Use-Case-Model Survey for **Catalog Manager**

1. Introduction

2. Actors

2.1 Client

Documentation: A client is a person who access informations related to the items listed in the Catalog. A client can order specific items

2.2 Customer Service Rep

Documentation: A Customer Service Rep is a person who has authorization to update the catalog inventory. This person can also interact with the configure catalog process.

3. Use Cases

3.1 Configure Catalog Manager

Documentation: The Configure Catalog Item use case allows the Customer Service Rep (CSR) to configure the Catalog Manager Web Services client to access the Catalog Manager application running on CICS.

3.2 List Catalog Items

Documentation: This use case allows a Client to determine the number of items that can be ordered from an in store catalog.

3.3 Order Item

Documentation: This use case allows a Client to order an item from a catalog.

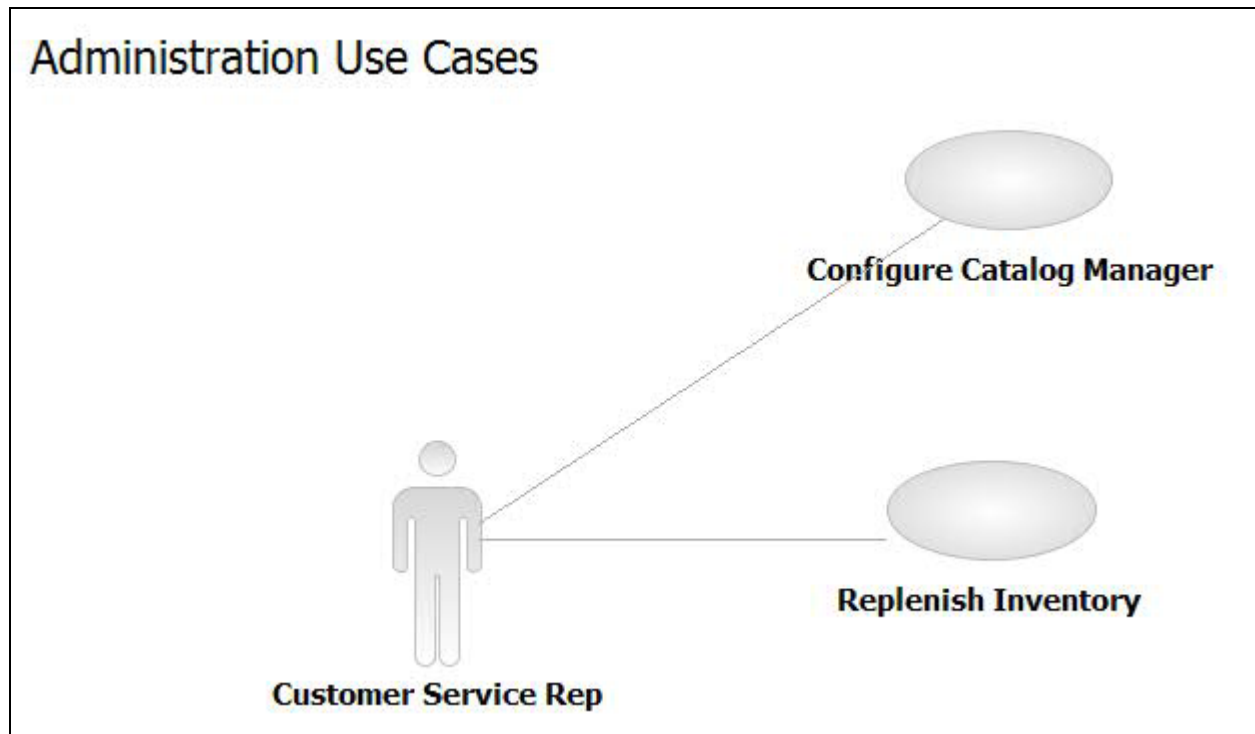

3.4 Replenish Inventory

Documentation: The Replenish Inventory Use Case takes place when the Customer Service Rep accesses the Catalog Manager to replenish items in the catalog that have been depleted.
