files", "Internet", and "Process Annotation". Below the palette is a "Revision History" section showing "Current" by "Wojciech Wilk". The top of the editor has a toolbar with "File", "Diagram", and "Messages" menus, and a window title bar showing "SayHello" and "Proces Wojtka *".

Bezpieczeństwo IBM, na którym można polegać

Bezpieczeństwo jest wartością wyróżniającą ofertę LotusLive.

Wymagania stawiane aplikacjom na poziomie przedsiębiorstwa spełnione są dzięki wykorzystaniu najlepszych praktyk dostępnych dzisiaj w narzędziach bezpieczeństwa i prywatności danych zarówno IBM jak i Lotus.

- Bezpieczeństwo w LotusLive bazuje na trzech filarach:
 - ✓ Infrastruktura fizyczna
 - ✓ Infrastruktura systemowa
 - ✓ Ludzie i procesy

Centrum Danych – infrastruktura fizyczna

LotusLive Engage wdrożone jest w zabezpieczonym *Data Center*, zapewniając fizyczną ochronę systemów i danych. Wykorzystywana jest tu niezliczona liczba kontroli bezpieczeństwa w celu uniemożliwienia nieautoryzowanego dostępu.

- Zabezpieczenie biometryczne wykorzystywane jest we wszystkich fizycznych punktach dostępu
- Monitorowanie i nagrywanie w standardzie CCTV (Closed-circuit television) to dodatkowa ochrona w przypadku nieuprawnionego dostępu
- Nadzór bezpieczeństwa przed 24 godziny na dobę
- Systemy przeciwpożarowe, monitorowania elektryczności, czy niwelowania skutków trzęsienia ziemi oraz solidna konstrukcja zmniejszają wpływ czynników zewnętrznych
- Zasilanie zapewnione jest przez kilku-punktowe sieci elektryczne, dodatkowo zabezpieczone z redundantnych źródeł

Usługi sieciowe – infrastruktura fizyczna

Bezpieczeństwo sieci zapewnione jest dzięki wysokiej dostępności, najnowocześniejszym firewall'om

- Cała komunikacja z klientem jest szyfrowana 128 bitowym algorytmem, poprzez SSL (Secure Socket Layer) dla protokołu HTTP oraz RC2 dla protokołów Sametime
- Backup systemów wykorzystuje 128 bitowe szyfrowanie AES
- Skanowanie antywirusowe w czasie rzeczywistym
- Komercyjne oprogramowanie antywirusowe jest zaimplementowane zarówno na serwerach jak i w aplikacjach, w celu zapewnienia skanowania w momencie składowania i współdzielenia plików
- Infrastruktura sieciowa rozszerzona jest o usługi kontroli jakości (Quality of Service (QoS) controls)
 - ✓ umożliwiające IBM natychmiastową skalowalność i rozszerzanie infrastruktury, korelację zdarzeń, monitorowanie wydajności i raportowanie
 - ✓ wykorzystuje zintegrowane alarmy do identyfikacji wspólnych dla infrastruktury błędów systemowych i zdarzeń
- Infrastruktura wykorzystuje globalnie rozmieszczone sieciowe punkty dostępu, w celu zapewnienia spójnej i niezawodnej wydajności aplikacji oraz transferu danych

Polityka bezpieczeństwa na poziomie aplikacji

Proces autentykacji w LotusLive zapewniony jest w oparciu o rozwiązanie *IBM Tivoli Access Manager*, co zapewnia pojedyncze logowanie do wszystkich komponentów

- Niezarejestrowani użytkownicy mogą uczestniczyć jedynie w *Spotkaniach*
- Katalog użytkowników w ramach zarejestrowanej organizacji dostępny jest wyłącznie dla danej organizacji
- Zarówno użytkownik, jak i administrator mogą uniemożliwić współdzielenie informacji kontaktowych z użytkownikami z poza organizacji

Recent FAQs

What is my profile, and who can see it?
Your profile is your identity on the site, such as your name, About Me information, and photograph. Anyone can search and find your profile, unless you have elected not to be listed in the public directory. Go to your profile to find out more.

How can I find other profiles?
Click My Network > Profiles to access the profiles search. You can type a full or partial name to find someone's profile.

What's the difference between Contacts and Profiles?
Contacts works like an address book where you create, edit, and own contact records. Profiles contains information that registered users create about themselves. Only you can change your profile, and you cannot change others.

LotusLive Public Directory

The LotusLive public directory is a list of users who want their name, job title, picture and company name to be searchable from the LotusLive Web site. The benefit to being listed is that any visitor to LotusLive can find you, even if they aren't signed in.

Do you want to be listed in the LotusLive public directory?

Yes, I want to publish my name, job title, picture and company name in the LotusLive public directory.
 No thanks. Do not publish my name, job title, picture and company name in the LotusLive public directory.

Upload (You have 499mb remaining)

Dołącz już dzisiaj do użytkowników LotusLive!

The banner features the LotusLive logo at the top left. A navigation menu includes links for About, Services, Solutions, Support, Try, Buy, Return to Services, and Log Out. The main headline reads "Working together just got easier" with the subtext "Online collaboration solutions for the working world". Below this is an image of a woman working at a laptop, with several overlapping screenshots of the LotusLive interface to her right. At the bottom, the text states "LotusLive is your place for online collaboration services. Discover, Connect and Interact." followed by three buttons: "Try", "Buy", and "Learn More".

www.lotuslive.com

The sign-up page has the LotusLive logo and navigation menu at the top. The heading is "Ready to sign up? Here's what you do...". It lists three steps: 1. Submit the Request Form on this page, 2. Look for an e-mail from us, and 3. Complete the Sign Up Form. Below the steps is a form titled "Account Details" with fields for "Your Name", "Your Email Address", "Country", "About Your Company" (Company, Industry, Number of employees), and a checkbox for "I want to receive e-mail about other IBM products, tips, and events".

Panasonic Corporation

Ushers in cloud computing with LotusLive to connect global workforce

The Business

- Panasonic is a market and technology leader in consumer and industrial electronics.

The Challenge

- Panasonic's vision is to become the #1 Green Innovation Company in the Electronics Industry by 2018. Panasonic will leverage IT innovation to enable business units globally to operate as "One Panasonic." As part of its globalization efforts, the company embarked on an information technology (IT) initiative to improve competitive advantage and overall business results by helping its multiple business units work together more efficiently.

Solution

- Adopt IBM's LotusLive cloud collaboration services to enable its workforce to communicate and collaborate more efficiently with its global network of customers, partners and suppliers.
 - Adopt **LotusLive Engage** for Web conferencing, online meetings, file sharing, instant messaging and project management.
 - Use **LotusLive Connections** for business social networking between employees, partners and suppliers to find and share the right insight.
 - Migrate employees from Microsoft Exchange or other collaboration software to **LotusLive Notes** and **LotusLive iNotes** for email, calendaring and contacts.

Benefits

- Low cost and rapid deployment will provide cost savings.
- Superior extranet capabilities will allow Panasonic to provide a set of cloud collaboration tools for immediate access across all regions -- connecting global project teams and best practices for product research, development and sales and giving Panasonic an edge over competitors.

"LotusLive is an integral vehicle for our employees to truly function as a globally integrated enterprise. It will allow us to work securely with our extended enterprise of Panasonic partners and customers as if they are all in the same location, bringing the promise of quicker, more efficient teamwork and commerce worldwide."

Mitsuhiro Aoyama, Vice President
Corporate Information Systems Company,
Panasonic Corporation

Collaboration Matters

Saves time and money using LotusLive Engage

The Business

- A social networking consultancy operating throughout the UK with strategic relationships with organizations in mainland Europe and USA

The Challenge

- Reduce time and money spent on client travel
- Eliminate time spent on searching email for files, version control problems
- No budget or IT resources to implement new collaboration infrastructure

Solution

- Use **Files** to create a central place to store and share information with external audiences (e.g., Statement of Work, project plan, presentations)
- Use **Activities** to:
 - Manage projects and tasks for software and infrastructure roll-outs
 - Streamline client communication and work on tasks together
 - Improve document version control
- Use **Online Meetings** to reduce travel costs
- Use **Contacts** and **Profiles** to manage contact list

Benefits

- Saved 5-10 working days on a typical 8-week project, increasing productivity by **25%**
- Saved an estimated **20%** on total project costs (including travel)
- Reduced unnecessary e-mail communication
- Completed multiple projects with external audiences (worked across firewalls)

“The cost of completing a project has almost certainly been reduced by as much as 20%. That includes the time savings gained by using online meetings rather than face-to-face sessions with travel, by having one location for shared files and resources rather than having to request, check and email files, by using IM rather than leaving voicemails, and by being able to find current contact details easily.”

Stuart McIntyre, Technical Director, Collaboration Matters

Lotus knows.

Smarter software for a Smarter Planet.

Inset is a small, venture-backed start up with only 16 employees. Only 5 people are based in the same office in NJ, our field staff and investigators are spread across the US and our manufacturing is done outside Boston. With the bulk of people working in the field around the US, they needed an easy, web-based way to share information and collaborate on a whole host of office documents.

Needed centralized, web-based productivity tools
Clinical field staff were struggling to access the internal shared drive via VPN – in fact, most days they were unable to access it.

Building our infrastructure in the cloud made complete sense. LotusLive had the answers they needed – easy online meetings, simple document upload and collaboration as well as sharing contacts

LotusLive gave us....

...robust web meetings, contact sharing, file collaboration and chat configuration and deployment challenges.

....an easy intuitive web 2.0 interface that was simple enough for field folks with limited computer training to adopt and the multiple training modules help them to answer their own questions

.....the ability to share contacts and notes about contacts as they are so spread without any extraneous elements or extensive out and often speak with the same people.

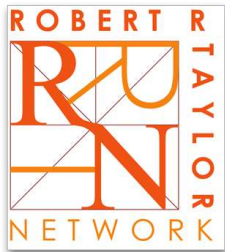

Maureen Shaffer

Vice President of Marketing

Lotus knows.

Smarter software for a Smarter Planet.

They had a very virtual group – of about 250 people worldwide and we needed:

- A way to facilitate, be efficient and on time with decision making
- A way to keep everyone in the loop
- Know who is working on which projects
- An application that would allow us to centralize all material

We expected we would need to build a custom solution – we didn't think something existed that would house all the apps we needed

LotusLive allowed them to...

- ...focus on entrepreneurship, innovation, breaking the mold – cutting edge – excellence
- ...give their virtual group an identity – it's where where they go to work every day.
- LotusLive is convenient – and easy to use.
- ...to have a single place to go to and didn't need to cobble solutions together – pulling from various sites – to get the tools they needed.

What you've done with LotusLive is exactly in the same mindset of what are trying to do with RRTN. It's an innovative platform – and as an early adopter – we were able to demonstrate our innovativeness as well. We have big plans for our use with LotusLive:

Darian Hendricks

President & Executive Director

Smarter software for a Smarter Planet.

NORTEL

Had a variety of tools - all in an effort to make their work lives simpler – but some required a lot of administration direction and hand holding.

They were spending up to 15 minutes at the beginning of their teleconferences, with people trying to figure out if they had the most recent version of the document, the right pass code, or where they could find the presentations. Took longer in some instances if someone new joining the call

LotusLive gave us the ability to...

- ...collaborate instantly
- ...eliminate hand holding
- ...start a meeting with a single click
- ...have a common repository
- ...edit documents easily
- ...save time and money

Tom Kivell
Business Development Manager for SMB
